Water Management Research Laboratory, Brawley, CA	340,000
Water Use Reduction, Dawson, GA	1,200,000
Wild Rice and Soybean Research, St. Paul, MN	503,000
	<hr/>
Total	31,741,000

BUILDINGS AND FACILITIES

The bill provides \$67,966,000 for the Agricultural Research Service, Buildings and Facilities.

The following is a list of Congressionally-designated projects:

**Agricultural Research Service
Buildings and Facilities
Congressionally Designated Projects**

	Amount
U.S. Agricultural Research Service facility, Auburn, AL	\$6,000,000
U.S. Agricultural Research Service facility, Beltsville, MD	3,000,000
U.S. Agricultural Research Service facility, Bowling Green, KY	5,000,000
U.S. Agricultural Research Service facility, Bozeman, MT	3,000,000
U.S. Agricultural Research Service facility, Canal Point, FL	3,654,000
U.S. Agricultural Research Service facility, Davis, CA	3,000,000
U.S. Agricultural Research Service facility, Geneva, NY	3,654,000
U.S. Agricultural Research Service facility, Hilo, HI	5,000,000
U.S. Agricultural Research Service facility, Houma, LA	1,000,000
U.S. Agricultural Research Service facility, Kearneysville, WV	1,500,000
U.S. Agricultural Research Service facility, Lincoln, NE	4,000,000
U.S. Agricultural Research Service facility, Logan, UT	6,000,000
U.S. Agricultural Research Service facility, Lorman, MS	3,000,000
U.S. Agricultural Research Service facility, Orono, ME	1,500,000
U.S. Agricultural Research Service facility, Prairie du Sac, WI	1,000,000
U.S. Agricultural Research Service facility, Pullman, WA	5,000,000
U.S. Agricultural Research Service facility, Salinas, CA	5,350,000
U.S. Agricultural Research Service facility, Storrs, CT	3,654,000
U.S. Agricultural Research Service facility, Toledo, OH	3,654,000
	<hr/>
Total	67,966,000

NATIONAL INSTITUTE OF FOOD AND AGRICULTURE

RESEARCH AND EDUCATION ACTIVITIES

The bill provides \$806,495,000 for Research and Education Activities.

The following table reflects the bill:

**National Institute of Food and Agriculture
Research and Education Activities**

	Amount
Hatch Act	\$215,000,000
McIntire-Stennis, Cooperative Forestry Research Program	29,000,000
Evans-Allen Program (1890 Colleges, Tuskegee University and West Virginia State University)	49,750,000
Agriculture and Food Research Initiative	288,730,000
Special Research Grants:	
Potato Research	1,436,000
Congressionally Designated Projects	74,081,000
Improved Pest Control:	
Expert IPM Decision Support System	156,000
Integrated Pest Management	2,415,000
Minor Crop Pest Management (IR-4)	12,180,000
Pest Management Alternatives	1,434,000
Total, Improved Pest Control	16,185,000
Animal Health and Disease Research (Sec. 1433)	2,950,000
1994 Institutions Research Program	1,805,000
Rangeland Research	983,000
Graduate Fellowship Grants	3,859,000
Institution Challenge Grants	5,654,000
Multicultural Scholars Program	1,241,000
Hispanic Serving Institutions Education Grants	9,619,000
Secondary/2-year Post-Secondary	983,000
Capacity Building Grants (1890 Institutions)	19,375,000
Payments to the 1994 Institutions (Tribal Colleges)	3,342,000
Alaska Native-serving and Native Hawaiian-serving Education Grants	3,200,000
Resident Instruction Grants for Insular Areas	900,000
Distance Education Grants for Insular Areas	750,000
Grants to Upgrade Agriculture and Food Sciences Facilities and Equipment for Insular Areas	750,000
Farm Business Management and Benchmarking Program	1,250,000
Sun Grant Program	2,250,000

Foreign Agricultural Scholarships	500,000
New Era Rural Technology Program	875,000
Veterinary Medical Services Act	5,000,000
Federal Administration:	
Data Information System (REEIS)	2,704,000
Electronic Grants Administration System	2,136,000
Office of Extramural Programs	440,000
Pay Costs	5,826,000
Peer Panels	397,000
Other Federal Administration	34,678,000
Total, Federal Administration	<hr/> 46,181,000
Other:	
Supplemental and Alternative Crops	835,000
Aquaculture Centers (Sec. 1475)	3,928,000
Critical Agricultural Materials Act	1,083,000
Sustainable Agriculture	15,000,000
Total, Research and Education	<hr/> <hr/> 806,495,000

The following is a list of Congressionally-designated projects:

**National Institute of Food and Agriculture
Research and Education Activities
Congressionally Designated Projects**

Special Research Grants:	Amount
Advanced Genetic Technologies, KY	\$650,000
Advancing Biofuel Production, TX	300,000
Aegilops Cylindrica, WA	245,000
Agricultural Diversification, HI	153,000
Agricultural Entrepreneurial Alternatives, PA	233,000
Agricultural Marketing, IL	176,000
Agriculture Science, OH	450,000

Of the funding provided for the Food and Agriculture Policy Institute, \$340,000 shall be used to conduct analysis of rangeland, cattle, and hay with the University of Nevada-Reno.

HISPANIC-SERVING AGRICULTURAL COLLEGES AND UNIVERSITIES ENDOWMENT FUND

The bill provides \$10,000,000 for the Hispanic-Serving Agricultural Colleges and Universities Endowment Fund.

NATIVE AMERICAN INSTITUTIONS ENDOWMENT FUND

The bill provides \$11,880,000 for the Native American Institutions Endowment Fund.

EXTENSION ACTIVITIES

The bill provides \$499,376,000 for Extension Activities.

The following table reflects the bill:

**National Institute of Food and Agriculture
Extension Activities**

	Amount
Smith-Lever Sections 3(b) and (c)	\$297,500,000
1890 Colleges, Tuskegee University and West Virginia State University	44,700,000
Smith-Lever Section 3(d):	
Food and Nutrition Education (EFNEP)	68,070,000
Farm Safety	4,863,000
New Technologies for Ag Extension	1,750,000
Federally Recognized Tribes Extension Program	3,750,000
Pest Management	9,938,000
Sustainable Agriculture Federal-State Matching Grant Program	5,000,000
Children, Youth, and Families at Risk	8,412,000
Youth Farm Safety Education and Certification	486,000
Total, Section 3(d) Programs	102,269,000
1890 Facilities Grants (Sec. 1447)	22,000,000
Renewable Resources Extension Act (RREA)	4,068,000
Rural Health and Safety Education	1,738,000
Extension Services at the 1994 Institutions	5,321,000
Food Animal Residue Avoidance Database	1,000,000
Women and Minorities in STEM Fields	400,000
Subtotal	478,996,000
Federal Administration and Special Grants:	
Ag in the Classroom	553,000
General Administration	8,252,000
Other Federal Administration and Special Grants	11,575,000
Subtotal	20,380,000
Total, Extension Activities	499,376,000

The following is a list of Congressionally-designated projects:

National Institute of Food and Agriculture Extension Activities Congressionally Designated Projects	
	Amount
Childhood Farm Safety, Urbandale, IA	\$75,000
Conservation Technology Transfer, WI	376,000
Dairy Education, IA	175,000
Dairy Management, NY	200,000
Diabetes Detection and Prevention, WA, PA	1,033,000
E-commerce, MS	231,000
Efficient Irrigation, NM, TX	1,610,000
Extension Specialist, MS	173,000
Food Production Education, VT	116,000
Health Education Leadership, KY	300,000

Urban Horticulture, WI	376,000
Total	11,575,000

INTEGRATED ACTIVITIES

The following table reflects the bill:

The bill provides \$60,173,000 for Integrated Activities.

**National Institute of Food and Agriculture
Integrated Activities**

	Amount
Section 406 Legislative Authority:	
Water Quality	\$12,649,000
Food Safety	14,596,000
Methyl Bromide Transition Program	3,054,000
Organic Transition Program	5,000,000
Total, Section 406	<u>35,299,000</u>
International Science and Education Grants Program	3,000,000
Sustainable Agriculture Federal-State Matching Grant Program	10,000,000
 Critical Issues Program	 732,000
Regional Rural Development Centers Program	1,312,000
Food and Agriculture Defense Initiative (Homeland Security)	9,830,000
Total, Integrated Activities	<u><u>60,173,000</u></u>

OFFICE OF THE UNDER SECRETARY FOR
MARKETING AND REGULATORY PROGRAMS

The bill provides \$904,000 for the Office of the Under Secretary for Marketing and Regulatory Programs.

ANIMAL AND PLANT HEALTH INSPECTION
SERVICE

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$903,794,000 for the Animal and Plant Health Inspection Service (APHIS), Salaries and Expenses.

The bill provides \$3,850,000 for animal disease traceability. It includes a minimum of \$360,000 for blackbird management and an increase of \$1,500,000 for the Center for Veterinary Biologics.

There was a recent discovery of citrus black spot. APHIS is encouraged to continue to determine the extent of the infestation and implement the necessary measures to prevent the spread of the disease and to col-

laborate with, and utilize the scientific expertise of universities and ARS, as necessary, to develop methods to control and eradicate the disease.

APHIS is encouraged to support research and assist states and localities in controlling the spread of emerald ash borer.

There are difficulties in effectively addressing the cattle fever tick problem on the southern border of the United States. APHIS is urged to work with the livestock industry, including local businesses, nonprofits, and universities, to incorporate and implement new methods and strategies developed independently and cooperatively as part of the Cattle Fever Tick Eradication Program.

APHIS is encouraged to use an appropriate portion of the funding provided for sudden oak death (*Phytophthora ramorum*) to determine the actual level of infection in nurseries in all regions of the country through rigorous and expanded survey and to promote the development and testing of new

systems of nursery pest and disease management.

Infectious disease outbreaks within the equine community threaten the biological and commercial health of the U.S. horse industry and have occurred with increased frequency over the last several years. APHIS is encouraged to develop a comprehensive plan to respond to equine infectious diseases, including their prevention, diagnosis, and containment.

APHIS shall provide the Committees with a report on the current availability and use of electronic animal health certificates. The report should solicit input from State Veterinarians, animal health practitioners, and livestock producers. In particular, the report should focus on user experiences with the currently available systems and compatibility issues among systems.

The following table reflects the bill:

Animal and Plant Health Inspection Service**(In Thousands of Dollars)**

Program	Amount
Pest and Disease Exclusion:	
Agricultural Quarantine Inspection.....	\$29,526
Cattle Ticks.....	16,250
Foreign Animal Diseases/FMD.....	4,007
Fruit Fly Exclusion and Detection.....	63,568
Import-Export Inspection.....	13,564
Overseas Technical and Trade Operations	16,595
Screwworm.....	20,243
Tropical Bont Tick.....	432
Total, Pest and Disease Exclusion.....	164,185

Plant and Animal Health Monitoring:

Animal Health Monitoring & Surveillance.....	120,620
Animal and Plant Health Regulatory Enforcement.....	15,913
Avian Influenza	45,219
Emergency Management Systems.....	15,933
National Veterinary Stockpile.....	3,771
Pest Detection.....	27,576
Select Agents.....	5,214
Total, Plant & Animal Health Monitoring.....	234,246

Pest and Disease Management:

Aquaculture.....	6,366
Biological Control.....	11,399
Brucellosis.....	9,804
Chronic Wasting Disease.....	15,232
Contingency Fund.....	1,585
Cotton Pests	22,254

Emerging plant pests:

Asian Long-horned Beetle.....	49,911
Citrus Canker/Citrus Health Program.....	48,000
Emerald Ash Borer.....	24,000
Glassy-winged Sharpshooter.....	22,527
Sudden Oak Death	5,700
Potato Cyst Nematode.....	7,286
Karnal Bunt.....	2,160
Light Brown Apple Moth.....	6,000
Sirex Woodwasp.....	1,505
Varroa Mite.....	469
Other Emerging Plant Pests.....	1,605

Total, Emerging Plant Pests.....	169,163
Golden Nematode.....	843
Grasshopper and Mormon cricket.....	5,637
Gypsy Moth.....	4,981
Imported Fire Ant	1,909
Johne's Disease.....	5,647

Viral Hemorrhagic Septicemia Monitoring and Management, WI	550,000
Wildlife Management and Control, MS	496,000
Wildlife Services, SD	519,000
Wisconsin Livestock Identification Consortium	1,500,000
Wolf Predation Management, MI, MN, WI	<u>727,000</u>
Total	23,325,000

BUILDINGS AND FACILITIES

The bill provides \$4,536,000 for the Animal and Plant Health Inspection Service, Buildings and Facilities.

AGRICULTURAL MARKETING SERVICE

MARKETING SERVICES

The bill provides \$96,645,000 for marketing services of the Agricultural Marketing Service. The bill provides the following increases: \$150,000 for the Market News Program to expand coverage of organic production and distribution markets; \$891,000 for the Pesticide Data Program; \$250,000 for the Microbiological Data Program to enter into a sampling agreement with the State of Arizona; \$3,111,000 for the National Organic Program for regulatory review and enforcement; and \$460,000 for Wholesale, Farmers, and Alternative Markets.

LIMITATION ON ADMINISTRATIVE EXPENSES

The bill includes a limitation of \$60,947,000 for the Agricultural Marketing Service, Limitation on Administrative Expenses.

FUNDS FOR STRENGTHENING MARKETS, INCOME, AND SUPPLY (SECTION 32)

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$20,283,000 for the Agricultural Marketing Service, Funds for Strengthening Markets, Income, and Supply.

The Secretary is directed to provide notification to the Committees in advance of any public announcement or release of section 32 funds under the authority described in clause 3 of 7 U.S.C. 612c.

PAYMENTS TO STATES AND POSSESSIONS

The bill provides \$2,484,000 for the Agricultural Marketing Service, Payments to States and Possessions.

GRAIN INSPECTION, PACKERS AND STOCKYARDS ADMINISTRATION

SALARIES AND EXPENSES

The bill provides \$43,742,000 for the Grain Inspection, Packers and Stockyards Administration, Salaries and Expenses.

The agency is expected to strongly consider the submitted comments regarding the practical and economic impact that aspects of the proposed rule on the marketing of meat products may have on the smooth operation of commerce within the livestock industry. For example, consideration should be given to the impact the packer-to-packer prohibition may have on the marketplace or how the proposed rule may impact producers' abilities to enter into marketing agreements that provide premiums for their products.

LIMITATION ON INSPECTION AND WEIGHING SERVICES EXPENSES

The bill includes a limitation of \$50,000,000 for the Grain Inspection, Packers and Stockyards Administration, Limitation on Inspection and Weighing Services Expenses.

OFFICE OF THE UNDER SECRETARY FOR FOOD SAFETY

The bill provides \$821,000 for the Office of the Under Secretary for Food Safety.

FOOD SAFETY AND INSPECTION SERVICE

The bill provides \$1,047,200,000 for the Food Safety and Inspection Service.

FSIS is directed to use its appropriated funds for activities directly in support of the public health to the maximum available extent before using them for bonus awards for senior officials and report on bonuses awarded to senior officials for fiscal year 2010.

FOOD SAFETY AND INSPECTION SERVICE

FUNDING BY ACTIVITY

Food Safety and Inspection:	
Federal	\$919,248,000
State	65,118,000
International	19,461,000
CODEX	3,903,000
Public Health Data Communication Infrastructure System	39,470,000

Total \$1,047,200,000

OFFICE OF THE UNDER SECRETARY FOR FARM AND FOREIGN AGRICULTURAL SERVICES

The bill provides \$904,000 for the Office of the Under Secretary for Farm and Foreign Agricultural Services.

The Secretary is encouraged further to develop adequate standardization of quality control mechanisms for commodities used for food aid and to use funds from the CCC to supplement inspections of such commodities in order to avoid breaks in food pipelines and to maintain an orderly conveyance of food to affected populations.

FARM SERVICE AGENCY

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$1,325,650,000 for the Farm Service Agency, Salaries and Expenses, which includes \$18,000,000 for the Common Computing Environment and \$38,300,000 for MIDAS.

Of this, the bill provides \$24,000,000, the same as last year's level, for the National Agricultural Imagery Program (NAIP). This amount is in addition to any provided by co-operating funds from any other federal, state, or local government for NAIP.

STATE MEDIATION GRANTS

The bill provides \$4,185,000 for State Mediation Grants.

GRASSROOTS SOURCE WATER PROTECTION PROGRAM

The bill provides \$5,500,000 for the Grassroots Source Water Protection Program.

DAIRY INDEMNITY PROGRAM

(INCLUDING TRANSFER OF FUNDS)

The bill provides an appropriation of such sums as may be necessary for the Dairy Indemnity Program.

AGRICULTURAL CREDIT INSURANCE FUND PROGRAM ACCOUNT

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$471,815,000 for the Agricultural Credit Insurance Fund Program Account.

The following table reflects the amounts provided in the bill:

Farm Ownership Loans:	
Direct	(\$475,000,000)
Subsidy	32,870,000
Guaranteed	(1,500,000,000)
Subsidy	5,700,000
Farm Operating Loans:	
Direct	(\$900,000,000)
Subsidy	54,540,000
Unsubsidized Guaranteed	(1,500,000,000)
Subsidy	34,950,000
Subsidized Guaranteed ...	(144,035,000)
Subsidy	19,920,000
Indian Tribe Land Acquisition Conservation:	(10,000,000)
Direct	(75,000,000)
Subsidy	2,243,000
Guaranteed	(75,000,000)
Subsidy	285,000
Indian Highly Fractionated Land	
Subsidy	214,000
Boll Weevil Eradication	(100,000,000)
ACIF Expenses:	
Salaries and Expenses	\$313,173,000
Administrative Expenses	7,920,000

RISK MANAGEMENT AGENCY

The bill provides \$83,064,000 for the Risk Management Agency.

Corporations

FEDERAL CROP INSURANCE CORPORATION FUND

The bill provides an appropriation of such sums as may be necessary for the Federal Crop Insurance Corporation Fund.

COMMODITY CREDIT CORPORATION FUND

REIMBURSEMENT FOR NET REALIZED LOSSES

(INCLUDING TRANSFERS OF FUNDS)

The bill provides an appropriation of such sums as may be necessary for Reimbursement for Net Realized Losses of the Commodity Credit Corporation.

HAZARDOUS WASTE MANAGEMENT

(LIMITATION ON EXPENSES)

The bill provides a limitation of \$5,000,000 for Hazardous Waste Management.

TITLE II

CONSERVATION PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR NATURAL RESOURCES AND ENVIRONMENT

The bill provides \$904,000 for the Office of the Under Secretary for Natural Resources and Environment.

NATURAL RESOURCES CONSERVATION SERVICE

CONSERVATION OPERATIONS

The bill provides \$922,433,000 for Conservation Operations, which includes \$5,000,000 for streamlining and integrating business model tools; \$7,500,000 for strategic watershed action teams; \$15,500,000 for modernization and upgrades of the Common Computing Environment; \$250,000 for the soil climate analysis network; and an additional \$500,000 above the budget request for snow surveys.

The following is a list of Congressionally-designated projects:

**Natural Resources Conservation Service
Conservation Operations
Congressionally Designated Projects**

	Amount
Accelerated Soil Mapping Survey, WY	\$200,000
Agricultural Development and Resource Conservation, HI	1,400,000
Agricultural Wildlife Conservation Center, MS	939,000
Audubon Conservation Curriculum, NY, VA	800,000
Borderlands Conservation, TX	500,000
CEMSA with Iowa Soybean Association	288,000
Center for Invasive Species Eradication, TX	1,000,000
Chesapeake Bay Activities	3,998,000
Connecting for Conservation, MA	450,000
Conservation Enhancements, PA	200,000

Conservation Internships, WI	120,000
Conservation Planning, MA, WI	423,000
Conservation Technical Assistance, KY	500,000
Conservation Technical Assistance, NJ	236,000

Conservation Technology Transfer, WI	516,000
Cooperative Agreement with Tufts University, CT	333,000
Cover Crop Program, MD	1,000,000
Delta Conservation Demonstration, MS	376,000
Delta Water Study, MS	235,000
Farm Viability Program, VT	300,000
Fountain Creek Watershed Project, CO	500,000
Georgia Soil and Water Conservation Commission Cooperative Agreement	2,423,000
Gilbert M. Grosvenor Center for Geographic Education Watershed Project, TX	282,000
Grazing Lands Conservation Initiative, WI	835,000
Great Basin Plant Materials Center, NV	269,000
Great Lakes Basin Program for Soil Erosion and Sediment Control, Great Lakes Commission	404,000
Hungry Canyons Alliance, IA	282,000
Illinois Conservation Initiative	1,126,000
Kentucky Soil Erosion Control	724,000
Long Island Sound Watershed, NY	133,000
Massaro Community Farm, CT	300,000
Maumee Watershed Hydrological and Flood Mitigation, OH	667,000
Mississippi Conservation Initiative	4,000,000
Municipal Water District of Orange County for Efficient Irrigation, CA	134,000
Native Plant Initiative, LA	500,000

Nutrient Management, MD	500,000
Operation Oak Program	100,000
Pace University Land Use Law Center, White Plains, NY	133,000
Pastureland Management/Rotational Grazing, NY	400,000
Phosphorous Loading in Lake Champlain, VT	179,000
Prairie Biomass, IA	100,000
Quabbin to Cardigan Conservation Initiative, NH	282,000
Range Revegetation for Fort Hood, TX	333,000
Riparian Restoration, NM	200,000
Sand County Foundation, WI	892,000
Soil Surveys, RI	134,000
Technical Assistance Grants to Kentucky Soil Conservation Districts, KY	545,000
Technical Assistance to Livestock/Poultry Producers, NC	300,000
Town of Cary Swift Creek Stream Bank Restoration, NC	199,000
Upper Cedar River Watershed Coalition, IA	150,000
Washington State Conservation Program	500,000
Water Quality Protection Program for the Monterey Bay Sanctuary, CA	400,000
Watershed Agricultural Council, NY	480,000
Watershed Demonstration Project, IA	134,000
Watershed Planning Staff, Pacific Island Area	500,000
Watershed Protection Plan for Hood County, TX	100,000
West Virginia Conservation Initiative	<u>1,000,000</u>
Total	34,954,000

WATERSHED AND FLOOD PREVENTION
OPERATIONS

The bill provides \$18,485,000 for Watershed
and Flood Prevention Operations.

The following is a list of Congressionally-designated projects:

Natural Resources Conservation Service Watershed and Flood Prevention Operations Congressionally Designated Projects	
	Amount
Alameda Creek Watershed Project, CA	1,337,000
Big Slough Watershed Project, AR	100,000
Copper Mine Brook Watershed, CT	330,000
Dunloup Creek Watershed Project, WV	1,500,000
Gin Bayou Bank Stabilization, MS	500,000
Lahaina Watershed, HI	4,000,000
Lake County Watershed, IL	350,000
Lower Hamakua Ditch Watershed Project, HI	1,800,000
Missouri Watershed Projects	2,000,000
North Drainage Project, MS	500,000
North Fork of the Elkhorn Creek, WV	300,000
Pidcock-Mill Creeks Watershed Project, PA	573,000
Pocasset River, RI	2,000,000
Soap Creek Watershed Project, IA	595,000
Southeast Quadrant Drainage and Flood Prevention Project, AL	350,000
Upcountry Maui Watershed Project, HI	2,000,000
Wailuku-Alenaio Watershed Project, HI	<u>250,000</u>
Total	18,485,000

WATERSHED REHABILITATION PROGRAM

The bill provides \$20,497,000 for the Watershed Rehabilitation Program.

Funding under this program is to be provided for rehabilitation of structures determined to be of high priority need in order to protect property and ensure public safety.

RESOURCE CONSERVATION AND DEVELOPMENT

The bill provides \$50,730,000 for Resource Conservation and Development.

TITLE III

RURAL DEVELOPMENT PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR RURAL DEVELOPMENT

The bill provides \$904,000 for the Office of the Under Secretary for Rural Development. The Secretary is directed to provide a report, by September 30, 2011, to the Committees detailing performance results of the Regional Innovation Initiative.

The Secretary is encouraged to consider the statutory requirements authorized in the 2008 Farm Bill when issuing the final rule for the Rural Energy for America Program. The 2008 Farm Bill did not restrict the application of this program to agricultural producers in rural areas. The Secretary is directed to provide a report within 30 days of enactment, to the Committees on the status of issuing the final rule and to provide them quarterly thereafter.

RURAL DEVELOPMENT SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$226,551,000 for Rural Development Salaries and Expenses, which includes \$6,000,000 for the Common Computing Environment.

The bill provides the same level of funding as fiscal year 2010 to maintain "portfolio compliance, safety and soundness." The Secretary is directed to ensure that proper lender monitoring and underwriting standards are sustained.

RURAL HOUSING SERVICE

RURAL HOUSING INSURANCE FUND PROGRAM ACCOUNT

The bill provides \$617,047,000 for the Rural Housing Insurance Fund Program Account.

The following table reflects the amounts provided in the bill:

Loan authorizations:	
Single family direct (sec. 502)	(\$1,840,256,000)
Single family unsubsidized guaranteed	(24,000,000,000)
Rental housing (sec. 515)	(69,512,000)
Multi-family housing guaranteed (sec. 538)	(129,133,000)
Housing repair (sec. 504)	(34,004,000)
Credit sales of acquired property	(11,449,000)
Site loans (sec. 524)	(5,052,000)
Self-help housing land development	(4,966,000)
Total, loan authorizations	(\$26,094,372,000)

Loan subsidies:

Single family direct (sec. 502)	\$115,200,000
Rental housing (sec. 515)	23,446,000
Multi-family housing guaranteed (sec. 538)	12,513,000
Housing repair (sec. 504)	6,437,000
Credit sales of acquired property	556,000
Site loans (sec. 524)	294,000

Self-help housing land development	288,000
Total, loan subsidies ...	\$158,734,000

RHIF administrative expenses (paid to RD)	\$458,313,000
---	---------------

RENTAL ASSISTANCE PROGRAM

The bill provides \$965,635,000 for the Rental Assistance Program.

MULTI-FAMILY HOUSING REVITALIZATION PROGRAM ACCOUNT

The bill provides \$40,791,000 for the Multi-Family Housing Revitalization Program Account.

MUTUAL AND SELF-HELP HOUSING GRANTS

The bill provides \$41,864,000 for Mutual and Self-Help Housing Grants.

RURAL HOUSING ASSISTANCE GRANTS

The bill provides \$40,400,000 for Rural Housing Assistance Grants.

FARM LABOR PROGRAM ACCOUNT

The bill provides \$20,346,000 for the Farm Labor Program Account.

RURAL COMMUNITY FACILITIES PROGRAM ACCOUNT

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$52,678,000 for the Rural Community Facilities Program Account.

The following table reflects the agreement:

Community Facilities:	
Direct loans	(\$295,038,000)
Direct subsidy	3,924,000
Guaranteed loans	(206,405,000)
Guaranteed subsidy	8,153,000
Grants	20,373,000
Rural community development initiative	6,256,000
Economic impact initiative grants	10,000,000
Tribal college grants	3,972,000

Total, loan subsidies and grants	\$52,678,000
--	--------------

RURAL BUSINESS-COOPERATIVE SERVICE

RURAL BUSINESS PROGRAM ACCOUNT

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$86,689,000 for the Rural Business Program Account.

The following table reflects the agreement:

Business and Industry:	
Guaranteed loans	(\$993,000,000)
Guaranteed subsidy	42,500,000
Rural business enterprise grants	38,727,000
Rural business opportunity grants	2,483,000
Delta regional authority ...	2,979,000

Total, loan subsidy and grants	\$86,689,000
--------------------------------------	--------------

RURAL DEVELOPMENT LOAN FUND PROGRAM ACCOUNT

The bill provides \$18,024,000 for the Rural Development Loan Fund Program Account.

RURAL ECONOMIC DEVELOPMENT LOANS PROGRAM ACCOUNT

(INCLUDING RESCISSION OF FUNDS)

The bill provides an estimated loan program level of \$33,077,000 for the Rural Economic Development Loan Program Account.

RURAL COOPERATIVE DEVELOPMENT GRANTS

The bill provides \$35,554,000 for Rural Cooperative Development Grants.

The bill provides \$8,924,000 for cooperative development grants; \$2,800,000 for a coopera-

tive agreement for the Appropriate Technology Transfer for Rural Areas program; \$3,463,000 for cooperative development centers, individual cooperatives, or groups of cooperatives that serve socially disadvantaged groups; and \$20,367,000 for the value-added agricultural product market development grant program.

RURAL ENERGY FOR AMERICA PROGRAM

The bill does not include additional funding for the Rural Energy for America Program. The 2008 Farm Bill provided \$70,000,000 in mandatory funding for this program in fiscal year 2011, which is an increase of \$10,000,000 above fiscal year 2010. In addition, this account has carryover from prior years to support a higher program level in fiscal year 2011.

RURAL UTILITIES SERVICE

RURAL WATER AND WASTE DISPOSAL PROGRAM ACCOUNT

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$582,851,000 for the Rural Water and Waste Disposal Program Account.

The following table reflects the agreement:

Water and Waste:	
Direct loans	(\$1,022,156,000)
Direct subsidy	87,701,000
Loans authorized by P.L. 83-566	(40,000,000)
Loans authorized by P.L. 83-566 subsidy	3,432,000
Guaranteed loans	(75,000,000)
Grants	469,228,000
Solid waste management grants	3,500,000
Water well system grants ..	497,000
Water and waste water revolving funds	993,000
High energy cost grants	17,500,000

Total, loan subsidy and grants	\$582,851,000
--------------------------------------	---------------

RURAL ELECTRIFICATION AND TELECOMMUNICATIONS LOANS PROGRAM ACCOUNT

The bill provides \$39,409,000 for the Rural Electrification and Telecommunications Loans Program Account.

The bill includes a general provision to improve the capacity for electrical generation in rural areas and the Secretary shall ensure that emissions control standards will be employed suitable for the level of power such facilities will generate.

The following table reflects the amounts provided in the bill:

Loan authorizations:	
Electric:	
Direct, 5 percent	(\$100,000,000)
Direct, FFB	(6,500,000,000)
Guaranteed Underwriting	(500,000,000)
Subtotal	(7,100,000,000)

Telecommunications:

Direct, 5 percent	(\$145,000,000)
Direct, Treasury rate ..	(250,000,000)

Direct, FFB	(295,000,000)
Subtotal	(690,000,000)
Total, loan authorizations	(\$7,790,000,000)
Guaranteed Underwriting subsidy	\$700,000
Administrative expenses (paid to RD)	\$38,709,000
DISTANCE LEARNING, TELEMEDICINE, AND BROADBAND PROGRAM	
The bill provides \$78,051,000 for the Distance Learning, Telemedicine, and Broadband Program Account.	
The following table reflects the amounts provided in the bill:	
Broadband:	
Direct loans	(\$400,000,000)
Direct subsidy	22,320,000
Grants	17,976,000
Distance learning and telemedicine grants	37,755,000
Total, loan subsidy and grants	\$78,051,000

TITLE IV

DOMESTIC FOOD PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR FOOD, NUTRITION AND CONSUMER SERVICES

The bill provides \$821,000 for the Office of the Under Secretary for Food, Nutrition and Consumer Services.

The Secretary is encouraged to continue collaboration between the Agricultural Marketing Service (AMS) and the Food and Nutrition Service (FNS) to connect local farmers to local school districts. The Secretary is also encouraged to have AMS and FNS expand collaboration with the Department of Defense FRESH program to increase the quantity of fresh produce purchased locally or regionally. The Secretary is directed to submit a report to the Committees within 180 days of enactment of this Act describing the economic and other barriers to farmer participation in sales of local food to schools.

FOOD AND NUTRITION SERVICE
CHILD NUTRITION PROGRAMS

The bill provides \$17,319,981,000 for Child Nutrition Programs. Included in this amount is \$7,500,000 for Hunger-Free Community grants; \$3,517,000 for food safety education; \$11,553,000 for computer support and processing, including information technology modernization and support; \$2,000,000 for farm-to-school tactical teams; and \$1,750,000 for program payment systems and reimbursement monitoring.

The bill also provides \$21,711,000 for studies and other activities. Included in this amount is \$10,000,000 for the school lunch and breakfast cost study III which will incorporate additional information on nutritional quality. Additionally, this study should review the linkages between wages and benefits of food service workers with student satisfaction with school meals and the nutritional quality of meals.

The Secretary is urged to assist program providers in reducing and eventually eliminating trans fats in child nutrition programs. The Secretary is directed to submit a report to the Committees within 180 days of enactment describing the Department's efforts to provide assistance.

The following table reflects the agreement:

Child Nutrition Programs:	
School lunch program	\$9,831,095,000
School breakfast program	3,093,970,000
Child and adult care food program	2,686,344,000
Summer food service program	392,680,000
Special milk program	12,512,000
State administrative expenses	208,651,000
Commodity procurement	1,019,914,000
Computer support and processing	11,553,000
Program payment systems and reimbursement monitoring	1,750,000
Team nutrition	15,046,000
Food safety education	3,517,000
Coordinated review	5,833,000
CACFP training and technical assistance	3,567,000
Studies and other activities	21,711,000
Hunger free community grants	7,500,000
Farm to school tactical team	2,000,000
CN payment accuracy	2,338,000
Child nutrition reauthorization	0
Total, Child Nutrition Programs	\$17,319,981,000

SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC)

The bill provides \$6,852,522,000 for the Special Supplemental Nutrition Program for Women, Infants and Children (WIC). The bill fully funds estimated WIC participation in fiscal year 2011. The bill includes \$80,000,000 for breastfeeding support initiatives, \$35,000,000 for State management information systems, \$14,000,000 for infrastructure improvements, and \$15,000,000 for evaluating program performance. In addition, the bill maintains funding for fruit and vegetable vouchers for women and implements fruit and vegetable vouchers for children up to the Institute of Medicine recommendation.

The authority for the WIC program requires the Secretary to make available supplemental foods that reflect current nutrition science, public health concerns, and cultural eating patterns. The Department has made improvements to the WIC program to improve access to fruits, vegetables and whole grains to program participants as recommended by the National Academies' Institute of Medicine study. The Department should continue to recognize that calcium remains a priority nutrient of concern and that adequate calcium consumption can be attained through a diet with a variety of dairy products.

SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM

The bill provides \$70,907,818,000 for the Supplemental Nutrition Assistance Program. Included in this amount is \$5,000,000,000 for a contingency reserve; \$3,500,000 for improving program access and application timeliness; \$1,750,000 for financial management systems modernization; and \$1,000,000 for information technology modernization and support.

The following table reflects the agreement:

Supplemental Nutrition Assistance Program:	
Benefits	\$59,652,032,000
State Administrative Cost	3,618,000,000
Employment & Training	387,946,000
Other Program Costs	131,623,000

Food Distribution Program on Indian Reservations (FDPIR)	96,958,000
Associated Activities	10,000,000
Commonwealth of the Northern Mariana Islands	12,148,000
Contingency Reserve	5,000,000,000
Nutrition Assistance for Puerto Rico	1,744,605,000
Nutrition Assistance for American Samoa	7,006,000
Emergency Food Assistance Program (TEFAP)	247,500,000
Total	\$70,907,818,000

COMMODITY ASSISTANCE PROGRAM

The bill provides \$262,619,000 for the Commodity Assistance Program.

Of that amount, the bill provides \$181,788,000 for the Commodity Supplemental Food Program, which includes \$5,000,000 to begin service in six additional States that have plans approved by the Department; \$53,000,000 for administrative funding for The Emergency Food Assistance Program (TEFAP); \$6,000,000 for TEFAP infrastructure grants; and \$20,000,000 for the Farmers' Market Nutrition Program.

NUTRITION PROGRAMS ADMINISTRATION

The bill provides \$162,587,000 for Nutrition Programs Administration. Included in this amount is \$5,170,000 for improved program administration and \$5,000,000 to develop and promote dietary guidelines.

TITLE V

FOREIGN ASSISTANCE AND RELATED PROGRAMS

FOREIGN AGRICULTURAL SERVICE
SALARIES AND EXPENSES
(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$219,280,000 for the Foreign Agricultural Service, Salaries and Expenses, which includes increases of \$3,430,000 for international cooperative administrative support services; \$4,004,000 for overseas IT support; \$5,000,000 for the development and growth of sustainable food systems in developing countries; and \$4,500,000 for technical assistance for specialty crops. The bill also provides a total of \$14,600,000 for reconstruction and stabilization activities, \$4,500,000 for the Cochran Fellowship Program, \$2,500,000 for the Borlaug Fellowship Program, and \$4,500,000 for the National Export Initiative.

FOOD FOR PEACE TITLE I DIRECT CREDIT AND FOOD FOR PROGRESS PROGRAM ACCOUNT

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$2,846,000 for administrative expenses for the Food for Peace Title I Direct Credit and Food for Progress Program Account, to be paid to the appropriation for Farm Service Agency, Salaries and Expenses.

FOOD FOR PEACE TITLE II GRANTS

The bill provides \$1,690,000,000 for Food For Peace Title II Grants.

The Committees direct the Secretary, through the Office of Budget and Program Analysis, in consultation with the Administrator of the U.S. Agency for International Development, to submit quarterly reports to the Committees on the status of the Bill Emerson Humanitarian Trust, as well as immediately to notify the Committees when the trust has been drawn down.

COMMODITY CREDIT CORPORATION EXPORT
LOANS PROGRAM ACCOUNT
(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$6,884,000 for the Commodity Credit Corporation Export Loans Program Account.

McGOVERN-DOLE INTERNATIONAL FOOD FOR
EDUCATION AND CHILD NUTRITION PROGRAM
GRANTS

The bill provides \$219,500,000 for the McGovern-Dole International Food for Education and Child Nutrition Program.

TITLE VI

FOOD AND DRUG ADMINISTRATION AND
FARM CREDIT ADMINISTRATION

DEPARTMENT OF HEALTH AND HUMAN
SERVICES

FOOD AND DRUG ADMINISTRATION

SALARIES AND EXPENSES

The bill provides a direct appropriation of \$2,541,282,000 for Food and Drug Administration, Salaries and Expenses. The bill also provides \$667,057,000 for prescription drug user fees; \$61,860,000 for medical device user fees; \$19,448,000 for animal drug user fees; \$5,397,000 for animal generic drug user fees; \$450,000,000 for tobacco product user fees; and authorized collections for mammography fees, export and color certification fees, and priority review fees, as requested. It is expected that FDA will continue all projects, activities, and programs as included in the fiscal year 2011 budget request unless otherwise specified.

The following table reflects funding provided for direct appropriations:

*Food and Drug Administration, Salaries and
Expenses*

(thousands of dollars)

Program	Budget Authority
Foods	
Center for Food Safety and Applied Nutrition	267,986
Field Activities	601,401
Human Drugs	
Center for Drug Evaluation and Research	371,632
Field Activities	132,037
Biologics	
Center for Biologics Evaluation and Research	173,875
Field Activities	41,151
Animal Drugs & Feeds	
Center for Veterinary Medicine	91,467
Field Activities	54,135
Device & Radiological Products	
Center for Devices and Radiological Health	243,255
Field Activities	82,471
National Center for Toxicological Research	60,975
Other Activities	161,659
White Oak Consolidation ..	38,536
Other Rent & Rent Related	66,703
GSA Rent	153,999
Total Salaries & Expenses	2,541,282

In carrying out the provisions of this Act, FDA shall follow the directives provided in Senate Report 111-221 unless otherwise modified by this Act or Explanatory Statement. Reports requested in Senate Report 111-221 or this Explanatory Statement are due 90 days after the enactment of this Act unless a specific due date is provided. FDA is di-

rected to provide all reports and studies to the Committees on Appropriations of the House of Representatives and the Senate (hereafter referred to as "the Committees") in both an electronic and hard copy format.

The bill provides the following increases in budget authority for FDA salaries and expenses activities, as requested in the budget: \$10,896,000 for cost of living adjustments; \$83,000,000 for food safety investments; \$43,323,000 for investments relating to safer drugs, biologics, and medical devices; and \$25,000,000 for regulatory science.

The bill provides the following increases above the request: \$14,083,000 for food safety activities; \$2,000,000 for orphan product development grants; \$1,000,000 for the Office of the Associate Director for Rare Diseases; \$7,500,000 for generic drug review activities; \$3,000,000 for the review of direct-to-consumer advertising in the Division of Drug Marketing and Communication (DDMAC); \$2,000,000 for the review of communications to medical professionals in DDMAC; \$4,000,000 for the Office of Surveillance and Epidemiology for post-market activities; \$1,850,000 for the review of adverse drug experience reports in the Center for Veterinary Medicine; and \$2,000,000 for the National Antimicrobial Resistance Monitoring System.

Funds provided in addition to the budget request for food safety will allow FDA to access additional information on foreign food exports and take other actions to ensure that foods imported into the United States are safe. Increased funding is provided for food safety inspections to increase the number of inspectors and enhance the ability of inspectors to review imports at the border. It will also allow FDA to perform additional work to ensure that animal feed and feed ingredients imported into the United States meet FDA safety standards.

In Senate Report 109-266, concerns were raised about FDA's inability to provide Congressional reports in a timely manner. After implementing changes that temporarily remedied this situation, recent Congressional directives have either been responded to late, or not responded to at all. This is unacceptable. In the fiscal year 2010 bill, FDA was asked to report on eight issues. The due date for all of these reports has long since passed, and more than one year after the enactment of the fiscal year 2010 bill, FDA has provided only four of the requested reports. FDA is again reminded that reports to Congress play an important role in the decision making process. Not more than 15 days after the enactment of this Act, FDA is directed to report on the status of all reports requested in Appropriations Acts for fiscal years 2009, 2010, and 2011. The report shall include the following information: report topic; the House, Senate, or conference report from which the report is requested; the due date for the report; the date the report was submitted to the Congress; and for those reports that have not been submitted to Congress, the expected submission date and an update on where the report is in the drafting and clearance process. Following the initial report, FDA is directed to provide updated reports on the first of each month.

The Secretary of Health and Human Services (HHS) should continue to work with the Secretary of Commerce in support of the current Memorandum of Understanding between the National Oceanic and Atmospheric Administration (NOAA) and FDA to strengthen cooperation on seafood safety, labeling and fraud. Agreements should focus on coordination of testing seafood imports, inspection of

imported seafood at both domestic and international facilities, data standardization and collection, joint training and outreach for testing facilities, and information sharing. An increase is encouraged in the use of NOAA laboratory testing and the commissioning of NOAA officers by the Secretary of HHS, as needed, in order to increase capacity for seafood inspection and testing. Sharing of information with the Federal Trade Commission is also encouraged as appropriate on consumer protection issues with respect to fraud in seafood marketing and labeling.

While there is strong leadership in place at FDA, concerns have been raised about the existing structure at the agency, especially as it pertains to the safety of prescription drugs, and the perceived imbalance that exists within FDA between the Office of New Drugs and the Office of Surveillance and Epidemiology. There is significant concern that this structure is biased because those who initially approve drugs also have a large role in determining how they are regulated for safety in post-marketing. This could create a conflict of interest.

Therefore, FDA is directed to issue a report by March 31, 2011 that would outline the process necessary to create an independent office within FDA focused on post-market evaluation that would work collaboratively with the office that reviews and approves drugs for marketing. FDA is also strongly urged to study legislative proposals that have been introduced to create a new Center for Postmarket Drug Evaluation and Research at FDA as part of the report.

FDA is directed to issue a sunscreen final rule that addresses both ultraviolet B (UVB) and ultraviolet A (UVA) radiation protection no later than 60 days after enactment.

FDA is urged to more proactively engage public health and consumer nonprofit organizations that are not funded by regulated industries, to encourage their greater input and written evaluations on PDUFA, MDUFMA, Sentinel Projects, Critical Path, the public availability of post-market research findings, and other key issues regarding medical products.

BUILDINGS AND FACILITIES

The bill provides \$10,000,000 for FDA Buildings and Facilities.

INDEPENDENT AGENCY

FARM CREDIT ADMINISTRATION

LIMITATION ON ADMINISTRATIVE EXPENSES

The bill includes a limitation of \$59,400,000 on administrative expenses of the Farm Credit Administration.

TITLE VII—GENERAL PROVISIONS

(INCLUDING RESCISSIONS AND TRANSFERS OF
FUNDS)

Section 701.—The bill includes language making funds available for the purchase, replacement, and hire of passenger motor vehicles.

Section 702.—The bill includes language allowing for unobligated balances to be transferred to the Working Capital Fund.

Section 703.—The bill includes language limiting the funding provided in the bill to one year, unless otherwise specified.

Section 704.—The bill includes language limiting indirect costs on cooperative agreements between the Department of Agriculture and nonprofit organizations to 10 percent.

Section 705.—The bill includes language making appropriations to the Department of Agriculture for the cost of direct and guaranteed loans available until expended to disburse obligations for certain Rural Development programs.

Section 706.—The bill includes language for funds to cover necessary expenses related to advisory committees.

Section 707.—The bill includes language prohibiting the use of funds to establish an inspection panel at the Department of Agriculture.

Section 708.—The bill includes language regarding detailed employees.

Section 709.—The bill includes language regarding the appropriations hearing process.

Section 710.—The bill includes language regarding the transfer of funds to the Office of the Chief Information Officer and information technology funding obligations.

Section 711.—The bill includes language regarding the reprogramming of funds.

Section 712.—The bill includes language regarding user fee proposals.

Section 713.—The bill includes language regarding the closure or relocation of Rural Development offices.

Section 714.—The bill includes language allowing for reimbursement of the Bill Emerson Humanitarian Trust.

Section 715.—The bill includes language regarding the closure or relocation of a Food and Drug Administration office.

Section 716.—The bill includes language regarding the availability of funds for certain conservation programs.

Section 717.—The bill includes language regarding government-sponsored news stories.

Section 718.—The bill provides funding for the National Center for Natural Products Research.

Section 719.—The bill includes language limiting certain programs.

Section 720.—The bill includes language regarding eligibility for certain rural development programs.

Section 721.—The bill includes language regarding meat inspection.

Section 722.—The bill includes language providing that certain locations shall be considered eligible for certain rural development programs.

Section 723.—The bill provides funding for an agriculture pest facility in Hawaii.

Section 724.—The bill includes language authorizing certain watershed projects.

Section 725.—The bill includes language modifying matching requirements for certain research grants.

Section 726.—The bill provides funding for certain projects.

Section 727.—The bill includes language relating to infant formula.

Section 728.—The bill rescinds certain funds.

Section 729.—The bill includes language relating to the export of poultry products to the United States.

Section 730.—The bill includes language regarding the Federal Meat Inspection and other acts.

Section 731.—The bill includes funding for two farm bill programs.

Section 732.—The bill includes language establishing a forestry pilot program for lands affected by Hurricane Katrina.

Section 733.—The bill includes language regarding administrative funds for certain farm bill programs.

Section 734.—The bill includes language regarding guaranteed business and industry loan fees.

Section 735.—The bill includes language regarding strategic regional development planning.

Section 736.—The bill includes language regarding the broadband program.

Section 737.—The bill provides for the rescission of certain facilities funds.

Section 738.—The bill provides for the rescission of certain rural development funds.

Section 739.—The bill provides for the rescission of certain facilities funds.

Section 740.—The bill includes funding for workforce acquisition capacity and capabilities.

Section 741.—The bill includes language regarding school food authorities.

Section 742.—The bill includes language regarding properties of the Agricultural Research Service.

Section 743.—The bill includes language regarding rare and neglected diseases.

Section 744.—The bill includes language regarding a food safety stakeholder panel.

Section 745.—The bill rescinds certain funds.

Section 746.—The bill includes language regarding baseload electric generation.

Section 747.—The bill rescinds certain funds.

Section 748.—The bill rescinds certain funds.

Section 749.—The bill limits certain funds.

DISCLOSURE OF EARMARKS AND CONGRESSIONALLY DIRECTED SPENDING ITEMS

Following is a list of congressional earmarks and congressionally directed spending items (as defined in clause 9 of rule XXI of the Rules of the House of Representatives and rule XLIV of the Standing Rules of the Senate, respectively) included in the bill or this explanatory statement, along with the name of each Senator, House Member, Delegate, or Resident Commissioner who submitted a request to the House or Senate Committee of jurisdiction for each item so identified. Neither the bill nor the explanatory statement contains any limited tax benefits or limited tariff benefits as defined in the applicable House and Senate rules.

FUNDING RECOMMENDATIONS
BUDGET AUTHORITY TOTAL—WITH
COMPARISONS

The total new budget (obligational) authority for fiscal year 2011 provided in the bill, with comparisons to the fiscal year 2010 amount and the 2011 budget estimate follows:

DIVISION B—COMMERCE, JUSTICE,
SCIENCE, AND RELATED AGENCIES AP-
PROPRIATIONS ACT, 2011

Following is an explanation of the effects of Division B, which makes appropriations for the Departments of Commerce and Justice, the National Aeronautics and Space Administration, the National Science Foundation, and related agencies for fiscal year 2011. As provide in Section 4 of the consolidated bill, this explanatory statement shall have the same effect with respect to the allocation of funds and the implementation of this division as if it were a joint explanatory statement of a committee of conference. Direction contained in Senate report 111-129, unless otherwise addressed in this statement, shall also provide legislative intent on the appropriations contained in division B of this Act. Funding levels for appropriations by account, and comparisons to fiscal year 2010 levels and the budget request, can be found in the table at the end of this division.

The Departments of Commerce and Justice, the National Aeronautics and Space Administration and the National Science Foundation are directed to submit spending plans, signed by the respective department or agency head, for review by the Committees on

Appropriations within 60 days of enactment of this Act. In addition, each department and agency funded herein shall follow the directions set forth in this Act and in this statement, and shall not reallocate resources or reorganize activities except as provided herein. Reprogramming procedures shall apply to funds provided in this Act, unobligated balances from previous appropriations Acts that are available for obligation or expenditure in fiscal year 2011, and non-appropriated resources such as fee collections that are used to meet program requirements in fiscal year 2011.

TITLE I
DEPARTMENT OF COMMERCE
INTERNATIONAL TRADE ADMINISTRATION
OPERATIONS AND ADMINISTRATION

The bill includes \$514,204,000 in total resources for the programs of the International Trade Administration (ITA), which includes \$9,439,000 in offsetting collections.

China anti-dumping and countervailing duty activities.—The agency is encouraged to allocate additional resources above the request to the activities of both these offices; is directed to fully staff anti-dumping efforts, and notify the Committees on Appropriations of any impediments to hiring or retaining staff with the required expertise.

National Export Initiative (NEI) and trade compliance and enforcement.—The bill includes funding to support a comprehensive export strategy. However, ITA and the Department are expected to focus just as aggressively on unfair imports and reducing

foreign subsidy programs as they do in trying to overcome unfair trade barriers to U.S. exports. ITA is directed to provide a spend plan for the NEI within 60 days of enactment of this Act to the Committees on Appropriations, and to provide quarterly reports on the implementation of this strategy.

U.S. Foreign Commercial Service (FCS).—The Department is directed to increase FCS's role overseas. However, the Department is cautioned to better plan for how ITA will reasonably grow the FCS and incorporate an influx of new personnel. ITA is directed to provide the Committees on Appropriations with a report within 60 days of enactment of this Act that will include a detailed workforce plan and refined cost estimates, as well as a specific management plan as to how the agencies will manage FCS's financial and workforce resources.

Travel expenditures.—The Department is expected to continue to submit quarterly reports regarding ITA's travel expenditures, including separate breakouts of funding, the number of trips and the purposes of travel.

Human rights training.—The agency is directed to provide human rights training for foreign commercial service officers and foreign national employees within the requested funding level.

The bill provides \$3,400,000 for congressionally-designated projects. ITA is directed to refrain from charging administrative costs and is expected to provide appropriate management and oversight of each grant.

International Trade Administration
Congressionally-designated Items
(\$ in thousands)

Recipient	Project	Amount
Cornell University, Ithaca, NY	National Textile Center - Cornell University	400
John H. Chafee Center for International Business, Smithfield, RI	Rhode Island Export Development Program (RIEDP)	500
Medgar Evers College of the City University of New York, Brooklyn, NY	Brooklyn International Trade Development Center	400
North Carolina State University, Raleigh, NC	National Textile Center Research	500
Philadelphia Hispanic Chamber of Commerce Services, Philadelphia, PA	Small Business Latin American Trade and Education Program	100
Textile/Clothing Technology Corporation, Cary, NC	Textile Research Programs	1,000
University of Nebraska-Lincoln, Lincoln, NE	International Trade Scholars Program	500

BUREAU OF INDUSTRY AND SECURITY
OPERATIONS AND ADMINISTRATION

The bill includes \$109,975,000 for the Bureau of Industry and Security (BIS).

Export controls.—The publication of patent applications for national security and dual-use technologies defeats the purpose of the Nation's export control laws. During the multi-agency effort to reform these laws, the Administration is urged to consider whether all such applications should be restricted automatically from publication, and whether the U.S. Patent and Trademark Office needs additional legislative authority to restrict such publication. BIS is directed to report to the Committees on Appropriations on this effort within 90 days of enactment of this Act.

ECONOMIC DEVELOPMENT ADMINISTRATION

The bill includes \$317,181,000 for the programs and administrative expenses of the EDA. The total recommendation for EDA consists of the amounts appropriated in the following two accounts.

ECONOMIC DEVELOPMENT ADMINISTRATION
PROGRAMS

The bill includes \$277,000,000 for Economic Development Assistance programs. Funds are to be distributed as follows; any deviation of funds shall be subject to the procedures set forth in section 505 of this Act:

Public works	\$160,000,000
Global climate change mitigation initiative	(25,000,000)
Planning	34,800,000
Technical assistance	12,700,000
Research and evaluation ...	1,500,000
Trade adjustment assistance	18,000,000
Economic adjustment assistance	50,000,000

Public works (PW).—PW funds are critical to economic development within local communities and industries and should not be reduced as proposed.

Planning.—The agency is directed to allocate this funding to the existing network of Economic Development Districts (EDDs), consistent with previous years' direction.

Technical assistance.—The bill includes an increase of \$400,000 to continue the competition of two additional university centers each year, with the goal of ensuring that each State has at least one center. EDA is encouraged to develop a plan to restore funding to historic levels, extend the three-year review process to five years, and re-establish the peer review mechanism for evaluating university centers. EDA is also directed to commission an independent study to evaluate the performance of the university center program to assist in the redesign.

Trade adjustment assistance (TAA).—The bill includes an increase of \$2,200,000 over fiscal year 2010 as a result of the inclusion of service firms. EDA is directed to continue to provide quarterly reports on the number of firms assisted, how that assistance is quantified, and the value each center adds to the TAA process. Collection of performance data is required to warrant increased funding.

Economic adjustment assistance (EAA).—EDA grantees have testified to the need for EAA grants but maintain that PW projects are the mainstay of economic development for their communities. The proposed shift of funds from PW to the EAA account would result in a net reduction in the number of PW projects funded. Therefore, the level of PW funding is maintained while EAA funding levels have been increased. EDA is encouraged to request significant additional funding for both programs in fiscal year 2012 and

beyond. Regional innovation clusters and business incubators, within the parameters of EDA's report of May 25, 2010, are supported within funding provided; EDA is encouraged to facilitate a system of consultation and referral among service providers. EDA is directed to provide quarterly reports on progress and funding awards for both initiatives, and expects proven performance. EDA is also encouraged to increase the number of revolving loan funds awarded and re-capitalized for worthy applicants. These funds are critical to communities that lack access to credit, particularly during economic downturns when many banks refuse to lend even to credit-worthy clients that have successfully borrowed in the past.

SALARIES AND EXPENSES

The bill includes \$40,181,000 for EDA's salaries and expenses. EDA is directed to fill vacancies in regional offices prior to those in headquarters, and to continue to increase the number of Economic Development Representatives in those areas where the territory to be covered presents geographical challenges to serving all communities in a timely and consistent manner. EDA is also encouraged to increase staff support for exceptionally large geographic areas.

MINORITY BUSINESS DEVELOPMENT AGENCY

MINORITY BUSINESS DEVELOPMENT

The bill includes \$32,316,000 for the Minority Business Development Agency (MBDA). The agency is urged to request sufficient funds in fiscal year 2012 and beyond to increase the annual funding levels for each of its Minority and Native American Business Enterprise Centers to at least \$300,000.

Office of Native American Business Development (ONABD).—The bill includes not less than \$1,000,000 for the ONABD, as requested, and the ONABD is directed to utilize the assistance of the Native American Business Enterprise Centers to help fulfill its obligations.

Technical assistance.—The agency is directed to provide a report to the Committees on Appropriations by March 1, 2011, on the centers that offer technical assistance in more than one language, specifying the type of assistance each center offers, in which languages, and the disaggregated data on minority firms served.

Multilingual staff.—To the extent feasible, MBDA is directed to increase the multilingual staff at headquarters and at MBDA centers, particularly in those geographic service areas that have significant populations with limited English proficiency as defined by the most recent Census data.

ECONOMIC AND STATISTICAL ANALYSIS

SALARIES AND EXPENSES

The bill includes \$110,000,000 for Economic and Statistical Analysis. The proposed new measurements will help Federal, State, and local governments shape better policies to spur job creation and assist in long-term planning decisions.

BUREAU OF THE CENSUS

The bill includes a total operating level of \$1,235,423,000 for the Bureau of the Census.

SALARIES AND EXPENSES

The bill includes \$271,364,000 for the salaries and expenses of Census, which includes \$5,000,000, as requested, to allow Census to work in coordination with the Bureau of Labor Statistics to supplement the official poverty measures with annual measures from the Current Population Survey.

PERIODIC CENSUSES AND PROGRAMS

The bill includes a total of \$964,059,000 for all periodic censuses and related programs

and includes funding for the requested initiatives, albeit at a reduced level. Census may use up to \$255,600 for additional acquisition workforce capacity and capabilities, as requested, from available funds.

American Community Survey (ACS).—More than 180 Federal assistance programs rely on ACS data to distribute \$416 billion annually. The fiscal year 2011 request proposes to begin to increase the sample size to 3.5 million housing units annually. However, GAO has expressed concerns with the current staffing plan. Census shall provide more detailed and transparent staffing documentation to the Committees on Appropriations within 60 days of enactment of this Act.

Data processing systems.—The bill includes funding to strengthen information security capabilities, meet increasingly demanding security requirements, and proactively protect data resources.

Monthly status reports.—Census is directed to continue its dashboard monthly status reports as it transitions into preparations for the 2020 decennial.

Inspector general (IG) recommendations.—Census is directed to incorporate all IG recommendations as it transitions into the 2020 decennial, including a thorough review of the training process; better communication of Census' various enumeration practices; and increased budget transparency.

Other languages.—Census is encouraged to create language assistance guides for the ACS, and is directed to continue to provide updates on a semi-annual basis on its language assistance program.

Data on small population groups.—Census' efforts to collect and make available data from the ACS and the decennial on small population groups and national origins subgroups continues to be of great importance for policymakers, as the needs among various populations vary significantly.

Offshore U.S. jurisdictions.—Census is urged to ensure that future statistics incorporate data on all U.S. citizens, including those in Puerto Rico and other offshore jurisdictions.

Best practices.—Census is urged to develop and share its best practices and methods for outreach to hard-to-count communities with Federal agencies and State and local governments.

NATIONAL TELECOMMUNICATIONS AND
INFORMATION ADMINISTRATION

SALARIES AND EXPENSES

The bill includes \$41,568,000 for the salaries and expenses of the NTIA. The agency is directed to provide quarterly reports on grant activities.

Minority Serving Institution (MSI) Digital and Wireless Technology Opportunity Program.—Within 60 days of enactment of this Act, the Secretary of Commerce is directed to submit to the Committees on Appropriations a report describing the Department's plans to support and assist MSIs in improving their instrumentation, connectivity, hardware and software for instructional and research purposes as contemplated by the Stevenson-Wydler Technology Innovation Act of 1980, and is urged to include a request for this program in fiscal year 2012.

Reverse auctions.—GAO is directed to provide a report to the Committees on Appropriations by May 1, 2011, on the feasibility of using reverse auctions to distribute any future broadband subsidies through commercially available, online procurement tools, including best practices, rigorous evaluation techniques, and recommendations to ensure compliance and accountability for auction winners.

PUBLIC TELECOMMUNICATIONS FACILITIES,
PLANNING AND CONSTRUCTION

The bill includes \$20,000,000 for Public Telecommunications Facilities, Planning and Construction (PTFPC). The Administration once again proposed to eliminate the PTFPC program, despite its own report that delineates the need for PTFPC. Both the Corporation for Public Broadcasting (CPB) and PTFPC work closely to ensure that they are not funding the same projects. Each agency has a separate sphere of responsibility and the programs differ in their respective eligibility requirements and in the scope of the projects that each fund. PTFPC funds only planning and construction projects through a competitive process. CPB's community service grant program does not fund planning or construction projects. In addition, PTFPC funding is essential to providing radio and television services to the print-handicapped and individuals served by small or low-power stations and stations faced with a catastrophic loss of service, and new stations seeking to serve communities in remote or rural areas.

UNITED STATES PATENT AND TRADEMARK
OFFICE

SALARIES AND EXPENSES
(INCLUDING TRANSFER OF FUNDS)

The bill includes \$2,262,000,000 for the United States Patent and Trademark Office (USPTO), including \$2,090,000,000 under the current fee structure, and an additional \$172,000,000 to be generated by a surcharge on patent fees, as provided in this bill.

Projected fee collections.—The misperception by some USPTO stakeholders that fees collected by the agency and not appropriated for a particular fiscal year are "diverted" to fund other agencies in the bill is an entirely inaccurate description. But USPTO's inability to provide accurate projections of its fee collections has had the effect of diverting funding from other agencies and critical priorities in the bill when the agency has overestimated the fees it will collect. To the extent that an estimate may be significantly more or less than actual fee collections, it is the failure of USPTO's own estimation technique that causes the problem. In fact, Congress has appropriated USPTO's full fee collection estimates for many years, and any fees collected by USPTO but not appropriated for a particular fiscal year are credited to the agency and remain available for appropriation at a later date.

Neither are all of the Federal costs of patents borne by stakeholders through fee payments. Patent-related litigation activities by the Department of Justice and the Federal Judiciary are a benefit to patent holders and are financed outside of the patent fee system, at great expense to the American taxpayer. These are just two examples. If the stakeholders continue to insist on full access to fee collections, those fees should arguably include an accounting of all the costs of Federal agencies for patent activities.

Some USPTO stakeholders are reportedly encouraging the elimination of the role of the Appropriations Committees in any decisions related to the annual budget of USPTO. However, pendency and backlog issues are not fundamentally the result of a lack of funds, but of a lack of management. Stakeholders would be better served by continued oversight and improved budget formulation, execution, and management than by advocating for an agency with no annual budgeting oversight by Congress.

Operating reserve fund.—USPTO is directed to provide a plan for the proposed operating

reserve fund, including limitations on spending, within 60 days of enactment of this Act, to the Committees on Appropriations.

Provision of fee collection projections.—USPTO is directed to continue to provide quarterly reports on its projected fee collections and to notify the Committees on Appropriations during any month when significant changes in such projections prompt serious concern or require significant budgetary responses.

Justification improvements.—USPTO's efforts to provide a requirements-based budget for fiscal year 2011 are acknowledged. However, the text needs to make the argument for the funding requested and serve as resource materials for Congressional use, and the justification shall be subjected to Department of Commerce (DOC) oversight and editing. USPTO is directed to work with DOC, as well as the Committees on Appropriations, to ensure the fiscal year 2012 budget request is appropriately formatted.

Reprogramming and spend plan.—USPTO is required to follow the reprogramming procedures outlined in section 505 of this Act before using excess fee collections to forward fund expenses beyond fiscal year 2011. Any deviations from the funding distribution provided for in this Act, including carryover balances, are subject to the standard reprogramming procedures set forth in section 505 of this Act. USPTO is directed to provide a spend plan for fiscal year 2011, within 60 days of enactment of this Act, incorporating all carryover balances from previous fiscal years, and describing any changes to the patent or trademark fee structure. Any changes from the spend plan shall also be subject to section 505 of this Act.

Backlog of patent applications.—GAO has found that the hiring of additional patent examiners is not sufficient to address the backlog of patent examinations. Too often, patent examiners, extensively trained at great expense to the agency, have become private sector patent attorneys after only a short tenure with the agency. USPTO has identified alternative methods to meet backlog reduction goals and is directed to provide a report to the Committees on Appropriations on its progress with this and other backlog reduction strategies within 90 days of enactment of this Act.

Economic security.—In some circumstances, the time between the statute-mandated publishing of patent applications and the award of a patent allows competitors market advantage. This risks U.S. economic security and inventors' intellectual property rights. USPTO is directed to study its patent publishing process and consider the alternative of publishing only the patent abstract instead of the entire application, and report to the Committees on Appropriations on this effort within 90 days of enactment of this Act.

Small business international patent protection.—DOC is directed to work with USPTO and ITA to provide the Committees on Appropriations with a report, within 90 days of enactment of this Act, on how best to help small businesses with international patent protection, including, if a fund is a reasonable option, the initial level of appropriations; management recommendations; eligible applicants and selection criteria; and ways to ensure the fund becomes financially self-sufficient.

NATIONAL INSTITUTE OF STANDARDS AND
TECHNOLOGY

The bill includes \$877,700,000 for the National Institute of Standards and Technology (NIST).

SCIENTIFIC AND TECHNICAL RESEARCH AND
SERVICES

The bill includes \$541,246,000 for NIST's scientific and technical core programs.

Cybersecurity.—The bill provides \$10,000,000 for the Director to establish and operate a National Cybersecurity Center of Excellence (NCCOE) in addition to NIST's ongoing cybersecurity activities, of which \$6,650,000 should be for internal NIST requirements to staff and scale up the center, and \$3,350,000 shall be allocated on a merit-based competitive basis for activities with relevant non-Federal entities.

Molecular genetic assays.—Molecular genetic assays provide the cutting edge for many individualized therapies in oncology, transplantation, infectious disease and genetics, but the production of certified reference materials has fallen behind the technical capabilities of these assays. NIST is urged to develop certified reference materials for tests that are urgently needed to improve patient care and safety, including cytomegalovirus, BCR/ABL mutation, KRAS mutation, EGFR mutation, BK virus, and Epstein Barr virus.

NIST is directed to begin a national scale greenhouse gas (GHG) observation testbed to examine data from existing and emerging national GHG networks to verify measurement efficacy and integration into inverse climate models, in order to provide the foundation for independent measuring, reporting and verification activities.

The bill provides \$5,275,000 for congressionally-designated projects. NIST is directed to refrain from charging administrative costs and is expected to provide appropriate management and oversight of each grant.

INDUSTRIAL TECHNOLOGY SERVICES

The bill includes \$204,454,000 for Industrial Technology Services (ITS). Of this amount, \$124,700,000 is provided for the Manufacturing Extension Partnerships, including full support for the National Innovation Marketplace; \$69,900,000 is provided for the Technology Innovation Program to continue existing awards; and \$9,854,000 is provided for the Baldrige Performance Excellence Program, as requested. During fiscal year 2010, the former Baldrige National Quality Program was renamed and moved to ITS to consolidate NIST's non-laboratory extramural programs.

CONSTRUCTION OF RESEARCH FACILITIES

The bill includes \$132,000,000 for NIST construction. The bill provides funding for the agency's highest priorities, including completion of the JILA expansion. NIST is directed to provide quarterly reports on the status of all construction projects to the Committees on Appropriations.

Competitive construction grants.—Within funds provided, \$20,000,000 is included for competitive construction grants for research science buildings in fiscal year 2011. The program continues to attract significant numbers of applicants, leverages additional public and private funding, provides jobs, and improves science research in the Nation. The Administration is expected to include this program in future requests.

The bill provides \$50,000,000 for congressionally-designated projects. NIST is directed to refrain from charging administrative costs and is expected to provide appropriate management and oversight of each grant.

National Institute of Standards and Technology
Congressionally-designated Items
(\$ in thousands)

Recipient	Project	Amount
Glenville State College, Glenville, WV	Center of Teacher Excellence	2,000
Mississippi State University, Starkville, MS	Life Sciences Commercialization Laboratory	4,000
Rhode Island School of Design, Providence, RI	Facility for Advanced Visualization Technologies	750
University of Alabama, Tuscaloosa, AL	Interdisciplinary Science and Engineering Teaching and Research Corridor	30,000
University of Hawaii, Honolulu, HI	Hawaii Open Supercomputing Center and Coral Biodiversity	3,000
University of Kentucky, Lexington, KY	University of Kentucky Evaluation of Firefighter Turnout Gear for Safety	275
University of Mississippi Medical Center, Jackson, MS	Mississippi Biotechnology Research Park	8,000
University of Rhode Island, Kingston, RI	Rhode Island Consortium for Nanoscience and Nanotechnology	1,250
University of Southern Mississippi, Hattiesburg, MS	Mississippi Polymer Institute	6,000

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

The bill includes a total of \$5,551,928,000 in discretionary appropriations for the National Oceanic and Atmospheric Administration (NOAA). Within the amount provided, NOAA is directed to fund the congressionally-designated activities in the amounts identified in the table at the end of this account. NOAA is directed to refrain from charging administrative costs to these grants and is expected to provide appropriate management and oversight of each grant.

OPERATIONS, RESEARCH, AND FACILITIES (INCLUDING TRANSFERS OF FUNDS)

The bill includes a total program level of \$3,478,460,000 under this account for the coastal, fisheries, marine, weather, satellite and other programs of NOAA.

NATIONAL OCEAN SERVICE (NOS)

Mapping and charting.—The bill includes \$51,350,000 for mapping and charting, of which \$1,500,000 is for the development and demonstration of unmanned surface vehicles for hydrographic survey operations.

Integrated Ocean Observing System (IOOS).—The bill provides \$33,000,000 for the IOOS regional observations, of which \$6,000,000 is for program administration; \$24,000,000 is for a competitive, regional ocean observing systems solicitation; and \$3,000,000 is to continue to establish a consortium for testing and advancing new sensor technologies. Proposals for continuation of existing multi-regional extramural test beds shall be considered and evaluated concurrently and equally as part of the regional ocean observing systems solicitation.

Coral reef programs.—The bill includes a total of \$32,706,000 for coral reef research and operations, including \$27,000,000 in NOS; \$2,506,000 for deep sea corals in the National Marine Fisheries Service; \$2,000,000 in Oceanic and Atmospheric Research, and \$1,200,000 in congressionally-directed projects.

Response and restoration.—The bill includes \$29,418,000 for response and restoration, of which \$2,900,000 is for initial operations of the Gulf of Mexico Disaster Response Center (DRC). NOAA is expected to appropriately staff and fund the DRC in out-years to achieve operational capacity as the gulf coast hub for NOAA's emergency preparedness, response, and recovery operations. The duration of the Deepwater Horizon spill has revealed that ORR staff is overextended. While the costs of NOAA's response and restoration efforts should ultimately be reimbursed by the party or parties responsible, it is imperative that NOAA have appropriate levels of funding available to conduct efforts as needed. NOAA is directed to provide the Committees on Appropriations with a long-term budget plan that reflects an updated and more realistic core staffing and resource profile based on lessons learned.

Oil spill research.—The budget materials for fiscal year 2012 shall include and justify a unified and coordinated Federal approach for oil spill research that includes the Department of the Interior, the Department of Energy, the National Oceanic and Atmospheric Administration and the Coast Guard.

Competitive external research.—The bill includes \$16,000,000 for competitive external ocean science research, including harmful algal blooms, hypoxia and regional ecosystems.

Coastal zone management grants.—The bill includes \$68,146,000 for coastal zone management grants and NOAA is directed to use a portion of the increases provided for efforts

to modernize and improve state information systems to assess, track and manage permitting and land-use tracking procedures.

National Estuarine Research Reserve System (NERRS).—The bill includes \$1,174,000 above the request for NERRS operations.

Marine sanctuary program.—The bill includes \$49,500,000 for the marine sanctuary program, of which \$2,000,000 is for the purchase and installation of integrated vessel electronics for the Marine Sanctuary small boats program.

NATIONAL MARINE FISHERIES SERVICE (NMFS)

National catch share program.—The bill includes \$49,500,000 for the national catch share program. This fully funds the implementation and operation of planned and existing catch share programs, and includes \$6,002,000 for cooperative research specific to catch share programs. Ensuring sustainable fisheries ensures jobs—from harvesters to processors to retailers—and ensures the profitability of coastal communities, which depend upon those jobs. Over time, improved fisheries will increase tax revenue, as well as ensure a reliable and sustainable food source for the Nation. Catch shares are designed to end overfishing and return a fishery to sustainable levels, in part by providing fishermen with the tools to ensure that they can sell the fish they catch, rather than throw excess back into the ocean, which frequently kills the fish. Over time, catch shares improve the overall economic performance of the fishery, because as overfishing ends and the stock rebounds, the catch allowed increases, which is of increasing value to the fishermen.

The Committees on Appropriations recognize the importance of the commercial and recreational fishing industries and are sensitive to the objections raised by some fishermen to the concept of catch shares. The Committees share the concerns of these fishermen about the consolidation of the industry, declining catches, and the challenge of complying with regulations imposed by the Magnuson-Stevens Reauthorization Act (MSRA). However, the Committees note that catch shares are not the driving force behind consolidation or declining catches. Instead, they are a tool that may be adopted by each regional council if such council determines that a fishery would benefit from their use; catch shares are not NOAA-mandated. Catch shares are intended to provide fishermen with more business flexibility in responding to the MSRA regulations, allowing fishermen to consider market and weather conditions in deciding when to fish, thus increasing the price per pound and improving safety at sea.

Catch shares are also less amenable to long-term consolidation, because a specific portion of the total allowable fishery catch is allocated to individuals, cooperatives, communities, or other entities, including sectors. Nevertheless, NOAA is directed to provide a report to the Committees on Appropriations, within 120 days of enactment of this Act, detailing the steps being taken, either by the agency or by the regional councils, to address excessive consolidation.

Recreational fisheries.—Recreational fishing is economically and culturally valuable to our Nation. The Secretary is directed to issue guidance to councils to consider biological, social and economic impacts as criteria in determining the initial distribution of catch shares among sectors in multi-sector fisheries, and to consider transferability of catch share privileges between commercial and recreational sectors. In addition, the Secretary is encouraged to ensure that com-

position of the individual regional councils is sensitive to the statutory requirements of equity and fairness with respect to the balance between commercial and recreational fishermen.

Fishery-independent surveys.—The closure of fisheries due to the Deepwater Horizon oil spill has eliminated landing data from both commercial and recreational fisheries sectors, and combined with the lack of fishery-independent survey information, the result is that the assessment of the immediate impact of the oil spill on Gulf fisheries stocks, as well as the ability to predict long-term impacts, is impeded. NOAA is encouraged to fully implement a fishery-independent data collection strategy, and is directed to provide a report to the Committees on Appropriations on implementation of such a strategy within 90 days of enactment of this Act.

Salmon management activities.—The bill includes \$49,729,000 for salmon management activities, of which no less than \$23,729,000 is directed for Pacific Salmon Treaty activities, an increase of \$4,611,000 above the request. In addition, an increase of \$9,500,000 is provided above the request to allow hatcheries to be reformed according to the recommendations of the Hatchery Scientific Review Group.

Fisheries enforcement asset forfeiture fund (AFF).—The Inspector General's (IG) investigation into the AFF, established to use revenues from fisheries fines and penalties to pay for enforcement activities, revealed a serious lack of budgetary oversight by NOAA. The independent forensic review of this fund revealed the revenues have been co-mingled with other funds, resulting in a lack of visibility over the entire fund by any one organization in NOAA or DOC or any one responsible and accountable individual; and that many transactions had no supporting documentation, were missing approvals, and may ultimately be found to be improper expenditures from the fund. Moreover, at any given time, it is unclear how much is available in the fund, though it should be, at all times, strictly accounted for and included as offsetting funds for any appropriations request. In addition, the fishing industry has made claims, particularly in the Northeast region, that NOAA's fines are excessive, constituting a form of bounty, because NOAA is able to retain the proceeds from its enforcement cases. NOAA is directed to: (1) define what appropriate expenses may be charged against the asset forfeiture fund and develop guidance accordingly; (2) conduct an annual audit of the fund which will be commissioned by the IG for which expenses shall be paid from the fund account; (3) post results of the annual audit of the fund to NOAA's website in a prominent and conspicuous place; (4) generate and implement an audit action plan incorporating all the IG's recommendations; (5) utilize the science available to set priorities and focus enforcement on those priorities; and (6) provide a spend plan, containing all these elements, to the Committees on Appropriations. The bill includes \$60,000,000 for enforcement, and essentially freezes the AFF until NOAA receives approval from the Committees on the AFF spend plan.

Ombudsman.—Given the overall results of the IG reviews; persistent complaints about the complexity of the regulations; and the fact that the penalty assessment and defense process can put members of the fishing industry—predominantly small business owners—out of business without recourse, NOAA is directed to consider establishing an ombudsman position for the fishing community that reports independently to the Under Secretary. Additionally, or as an alternative to

an ombudsman, NOAA is directed, within its enforcement program, to establish an independent office empowered to advocate or advise the regulated community on violation avoidance, compliance assistance, and defense and settlement advocacy.

Observers.—The bill includes a total of \$5,000,000 for the Longline Observer program.

Community-based restoration program (CRP) grants.—The bill includes \$28,967,000 for fisheries habitat restoration, the same as the request. NOAA's goal of implementing larger-scale ecological restoration and the enormous backlog of coastal habitat restoration projects is acknowledged, and future budget requests are expected to provide appropriate funding levels for such efforts. However, the multitude of important ecosystem benefits of small- to mid-scale habitat restoration projects that involve local communities and contribute to larger-scale regional conservation or restoration plans are critical. NOAA is expected to maintain the small- to mid-scale project focus of the CRP that continues to provide broad ecosystem benefits; involving community oriented organizations and their communities and citizens at the local level has been essential to CRP's highly successful on-the-ground restoration efforts.

Antarctic research.—The fiscal year 2010 Antarctic field research season was significantly affected by the lack of an appropriate vessel and unexpected weather patterns, reducing the number of samples below minimum levels in an effort to ensure the safety of the crew and research teams. However, maintaining the long-term database is critical to assuring validity with respect to assessing the impacts of climate change. NOAA is directed to ensure that funding levels are sufficient to provide an appropriate and safe vessel, regardless of weather conditions, and that research is conducted as required to maintain continuity of the data.

Cooperative research.—Cooperative research provides an effective means for fishermen to become involved in the collection of fundamental fisheries information, and given the challenging economic and regulatory conditions facing fishermen, the bill provides \$11,600,000, which is \$4,500,000 above the request, and is in addition to the \$6,002,000 included in the catch share program.

Regional studies.—NOAA's Chesapeake Bay Office is directed to collaborate with the States of Maryland and Virginia to advance multiple species management. NOAA shall continue to utilize Sea Grant programs from both States and the National Centers for Coastal Ocean Science, particularly the Cooperative Oxford Laboratory (COL), on oyster restoration and spatial planning science and management goals. NOAA is directed to provide the Committees on Appropriations with a report within 60 days of enactment of this Act, detailing a clear strategic partnership between NOAA's Chesapeake Bay Laboratory and COL, including collaborative breakouts on personnel, resources, and costs.

OCEANIC AND ATMOSPHERIC RESEARCH (OAR)

Climate research.—The bill includes \$163,159,000 for the competitive research program; out of the increase provided \$2,200,000 is for continued chemical climate research important to climate modeling; \$1,400,000 is for atmospheric chemistry to avoid losing a key sampling component; and \$1,000,000 is provided for replacement of equipment and facilities damaged by the tsunamis triggered by the earthquake that occurred in September 2009. NOAA is encouraged to reestablish this important research station as quickly as possible and is directed to provide a report to the Committees on Appropriations

within 90 days of enactment of this Act, on its plans to do so.

Urban greenhouse gas measurements.—NOAA is directed to report to the Committees on Appropriations on the status of urban greenhouse gas measurement within 120 days of enactment of this Act. The report should include whether there is a need to ensure accurate monitoring of greenhouse gases in the urban environment and an opportunity to partner with institutions of higher learning; as well as the feasibility of deploying a network of portable, highly-accurate, low-maintenance analyzers that meet the highest international standards in multiple, geographically-diverse cities.

Laboratories and cooperative institutes.—The Committees on Appropriations are aware that NOAA is underfunding cooperative institutes and creating partnerships with the external community under false financial pretenses. An increase is provided to help bridge this gap, including \$2,000,000 in competitive funding above the ocean, coastal, and Great Lakes laboratories and cooperative institutes request for external coral reef institutes. The Administration is expected to fully fund cooperative institutes and laboratories at appropriate levels in future years.

Weather and air quality research.—The bill includes \$650,000 for laboratories and cooperative institutes for instrumentation and operation of state of the art monitoring of nutrients and mercury speciation measurement stations and laboratories.

National Sea Grant College program.—The bill includes \$63,000,000, of which \$4,500,000 is for marine aquaculture research and \$2,000,000 is for aquatic invasive species research; both shall be coordinated by NOAA's Sea Grant office.

NATIONAL WEATHER SERVICE (NWS)

Space weather.—The importance of solar flare predictions in space weather forecasting is recognized, and NOAA is encouraged to further develop research efforts to improve the statistical certainty of solar flare predictions.

National Mesonet program.—The bill includes \$25,400,000 for continuation and expansion of the National Mesonet program, including: (1) \$13,400,000 to maintain data procurements from existing surface in-situ observations including those initiated during the initial phases of the program, as well as those added in recent years; (2) \$4,000,000 for expansion of surface in-situ observations in all areas of the country including urban and non-urban rural, coastal and mountainous regions for purposes of weather and climate monitoring; (3) \$2,000,000 for establishment of a National Mesonet Test Bed project to demonstrate the integration of multifunctional observing systems including both surface in-situ and remote sensing profilers for improved forecasts and benefits to top priority segments of the economy including renewable energy growth and aviation efficiencies; (4) \$5,000,000 for the continued development and expansion of the Mobile Platform Environment (MoPED) System into full capability to ensure that mobile platform environmental data is available to support efforts of the NWS; (5) \$500,000 for enhancements to the Meteorological Assimilation Data Ingest System (MADIS), including continued evolution of metadata handling and performance capabilities, contingent upon submission of a plan that shows a multi-year justification for why MADIS expansion is preferable to competitive procurement of tools developed by the private sector for the same purpose; and (6) \$500,000 for the National Mesonet program office for oversight

and data utilization initiatives. NOAA is expected to include a robust and expanded national mesonet program in its fiscal year 2012 budget request.

NATIONAL ENVIRONMENTAL SATELLITE, DATA AND INFORMATION SERVICE (NESDIS)

Scatterometer.—NOAA is directed, together with NASA which is similarly directed, to continue co-funding joint studies within available funds that should lead to a fiscal year 2012 request to build and fly an operational scatterometer providing sea surface vector wind measurements. The Committees on Appropriations are concerned that such a request was not included in fiscal year 2011, given the demise of the QuikSCAT. NOAA should aggressively pursue negotiations to secure a flight opportunity for this instrument that is both reliable and timely.

Archive, access, and assessment.—The bill includes \$75,000,000, an increase of \$10,145,000 above fiscal year 2010, to transition climate data records (CDR) to operations; continue additional CDR development; and to close the gap in long-term safe storage of and access to the Nation's environmental data and information.

PROGRAM SUPPORT (PS)

Facilities.—The bill includes \$36,346,000 for NOAA facilities, which includes \$7,000,000 for renovations and modernization of facilities necessary to support weather and climate modeling needs. No funding for the Marine Operations Center—Atlantic facility is provided as its construction has already been financed.

Acquisition workforce capacity and capabilities.—NOAA may use up to \$1,908,414 for additional acquisition workforce capacity and capabilities, as requested, from available funds.

Administrative funding cap.—The Committees on Appropriations are concerned about the lack of transparency and visibility of all administrative costs incurred by NOAA's corporate staff and line offices, including regional and field offices. The Committees are particularly concerned that the non-visible administrative cost components may be increasing more rapidly than the directly visible corporate services appropriation enacted to pay for NOAA corporate administrative costs. For example, NOAA has continued to assess line office programs for a portion of their corporate administrative costs through a "direct billing" process that is not visible to the Committees. Over the past five years, the corporate services appropriation has accounted for a declining share of total NOAA corporate administrative costs, while the "direct billing" share of these costs has increased significantly.

To address these concerns, the bill establishes a cap on all NOAA headquarters (HQ) administrative costs for fiscal year 2011. This new cap limits the amount of ORF and PAC funds that can be used for administrative costs incurred by NOAA's corporate and line office HQ operations. The cap for fiscal year 2011 is \$413,000,000, of which up to \$391,000,000 may be met using ORF funds and up to \$22,000,000 may be met using PAC funds. This \$413,000,000 limitation may be increased up to five percent, with congressional notification of the reasons for any proposed increase at least 15 days in advance of the need. This cap includes the corporate services appropriation within ORF and all NOAA payments to the Department of Commerce for administrative services. No other funds appropriated for NOAA in this Act may be used to pay for NOAA administrative costs. Administrative costs consist of those for the following

standard administrative functions: (1) general management and direction, including public affairs and information dissemination activities; (2) legal services; (3) CFO operations including budget, finance, and accounting activities; (4) CIO operations and all IT-related expenses; (5) CAO operations, including facilities and security costs; (6) human resources services, including EEO; and (7) procurement, acquisition and grants management operations.

Although the NOAA line offices also incur administrative costs at the field offices and financial management centers (FMCs) that execute their programs, these costs are not included in the administrative cost cap for two reasons. First, the distinction between administrative and program costs for field operations is less clear than for line office HQ operations. Second, the current data identifying these field administrative costs appear incomplete and less reliable than HQ data. A cap may be imposed on these costs at a future date.

In addition, NOAA shall provide a report to the Committees on Appropriations within 30

days of enactment of this Act that identifies total NOAA administrative costs for fiscal year 2009 actual, fiscal year 2010 actual, and fiscal year 2011 planned for NOAA corporate staff and each line office, including the Office of Marine and Aircraft Operations. The report shall also identify the administrative costs incurred by these organizational entities, as well as the field offices and FMCs, for the standard administrative functions described above. Similar tables shall be included in all subsequent NOAA annual budget justifications provided to Congress.

Education.—The bill includes \$10,000,000 for competitive educational grants, of which \$2,500,000 is to continue the ocean education partnership and \$2,500,000 is to improve geographic literacy in the Nation's schools utilizing NOAA's national network of weather and environmental activities; \$14,000,000 for the educational partnership program with minority serving institutions; a total of \$8,700,000 for BWET regional programs; \$2,000,000 for the GLOBE program in partnership with the National Aeronautics and Space Administration; and \$2,000,000 to en-

sure an appropriate administrative level. NOAA is directed to request separate funding for each program element in future budget requests, rather than rolling the funding up into one line.

Justification improvement.—NOAA is directed to continue to work with the Committees on Appropriations to reformat the justification into a more transparent, informative and user-friendly document. The Department is similarly directed.

Research and development (R&D) tracking and outcomes.—NOAA is directed to continue to track the division of R&D funds between intramural and extramural research; assure consistency and clarity in the collection and reporting of data; clearly state expected research outcomes and available funding to provide transparency into the competitive grant process; and increase extramural research funding in future requests to build broad community support and leverage external funding for mission-oriented research.

PROCUREMENT, ACQUISITION, AND
CONSTRUCTION
(INCLUDING TRANSFER OF FUNDS)

The bill includes a total program level of \$2,002,219,000 in direct obligations for procurement, acquisition, and construction (PAC). The PAC cap for fiscal year 2011 is \$22,000,000, which may be increased by up to five percent with congressional notification of the reasons for any proposed increase at least 15 days in advance of the need. No other funds appropriated for NOAA in this Act may be used to pay for NOAA administrative costs.

The following narrative descriptions and tables identify the specific activities and funding levels included in this Act:

National Environmental Satellite, Data and Information Service (NESDIS).—NOAA's efforts to move forward with a full-scale radio occultation satellite constellation is supported. However, NOAA is encouraged to explore fully the possibility of buying radio occultation data from private American companies, as a sole or supplemental source for this data. Funding is also provided for DSCVR and replacement of the ACE spacecraft, and NOAA is directed to report to the Committees on Appropriations by February

7, 2011, on the most expeditious and cost effective options for making DSCVR operational and replacing the ACE spacecraft.

Joint polar satellite system (JPSS).—Despite months of encouraging rhetoric about overhauling the highly troubled National Polar-orbiting Operational Environmental Satellite System (NPOESS), the Administration has failed to fully execute plans to restructure the civil portion of this program and migrate its associated contracts over to NOAA and NASA. The Committees on Appropriations remain concerned at the lack of definitive budgeting as well as decisional delays caused by uncertainty over the transition of the legacy program, including possible contract termination costs. It is unconscionable that critical National weather and climate data are held hostage to contract negotiations, not to mention the budgetary impacts and implications. As a result of the lack of clarity, the bill includes \$1,803,609,000 for all of NOAA's satellite programs. The agency is directed to ensure a 2014 launch date of JPSS-1, to minimize the potential gap in civil weather forecasting. NOAA is directed to provide a detailed budget plan no later than 90 days after enactment of this Act, to include funding level options ranging

from less expensive to preferred path. Once NOAA has provided a more refined budget, should the need for reprogramming become evident, the Committees will be receptive to such a request. NOAA is further directed to provide monthly programmatic and procurement status reports.

Inspector General (IG) oversight.—The bill includes a transfer of \$1,000,000 from PAC to the IG for oversight and auditing to ensure that the current satellite programs avoid the cost overruns and enormous administrative overhead associated with NPOESS. Without aggressive oversight and fiscal vigilance, this program has the potential to overwhelm the remainder of NOAA's future budgets. NOAA is directed to incorporate all IG recommendations for the geostationary and polar-orbiting satellite programs.

Comprehensive large array stewardship system (CLASS).—The bill includes \$18,476,000 for CLASS. Of these funds, \$5,500,000 is for maintenance, operations, and implementation of enhancements from development activity, and \$15,976,000 is for contracted development, with project administration and oversight to be at NOAA's National Climatic Data Center.

PACIFIC COASTAL SALMON RECOVERY

The bill includes \$80,000,000 for the Pacific Coastal Salmon Recovery Fund, requires all funds to be allocated based on scientific and merit principles, and prohibits the availability of funds for marketing activities.

FISHERMEN'S CONTINGENCY FUND

The bill includes \$250,000 for the Fishermen's contingency fund and directs the agency to request funding for this program on an annual basis.

COASTAL ZONE MANAGEMENT FUND

(INCLUDING TRANSFER OF FUNDS)

The bill includes language transferring not to exceed \$3,000,000 from the Coastal Zone Management Fund to "Operations, Research, and Facilities."

FISHERIES FINANCE PROGRAM ACCOUNT

The bill includes language under this heading limiting obligations of direct loans to \$16,000,000 for Individual Fishing Quota loans and \$59,000,000 for traditional direct loans.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

The bill includes \$64,595,000 for Departmental Management, which provides for the Department's highest priorities, including full funding of the IT cyber security initiative. The Department may use up to \$1,377,991 for increasing acquisition work-force capacity and capabilities, as requested, from available funds.

Repatriation initiative.—A key component to doubling U.S. exports is the repatriation of U.S. jobs that have moved abroad. The Secretary is directed to launch a job repatriation initiative, to include the development of a "best practices" for States and local communities to use to grow their manufacturing base, and the expertise and resources of ITA, EDA, MBDA, and NIST, in coordination with other Federal economic development agencies, such as the Small Business Administration. The Secretary is directed to submit a report to the Committees on Appropriations on the implementation of this initiative 120 days after enactment of this Act.

Justification improvement.—The Department is directed to continue to work to reformat all Department of Commerce (DOC) justifications into more transparent, informative, and user-friendly documents.

Departmental oversight.—The Department is directed to continue to develop oversight capacity of the USPTO; track fee collections and other pertinent policy and economic impacts; avoid budgetary shortfalls; and ensure that the Department and the Committees on Appropriations are fully informed on USPTO funding issues.

Emergency steel loan guarantee (ESLG) program.—The proposed rescission of the remaining unobligated subsidy balances associated with the ESLG program is rejected.

Native American affairs.—The Department is encouraged to expand the scope of the operations of the new office of the Senior Advisor for Native American Affairs within available funding.

U.S. Israel Science and Technology Commission (USISTC).—DOC is directed to report on the feasibility of reestablishing the USISTC within the DOC, and encourages the commitment of appropriate resources.

National manufacturing strategy.—Within six months of enactment of this Act, DOC is directed to submit a report to the Committees on Appropriations and post on a public website a National manufacturing strategy outlining the initiatives the Administration is pursuing to strengthen the Nation's manufacturing sector and detailing progress made

since the release of "A Framework for Revitalizing American Manufacturing" in December 2009.

RENOVATION AND MODERNIZATION

The bill includes \$5,000,000 for continued renovation activities.

OFFICE OF INSPECTOR GENERAL

The bill includes \$29,394,000 for the Office of Inspector General (IG) for fiscal year 2011. In addition, the bill includes transfers to the IG from USPTO and NOAA satellites for oversight and audits of those activities. The IG is directed to provide semiannual reports on the status and progress of the 2020 decennial.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

The following general provisions are included for the Department of Commerce:

Sections 101, 102 and 104 through 108 continue longstanding general provisions without substantive change from previous years.

Section 103 modifies the authority to transfer funds between Department of Commerce accounts, including NOAA, and requires notification to the Committees on Appropriations of certain actions.

Section 109 establishes interim authorities regarding American Samoa's bigeye tuna fishery catch allocation.

TITLE II

DEPARTMENT OF JUSTICE

GENERAL ADMINISTRATION

SALARIES AND EXPENSES

The bill provides \$145,565,000 for General Administration, Salaries and Expenses.

Terrorism trials of former Guantanamo Bay detainees.—The bill does not include the Administration's request of \$72,771,000 for the first year costs of criminal trials for some former Guantanamo Bay detainees. This reduction reflects the fact that the Administration's plan for these trials is still undefined.

Office of Legislative Affairs (OLA).—OLA needs to provide the Committees on Appropriations with information proactively and in a timely manner, but this has not been consistent practice over the past two years. OLA is directed to take whatever steps are necessary (including communicating with the White House to end unhelpful and counterproductive information embargoes) to improve the sharing of information with the Congress.

International Organized Crime (IOC).—The bill includes funds for the IOC Intelligence and Operations Center, the Attorney General's Organized Crime Council Program Support Office and IOC increases requested in other bureaus. Resources requested to provide a central fund for IOC case operation costs, however, should continue to be derived from the Attorney General's special projects fund or other available sources. If the IOC initiative is intended to be a permanent fixture that will appear in future requests, the Department of Justice (DOJ) should develop a strategy for funding this program somewhere other than the executive leadership budget.

Cooperation with the Government Accountability Office (GAO).—The Department is directed to develop, in consultation with GAO, a compromise that will allow congressional oversight to proceed as necessary on intelligence-related programs. As part of the negotiation of this compromise solution, DOJ is directed to work more broadly with GAO on improving the quality, quantity and timeliness of DOJ responses to GAO reviews on all subjects, including those that are not directly related to intelligence or national security programs.

Missing and unidentified persons system.—The Department is directed to report to the Committees on Appropriations on how it plans to share information between the National Crime Information Center and online databases containing information on unidentified decedents and missing persons. This report shall be submitted within 180 days of the enactment of this Act.

Gang enforcement.—The Department should continue to strive for better cooperation among anti-gang entities and greater effectiveness in enhancing and linking gang cases. In addition, the Department shall continue keeping the Committees on Appropriations informed of any planned management and organizational changes regarding anti-gang efforts.

Obscenity enforcement.—The Department shall report to the Committees on Appropriations within 180 days of enactment of this Act on Obscenity Prosecution Task Force staffing and spending levels, as well as on obscenity investigation and prosecution workload statistics and accomplishments, both currently and since the creation of the Task Force in 2005.

Prison rape elimination.—The Department shall publish, as soon as possible, a final rule adopting national standards for eliminating prison rape as mandated by the Prison Rape Elimination Act (PREA) of 2003, and continue efforts to provide assistance in the form of training, technical assistance, and implementation grants to assist State, local, and tribal jurisdictions in achieving compliance with PREA national standards.

Tribal law enforcement.—The Department shall submit a report outlining how a pilot project would be structured to assess the impacts of expanding tribal law enforcement jurisdiction. The report should include a description of: 1) how a pilot tribe would be selected; 2) which categories of crime would be included in the jurisdictional expansion; 3) how tribal capacity issues would be addressed; 4) what statutory changes would be necessary; 5) how constitutional safeguards would be implemented; and 6) how the Department would evaluate the success or failure of the pilot. This report shall be submitted to the Committees on Appropriations no later than 180 days after the enactment of this Act. To the extent additional funding would be required to enhance tribal capacity as part of such a pilot, grant funding through the Department's tribal grant programs shall be available for this purpose in fiscal year 2011 and future years as necessary.

Tribal consultation.—Within 150 days of enactment of this Act, the Attorney General shall provide the Committees on Appropriations with a report on how DOJ will use the tribal consultation process to further streamline and coordinate programs and funding opportunities for Native Americans both within DOJ and with relevant programs of the Department of the Interior.

NATIONAL DRUG INTELLIGENCE CENTER

The bill provides \$44,580,000 for the National Drug Intelligence Center.

JUSTICE INFORMATION SHARING TECHNOLOGY

The bill provides \$124,585,000 for Justice Information Sharing Technology.

Unified Financial Management System (UFMS).—The direct appropriation for UFMS is focused on the ongoing needs of the Project Management Office rather than pre-funding the initiation of any additional new work. The Department should add any further necessary development and deployment costs to the planned fiscal year 2011 UFMS reprogramming. For UFMS activity that is

undertaken in fiscal year 2011, the Department is directed to continue submitting quarterly reports to the Committees on Appropriations listing milestones for the year, with budget and schedule estimates for each, and describing progress made against each of those milestones.

Joint Automated Booking System (JABS).—In order to account for a slower rollout schedule for JABS biometric upgrades, the JABS enhancement request has been reduced by \$3,000,000.

Justice Consolidated Office Network (JCON).—The Department is directed to find program and acquisition efficiencies sufficient to sustain an \$8,000,000 reduction to this line item.

Litigation Case Management System (LCMS).—Since the budget request was submitted, the Department has decided to terminate LCMS due to intractable programmatic and management problems. As a result, the bill has eliminated all LCMS funding from this account. Any closeout costs needed for the program can be covered with funds remaining from the fiscal year 2010 LCMS reprogramming or other available sources.

Cyber security and secure communications.—The bill provides \$32,100,000 for the continued strengthening of DOJ's cyber security and secure communications programs.

LAW ENFORCEMENT WIRELESS COMMUNICATIONS

The bill provides \$207,727,000 for Law Enforcement Wireless Communications.

Integrated Wireless Network (IWN).—The Department is directed to continue submitting quarterly reports to the Committees on Appropriations on planned and actual IWN milestone achievement, including budget and schedule parameters. This year, the quarterly reports should also include a description of the Department's efforts to ensure that components are purchasing equipment that is compliant with Project 25 standards.

ADMINISTRATIVE REVIEW AND APPEALS

This bill provides \$315,420,000 for Administrative Review and Appeals.

Legal Orientation Program (LOP).—The bill provides \$6,200,000 for the LOP, which includes \$2,000,000 for the custodians of unaccompanied alien children program and an increase of \$200,000 to cover the costs of the recent expansion of the LOP. The Executive Office for Immigration Review (EOIR) is directed to dedicate additional funds to LOP, as necessary and available, to ensure that there is no decrease in the level of support for LOP from year to year.

Immigration Court staffing.—EOIR is directed to submit a report to the Committees on Appropriations showing authorized Immigration Judge (IJ) staffing, start of year on-board levels, anticipated attrition, planned hiring and expected end of year on-board levels. This report should be provided no later than 120 days after the enactment of this Act and should be supplemented by quarterly updates showing actual data as it is received. When allocating new law clerk positions among IJ teams, EOIR is directed to prioritize the addition of clerk positions to teams where the ratio of judges to clerks exceeds 1:1.

DETENTION TRUSTEE

The bill provides \$1,533,863,000 for the Office of the Federal Detention Trustee (OFDT).

Population estimates.—The Appropriations Committees continue to be concerned with the Department's ability to anticipate the funding needs for this account. In order to

improve tracking of the cost drivers for detention space needs, OFDT is directed to continue reporting to the Committees on a quarterly basis the number of individuals in the detention system, the projected number of individuals and the annualized costs associated with them.

OFFICE OF INSPECTOR GENERAL

The bill provides \$88,792,000 for the Office of Inspector General.

UNITED STATES PAROLE COMMISSION

SALARIES AND EXPENSES

The bill provides \$13,582,000 for the United States Parole Commission.

LEGAL ACTIVITIES

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES

This bill provides \$969,989,000 for General Legal Activities. The funding is provided as follows:

Program	Amount
Solicitor General	\$11,018,000
Tax Division	115,972,000
Criminal Division	187,625,000
Civil Division	334,944,000
Environment and Natural Resources Division	111,410,000
Office of Legal Counsel	7,782,000
Civil Rights Division	161,885,000
INTERPOL-USNCB	38,518,000
Office of Dispute Resolution	835,000
Total	969,989,000

Tribal trust litigation.—The Environment and Natural Resources Division's costs for conducting all tribal trust litigation and related activities in fiscal year 2011 will be paid for by the Department of Interior; consequently, these funds were not provided directly through this division.

Human trafficking and slavery.—Within amounts provided for the Civil Rights Division, \$5,300,000 is for the Human Trafficking and Slavery Prosecution Unit.

Human rights crimes.—The Criminal Division is directed to continue increasing efforts to investigate and prosecute serious human rights crimes, including genocide, torture, use or recruitment of child soldiers and war crimes. Within the Criminal Division budget, \$1,800,000 shall be allocated for attorneys, analysts and support personnel to pursue these cases.

Child exploitation.—The bill provides \$1,500,000 above the request to enhance INTERPOL's efforts to establish a dedicated global unit to fight child exploitation. This unit will assist in enforcement requirements outlined in the Adam Walsh Child Protection and Safety Act (the "Adam Walsh Act," or AWA) and other initiatives aimed at combating child sexual exploitation.

VACCINE INJURY COMPENSATION TRUST FUND

The bill provides \$7,833,000 for the Vaccine Injury Compensation Trust Fund.

SALARIES AND EXPENSES, ANTITRUST DIVISION

The bill provides \$71,028,000 in direct appropriations for the Antitrust Division.

SALARIES AND EXPENSES, UNITED STATES ATTORNEYS

The bill provides \$2,041,269,000 for the United States Attorneys.

AWA enforcement.—The U.S. Attorneys are directed to spend no less than \$38,460,000 on prosecutions and other activities pursuant to the AWA. The U.S. Attorneys should continue to make AWA and other child exploitation cases a prosecutorial priority.

Human trafficking.—The Executive Office for U.S. Attorneys (EOUSA), in consultation

with each U.S. Attorney, is directed to designate a point of contact in each U.S. Attorney Office who shall serve as the coordinator for all activities within that office concerning human trafficking and slavery matters covered by the Trafficking Victims Protection Act. Each office is also urged to convene quarterly working-level meetings, where Federal, State and local law enforcement are represented, focusing specifically on combating human trafficking.

Indian Country programs.—The U.S. Attorneys are directed to spend no less than \$31,965,000 on prosecutions and related activities in Indian Country. EOUSA is directed to closely monitor caseload trends in districts with Indian Country responsibilities and to take actions, as appropriate, to direct additional funds to these districts if needed. EOUSA is also directed to submit a report describing the status of its pilot tribal community prosecution teams and summarizing their activities and achievements to date. This report shall be submitted to the Committees on Appropriations no later than 150 days after the enactment of this Act.

UNITED STATES TRUSTEE SYSTEM FUND

The bill provides a net direct appropriation of \$0 for the United States Trustees.

Debtor audits.—The Trustees shall submit a report quantifying the budgetary need for debtor audits in 2011 and outlining a plan for how those needs will be met with available resources. This report shall be submitted to the Committees on Appropriations no later than 90 days after the enactment of this Act.

SALARIES AND EXPENSES, FOREIGN CLAIMS SETTLEMENT COMMISSION

The bill provides \$2,159,000 for the Foreign Claims Settlement Commission.

FEES AND EXPENSES OF WITNESSES

The bill provides \$270,000,000 for Fees and Expenses of Witnesses.

SALARIES AND EXPENSES, COMMUNITY RELATIONS SERVICE

The bill provides \$12,606,000 for the Community Relations Service (CRS).

Emmett Till Unsolved Civil Rights Crime Act activities.—With funds provided, CRS should continue partnering with law enforcement agencies and communities in conflict resulting from the investigation of unsolved civil rights era cold cases.

ASSETS FORFEITURE FUND

The bill provides \$20,990,000 for the Assets Forfeiture Fund.

UNITED STATES MARSHALS SERVICE

SALARIES AND EXPENSES

The bill provides \$1,180,534,000 for the United States Marshals Service (USMS), Salaries and Expenses.

Sex offender apprehension.—Although the Marshals Service has annualized prior year AWA enforcement funding into its base budget, it has consistently failed to request new resources to expand the sex offender apprehension program. In order to provide an infusion of new resources in fiscal year 2011, the bill provides \$10,181,000 for additional AWA-related activities and the operations of the National Sex Offender Targeting Center. These funds are provided in place of the money requested for the Special Operations Group and the Technical Operations Group. If additional funds are needed to meet AWA program needs, the Department should reprogram resources from lower priority programs.

Contract management in the districts.—Marshals Headquarters should continue to exert more central control over contracting practices in the districts in order to move every

district toward contracting best practices and identify problems in the field more quickly. The Marshals Service should also continue preliminary efforts, in consultation with affected employees, to establish an ombudsman office to address contract-related problems that arise in the districts.

Regional Fugitive Task Forces (RFTFs).—The Marshals are directed to provide \$20,000,000 to enhance existing RFTFs and to establish new task force capabilities in areas not currently served by RFTFs.

CONSTRUCTION

The bill provides \$26,625,000 for Marshals Construction.

NATIONAL SECURITY DIVISION

SALARIES AND EXPENSES

The bill provides \$99,537,000 for the National Security Division.

INTERAGENCY LAW ENFORCEMENT

INTERAGENCY CRIME AND DRUG ENFORCEMENT

The bill provides \$574,319,000 for the Organized Crime and Drug Enforcement Task Forces (OCDETF).

Strike Force personnel.—OCDETF is directed to submit a report showing the fiscal year 2010 and planned fiscal year 2011 distribution of personnel (by bureau) to each of the collocated Strike Forces. This report should be submitted to the Committees on Appropriations no later than 120 days after the enactment of this Act.

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

The bill provides \$8,089,597,000 for the Federal Bureau of Investigation (FBI), Salaries and Expenses.

Program increases.—The bill provides funds for all requested program increases in full, with the exception of Render Safe. The FBI can space the acquisition of its Render Safe planes over two years without degrading its readiness posture below that which is currently available via the leased aircraft. Consequently, the bill has reduced the request by \$17,878,000, or the cost of one plane. If the FBI wants to proceed with the acquisition of the second plane in fiscal year 2011, a reprogramming request may be submitted to accomplish this.

Human trafficking.—The bill includes \$5,000,000 above the request for the investigation of trafficking in persons and the provision of victim witness coordinators for trafficking cases.

Law enforcement in Indian Country.—The bill funds 81 new FBI positions for law enforcement in Indian Country, at a cost of \$19,000,000, within the FBI's own budget rather than through the Bureau of Indian Affairs. These positions are to be available exclusively for Indian Country programs and allocated to areas of greatest need.

Adherence to notification requirements.—The FBI is directed to work with the Office of Management and Budget to transition its budget from the current four decision units to a new set based more closely on the FBI's operating structure. This will rationalize the Bureau's budget execution and improve its ability to identify when an internal reallocation of funds should trigger Section 505 notification requirements. To ensure that notifications are provided as needed during the time that the new decision units are being constructed, the FBI is directed to develop and issue strict new guidance on adherence to Section 505 requirements, including guidance on how and when to provide notification of reallocations that are intended to be temporary.

Hiring plan.—The FBI is directed to once again submit a hiring plan and quarterly up-

dates on staffing, consistent with the direction provided in the statement accompanying Public Law 111-117. Along with the Bureau-wide staffing data already requested, the FBI is directed to include in the quarterly reports a tracking of the number of authorized and onboard victim-witness coordinators at the Bureau.

Intellectual property rights (IPR) enforcement.—IPR enforcement should remain an investigative priority at the Bureau. In order to maximize the effectiveness of IPR enforcement, the Bureau should make all necessary efforts to coordinate and cooperate with IPR units at the U.S. Attorneys and the Criminal Division. In addition, the FBI is directed to submit a report on the activities of its dedicated agents investigating IPR cases. Specifically, the report should demonstrate that the additional IPR agents provided in P.L. 111-8 and 111-117 (to a base level of no less than \$25,100,000) are solely investigating and prosecuting violations of Federal intellectual property law. The report shall also provide an accounting of the agents placed in specific field offices with Computer Hacking and Intellectual Property units and the types of intellectual property investigations pursued by these agents. The report shall be submitted to the Committees on Appropriations no later than 120 days after the enactment of this Act.

Unobligated and unexpended balances.—The FBI is directed to work with the Committees on Appropriations to develop a reporting structure that will provide clear accountings of unobligated and unexpended balances on a regular schedule. In the meantime, GAO is directed to review the FBI's processes for periodically reviewing its unexpended balances and reallocating any balances that are determined to be available for deobligation. This review should ensure that the FBI's procedures are appropriately rigorous and include a comparison of the FBI's practices to those in other Federal agencies. GAO shall report to the Committees on Appropriations on the results of this review no later than 180 days after the enactment of this Act.

Criminal Justice Information Services (CJIS) Division.—The bill provides \$675,600,000 for the CJIS Division. This total includes \$291,100,000 of appropriated funds and \$384,500,000 of user fees.

Animal cruelty data in the Uniform Crime Report (UCR).—The FBI is directed to facilitate the prompt consideration by the CJIS Advisory Policy Board of any received proposal to add animal cruelty data to the UCR.

Next Generation Identification (NGI) system.—The FBI is directed to identify the fiscal year 2011 expected costs for NGI in its portion of the DOJ spending plan and to immediately notify the Committees on Appropriations of any changes to NGI's budget, schedule or expected achievements that emerge during the course of the year.

File inventory.—The FBI is directed to continue supporting its nationwide file inventory program at a funding level no less than the level provided for this activity in fiscal year 2010.

Gang enforcement.—The FBI is directed to continue supporting its Safe Streets Task Force program at no less than the current services level.

Surveillance.—The bill provides an increase of \$25,179,000 to hire additional personnel to help address gaps within the Bureau's surveillance program. No less than 75 percent of these additional funds shall be spent on Special Surveillance Groups.

Cyber security.—In recognition of the FBI's unique cyber-related authorities and exper-

tise, the bill provides \$181,754,000, an increase of 163 positions and \$45,926,000 above the fiscal year 2010 enacted level, to further the Bureau's investigatory, intelligence gathering and technological capabilities to address cybercrime.

Human rights violations.—The FBI is directed to increase its efforts to investigate and support the prosecution of serious human rights crimes committed by foreign nationals, including genocide, torture, and use or recruitment of child soldiers. Within the amounts provided, the FBI is directed to allocate \$1,500,000 for agents and associated support personnel at FBI headquarters to assist with these cases.

Civil rights enforcement.—Civil rights investigations are a top investigative priority of both the Bureau and the Congress. The bill provides the request of \$36,600,000 for the civil rights enforcement program, which will support investigations of hate crimes, civil rights era cold cases pursued under the Emmett Till Unsolved Civil Rights Crime Act, and related offenses.

Child exploitation programs.—Despite a multiyear increase in Internet exploitation cases, the FBI requested a current services budget of \$52,971,000 for the Innocent Images program in fiscal year 2011. The bill provides this funding, but the FBI is directed to closely monitor the online sexual predator threat and to allocate additional resources to this program in future requests if necessary. For child prostitution and domestic sex trafficking cases that are not primarily Internet based, the bill provides a total of \$26,100,000 through the Bureau's Innocence Lost program.

Mortgage fraud.—Mortgage fraud activity, particularly in the subprime market, was a contributing factor to the recent economic crisis and continues to play a role in undermining national economic stability. In order to improve the Bureau's ability to identify and investigate these schemes, the bill provides an increase of \$71,497,000 to hire additional agents, analysts and support personnel in the white collar crime program to focus on mortgage fraud.

The DOJ Inspector General revealed last year that the FBI was not making full use of its white collar crime resources despite the greatly increasing workload in this area. In light of these findings and to ensure that the mortgage fraud program is receiving the resources and attention that are expected, the FBI is directed to provide on a quarterly basis a break-out of the personnel allocated to mortgage fraud investigations, the amount of any under- or overburn experienced on mortgage fraud that quarter, and the number of mortgage fraud cases being worked in that quarter.

DNA technical review standards.—The Committees are aware of proposals to make changes to the FBI's DNA technical review standards; the FBI is directed to keep the Committees on Appropriations apprised of any activity regarding decisions to modify or maintain those standards.

Sentinel.—The FBI asserts that the problems it has experienced with the Sentinel project are contained; the project will finish late but within budget; and the product delivered through the end of Phase 2 largely reflects what was expected under the program plan. Outside sources seem to agree unanimously that each of these three contentions is overly optimistic. Relatively little was achieved, in terms of delivered benefits to end users, through Phases 1 and 2 even though more than 90 percent of the project budget was consumed. It is difficult to imagine that all of Phases 3 and 4 can still be

achieved with so little remaining funding unless major corners are cut in either execution or function.

Despite these concerns, the FBI has persisted in committing itself to completing the project within its \$451,000,000 budget, and the Congress will hold the Bureau to that commitment. Consequently, the FBI is prohibited from spending anything in excess of the \$451,000,000 total without first providing notification to the Committees on Appropriations, even if a funding source is available that would not otherwise trigger Section 505 notification requirements.

To manage the completion of Sentinel, the FBI shall develop a Work Breakdown Structure (WBS) that complies with guidance provided in GAO-09-3SP: *Best Practices for Developing and Managing Capital Program Costs*. The product-based WBS shall contain the capabilities that complete Sentinel as identified by the DOJ OIG in its 11-01 report (October, 2010). The structure of the Sentinel Completion WBS shall include components for (1) Phase 3 Capabilities, (2) Phase 4 Capabilities and (3) Deferred Capabilities. The FBI shall elaborate on each of the three WBS components to itemize the planned or deferred functionality that will complete Sentinel.

The FBI shall also configure its Earned Value Management System to report progress on the itemized functionality associated with each component.

CONSTRUCTION

The bill provides \$130,589,000 for FBI Construction.

Modernization of FBI Academy facilities.—The bill provides \$6,287,000 for renovation and abatement activities necessary for the modernization of existing FBI Academy facilities and \$17,000,000 for the construction of a new dormitory on the Academy campus.

DRUG ENFORCEMENT ADMINISTRATION

SALARIES AND EXPENSES

The bill provides \$2,088,176,000 for the Drug Enforcement Administration (DEA), Salaries and Expenses.

Prescription drug abuse.—The bill provides \$291,832,000 for DEA's diversion control program. These funds are fully offset by fee collections.

Methamphetamine cleanup.—The bill provides \$10,000,000 through the Community Oriented Policing Services (COPS) program to assist State, local and tribal law enforcement agencies with the proper removal and disposal of hazardous materials at clandestine methamphetamine labs, including funds for training, technical assistance, a container program and purchase of equipment. These funds will be provided by transfer to DEA.

Terrorism Investigations Unit.—DEA is directed to use \$4,000,000 for the Special Operations Division to create a third Terrorism Investigations Unit for Afghanistan.

CONSTRUCTION

The bill provides \$41,941,000 for DEA Construction.

El Paso Intelligence Center (EPIC).—The bill provides \$41,941,000 for costs related to the renovation of the existing EPIC facility and the expansion of the building. The improvement of physical infrastructure at EPIC should allow DEA to accommodate the increasing interagency demand for space there and will meet the government's need for a centralized and consolidated location for agencies to further coordinate their interdiction, intelligence and investigative activities focused on the Southwest border region.

BUREAU OF ALCOHOL, TOBACCO, FIREARMS AND EXPLOSIVES

SALARIES AND EXPENSES

The bill provides \$1,162,986,000 for the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF).

Project Gunrunner performance.—ATF is directed to provide to the Committees on Appropriations performance data showing how Project Gunrunner offices are contributing to the program's overall goal of reducing firearms trafficking into Mexico. This report shall be submitted no later than 120 days after the enactment of this Act.

Firearms trafficking between the United States and Mexico.—A reliable baseline of the annual weapons traffic across the U.S. southern border is necessary for the development of the most effective firearms enforcement strategies and the determination of the necessary levels of budgetary support for those strategies. Because such a baseline does not currently exist, ATF is directed to work with the Department of Homeland Security to develop and submit an estimate to the Committees on Appropriations, along with any necessary explanatory material, no later than 180 days after the enactment of this Act.

Firearms tracing capacity.—ATF is urged to identify resources via reprogramming in fiscal year 2011 to begin addressing National Tracing Center capacity and digitization needs and to prioritize funds for these issues in its fiscal year 2012 budget request.

Addressing the regulatory backlog.—ATF is directed to dedicate \$500,000 from within the funds provided to hiring additional regulatory writers to reduce the regulatory backlog.

Implementation of the Prevent All Cigarette Trafficking (PACT) Act.—ATF is directed to report to the Committees on Appropriations on its expected annual costs for implementation of the PACT Act, the extent to which those costs might be covered by deposits in the PACT Anti-Trafficking Fund and the plan for covering any new costs that are not offset by the Fund. This report shall be submitted no later than 180 days after the enactment of this Act.

Gang enforcement.—ATF is directed to continue supporting its Violent Crime Impact Team program at no less than the current services level.

FEDERAL PRISON SYSTEM

SALARIES AND EXPENSES

The bill provides \$6,553,779,000 for the salaries and expenses of the Federal Prison System. As part of the Department's fiscal year 2011 spending plan, the Bureau of Prisons (BOP) shall propose a distribution of funds by decision unit that incorporates directives in this statement. BOP's fiscal year 2012 budget request shall provide detailed descriptions of the major categories of activities comprising each decision unit and the proposed funding levels for each such category, including comparisons to prior year obligations for each category.

Correctional worker staffing.—No less than \$120,500,000 is for additional base correctional worker staffing in fiscal year 2011 and for the annualized cost of base correctional workers hired during fiscal year 2010. BOP shall identify, as part of the budget requests for fiscal year 2012 and future years, the number of authorized positions for each BOP facility in each correctional worker staffing category, including comparisons of the number of authorized positions in each category for fiscal years 2009 through 2012 and a description of the process used to determine the number of authorized positions for each year.

Staffing in housing units.—BOP is directed to provide a report to the Committees on Appropriations, within 180 days of enactment of this Act, describing BOP's policies for assigning correctional officers to housing units in low, medium, and high security prisons. The report should describe how BOP determines the vulnerability of officers to assaults by inmates in housing units; how this vulnerability determination informs the staffing assignments for housing units; the extent to which low staffing levels have prevented BOP from adequately staffing housing units to minimize officer vulnerability; the extent to which additional funding for staffing provided in this bill will be used to increase staffing in housing units; and any strategies BOP has adopted, considered or may consider to mitigate officer vulnerability in housing units.

New prison activation.—Not less than \$72,600,000 shall be used to begin or complete the activation of newly constructed prisons.

Inmate reentry and Second Chance Act implementation.—No less than \$39,695,000 is for BOP's Second Chance Act (SCA) requirements and Residential Reentry Centers (RRC), as requested. BOP shall report quarterly to the Committees on Appropriations on the average length of stay in community corrections, differentiated by average lengths of stay in RRCs and home confinement. In addition, BOP shall submit a report to the Committees on Appropriations, within 120 days of enactment of this Act, on the status of implementing Government Accountability Office recommendations (GAO-010-854R) regarding BOP's strategic approach to budgeting for inmate reentry programs. As part of its portion of the Department's fiscal year 2011 spending plan, BOP shall delineate the funding to be provided for each of its programs and activities related to inmate reentry and SCA implementation. Current and future reentry programming should be informed by the recommendations and themes included in the recent report of BOP's independent panel on prisoner reentry. As part of the fiscal year 2012 budget submission, BOP shall provide a detailed description of the coordinated prisoner reentry strategy required by the SCA, which should include clearly defined goals, an implementation timeline, the estimated costs of implementing the strategy in fiscal year 2012, and the estimated cost of fully implementing the strategy.

Counterterrorism activities.—No less than \$14,200,000 is for the full estimated cost of BOP's counterterrorism activities.

National Institute of Corrections (NIC).—No less than \$20,320,000 is for the NIC.

BUILDINGS AND FACILITIES

The bill provides \$269,733,000 for the construction, acquisition, modernization and repair of prison and detention facilities housing Federal inmates.

Modernization and repair (M&R).—BOP shall provide an updated report to the Committees on Appropriations, within 90 days of enactment of this Act, identifying the total estimated cost of all pending M&R projects by region and the methodology used to develop those estimates. BOP shall provide a similar M&R backlog list as part of its budget request for future years. In addition, the Government Accountability Office (GAO) shall review the methods that BOP uses to identify and prioritize needed facility improvements, the processes it uses to estimate associated costs, and its plan for addressing its M&R backlog. GAO shall report to the Committees on Appropriations, making recommendations for any needed improvements, by September 15, 2011.

Construction.—Within 30 days of enactment of this Act, BOP shall provide to the Committees on Appropriations the most recent status of construction report and shall notify the Committees of any deviations from the construction and activation schedule, including detailed explanations of the causes of delays and actions proposed to address them.

LIMITATION ON ADMINISTRATIVE EXPENSES, FEDERAL PRISON INDUSTRIES, INCORPORATED

The bill establishes a limitation on administrative expenses of \$2,700,000 for Federal Prison Industries, Incorporated (FPI). FPI is directed to report to the Committees on Appropriations within 180 days of enactment of this Act on how it plans to use new pilot program authorities included in Title V of this Act.

STATE AND LOCAL LAW ENFORCEMENT ACTIVITIES

Salaries and expenses.—All activities related to the management and administration of discretionary grant programs, grants, and cooperative agreements shall be supported only with funding provided via the separate Salaries and Expenses (S&E) appropriation provided in the bill for each grant office. The Office on Violence Against Women (OVW), the Office of Justice Programs (OJP), and the Office of Community Oriented Policing Services (COPS) are directed to develop formal definitions of management and administration costs or detailed guidance governing decisions about the types of costs that may be charged to each office's S&E account. In addition, each grant office shall detail actual and projected S&E costs by program, including personnel costs, as part of the budget submission for future fiscal years.

Workload analysis.—OVW, OJP, and COPS are each directed to conduct a workload analysis to ensure that their respective staffing levels and mix of personnel accurately reflect workload and requirements. Each office shall provide a report to the Committees on Appropriations within six months of the date of enactment of this Act describing its updated staffing model based on the results of its workload analysis. Within six months of the date the offices submit their reports, GAO is directed to report to the Committees on Appropriations, evaluating each office's staffing model and making recommendations, as warranted, on how each office's staffing model could be further improved.

Training, technical assistance, research and statistics, and peer review.—Training and technical assistance (T&TA) activities, research and statistics activities and peer review performed by OJP, OVW, and COPS, or through interagency agreements or under contract for OJP, OVW, and COPS, may be supported with program funds, subject to the submission of details related to planned costs in these categories by program as part of the Department's fiscal year 2011 spending plan. As part of the budget submission for fiscal year 2012 and future years, the Department is directed to detail the actual costs for each grant office in each of these categories for the prior fiscal year, along with estimates of planned expenditures by each grant office in each of these categories for the current year and the budget year.

Non-compliant grantees.—OJP, COPS and OVW appear to be using different sanctions and remedies for grantees that are determined to be out of compliance with grant requirements. The Department should work to consolidate rules and procedures across OJP, COPS and OVW in order to produce the most consistent possible compliance enforcement process.

**OFFICE ON VIOLENCE AGAINST WOMEN
VIOLENCE AGAINST WOMEN PREVENTION AND
PROSECUTION PROGRAMS
(INCLUDING TRANSFER OF FUNDS)**

The bill provides \$448,500,000 for Violence Against Women Prevention and Prosecution Programs. These funds are distributed as follows:

Program	Amount
STOP Grants	\$198,000,000
National Institute of Justice (R&D)	3,000,000
Transitional Housing Assistance	30,000,000
Grants to Encourage Arrest Policies	45,000,000
Rural Domestic Violence Assistance Grants	37,000,000
Violence on College Campuses	9,500,000
Civil Legal Assistance	50,000,000
Sexual Assault Victims Services	30,000,000
Elder Abuse Grant Program	4,250,000
Safe Havens Project	14,000,000
Education & Training for Disabled Female Victims Court Training and Improvement	6,750,000
Services for Children/Youth Exposed to Violence	3,000,000
Advocates for Youth/Services for Youth Victims (STARY)	3,000,000
National Tribal Sex Offender Registry	3,500,000
Engaging Men and Youth in Prevention	1,000,000
National Resource Center on Workplace Responses Supporting Teens through Education and Prevention	3,000,000
Analysis and Research on Violence Against Indian Women	2,500,000
American Indian/Native Alaskan Sexual Assault Clearinghouse	3,000,000
Regional Summits on Violence Against Indian Women	500,000
Total	500,000
Total	448,500,000

Tribal funding.—The bill provides \$48,909,000 in OVW funds for tribal purposes. This includes \$43,064,000 in set-asides for tribal coalitions and tribal governments; \$845,000 in other tribal set-asides; and \$5,000,000 for tribally focused programs, including the National Tribal Sex Offender Registry, Analysis and Research on Violence Against Indian Women, Regional Summits on Violence Against Indian Women and the American Indian/Native Alaskan Sexual Assault Clearinghouse.

SALARIES AND EXPENSES

The bill provides \$17,800,000 for the management and administration of OVW programs.

**OFFICE OF JUSTICE PROGRAMS
RESEARCH, EVALUATION AND STATISTICS
(INCLUDING TRANSFER OF FUNDS)**

The bill provides \$340,000,000, as follows, for Research, Evaluation and Statistics programs administered by the National Institute of Justice and the Bureau of Justice Statistics:

Program	Amount
National Institute of Justice	\$60,000,000

Program	Amount
Bureau of Justice Statistics	60,000,000
Evaluation Clearinghouse	1,000,000
National Instant Criminal Background Check System	15,000,000
Criminal Records Upgrade	10,000,000
Paul Coverdell Forensic Science	30,000,000
Stalking Database	3,000,000
DNA Initiative	161,000,000
Debbie Smith DNA Backlog grants	(151,000,000)
Kirk Bloodsworth Post Conviction DNA Testing grants	(5,000,000)
Sexual Assault Nurse Examiners	(5,000,000)

Total 340,000,000

National Institute of Justice (NIJ).—NIJ should carry out the new initiatives proposed for fiscal year 2011, including the Bureau of Prison inmate reentry evaluation, the Arrestee Drug Abuse Monitoring Program, and the Stopping Crime Block-by-Block Field Experiments. As part of the Department's fiscal year 2011 spending plan, NIJ is directed to provide a plan for the use of all funding it administers, and to include details regarding research and evaluation specifically related to prevention and intervention approaches directed at individuals under the age of 18. Within 120 days of enactment of this Act, NIJ is directed to provide a report to the Committees on Appropriations responding to the July 2010 report by the National Research Council, Strengthening the National Institute of Justice. The report should include detailed responses to the report's recommendations; a strategy for implementing recommendations with which NIJ concurs, including an estimated timeline for implementation; and detailed rebuttals of any recommendations with which NIJ does not concur. In lieu of the two Office of Inspector General (OIG) directives in Senate report 111-229 related to NIJ, the OIG is directed to review DNA backlog expenditures over the last three fiscal years, including an evaluation of the process for developing funding solicitations to ensure they are appropriately tied to established program goals and designed to ensure competition among qualified applicants.

DNA and forensics research and evaluation.—From the amounts provided for NIJ, the bill transfers \$5,000,000 to the National Institute of Standards and Technology Office of Law Enforcement Standards to support the continued development of standards and standard reference materials.

Bureau of Justice Statistics (BJS).—BJS should implement the proposed initiatives on Indian Country statistics and indigent defense.

Evaluation clearinghouse/what works repository.—The Evaluation Clearinghouse/What Works Repository, an on-line source for evidence-based information on what works and what is promising in criminal and juvenile justice policy and practice, shall be administered by the Office of the Assistant Attorney General.

STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$1,651,780,000, as follows, for State and Local Law Enforcement Assistance programs administered by the Bureau of Justice Assistance (BJA), the Office for Victims of Crime, the Community Capacity Development Office, or the Office of Sex Offender Sentencing, Monitoring, Apprehending, Registering and Tracking:

<i>Program</i>	<i>Amount</i>	<i>Program</i>	<i>Amount</i>	<i>Program</i>	<i>Amount</i>
Byrne Memorial Justice Assistance Grants	\$519,000,000	Children Exposed to Violence Initiative	25,000,000	Second Chance Act Programs	100,000,000
National Institute of Justice	(5,000,000)	Matthew Shepard Hate Crimes Prevention Program	6,000,000	Bulletproof Vests	25,000,000
State and Local Antiterrorism Training	(2,000,000)	Flexible Tribal Assistance	100,000,000	NIST/OLES	(1,500,000)
State and Local Assistance Help Desk & Diagnostic Center	(6,000,000)	State Criminal Alien Assistance Program	300,000,000	State Automated Victim Notification System	10,000,000
National Criminal Justice Commission (Section 542 of this Act)	(7,000,000)	Southwest Border Prosecutor Program	20,000,000	Regional Information Sharing Activities	40,000,000
Byrne Competitive Grants	35,000,000	Northern Border Prosecutor Program	5,000,000	Total	1,651,780,000
Byrne Criminal Justice Innovation Program	30,000,000	Victims of Trafficking Grants	15,000,000	<i>Edward Byrne memorial justice assistance grant program.</i> —The bill provides \$519,000,000 for the Edward Byrne Memorial Justice Assistance Grant program. Funding is not available for luxury items, real estate, or construction projects. The Department should strongly encourage State, local and tribal governments to target funding to programs and activities that are in conformance with evidence-based strategic plans developed through broad stakeholder involvement. The Department is directed to make technical assistance available to State, local and tribal governments for the development or updating of such plans. <i>Byrne discretionary grants.</i> —The bill incorporates by reference the following congressionally-designated activities to prevent crime, improve the criminal justice system, provide victim services, or other related activities:	
Byrne Discretionary Grants	199,780,000	Residential Substance Abuse Treatment for State Prisoners	25,000,000		
Criminal Justice Reform and Recidivism Reduction	20,000,000	Drug Courts	50,000,000		
John R. Justice Grant Program	10,000,000	Mentally Ill Offender Act ..	12,000,000		
Smart Policing	5,000,000	Prescription Drug Monitoring	5,000,000		
Ensuring Fairness and Justice in the Criminal Justice System	3,000,000	Prison Rape Prevention and Prosecution	10,000,000		
Justice Information Sharing and Technology	5,000,000	Capital Litigation/Wrongful Conviction Review Grants	12,500,000		
Smart Probation	10,000,000	Missing Alzheimer's Patient Grants	2,000,000		
Adam Walsh Act Implementation	20,000,000	Economic, High-tech and Cybercrime Prevention ..	23,000,000		
Sex Offender Management Assistance	5,000,000	Training Program to Assist Probation and Parole Officers	3,500,000		
National Sex Offender Public Website	1,000,000

Byrne competitive grants.—As part of OJP's portion of the Department's fiscal year 2011 spending plan, OJP is directed to detail the criteria and methodology that will be used to award these grants. OJP is encouraged to continue supporting efforts to solve civil rights cold cases.

Smart probation.—The Smart Probation initiative will help States and units of local government reduce crime and recidivism through court-based and other probation approaches that provide swift, predictable, and graduated sanctions for noncompliance with the conditions of probation.

Flexible tribal assistance.—OJP is expected to consult closely with tribal stakeholders in determining how tribal assistance funds will be awarded for detention facilities, courts, alcohol and substance abuse programs, civil and criminal legal assistance, and other priorities. As part of the Department's spending plan for fiscal year 2011, OJP shall provide a plan for the use of these funds that has been informed by such consultation.

Victims of trafficking.—The bill provides \$15,000,000 for task force activities and services for U.S. citizens, permanent residents, and foreign nationals who are victims of trafficking, including no less than \$6,700,000 for victim services for foreign national victims of trafficking. OJP shall consult with stakeholder groups in determining the overall allocation of Victims of Trafficking funding, and shall provide a plan for the use of these funds as part of the Department's fiscal year 2011 spending plan. The spending plan should be guided by the best information available on the regions of the United States with the highest incidence of trafficking. In addition, the Department of Justice is directed to undertake outreach efforts in the form of public notices, such as newspaper advertisements, in ethnic communities in the United States, the home countries of which represent the top ten countries with regard to the prevalence of human trafficking activities. These efforts shall be designed to increase awareness of what constitutes human trafficking crimes and provide information on how assistance can be obtained, with the objective being the discovery and rescue of victims and the identification and prosecution of offenders.

Capital litigation/wrongful conviction review.—Of the amount provided, \$2,500,000 is for capital litigation grants and \$10,000,000 is for competitive grants to public and non-profit entities that work to exonerate individuals who have been wrongfully convicted.

Economic, high-tech and cybercrime prevention.—Within the funds provided, no less than \$6,000,000 is for competitive grants to State and local law enforcement entities and related organizations to address criminal intellectual property enforcement and prosecution, which may include grants for related training and technical assistance provided to State and local law enforcement entities.

Second Chance Act.—OJP shall consult with stakeholder groups in determining the allocation of Second Chance Act funding among authorized programs and shall provide a plan for the use of these funds as part of the Department's fiscal year 2011 spending plan.

Byrne criminal justice innovation program.—OJP is encouraged to give consideration to current Weed and Seed grantees as noted in Senate Report 111-229.

Regional information sharing activities.—The bill provides \$40,000,000 to support activities that enable the sharing of nationwide criminal intelligence and other resources with State, local, and other law enforcement agencies and organizations. Such activities should address critical and chronic criminal threats, including gangs, terrorism, narcotics, weapons, and officer safety or "event deconfliction," and should reflect regional as well as national threat priorities. All activities shall be consistent with national information sharing standards and requirements as determined by BJA.

JUVENILE JUSTICE PROGRAMS

The bill provides \$506,040,000, as follows, for Juvenile Justice Programs administered by the Office of Juvenile Justice and Delinquency Prevention (OJJDP):

Program	Amount
Part B—State Formula	\$72,000,000
Part E—Challenge Grants and Projects	73,240,000
Youth Mentoring Grants ...	100,000,000
Title V—Incentive Grants	80,000,000
Tribal Youth	(40,000,000)
Gang and Youth Violence Prevention and Education	(15,000,000)

Program	Amount
Alcohol Prevention	(25,000,000)
Community-Based Violence Prevention Initiative	20,000,000
CASA—Special Advocates ..	15,000,000
Training for Judicial Personnel	2,500,000
Missing and Exploited Children	70,000,000
Internet Crimes Against Children Task Forces ..	(30,000,000)
Investigation and Prosecution of Child Abuse	22,500,000
Juvenile Accountability Block Grants	45,000,000
National Juvenile Delinquency Court Improvement Program	5,000,000
Disproportionate Minority Contact and Evaluation Program	800,000
Total	506,040,000

Youth mentoring.—Among other activities, youth mentoring funds should support programs, particularly in minority and underserved communities, that also help foster the development of employment skills, entrepreneurship, financial literacy, and educational achievement, including preparation for post-secondary education success. In addition, in light of the alarming high school dropout, arrest, and unemployment rates among youth with disabilities, OJJDP is encouraged to fund expansions of mentoring services for youth with disabilities. As part of its portion of the Department's spending plan, OJJDP is directed to detail the criteria and methodology that will be used to award youth mentoring grants.

Missing and exploited children.—Within the total, \$30,000,000 is for the Internet Crimes Against Children Task Force program. As part of the Department's spending plan for fiscal year 2011, OJP is directed to provide a plan for the use of Missing and Exploited Children program funds.

Part E discretionary grants.—The following congressionally-designated activities related to juvenile justice and at-risk youth are incorporated into the bill by reference:

OJP - Juvenile Justice
Congressionally-designated Items

PUBLIC SAFETY OFFICER BENEFITS

The bill provides \$77,300,000 for the Public Safety Officer Benefits program, including \$61,000,000 for death benefits for survivors, an amount estimated by the Congressional Budget Office that is considered mandatory for scorekeeping purposes, and \$16,300,000 for disability and education benefits.

SALARIES AND EXPENSES

The bill provides \$200,000,000 for salaries and expenses for the Office of Justice Programs (OJP), including \$32,500,000 for OJP's Office of Audit, Assessment, and Management.

COMMUNITY ORIENTED POLICING SERVICES
COMMUNITY ORIENTED POLICING SERVICES
PROGRAMS
(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$542,070,000 for COPS Programs. These funds are distributed as follows:

Program	Amount
COPS Hiring and Policing Development	\$363,000,000
Transfer to Tribal Resources Grant Program	(42,000,000)
Tribal Resources Grant Program	30,000,000

Program	Amount
COPS Technology and Interoperability	98,885,000
Transfer to NIST OLES ..	(1,500,000)
Meth Hotspots	17,185,000
Transfer to DEA	(10,000,000)
Child Sexual Predator Prosecution Program	18,000,000
Secure Our Schools	15,000,000
Total	542,070,000

COPS hiring and policing development.—The bill includes \$363,000,000 for hiring and policing development grants for State, local and tribal law enforcement. Within the amount provided, COPS is directed to fund \$26,000,000 of community policing development programs, including police integrity initiatives. Within the funds available for hiring grants, \$30,000,000 is for the hiring or rehiring of officers who will be assigned to Internet Crimes Against Children (ICAC) Task Forces. These funds, together with those provided under the OJP heading, will fully meet the level authorized for ICACs under the PROTECT Act. In recognition of average personnel and benefit levels in many parts of the country that exceed the \$75,000 per officer statutory cap for the hiring program, the cap has been waived for fiscal year 2011. The local match

requirement for these grants has also been waived.

Tribal resources.—At the enacted levels, COPS will be supporting \$72,000,000 in programs targeted exclusively to tribal communities through the Tribal Resource Grant Program (TRGP). Within the TRGP, \$30,000,000 is provided through direct appropriations and \$42,000,000 by transfer from the hiring and policing development program. All funds available to the TRGP can be used for hiring, equipment, training and anti-methamphetamine activities. This will allow tribes maximum flexibility to respond to their most urgent local priorities.

Technology and interoperability grants.—The bill provides \$98,885,000 for technology and interoperability grants, including a transfer of \$1,500,000 to the NIST Office of Law Enforcement Standards to complete remaining aspects of Project 25 interface standards and to begin developing standards for emerging technologies, such as VoIP applications, for public safety operations. Within the amount provided, COPS is directed to fund congressionally-designated activities in the amounts identified in the following table, which the bill incorporates by reference:

Methamphetamine hotspots.—The bill provides \$17,185,000 for the Methamphetamine Hotspots program, including a transfer of \$10,000,000 to DEA for assistance to State,

local and tribal law enforcement agencies with the removal and disposal of hazardous materials at clandestine meth labs. Within the amount provided, COPS is directed to

fund congressionally-designated activities in the amounts identified in the following table, which the bill incorporates by reference:

SALARIES AND EXPENSES

The bill provides \$39,000,000 for the management and administration of COPS programs.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

The Act includes the following general provisions for the Department of Justice:

Section 201 makes available additional reception and representation funding for the Attorney General from the amounts provided in this title.

Sections 202 through 210 and sections 212 through 213 continue general provisions without substantive change from previous years.

Section 211 requires the Department to follow reprogramming procedures prior to any deviation from the program amounts specified in this title and to any re-obligation, for any purpose other than that of the program for which the prior obligation was made, of de-obligated balances of funds provided in previous years.

Section 214 permits up to 3 percent of grant and reimbursement program funds made available to the Office of Justice Programs to be used for training and technical assistance and permits up to 3 percent of grant and reimbursement program funds made available to that office to be transferred to NIJ or BJS for criminal justice research and statistics.

Section 215 gives the Attorney General the authority to waive matching requirements for certain Second Chance Act grant programs.

Section 216 permits the use of appropriated funds for travel and health care of personnel serving abroad.

TITLE III

SCIENCE

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

The bill provides \$6,990,000 for the Office of Science and Technology Policy (OSTP). OSTP shall provide leadership and active coordination on STEM education; nanotechnology, including its societal dimensions; and hydrology research and water resources, understanding terrestrial managed and unmanaged ecosystems and their role in climate change, and soil science and the role of soils in the carbon cycle. Each of these areas involves significant activities of multiple departments and agencies and is critical to issues of national importance.

OSTP personnel.—OSTP shall provide a report to the Committees on Appropriations not later than 90 days following enactment of this Act, detailing the number, by function, of personnel authorized and currently on-board, at the OSTP, including all IPAs, reimbursable, non-reimbursable and detailed personnel, and identifying the agencies from which the staff is detailed.

Plant data.—OSTP shall provide a report within 120 days of enactment on maintenance of plant data, both genotypic and phenotypic, through combined public and private efforts.

Dispersants.—OSTP Director shall, within 60 days of enactment of this Act, submit to the Committees on Appropriations a research plan for the most urgent research questions regarding dispersants and within 180 days of enactment of this Act outline a comprehensive research plan and funding strategy for research on dispersants including their benefits, detriments, and the monitoring of their long-term effects on the environment.

NATIONAL AERONAUTICS AND SPACE
ADMINISTRATION
AGENCY SUMMARY

Annual budget preparation and presentation.—NASA's annual budget submission continues to be disappointing in its lack of transparency. NASA is directed to prepare the annual budget submission to Congress in a manner fully consistent with direction contained in 42 USC 16611b.

Reserves reporting.—NASA is directed to include in its budget justification the reserve assumed by NASA to be necessary within the amount proposed for each directorate, theme, program, project and activity, or, if the proposed funding level for a directorate, theme, program, project or activity is based on confidence level budgeting, the confidence level assumed in the proposed funding level.

Reporting of cost, schedule and content for NASA research and development projects.—NASA is directed to cooperate fully and to provide timely program analysis, evaluation data, and relevant information to the Government Accountability Office (GAO) so that GAO can report to Congress in advance of the annual budget submission of the President and semiannually thereafter on the status of large-scale NASA programs, projects, and activities based on its review of this information.

Breach reporting.—Pursuant to section 103 of Public Law 109-155, the NASA Authorization Act of 2005, NASA is required to deliver several reports to the appropriate authorizing committees when project costs grow in excess of certain thresholds. NASA is directed to submit these reports concurrently to the Committees on Appropriations.

Monthly reports.—To improve the usefulness of monthly reports on obligations and disbursements required by section 525(b) of the Fiscal Year 2008 Omnibus Appropriations Act, NASA is directed to include in the funding that it reports as available not only new budget authority, but also carryover and recoveries. Specifically, on the 15th business day of each month beginning in March 2011, the Administrator of NASA shall report in writing to the Committees on Appropriations detailed financial information on the execution of the budget for the preceding month and for the fiscal year to date. Each report shall provide information on obligations incurred against, and outlays made from, the appropriations for fiscal year 2011 and prior years; available carryover from prior year appropriations; and recoveries from prior or current year appropriations, presented by (1) appropriation account, (2) theme, (3) program or project, (4) Center, and (5) object class, and any other financial information requested by the Committees on Appropriations.

Contracting.—NASA is directed to minimize its use of cost plus fee contracting and to employ fixed price contracts for all systems, components, and projects using proven or high technical readiness technology.

Operating plans.—NASA is directed to provide the amount of civil service manpower assumed in the plans for each account and for the four themes within the Science account, the three themes within the Space Research and Technology account, and the four themes within the Space Operations account.

Summary funding provided for NASA is delineated more fully in the table below and in the account summaries.
NASA (\$'s in thousands)

Science	5,005,600
Aeronautics	579,600
Space Research and Technology	559,000

Exploration	3,706,000
Space Operations	5,247,900
Education	180,000
Cross Agency Support	3,085,700
Construction and Environmental Compliance and Restoration ¹	528,700
Inspector General	37,500

Total	18,930,000
-------------	------------

¹ Includes \$20,000,000 in prior year appropriations

SCIENCE

The bill provides \$5,005,600,000 for science, and within funds provided for planetary science, makes \$15,000,000 available for a reimbursable agreement with the Department of Energy to re-establish the facilities required to produce fuel for radioisotope thermoelectric generators to enable future science missions.

Earth system science pathfinder, other missions and data analysis.—NASA is directed to use at least \$10,000,000 within funds provided to continue and expand its pilot data product effort on above-ground terrestrial biomass carbon using data available from existing sources and measurement systems to establish a baseline forest biomass and carbon inventory pilot at the management relevant 30-meter scale of Landsat data sufficient to resolve forest biomass on parcels of 10 acres or more. Also within funds provided, \$5,000,000 is for continuing and expanding ongoing carbon monitoring system pilot activities and to add a pilot effort on soil carbon working with the appropriate other Federal agencies.

Scatterometer.—NASA shall support NOAA in any efforts to develop a dual-frequency operational scatterometer to provide sea surface vector wind measurements in both light and strong wind conditions.

Jupiter system mission.—In support of the potential collaboration between NASA and the European Space Agency on Jupiter system exploration with orbiting spacecraft for both Europa and Ganymede, the bill provides \$30,000,000 within funds provided for Outer Planets to continue studies of this flagship mission.

International lunar network.—NASA shall immediately move forward with this mission.

Solar Probe Plus.—The bill includes \$14,100,000 for the Solar Probe Plus mission, and NASA is directed to work aggressively to achieve a launch in 2016.

Wide Field Infrared Survey Telescope (WFIRST).—WFIRST was identified as the first priority in the recent astronomy and astrophysics decadal survey. NASA is strongly encouraged to make a robust request for WFIRST in fiscal year 2012 that builds on the work of the Joint Dark Energy Mission project.

Civil service labor and expenses.—Although funds for the Science account are made available for two years, NASA shall manage civil service labor and expenses within the account on a one-year basis.

Details of funding for the Science Mission Directorate are provided in the following table.

Science Mission Directorate (dollars in thousands)

Earth Science	
Earth Science Research	438,100
Earth Science Research and Analysis	324,600
Computing and Management	113,500
Earth Systematic Missions	809,400
Global Precipitation Measurement (GPM)	128,800

<i>Science Mission Directorate (dollars in thousands)—Continued</i>	
Glory Mission	21,900
Landsat Data Continuity Mission (LDCM)	156,800

AERONAUTICS

The bill provides \$579,600,000 for aeronautics.

Civil service labor and expenses.—Although funds for the Aeronautics account are made available for two years, NASA shall manage civil service labor and expenses within the account on a one-year basis.

Green aviation.—NASA is directed to establish a lead Center of Excellence (COE) for Green Aviation at an existing NASA Research Center with appropriate expertise and comprehensive test facilities. This COE shall coordinate the program as it grows and establish public-private partnerships with industry and academia to test and develop subsystems, full scale concept aircraft and other technologies in realistic flight environments up to technology readiness level 6. NASA shall report on its detailed implementation of these tasks by April 1, 2011.

SPACE RESEARCH AND TECHNOLOGY

The bill provides \$559,000,000 for Space Research and Technology including funding for Small Business Innovative Research (SBIR) and Small Business Technology Transfer (STTR) programs, for exploration technology research and development proposed within the Exploration account, and for general space research and technology. NASA shall propose an appropriate allocation of funds for this account, including commercial reusable suborbital research, as part of its operating plan for fiscal year 2011. Consequently, no detail is provided herein.

Exploration technology development.—Any activities requested as part of exploration technology development under the Exploration account, including initiation of the Flagship 1 program, may be funded in this account.

Low technology readiness space research and technology.—The general space research and technology element of this program will deal with technologies at low levels of technology readiness. NASA is directed to pattern the management of this program element on the proven advanced research projects agency model. It will be critical that NASA attract visionary technology leaders to limited-term positions as program managers at NASA Headquarters because their decisions will determine the success of this program. To en-

sure broad outreach to the best centers of new and innovative technologies, no NASA center shall be assigned a role in the management of this program, and NASA center research and development shall not be accorded any preference over research by public and private entities outside NASA.

Civil service labor and expenses.—Although funds for the Space Research and Technology account are made available for two years, NASA shall manage civil service labor and expenses within the account on a one-year basis.

EXPLORATION

The conference agreement provides \$3,706,000,000 for exploration. Within funds provided, no less than \$300,000,000 shall be for Commercial Cargo; no less than \$250,000,000 shall be for Commercial Crew; no less than \$1,800,000,000 shall be for development of a heavy lift launch vehicle system; and no less than \$1,200,000,000 shall be for development of the Orion multipurpose crew exploration vehicle.

Heavy lift launch vehicle.—The bill provides \$1,800,000,000 to begin building an integrated heavy lift launch vehicle system for crew and cargo. The system shall enable human transportation at the highest possible safety standards and lowest life cycle costs for human exploration beyond low Earth orbit and shall be designed, managed, and integrated by the Marshall Space Flight Center. This funding shall be part of a sustained, parallel development effort of a common core and an upper stage to culminate in an initial human space transportation capability by 2016. The heavy lift launch vehicle, as authorized in Public Law 111-267, shall have an initial lift capability of not less than 130 tons to low Earth orbit, have the capability to lift the necessary elements for missions beyond low Earth orbit in order to extend human exploration capabilities, and serve as back-up for crew and cargo transportation to the International Space Station. No funding from this appropriation for the vehicle shall be used for technology development, crew vehicle development, or supporting mission or ground operations systems development. The program shall be managed under a strict cost cap of \$11,500,000,000 through fiscal year 2017. Within 60 days of enactment of this Act, NASA shall report to the Committees on Appropriations on planned milestones, draft requirements, the conceptual design of the heavy lift launch vehicle, planned ground and early flight testing programs and deliverables for the heavy lift launch vehicle program, along with any existing contract vehicles the agency intends to use. As part of this report, NASA shall evaluate the preceding recommended cost cap and either validate the proposed cap or provide a viable and validated alternative.

Orion multipurpose crew exploration vehicle.—The bill provides \$1,200,000,000 for the Orion multipurpose crew exploration vehicle that will enable human transportation beyond low Earth orbit. The vehicle shall be capable of being launched on the heavy lift launch vehicle and may also provide alternative access to low Earth orbit, including the International Space Station by fiscal year 2014. The program shall be managed under a strict cost cap of \$5,500,000,000 through fiscal year 2017. No funding from this appropriation for the Orion capsule shall be used for technology development, heavy lift launch vehicle development, or supporting mission or ground operations systems development. Within 60 days of enactment of this Act, NASA shall report to the

Committees on planned milestones, expected performance and configurations, a planned testing program, and deliverables for the crew exploration vehicle program, along with any suggestions for streamlining oversight. As part of this report, NASA shall evaluate the preceding cost cap and either validate the cap or provide a viable and validated alternative.

Robotic precursor program.—NASA shall consolidate all elements of the lunar lander and exploration robotics programs and locate project management at the Marshall Space Flight Center as proposed.

Additional funds.—The unallocated amount of \$156,000,000 may be used for activities requested under human research or robotic precursors or to augment or enhance other activities explicitly funded under Exploration. Funding for exploration technology development is provided as part of Space Research and Technology.

Civil service labor and expenses.—Although funds for the Exploration account are made available for two years, NASA shall manage civil service labor and expenses within the account on a one-year basis.

SPACE OPERATIONS

The bill provides \$5,247,900,000 for space operations including \$989,100,000 for Space Shuttle operations and support; \$825,000,000 for an additional Space Shuttle logistics flight, launch complex development, and development of ground operations for the heavy lift launch vehicle and the Orion crew exploration vehicle; \$2,745,000,000 for International Space Station operations, maintenance, research, development and support; and \$688,800,000 for Space and Flight Support operations, production, research, development and support.

Additional shuttle logistics flight and launch complex development.—Prior to obligation of any funds for an additional shuttle logistics flight the NASA Administrator shall certify to the Committees on Appropriations that an additional shuttle flight will be at least as safe as the remaining flights on the shuttle manifest dated February 28, 2010, that the intended mission is in the national interest, and that the risks to be incurred are commensurate with the benefits.

Any funds not spent on an additional shuttle logistics flight shall be available for: launch complex development only for activities at the Kennedy Space Center related to the civil, non-defense launch complex; use at other NASA flight facilities that are currently scheduled to launch cargo to the International Space Station; and development of ground operations for the heavy lift launch vehicle and the Orion crew exploration vehicle. No funds are provided for the refurbishment of ET-94.

Within 60 days of enactment of this Act, NASA shall provide the Committees on Appropriations the five-year plan for the civil launch complex and other NASA flight facilities and a plan and budget estimate for development of ground and mission operations to support the heavy lift launch vehicle and the Orion crew exploration vehicle. As part of this plan, NASA shall clearly delineate the respective responsibilities of ground and mission operations development and operations as distinct from the responsibilities of the heavy lift launch vehicle and Orion crew exploration vehicle; explain how the recommended plan will provide the lowest life cycle costs for human exploration beyond low Earth orbit; and supply cost estimates for development and operations to serve as the basis for an appropriate cost cap on development and an achievable target level of annual operating costs.

Any funds for construction activities shall be transferred to the construction and environmental compliance and restoration account and become available for five years.

Satellite servicing.—Within the amounts provided for space operations, \$75,000,000 is for continuing efforts in use of the next generation of human space flight architecture to service existing and future observatory-class scientific spacecraft as identified in the conference report accompanying division B of Public Law 111-8. The activities to be undertaken shall be a joint project of the Space Operations, Science, and Exploration mission directorates, and shall include technology demonstrations for both robotic and human servicing capabilities.

International Space Station national laboratory.—NASA shall provide the guaranteed access for International Space Station (ISS) national laboratory experiments provided in Section 504(d)(1) of Public Law 111-267.

Disposition of space shuttle orbiters.—Following the retirement of the space shuttles, NASA should bear any costs that normally would be associated with surplusing the orbiters, including taking hazardous orbiter systems offline. Any shuttle recipient should bear transportation costs, along with costs associated with preparing the surplused orbiter for display. If an orbiter is awarded to the Smithsonian Institution, NASA shall provide it at nominal or no charge. Any funds received from shuttle orbiter disposition shall be available only as provided in subsequent appropriations Acts.

Civil service labor and expenses.—Although funds for the Space Operations account are made available for two years, NASA shall manage civil service labor and expenses within the account on a one-year basis.

EDUCATION

The bill provides \$180,000,000 for education including \$44,800,000 for Space Grant programs. The bill makes a technical amendment related to the availability of the Endeavor Teacher Fellowship Trust Fund.

National space grant college and fellowship program.—NASA is directed to fund 42 states or jurisdictions at \$900,000 each and 10 states or jurisdictions at \$700,000 each. No funds for administrative costs may be withheld by NASA from these grants.

Educational activities at NASA centers.—NASA is directed to fund each of the ten NASA center visitor centers at \$1,000,000 for the development of educational activities. No funds for administrative costs may be withheld by NASA from these grants.

Informal education grant program.—NASA is directed to use \$8,000,000 to fund competitively selected grants to informal education institutions for science, technology, engineering, and mathematics education activities including partnerships between these institutions and school systems to accomplish inquiry-based education. No funds for administrative costs may be withheld by NASA from these grants.

Minority university research and education program.—NASA is directed to fund this program at \$30,000,000.

Experimental Program to Stimulate Competitive Research.—NASA is directed to fund this program at \$24,900,000.

Civil service labor and expenses.—Although funds for the Education account are made available for two years, NASA shall manage civil service labor and expenses within the account on a one-year basis.

CROSS AGENCY SUPPORT

The bill provides \$3,085,700,000 for Cross Agency Support including \$2,270,200,000 for

NASA center management and operations; \$47,500,000 for independent verification and validation (IV&V); and \$56,125,000 for congressionally-designated projects that are included by reference. Funds are made available for one year.

Activities of the Chief Engineer.—NASA is directed to fund these activities at the amount included in the budget request.

Acquisition workforce increase.—Within funds provided, up to \$3,592,000, as requested, may be used to enhance NASA's acquisition workforce.

Affordability adjustment.—The bill assumes a general reduction that may be applied to unobligated balances from prior years and to amounts provided herein. Such reductions, which shall be detailed in NASA's initial operating plan, shall not be assessed against those activities augmented by the bill or otherwise addressed by this explanatory statement.

Employee performance communications system (EPCS).—In lieu of the report requested in the Senate report to S. 3636, Government Accountability Office [GAO] shall assess NASA's EPCS. To the extent practical, GAO should assess whether EPCS, as implemented by NASA, utilizes leading human capital practices and results in a system that provides both accountability and fairness for all employees. GAO should also include in its assessment the extent to which NASA's EPCS has a process for planning, monitoring, developing, assessing, and rewarding employee performance that is aligned to the agency's goals and promotes a performance culture that focuses on two-way communication and accountability for results, and clearly differentiates between high and low performing employees. NASA's Office of Diversity and Equal Opportunity shall complete its assessment of the issues raised in the Senate report regarding equal opportunity and inequity among supervisory and non-supervisory staff and NASA shall respond appropriately to those findings.

Allocation of funds to specific program elements.—Details of the funding break-out within Cross Agency Support are provided in the following table.

Cross Agency Support (dollars in thousands)	
Center Management and Operations	2,270,200
Center Institutional Capabilities	1,776,200
Center Programmatic Capabilities	494,000
Agency Management and Operations	809,200
Agency Management	400,000
Safety and Mission Success ...	204,200
Safety and Mission Assurance	49,000
Chief Engineer	103,600
Chief Health and Medical Officer	4,100
Independent Verification and Validation	47,500
Agency IT Services (AITS)	177,800
IT Management	16,100
Applications	79,100
Infrastructure	82,600
Strategic Capabilities Assets	
Program	29,800
Simulators	11,700
Thermal Vacuum Chambers	8,400
Arc Jets	9,700
Congressionally Directed Items	56,125
Affordability adjustment	-52,425

Total, Cross Agency Support 3,085,700
Congressionally-designated projects.—Within the appropriation for cross agency support

programs, the conference agreement provides for the following congressionally-directed activities:

National Aeronautics and Space Administration
Cross Agency Support
Congressionally-designated Items
(\$ in thousands)

Recipient	Project	Amount
Anne Arundel County Public Schools, Annapolis, MD	STEM Innovation Incubator	1,000
Bay Area Houston Economic Partnership, Houston, TX	Space Alliance Technology Outreach Program	2,000
Baylor University, Waco, TX	Baylor Advanced Composite Materials Research and Baylor Research Innovation Collaborative	2,300
Baylor University, Waco, TX	Space Sciences Consortium	1,000
City of Downey, Downey, CA	Remote Sensing Exhibit	500
College Opportunity Resources for Education, Philadelphia, PA	STEM Scholarship Program	1,500
Dallas County Community College District, Dallas, TX	STEM Professions Initiative	300
Delaware AeroSpace Education Foundation, Smyrna, DE	Science and Technology Literacy	175
Dillard University, New Orleans, LA	Dillard University Eighth Grade Initiative	300
Fulton-Montgomery Community College, Johnstown, NY	Center for Engineering and Technology	400
Glenville State College, Glenville, WV	Center of Teacher Excellence	10,000
GEAR UP Collaborative, Philadelphia, PA	Math, Science and Technology Enrichment Program	2,000
Imiloa Astronomy Center, Honolulu, HI	Imiloa Astronomy Center	2,500
Marshall Space Flight Center, Huntsville, AL	Advanced Algorithm, Integration, and Maturation	500
Marshall Space Flight Center, Huntsville, AL	Development of Characterization Techniques for Advanced High Temperature Materials in Space Launch Applications	500
Marshall Space Flight Center, Huntsville, AL	NASA Space Nuclear Power Systems Research and Development	500
Marshall Space Flight Center, Huntsville, AL	Product Lifecycle Management	500
Middle Tennessee State University, Murfreesboro, TN	Aviation Safety and Human Factors Research Using Emerging Technologies	400
Middle Tennessee State University, Murfreesboro, TN	Future Aerospace Scientists in Tennessee	300
Mississippi State University, Starkville, MS	Linking Disruptive Manufacturing Research with Manufacturing Industries	1,250
Morgan State University, University of Maryland Eastern Shore, and Bowie State University, Baltimore, MD	Chesapeake Information Based Aeronautics Consortium	3,000
National Commission on Teaching and America's Future, Towson, MD	NASA "21st Century Learning Studios"	300
National Institute for Aviation Research, Wichita, KS	National Center for Advanced Materials Performance	950
New Mexico State University, Las Cruces, NM	Science, Engineering, Math, Aerospace Academy	200
North Carolina A&T University, Greensboro, NC	Low-Power Microelectronics for Harsh Environments Encountered in NASA Missions	200

National Aeronautics and Space Administration
Cross Agency Support
Congressionally-designated Items
(\$ in thousands)

Recipient	Project	Amount
Northern Kentucky University Research Foundation, Highland Heights, KY	STEM Outreach Initiative	200
Rochester Area Colleges, Inc., Rochester, NY	Center for Excellence in Math and Science	500
Southeast Missouri State University, Cape Girardeau, MO	Missouri NASA Math, Science and Technology Education Enhancement Program	500
Space Florida, Cape Canaveral, FL	Clean Energy Initiatives	750
Space Florida, Cape Canaveral, FL	Launch Complex-36/46 Infrastructure	1,650
Spelman College, Atlanta, GA	Women in Science and Engineering Program	100
St. Louis Community College, St. Louis, MO	Missouri Challenge	500
Teach for America, New York, NY	Teach for America STEM Activities	3,000
Tennessee Technological University, Cookeville, TN	STEM Innovation Through Digital Manufacturing	200
Towson University, Coppin State University, and University of Maryland Biotechnology Institute, Towson and Baltimore, MD	Baltimore Excellence in Science Teaching Partnership	1,000
University of Alabama in Huntsville, Huntsville, AL	Airborne Sensor for Disasters and Environmental Monitoring	500
University of Louisville, Louisville, KY	University of Louisville Diagnosing and Mitigating Human Exposure to Radiation	2,000
University of Maryland, College Park, MD	University-Assisted K-12 Engineering Education Program	800
University of Massachusetts, Amherst, Amherst, MA	Large Millimeter Telescope	500
University of Mississippi, Oxford, MS	National Center for Remote Sensing, Air, and Space Law	1,400
University of Mississippi, University, MS	Innovative STEM Education	200
University of North Dakota, Grand Forks, ND	Upper Midwest Aerospace Consortium	3,000
University of Northern Iowa, Cedar Falls, IA	National Institute for Early Mathematics and Science Education	200
University of Southern Mississippi, Hattiesburg, MS	Transitioning Space Technologies into the Commercial Sector	1,750
University of Toledo, Toledo, OH	Advanced Photovoltaics Array Testing	1,000
University of Vermont, Burlington, VT	Complex Systems Center	1,300
West Virginia University, Morgantown, WV	Automatic Sensor Webs for Scientific Discovery	500
West Virginia University, Morgantown, WV	Aviation Safety Research and Design	500
Wheeling Jesuit University, Wheeling, WV	National Technology Transfer Center	1,500

CONSTRUCTION AND ENVIRONMENTAL COMPLIANCE AND RESTORATION

The bill provides \$508,700,000 and \$20,000,000 to be derived from available unobligated balances appropriated in previous years. The recommendation fully supports the requests in the budget. NASA is directed to allocate these funds as follows:

Science	\$40,500,000
Exploration	109,800,000
Space operations	15,600,000
Cross agency support	362,800,000
Institutional investments	(300,700,000)
Environmental compliance and restoration ...	(62,100,000)

Historic buildings.—Within funds provided for cross agency support construction, NASA is directed to use \$20,000,000 for restoration of historic buildings.

Provision of form 1509.—NASA is directed to continue to provide NASA form 1509 for each construction of facilities (CoF) project submitted in the annual budget request or an initial operating plan and for each CoF project subject to a reprogramming notification.

Capabilities for the future.—NASA is urged to request funding for aeronautics, science, and institutional construction of facilities to address at least 20 percent per year of the need identified in the National Research Council report *Capabilities for the Future—An Assessment of NASA Laboratories for Basic Research*.

OFFICE OF INSPECTOR GENERAL

The conference agreement provides \$37,500,000 for the Office of Inspector General, which shall be available for one year.

ADMINISTRATIVE PROVISIONS

The bill contains language regarding the availability of funds for announced prizes.

The bill contains language providing for the transfer of certain amounts between appropriations accounts.

The bill contains language regarding transfers of unexpired balances.

The bill contains a provision that stipulates that funding designations and minimum funding requirements contained in any other Act shall not apply to funds appropriated in this Act for NASA.

The bill includes language permitting transfer of up to \$60,000,000 from NASA Exploration and Space Operations accounts to the Economic Development Administration to promote economic development and ease workforce transition related to the retirement of the Space Shuttle and programmatic changes in the Exploration program.

NATIONAL SCIENCE FOUNDATION

Continuity in funding levels.—The American Recovery and Reinvestment Act of 2009 (ARRA) included \$3,002,000,000 in funding for the National Science Foundation (NSF). Roughly two-thirds of these supplemental funds have supported 2-, 3-, 4-, and 5-year grants. Consistent with normal NSF practice, the majority of the awards fund 3-year grants. In the Rising Above the Gathering Storm Revisited report of the National Research Council the authors state, “Without new actions the precipitous reduction in efforts that were being funded by that mechanism will be very damaging to America’s future ability to compete for jobs in the global marketplace.” The fiscal year 2011 budget request projects NSF funding in fiscal year 2012 of \$7,766,000,000 compared to \$8,490,000,000 projected for that year by the budget request for fiscal year 2010. This lower level is only 4.6 percent above the budget request for fis-

cal year 2011 and \$1,104,420,000 below the total funding level for fiscal year 2009. Should private sector R&D employment not grow sufficiently to make up the difference, the resulting downturn in employment and career opportunities in science, engineering and mathematics will undermine the objectives articulated in Rising Above the Gathering Storm to “make the U.S. the most attractive setting in which to study and perform research so that we can develop, recruit, and retain the best and brightest students, scientists, and engineers from within the U.S. and throughout the world.”

RESEARCH AND RELATED ACTIVITIES (INCLUDING TRANSFER OF FUNDS)

The bill provides \$5,949,080,000 for research and related activities, including a transfer of \$54,000,000 from NSF to the United States Coast Guard (USCG) for icebreaking services to cover all anticipated operation and maintenance costs for fiscal year 2011. It is expected that all future year operation and maintenance budget authority for these USCG icebreakers will be requested by the Department of Homeland Security, and the Committees will not entertain a request for this funding under NSF in fiscal year 2012.

Within the funds provided, NSF is directed to maintain funding at the levels requested for the following activities:

Climate change
Cyber-enabled discovery and innovation
Science and engineering beyond Moore’s law
Cybersecurity Research
National Radio Astronomy Observatory
National Astronomy and Ionosphere Center.—NSF is directed to maintain support for the National Astronomy and Ionosphere Center at the same level as in fiscal year 2010.

Hydrology, terrestrial ecosystems and soils.—NSF shall strengthen integration and coordination, including interagency coordination, of data systems, observations, and modeling across hydrology research, across soil science, and across terrestrial ecology research.

Gemini telescope.—NSF is directed to increase U.S. support of the Gemini telescope by \$2,000,000 above the request in order to acquire additional telescope time for NSF investigators.

EPSCoR.—Within the funds provided, \$156,000,000 is for EPSCoR.

Inquiry-based science and engineering courses.—NSF is strongly encouraged to fund augmentations of research grants to support development and implementation of inquiry-based, experiential science, technology, engineering, and math (STEM) courses for college freshmen, sophomores, or non-majors whereby students develop the habits of mind of a scientist.

Robotics research.—NSF shall increase support for robotics research that brings together products of the Beyond Moore’s Law and Nanotechnology initiatives along with rapid advances in computer science, electronics, and sensing.

MAJOR RESEARCH EQUIPMENT AND FACILITIES CONSTRUCTION

The bill provides \$157,190,000 for Major Research Equipment and Facilities Construction. None of the funds may be used to reimburse the Judgment fund. The following table shows the specific projects for which funding was requested and is provided.

Advanced Ligo	\$23,580,000
Atacama Large Millimeter Array (ALMA)	13,910,000
Advanced Technology Solar Telescope (ATST)	17,000,000

NEON	12,000,000
Ocean Observatories Initiative (OOI)	90,700,000

NSF shall be mindful that research systems for modeling and observing the environment have the potential to demonstrate techniques that may become part of operational systems.

EDUCATION AND HUMAN RESOURCES

The bill provides \$900,000,000 for Education and Human Resources. Adjustments to the budget request for specific programs are as follows:

Informal Science Education	+1,600,000
Pilot comprehensive initiatives in Inquiry-Based Education	+64,000,000
Historically Black Colleges and Universities UP	+32,000,000
Louis Stokes Alliances for Minority Participation ...	+44,750,000
Tribal Colleges and Universities	+14,250,000
Federal Cyber Service: Scholarships for Service/Cybercorps	+30,000,000

Graduate STEM fellows in K-12 education.—All proposals for fellows programs shall require science and engineering fellows to be trained in inquiry-based instruction and prepared to support this approach in the schools where they are assigned. NSF may broaden this program to allow fellow assignments in community colleges.

Inquiry-based college courses in STEM.—NSF shall use at least 20 percent of the funds provided for Transforming Undergraduate Education in STEM to support the development and implementation of inquiry-based, experiential STEM instruction in courses for freshmen, sophomores, and non-majors whereby the students develop the habits of mind of a scientist.

Within the Discovery Research K-12 program, NSF shall competitively select and fund at least four 4-year pilot comprehensive initiatives to demonstrate how to effectively implement and sustain inquiry-based, experiential instruction in K-12 STEM classes. The aim is to ensure that K-12 courses support the development in students of the habits of mind of a scientist. From among the highly reviewed proposals, NSF shall select pilots in at least one rural and one urban setting, from both primary and secondary instructional levels, and from different regions of the country. Each pilot is to incorporate the full range of activities necessary including teacher education, mentoring, and support; implementation in one or more schools; student assessment; and project evaluation. Each pilot should provide a report documenting the experience; identifying evidence about best practices and lessons learned, including a recommended implementation plan; evaluation of curricula, materials and assessment instruments used; and student learning outcomes. These reports shall be in a form suitable for use by other schools and school systems and be made widely available. As appropriate, pilots may be extended with additional funding in future fiscal years.

Robotics competitions.—Not less than \$2,000,000 is for competitive grants to promote STEM education through robotics competitions. Within 60 days of enactment of this Act NSF shall provide a report and spend plan to the Committees on Appropriations that details the proposed scope and implementation methodology for this program.

Robert Noyce teacher scholarships.—The bill provides \$55,000,000 for the Robert Noyce Teacher Scholarship program.

Best practices in K-12 STEM education.—NSF has yet to submit an interim or final report on the work of a panel of experts on STEM education called for in the statement of managers accompanying Public Law 111-117. NSF shall submit this report expeditiously and distribute widely the findings and recommendations of the report to U.S. educators.

AGENCY OPERATIONS AND AWARD MANAGEMENT

The bill provides \$319,190,000 for agency operations and award management. NSF may use up to \$2,000,000 within funds provided to increase the Foundation's acquisition workforce.

Within 90 days of enactment of this Act, NSF shall provide to the Committees on Appropriations a report detailing total personnel costs, excluding costs for program travel and travel support for reviewers, for operating the Foundation, including rotators, IPAs, and support contractors. The report shall detail the accounts and directorates within Research and Related Activities that are the source of this funding.

OFFICE OF THE NATIONAL SCIENCE BOARD

The bill provides \$4,840,000 for the National Science Board.

OFFICE OF INSPECTOR GENERAL

The bill provides \$14,700,000 for the Office of Inspector General (OIG). Within 180 days of enactment of this Act, the OIG shall develop a report analyzing NSF actions to improve workforce management and work environment.

TITLE IV

RELATED AGENCIES

COMMISSION ON CIVIL RIGHTS

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$9,400,000 for the Commission on Civil Rights.

Improving oversight.—Chronic financial and managerial problems at the Commission have been allowed to continue for too long without sufficient attention. In order to rectify this situation, the bill establishes an Inspector General for the Commission and provides that the post will be filled by the individual holding the position of Inspector General at the Equal Employment Opportunity Commission (EEOC). The IG is tasked with the duties and responsibilities specified in the Inspector General Act of 1978, to include the conduct of audits and reviews of Commission programs, finances and personnel. Funding for the operation of the Commission's OIG, in the amount of \$900,000, is provided by transfer to the EEOC OIG.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

SALARIES AND EXPENSES

The bill provides \$355,303,000 for EEOC Salaries and Expenses.

Backlog reduction.—In order to advance EEOC toward its backlog reduction goals, the bill supports an increase in EEOC personnel, which shall be prioritized toward the hiring of frontline staff that have the biggest impact on case resolutions. To assist in the monitoring of EEOC's hiring progress, EEOC is directed to continue submitting quarterly staffing reports, consistent with the direction provided in the statement accompanying P.L. 111-117.

Full service intake.—EEOC is currently reviewing and considering the adoption of a National Full Service Intake Model, which would create dedicated charge intake units in each field office to handle the intake process from pre-charge counseling through

charge filing. EEOC is directed to submit a report detailing its views on this model to the Committees on Appropriations within 120 days of the enactment of this Act.

Federal sector hearings.—EEOC is directed to submit a copy of the updated Federal Sector hearing plan (adjusted for stakeholder input) to the Committees on Appropriations prior to the implementation of such plan.

Office of Inspector General (OIG).—The appropriating paragraph for the Commission on Civil Rights establishes that EEOC's Inspector General will simultaneously hold the post of Inspector General of the Commission on Civil Rights. The funds needed by the EEOC OIG to carry out this new responsibility are provided by transfer directly from the Commission on Civil Rights budget.

STATE AND LOCAL ASSISTANCE

The bill provides \$30,000,000 for EEOC State and Local Assistance.

INTERNATIONAL TRADE COMMISSION

The bill includes \$87,000,000 for the International Trade Commission (ITC) for fiscal year 2011.

LEGAL SERVICES CORPORATION

PAYMENT TO THE LEGAL SERVICES CORPORATION

The bill provides \$440,000,000 for the Legal Services Corporation (LSC).

Governance and management.—Continuing reports of governance and management issues at LSC undermine the credibility of the organization and complicate efforts to direct additional funds into legal aid, where they are desperately needed. Progress has been made in completing action on reform recommendations identified by GAO and the LSC Inspector General, but some recommendations remain outstanding and additional issues have been raised. The timely resolution of these issues must be a priority of the Corporation so that management and governance questions do not continue to overshadow the good work being done by LSC and its grantees.

Cost effectiveness studies.—LSC is directed to continue its collaboration with DOJ to conduct a national level economic study of the cost effectiveness of legal aid that would expand on existing state models and establish more broadly applicable results.

Private attorney involvement.—All LSC grantees are required to take steps to incentivize private attorney involvement in their programs, but these efforts are not performing up to their potential. By making a more aggressive push for pro bono private attorney services, grantees could alleviate some pressure on their own budgets and increase the number of clients served. LSC is urged to seek further action from its grantees to improve private attorney participation.

Legal aid fellowships.—LSC is reportedly considering a proposal to create a fellowship program for retirees or recent law school graduates who will commit to working in legal aid for a designated period of time. LSC is directed to conduct a study of this proposal in order to further develop how such a fellowship program would work and how much it would cost to implement. LSC shall report to the Committees on Appropriations with the results of that study no later than 120 days after the enactment of this Act.

ADMINISTRATIVE PROVISION—LEGAL SERVICES CORPORATION

Title V of the bill revises the LSC administrative provision to permit the use of funds for the pursuit of class action cases on behalf of individuals eligible for legal aid. This revision

will better enable LSC grantees to address systemic problems, such as predatory lending and wrongful eviction, in a more efficient manner by consolidating cases. All other restrictions are unchanged.

MARINE MAMMAL COMMISSION

SALARIES AND EXPENSES

The bill includes \$3,500,000 for the Marine Mammal Commission (MMC). Within the funds provided, the MMC will be able to establish an interagency task force to harmonize environmental analyses without compromising the integrity of the analytical results, which has the potential to save millions of dollars every year; continue efforts to build capacity for marine mammal research and conservation in foreign and international waters; and respond to Deepwater Horizon oil spill events, including conducting reviews of lessons learned among the relevant agencies and governments, assessment of the effects of the spill on marine mammals, and monitoring and documenting recovery rates.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

The bill includes \$48,000,000 for the Office of the U.S. Trade Representative (USTR).

Office of Legislative Affairs.—USTR's Office of Legislative Affairs has a responsibility to provide Congress with information, including the timely submittal of fiscal year budget justifications and the appropriate points of contact, neither of which occurred during the fiscal year 2011 budget cycle.

Travel.—USTR is directed to submit a report detailing travel expenditures of all senior staff on a monthly basis to the Committees on Appropriations.

World Trade Organization (WTO).—USTR is directed to continue to negotiate within the WTO, in consultation with the Department of Commerce, to seek express recognition of the existing right of WTO members to distribute monies collected from antidumping and countervailing duties as they deem appropriate. USTR shall consult with and provide regular reports on the negotiations to the Committees on Appropriations every 60 days upon enactment of this Act. The agency is also directed to conduct negotiations within the WTO consistent with the objectives of the Trade Act of 2002 (Public Law 107-210), maintain strong U.S. trade remedies laws, prevent overreaching by WTO Panels and the WTO Appellate Body, and prevent the creation of obligations to which the United States has never agreed.

STATE JUSTICE INSTITUTE

SALARIES AND EXPENSES

The bill provides \$6,273,000 for the State Justice Institute.

COMMISSION ON WARTIME RELOCATION AND INTERNMENT OF LATIN AMERICANS OF JAPANESE DESCENT

SALARIES AND EXPENSES

The bill provides \$1,700,000 for the Commission on Wartime Relocation and Internment of Latin Americans of Japanese Descent.

TITLE V

GENERAL PROVISIONS

Sections 501 through 511, sections 513 through 528, section 531, and sections 533 through 535 continue general provisions without substantive change from previous years.

Section 512 delays the obligations of any receipts deposited into the Crime Victims Fund in excess of \$820,000,000 until October 1, 2011. This language is continued to ensure a stable source of funds will remain available

for the program, despite inconsistent levels of criminal fines deposited annually into the Fund.

Section 529 amends Public Law 104-134 to permit the use of Legal Services Corporation funds for class action lawsuits on behalf of individuals eligible for legal aid.

Section 530 provides for rescissions of unobligated balances in certain departments and agencies funded in this Act.

Section 532 prohibits the use of funds to pay the attendance of more than 50 employees at any single conference outside the United States, except for law enforcement training and/or operational conferences for law enforcement personnel when the majority of Federal employees in attendance are law enforcement personnel stationed outside the United States.

Section 536 requires agencies funded under the Act to submit quarterly reports to their Inspector General or senior ethics official regarding the costs and contracting procedures

relating to conferences for which the cost to the Government is more than \$20,000.

Section 537 requires the Department of Justice, the Department of Commerce, the National Aeronautics and Space Administration, and the National Science Foundation to submit reports related to Federal agency clean energy sustainability goals and targets.

Section 538 makes adjustments to prior year congressionally-designated projects.

Section 539 authorizes the establishment of a Commission on Wartime Relocation and Internment of Latin Americans of Japanese Descent.

Section 540 requires the Legal Services Corporation to comply with audits by the Government Accountability Office and the Corporation's Inspector General.

Section 541 allows Federal Prison Industries (FPI) to participate in the Prison Industries Enhancement Certification program and allows FPI to carry out pilot projects to

produce items that are no longer produced in the United States.

Section 542 authorizes the establishment of a National Criminal Justice Commission.

DISCLOSURE OF EARMARKS AND CONGRESSIONALLY DIRECTED SPENDING ITEMS

Following is a list of congressional earmarks and congressionally directed spending items (as defined in clause 9 of rule XXI of the Rules of the House of Representatives and rule XLIV of the Standing Rules of the Senate, respectively) included in the bill or this explanatory statement, along with the name of each Senator, House Member, Delegate, or Resident Commissioner who submitted a request to the Committee of jurisdiction for each item so identified. Neither the bill nor the explanatory statement contains any limited tax benefits or limited tariff benefits as defined in the applicable House and Senate rules.

DISCLOSURE OF EARMARKS AND CON-
GRESSIONALLY DIRECTED SPENDING
ITEMS

Following is a list of congressional ear-
marks and congressionally directed spending
items (as defined in clause 9 of rule XXI of

the Rules of the House of Representatives
and rule XLIV of the Standing Rules of the
Senate, respectively) included in the bill or
this explanatory statement, along with the
name of each Senator, House Member, Dele-
gate, or Resident Commissioner who sub-

mitted a request to the House or Senate
Committee of jurisdiction for each item so
identified. Neither the bill nor the explana-
tory statement contains any limited tax ben-
efits or limited tariff benefits as defined in
the applicable House and Senate rules.

DIVISION C—DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2011

Following is an explanation of the effects of Division C, which makes appropriations for the Department of Defense for fiscal year 2011. As provided in Section 4 of the consolidated bill, this explanatory statement shall have the same effect with respect to the allocation of funds and the implementation of this division as if it were a joint explanatory statement of a committee of conference.

The recommendation in the Department of Defense Appropriations Act, 2011, incorporates some of the provisions of the Senate-reported version of the bill (S. 3800). The language and allocations set forth in Senate Report 111-295 should be complied with unless specifically addressed to the contrary in the accompanying bill and explanatory statement.

Funding levels for appropriations by account, and comparisons to last year's levels and the budget request, can be found in the table at the end of this division.

DEFINITION OF PROGRAM, PROJECT, AND ACTIVITY

For the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119) and by the Budget Enforcement Act of 1990 (Public Law 101-508), the term program, project, and activity for appropriations contained in this Act shall be defined as the most specific level of budget items identified in the Department of Defense Appropriations Act, 2011, the related classified annexes and explanatory statements, and the P-1 and R-1 budget justification documents as subsequently modified by congressional action. The following exception to the above definition shall apply: for the military personnel and the operation and maintenance accounts, for which the term "program, project, and activity" is defined as the appropriations accounts contained in the Department of Defense Appropriations Act.

At the time the President submits his budget for fiscal year 2012, the Department of Defense is directed to transmit to the congressional defense committees budget justification documents to be known as the "M-1" and "O-1" which shall identify, at the budget activity, activity group, and sub-activity group level, the amounts requested by the President to be appropriated to the Department of Defense for military personnel and operation and maintenance in any budget request, or amended budget request, for fiscal year 2012.

CLASSIFIED ANNEX

Adjustments to classified programs are addressed in the accompanying classified annex.

CONGRESSIONAL SPECIAL INTEREST ITEMS

Items for which additional funds have been provided as shown in the project level tables or in paragraphs using the phrase "only for" or "only to" are congressional special interest items for purposes of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, as specifically addressed in these materials.

REPROGRAMMING GUIDANCE

The Department of Defense is directed to continue following the reprogramming guidance for acquisition accounts as specified in the report accompanying the House version of the fiscal year 2008 Department of Defense Appropriations bill (H.R. 110-279). For operation and maintenance accounts, the Department of Defense shall continue to follow the reprogramming guidelines specified title II of this statement. The dollar threshold for reprogramming funds shall remain at \$15,000,000 for operation and maintenance; \$20,000,000 for procurement; and \$10,000,000 for research, development, test and evaluation.

Also, the Under Secretary of Defense, Comptroller, is directed to continue to provide the congressional defense committees quarterly, spreadsheet-based DD Form 1416 reports for service and defense-wide accounts in titles I, II, III and IV of this Act. Reports for titles III and IV shall comply with guidance specified in the statement of managers accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of an operation and maintenance (O-1), procurement (P-1) or a research, development, test and evaluation (R-1) line exceed the identified threshold, the Department of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

FUNDING INCREASES

The funding increases outlined in the tables for each appropriation account shall be provided only for the specific purposes indicated in the tables.

ADMINISTRATIVE FEES

For contracts in the amount greater than the simplified acquisition threshold, the Secretary of Defense may not retain any fee or charge in excess of the actual cost (or estimated cost if the actual cost is not known) of entering into and administering the contract or other agreement under which the order is filled. In no event may the administrative fee or charge retained for such contracts exceed five percent of the funds appropriated, unless approved by the service acquisition executive concerned. Such approvals shall be reported to the Committees on Appropriations of the House and the Senate not later than 30 days after approval.

INNOVATIVE PROCUREMENT AND RESEARCH FUNDS

The recommendation includes an additional \$60,000,000 for innovative procurement efforts and \$439,200,000 for innovative research and development activities. A wide variety of valuable equipment, services and good ideas that can contribute to improving defense capabilities may never be fielded or

developed due to a lack of funding. The additional funding provided in this Act is intended to capture some of these items, with an emphasis on small business activities.

Within the research and development accounts it is directed that not less than \$128,000,000 (\$32,000,000 for each military department and Defense-Wide) shall be made available only for Phase III Small Business Innovative Research (SBIR) projects to transition ideas into projects that support acquisition programs. In addition, not less than \$40,000,000 of Defense-Wide funds shall be available only for unsolicited proposals which will be unique in nature. Projects shall be awarded based on an assessment of the benefits defined as enhancing military capability, accelerating the delivery of military capability, reducing the cost of weapons systems either fielded or under development, or improving the quality of life for service personnel. The maximum value of each project awarded with this funding shall not exceed \$4,000,000. Projects may be awarded in connection with equipment items, software and services consistent with the criteria noted above.

Procurements shall be competitively awarded based on current law and regulations. Procurements shall also be awarded based on an assessment of the benefits defined as enhancing military capability, accelerating the delivery of military capability, reducing the cost of weapons systems or improving the quality of life for service personnel.

It is directed that the overall guidance for the execution of this funding shall be established by the Under Secretary of Defense (Acquisition Technology & Logistics) (USD (AT&L)). Funds available to the military departments shall be administered by the military departments' civilian acquisition executives. Funds available for Defense-Wide activities, including unsolicited proposals, shall be administered by the USD (AT&L). Included in the funding allocated to the USD (AT&L) is \$3,200,000 for the management and administration of the program.

The USD (AT&L) shall provide a report to the congressional defense committees not later than 30 days after enactment of this Act that provides a detailed description of overarching guidance for these initiative funds. The military departments' civilian acquisition executives and the USD (AT&L) shall also provide a report to the congressional defense committees not later than 90 days after enactment of this Act, and at the close of each quarter of the fiscal year thereafter, listing the projects that have been awarded with this funding, separately listing the projects, procurements for small businesses and unsolicited proposals. These reports shall also indicate the criteria used to award projects and procurements to include the expected benefits as noted above, and the estimated savings, if any, that the projects and procurements may generate.

TITLE I—MILITARY PERSONNEL

For Military Personnel, funds are to be available for fiscal year 2011, as follows:

[in thousands of dollars]:

M-1 ---	Budget Request	Recommendation

TITLE II—OPERATION AND
MAINTENANCE

[in thousands of dollars]:

For Operation and Maintenance, funds are
to be available for fiscal year 2011, as follows:

O-1	---	Budget Request	Recommendation
---	---	---	---
OPERATION AND MAINTENANCE, ARMY			
---	---	---	---
111	MANEUVER UNITS	1,087,321	1,087,321
112	MODULAR SUPPORT BRIGADES	114,448	113,790
	Deployment Offset	---	-658
113	ECHELONS ABOVE BRIGADES	773,540	769,338
	Deployment Offset	---	-4,202
114	THEATER LEVEL ASSETS	794,806	767,727
	Aircraft Lease for Casualty Evacuation Funded in fiscal year 2011 OCO	---	-18,500
	Transfer to Title IX - Chemical Defense Equipment Sustainment	---	-8,579
115	LAND FORCES OPERATIONS SUPPORT	1,399,332	1,392,912
	Transfer to Title IX - MRAP Vehicle Sustainment at Combat Training Centers	---	-6,420
116	AVIATION ASSETS	897,666	870,226
	Deployment Offset	---	-30,000
	UAS Branch Concept Development	---	+2,560
121	FORCE READINESS OPERATIONS SUPPORT	2,520,995	2,317,441
	Unjustified Increase for Travel	---	-91,000
	Fort Hood Training Lands Restoration and Maintenance	---	+600
	Removal of One-Time fiscal year 2010 Costs	---	-35,000
	Fire Resistant Environmental Ensemble	---	+2,800
	Transfer to Title IX - Body Armor Sustainment	---	-71,660
	Transfer to Title IX - Rapid Equipping Force Readiness	---	-9,294
122	LAND FORCES FORCES SYSTEMS READINESS	596,117	574,946
	Transfer to Title IX - Fixed Wing Life Cycle Contract	---	-21,171
123	LAND FORCES DEPOT MAINTENANCE	890,122	955,202
	CP DEPMEDS Care of Supplies in Storage	---	+400
	CBPS Care of Supplies in Storage	---	+200
	M17 Care of Supplies in Storage	---	+240
	M12A1 Care of Supplies in Storage	---	+240
	UH-60 A to L Conversions	---	+60,000
	Installation Management Command, Non-Tactical Vehicle, Service Life Extension Program	---	+4,000
131	BASE OPERATIONS SUPPORT	7,563,566	7,288,391
	Transfer from the Defense Health Program for Centralized Management of the Substance Abuse Program	---	+30,625
	Fort Bliss Data Center	---	+2,000
	Storm Water Harvest and Reuse System	---	+1,200
	Army Tenant Pentagon Rent Requirements	---	-33,000
	Reduced Requirement for Collateral Equipment in fiscal year 2011	---	-50,000
	Transfer to Title IX - Overseas Security Guards	---	-200,000
	Transfer to Title IX - Senior Leader Initiative: Comprehensive Soldier Fitness Program	---	-30,000
	Army Conservation and Ecosystem Management	---	+4,000

OPERATION AND MAINTENANCE REPROGRAMMINGS

The Secretary of Defense is directed to submit the Base for Reprogramming (DD 1414) for each of the fiscal year 2011 appropriation accounts not later than 60 days after the enactment of this Act. The Secretary of Defense is prohibited from executing any reprogramming or transfer of funds for any purpose other than originally appropriated until the aforementioned report is submitted to the House and Senate Committees on Appropriations.

The Secretary of Defense is directed to use the normal prior approval reprogramming procedures to transfer funds in the Services' operation and maintenance accounts between O-1 budget activities in excess of \$15,000,000. In addition, the Secretary of Defense shall follow prior approval reprogramming procedures for transfers in excess of \$15,000,000 out of the following budget subactivities:

Army:
 Maneuver Units
 Modular Support Brigades
 Land Forces Operations Support
 Force Readiness Operations Support
 Land Forces Depot Maintenance
 Base Operations Support
 Facilities Sustainment, Repair and Modernization
Navy:
 Aircraft Depot Maintenance
 Ship Depot Maintenance
 Facilities Sustainment, Repair and Modernization
Marine Corps:
 Depot Maintenance
 Facilities Sustainment, Repair and Modernization
Air Force:
 Operating Forces Depot Maintenance
 Mobilization Depot Maintenance
 Training and Recruiting Depot Maintenance
 Administration and Servicewide Depot Maintenance
 Primary Combat Forces
 Combat Enhancement Forces
 Combat Communications
 Facilities Sustainment, Repair and Modernization

Finally, the Secretary of Defense shall follow prior approval reprogramming procedures for transfers in excess of \$15,000,000 into the following budget subactivity:

Operation and Maintenance, Army National Guard:
 Other Personnel Support/Recruiting and Advertising

With respect to Operation and Maintenance, Defense-Wide, proposed transfers of funds to or from the levels specified for defense agencies in excess of \$15,000,000 shall be subject to prior approval reprogramming procedures.

OPERATION AND MAINTENANCE BUDGET EXECUTION DATA

The Secretary of Defense is directed to continue to provide the congressional defense committees with quarterly budget execution data. Such data should be provided not later than 45 days after the end of each quarter for the fiscal year, and should be provided for each O-1 budget activity, activity group and subactivity group for each of the active, defense-wide, reserve and National Guard components. For each O-1 budget activity, activity group and subactivity group, these reports should include the budget request and actual obligation amount; the distribution of unallocated congressional adjustments to the budget re-

quest; all adjustments made by the Department in establishing the Base for Reprogramming (DD Form 1414) report; all adjustments resulting from below threshold reprogrammings and all adjustments resulting from prior approval reprogramming requests.

CIVILIAN PERSONNEL PAY RATES

The budget request included discrepancies between the services in the price growth budgeted for civilian personnel pay. The Office of the Under Secretary of Defense (Comptroller) is directed to ensure consistency across the Department for civilian personnel pay rates in future budget submissions.

INFORMATION OPERATIONS

The recommendation includes reductions to certain information operation programs. Due to the classification of these activities, a table is included in the classified annex of the statement indicating the programs to which adjustments have been made. In addition, the Under Secretary of Defense (Comptroller) shall continue to submit a strategic communications and information operations programs report to the congressional defense committees not later than 30 days after the submission of the President's annual budget request to Congress. The report shall include supplemental budget justification materials for strategic communication programs to include information operations, military information support operations and influence activities of the Department of Defense for which base budget, supplemental or overseas contingency operations funds have been appropriated or requested over the fiscal year 2010 through 2012 period, including: program strategies, target audiences, goals, and measures of effectiveness; budget exhibits at the appropriations account and subactivity level; spend plans (including positions and other direct costs associated with the activity); and production and dissemination mechanisms and locations. The report shall identify any current or prior year funds provided that have been obligated or expended for activities other than those for which the funding was requested, or transferred either above or below the reprogramming threshold notification requirements and the purposes for which the funds were otherwise used. Finally, the report shall include an annex to explain and support classified information.

MARITIME SECURITY EXERCISE

The Secretary of the Navy is directed to develop and conduct a tabletop exercise to identify specific gaps in surveillance procedures, information collection and sharing and predictive capability concerning terrorist-related overseas movements of weapons of mass destruction components through international waters. This analytical exercise should utilize the Naval Postgraduate School or a similar government academic organization with substantial ties to the Department of the Navy and background in both maritime security and national security matters. This exercise is to be limited and targeted to determine where vulnerabilities lie in our nation's overall maritime security posture.

ENERGY SECURITY

The Secretary of Defense is to be commended for collaborative pilot projects that demonstrate a systems-level approach to energy security. The intent of these projects include such things as improvements to energy self-sufficiency, reduction of greenhouse gas emissions, and increased use of renewable energy sources. Some joint bases

have been found to be well situated to conduct these projects which provide the foundation to replicate the energy security efforts at other Department of Defense installations, and therefore \$20,000,000 is provided for these Energy Security Pilot Projects. The fast track projects shall put these installations on a path to energy security within 18 months. Over the long term, the Department can use the fast-track pilot programs' foundational data, tools and process models to develop and implement a multiyear plan to achieve energy security at all Department of Defense installations. The Secretary of Defense is directed to provide an implementation plan to the congressional defense committees not later than 30 days after enactment of this Act, an initial status report of the pilot programs not later than March 15, 2011 and a comprehensive multiyear Energy Security Program plan not later than September 30, 2011.

MILITARY TIRES

To preserve a competitive and vigorous industrial base for military tires, the Director of the Defense Logistics Agency (DLA) is directed to: request that all contractors involved in any way with the Tire Procurement Initiative (TPI) provide DLA with any competitive tire pricing information they have received in connection with their performance of the TPI contract; make this information known to all interested contractors; report to the congressional defense committees not later than 45 days after enactment of this Act whether the requested information was provided; and, if the requested information was not provided, include in that report a plan for ensuring that real or perceived conflicts of interest related to the possession of this information does not undermine the integrity of future tire contracts.

MULTINATIONAL INFORMATION SHARING PROGRAMS

The Secretary of Defense is directed to provide a report to the congressional defense committees not later than 90 days after the enactment of this Act to include the following: a list of every program funded by the Department whose objective is to facilitate the secure exchange of electronic information between the United States and its partners and allies; the amount of funding provided to these programs in fiscal year 2010 and requested in fiscal year 2011; a plan for consolidating these programs into one program that can be used throughout the entire Department for the stated objective; and an explanation, if necessary, of why multiple information sharing systems are necessary and financially justified.

OUTSIDE LEGAL DEFENSE EXPENSES

The Secretary of Defense, in coordination with the Attorney General of the United States, is directed to provide a report to the congressional defense committees on the financial, legal, or other impacts of each of the following: amending public law to specifically make military personnel eligible for reimbursement of legal bills when they successfully defend themselves against charges of abusing detainees; providing servicemembers Professional Liability Insurance to cover legal fees, similar to the insurance that is available to other Federal employees; and reimbursing the \$1,000,000 that the Congressional Budget Office estimates U.S. servicemembers have already had to pay for their own defense against these types of charges for which later, the charges were dismissed or the servicemember acquitted since September 11, 2001. The Secretary is directed

to provide this report not later than 180 days after enactment of this Act.

JOINT ADVERTISING, MARKET RESEARCH AND STUDIES

The recommendation includes \$7,972,000 for the Joint Advertising, Market Research and Studies (JAMRS) Program under the Defense Human Resources Activity. The funding is directed to be used for the costs associated with maintaining the JAMRS Recruiting Database and the remainder to be used for market research and studies only related to recruiting medical health professionals.

READINESS AND ENVIRONMENTAL PROTECTION INITIATIVE

The Readiness and Environmental Protection Initiative (REPI) program has contributed significantly to relieving encroachment pressures at military installations across the nation. Many military installations either include lands that serve as critical habitat for species or find that community development on adjacent land threatens to impinge on operations. In order to expand the impact of the REPI program, the recommendation includes \$60,186,000 above the amount requested in the budget. In allocating funds appropriated for the REPI program, the Department is directed to consider proposals for acquiring property and easements to pre-

serve Clear Zone areas, Accident Potential Zones, firing ranges, maneuver areas, and airfields on the same basis as all other proposals.

YOUTH MENTORING PROGRAM

The recommendation provides \$20,000,000 for Youth Mentoring programs. The Department of Defense is directed to allocate this funding on a competitive basis to activities that are in close proximity to Department of Defense installations.

TITLE III—PROCUREMENT

For Procurement, funds are to be available for fiscal year 2011, as follows:

[in thousands of dollars]:

P-1	--	Budget Request	Recommendation

ACQUISITION CATEGORIES

Category I (ACAT I) Major Defense Acquisition Programs (MDAPs) are the high-cost and special interest programs for which the Under Secretary of Defense (Acquisition, Technology and Logistics) (USD (AT&L)) retains decision authority and conducts more extensive senior-level management reviews. Programs are identified as ACAT I based on their estimated total costs in constant fiscal year 2000 dollars or as designated by the USD (AT&L). Programs costing more than \$365,000,000 in research, development, test and evaluation or more than \$2,190,000,000 in procurement are automatically considered ACAT I. However, a number of expensive and critical programs, such as the F-22 Raptor and C-17 Globemaster, are falling outside the ACAT I process despite their very high modernization costs. The current criteria for senior level review fail to capture some programs most deserving of that review.

The USD (AT&L) is directed to review the standards used to identify the various acquisition categories and provide a report detailing the steps taken to ensure that programs such as the F-22 and C-17 receive the oversight required of large programs. The report is due to the congressional defense committees not later than 180 days after enactment of this Act.

M4 CARBINE

Industry offers a wide array of commercially available upgrades to improve the reliability, lethality and accuracy of the M4 carbine. However, Army efforts to procure upgrades have not drawn fully on industry's capabilities. Therefore, the Secretary of the Army is directed to ensure that full and open competition maximizing the participation of industry is used in finding vendors for M4 carbine upgrades.

HIGH MOBILITY MULTI-PURPOSE WHEELED VEHICLE

Fiscal year 2011 funding of \$989,067,000, the President's request, is recommended for High Mobility Multi-Purpose Wheeled Vehicles (HMMWV), with all funding intended for recapitalization of old HMMWVs and no funding for procurement of new HMMWVs. The Army has been slow to execute fiscal year 2010 funds that were appropriated by Congress as requested by the Army for the procurement of new HMMWVs. The Secretary of the Army is directed to act promptly to obligate the funds appropriated for the procurement of new production HMMWVs in the Department of Defense Appropriations Act, 2010.

BRADLEY FIGHTING VEHICLE

The Congress has been a strong supporter of the Bradley program. It is noted that not all Army National Guard Bradley Fighting Vehicles have been upgraded to a minimum of the Operation Desert Storm Situational Awareness configuration. The Army is expected to use prior year funds to upgrade remaining M2/M3 variants in the Army National Guard.

HIGH MOBILITY ENGINEER EXCAVATOR

In 2007, the Army successfully fielded a high speed, armored, self-deployable excavation system with attachments to execute a wide range of mobility, counter-mobility, survivability, and general engineering missions. It also satisfies specific transportability requirements allowing it to be used by airborne, air assault and light units. Since its fielding, the Army has employed this excavator with great success, especially with regard to route and mine clearing as it provides vastly improved force protection and soldier survivability for engineers performing mine and improvised explosive device clearing missions. The Marine Corps is reviewing the performance of this excavator and is considering adding it to their requirements documents. The Corps is encouraged to procure this machine and to include funding in future Marine Corps budget requests.

EVOLVED EXPENDABLE LAUNCH VEHICLE PRICING

The Secretary of Defense, in consultation with the Director of the National Reconnaissance Office, is directed to analyze the pricing strategies for Evolved Expendable Launch Vehicle (EELV) Launch Services (ELS) that will support both United Launch Alliance and Tier 2 and 3 supplier stability and encourage broader demand for ELS capabilities. This analysis should stress recovery of the marginal costs of the booster alone rather than the fully allocated costs of the EELV Launch Capability contract. The results of this analysis shall be reported to the congressional defense and intelligence committees not later than 90 days after enactment of this Act.

SPECIAL OPERATIONS COMMAND UNFUNDED REQUIREMENTS

The recommendation includes additional funding to address critical capability shortfalls in procurement and research and development for which a requirement has been identified by Special Operations Command (SOCOM) and funding was not included in the fiscal year 2011 budget submission. These program increases are provided in several

lines in "Procurement, Defense-Wide", and "Research, Development, Test and Evaluation, Defense-Wide". This funding should be executed in support of the prioritized unfunded requirements SOCOM has identified and/or submitted to the congressional defense committees. In this regard, funding is provided for the tactical vehicle unfunded requirement identified by Air Force Special Operations Command (AFSOC).

PRINTED CIRCUIT BOARD INDUSTRIAL BASE

The shift in the Department towards commercial off-the-shelf electronics has caused an increased dependence on off-shore circuit boards and a decline in the Nation's printed circuit board industrial base, possibly compromising our Nation's security. Therefore, the Secretary of Defense is directed to conduct an assessment of the domestic circuit board industry and its associated supply chain. This assessment should include a survey of the current capability and capacity of, along with the associated risks to, the domestic printed circuit board industrial base, a forecast of the long term maintenance requirements of the industrial base and an evaluation of the supply base required to ensure that current and future national security requirements can be satisfied domestically. The results of this assessment shall be reported to the congressional defense committees not later than six months after enactment of this Act.

C-17A GLOBEMASTER III

No funds are provided in the bill to acquire additional C-17 airlifter aircraft. Funding provided for C-17 Post Production Support is to protect needed production capabilities, assets, systems and processes for the continued life cycle support of the C-17. The C-17 is not to be used as a source for reprogrammings. The Department is directed to retain appropriated funds in the program.

JOINT SURVEILLANCE TARGET ATTACK RADAR SYSTEM (JSTARS) RE-ENGINEING

While no funds are provided specifically for the re-engineing effort in the fiscal year 2011 bill, there is substantial unobligated funding available from prior fiscal year appropriations within the JSTARS program. The Air Force may, as needed, use those funds to procure engine ship-sets.

TITLE IV—RESEARCH, DEVELOPMENT, TEST AND EVALUATION

For Research, Development, Test and Evaluation, funds are to be available for fiscal year 2011, as follows:

[in thousands of dollars]:

SOFTWARE DEVELOPMENT COST ESTIMATION

The Secretary of Defense is directed to provide the congressional defense committees a report, not later than 90 days after enactment of this Act, on its analysis identifying the common attributes of successful software intensive programs. The report should include the required metrics, data, and resources that are needed and used to better estimate and baseline future Department of Defense software program developments.

CONTRACT MANAGEMENT SERVICES PILOT PROGRAM

The Department of Defense has recently started a pilot program, in conjunction with the Ability One Services program, in which wounded veterans are trained and employed to conduct contract closeout activities. Thus far, in the infancy of the effort, millions of dollars have been recouped and over 1,500 contracts have been closed out with no rework required. The program could reasonably achieve a ratio of 10:1 return on investment. The recommendation provides an additional \$12,000,000 in the "Research, Development, Test and Evaluation, Defense-Wide" appropriation to expand this pilot program. The Director of Defense Procurement and Acquisition Policy shall be responsible for the management of this pilot program and shall provide a quarterly report to the congressional defense committees on the progress of the pilot program.

BIOMETRICS

Due to concern that the fiscal year 2011 request for biometrics funded duplicative efforts, the recommendation decreases biometrics funding by \$12,000,000. To ensure the program benefits from information technology best practices, the Secretary of the Army shall submit a report not later than 90 days after enactment of this Act which details: how biometric data will interface with and leverage the Army's Digital Common Ground System's cloud architecture that allows for real-time updates, device agnostic tactical nodes, and existing cross domain security capabilities that handle U.S. persons data; how the next generation biometric database configuration incorporates the lessons learned from earlier large intelligence database software license acquisitions; and how military intelligence program funding and non-military intelligence program funding will be determined for biometric programs going forward.

EXPEDITIONARY FIGHTING VEHICLE

A total of \$222,265,000 is provided for the Expeditionary Fighting Vehicle, including \$145,265,000 for termination liability. Funds designated for termination liability may be released for use in system development and demonstration activities upon certification by the Secretary of Defense to the congressional defense committees that testing on prototype vehicles has demonstrated sufficient confidence to meet program requirements.

BONE MARROW REGISTRY

The recommendation includes \$31,500,000 for the Department of the Navy, to be administered by the C.W. "Bill" Young Marrow Donor Recruitment and Research Program, also known as and referred to within the Naval Medical Research Center as the Bone Marrow Registry. Funds appropriated for the C.W. "Bill" Young Marrow Donor Recruitment and Research Program shall remain available only for the purposes for which they were appropriated, and may only be obligated for the C.W. "Bill" Young Marrow Program. Further, the agencies involved in contingency planning are encouraged to continue to include the C.W. "Bill" Young Marrow Donor Recruitment and Research Program in the development and testing of their contingency plans. The Base for Reprogramming (DD Form 1414) shall show this as a congressional special interest item. The Department is further directed to release all the funds appropriated for this purpose to the C.W. "Bill" Young Marrow Donor Recruitment and Research Program not later than 60 days after enactment of this Act.

COMMON DATA LINKS

The Secretary of the Air Force is directed to research, define and test a government specified interface that ensures open access to configuration commands between the host platform and common data links (CDL). Once defined, the Air Force should include this interface into the existing CDL family of specifications for new CDL terminal procurement contract awards. Recognizing the benefits of multiple vendors supplying competitive offerings for this vital communication service, the Secretary of Defense is encouraged to ensure that all Department of Defense platforms employing CDL shall adopt the Air Force defined CDL interface and that multiple vendor participation occurs in the further development of CDL family of specifications.

BEST INDUSTRIAL PROCESSES FOR DEPARTMENT OF DEFENSE DEPOTS

The recommendation includes \$8,000,000 to be used for the analysis of emerging technologies and best industrial processes for insertion into the Department of Defense maintenance depots. The funding will help the Department identify technological gaps, perform return on investment analyses and conduct procurement studies based on business case analyses studies.

GROUND MOVING TARGET INDICATION (GMTI) RADAR DEVELOPMENT

The recommendation provides \$12,000,000 for Ground Moving Target Indication (GMTI) Radar Development to conduct studies and analysis on candidate GMTI radar technologies which could lead to the development of platform-independent prototypes to demonstrate critical technical parameters (range, minimum detectable velocity and target location error) to support initial integration with air vehicles such as the E8 Joint Surveillance Attack Radar System, the Navy's P8A Multi-mission Maritime Aircraft, RQ4 Global Hawk or others. The Secretary of the Air Force is directed to provide an execution plan for these funds not later than 60 days after enactment of this Act to the Committees on Appropriations of the House and the Senate. Subsequent updates shall be provided at the beginning of the first and third quarter of each fiscal year until all funds are obligated and expended.

DEFENSE ADVANCED RESEARCH PROJECTS AGENCY (DARPA)

The Director of DARPA is directed to provide to the congressional defense committees, not later than 60 days after enactment of this Act, a report detailing by program element and project the application of undistributed reductions.

CHEMICAL TESTING ON ANIMALS

The Secretary of the Defense is directed to report to the congressional defense committees, not later than 90 days after enactment of this Act, on the impact of reducing or restricting funds provided for the purchase of animals for the purposes of demonstrating the effects of chemical agents on the animals.

Title V—Revolving and Management Funds

DEFENSE HEALTH PROGRAM REPROGRAMMING PROCEDURES

The recommendation designates the funding for the Direct Care System as a congressional special interest item, as defined elsewhere in this statement. The Assistant Secretary of Defense (Health Affairs) is also directed to provide quarterly reports to the Committees on Appropriations of the House and the Senate on budget execution data for all of the Defense Health Program accounts and to adequately reflect changes to the budget activities requested by the Services in future budget submissions.

CARRYOVER

The Assistant Secretary of Defense (Health Affairs) is directed to submit a detailed spending plan for any fiscal year 2010 designated carryover funds to the congressional defense committees not later than 15 days prior to executing the carryover funds.

PRIVATE SECTOR CARE SHORTFALL

The recommendation reduces the Private Sector Care budget activity group by \$236,000,000 as a result of pharmaceutical rebates being realized and the Military Health System adjusting to more normalized rates, creating excess funds. The Assistant Secretary of Defense (Health Affairs) is directed to report to the congressional defense committees not later than 60 days after enactment of this Act on the status of additional rebates that have been collected.

PEER-REVIEWED CANCER RESEARCH PROGRAM

The recommendation provides \$16,000,000 for a peer-reviewed cancer research program. The Department of Defense is directed to provide a report not later than 60 days after enactment of this Act to the congressional defense committees on the status of the peer-reviewed cancer research programs. The funds provided are directed to be used to conduct research in the following areas: melanoma and other skin cancers, pediatric and childhood cancer research, genetic cancer research, pancreatic cancer, kidney cancer, blood cancer, colorectal cancer, mesothelioma, radiation protection utilizing nanotechnology, and Listeria Vaccine for infectious disease and cancer. The funds provided under the Peer-Reviewed Cancer Research Program shall be used only for the purposes listed above.

PEER-REVIEWED MEDICAL RESEARCH PROGRAM

The recommendation provides \$50,000,000 for a Peer-Reviewed Medical Research Program and the Secretary of Defense, in conjunction with the Service Surgeons General, is directed to select medical research projects of clear scientific merit and direct relevance to military health. Research areas considered under this funding are restricted to: chronic fatigue syndrome, chronic migraine and post-traumatic headache, drug abuse, epidermolysis bullosa, epilepsy, fragile x syndrome, inflammatory bowel disease, interstitial cystitis, lupus, neuroblastoma, osteoporosis and related bone disease, Paget's disease, pancreatitis, pheochromocytoma, polycystic kidney disease, post-traumatic osteoarthritis, scleroderma, social work research, and tinnitus. The additional funding provided under the Peer-Reviewed Medical Research Program shall be devoted only to the purposes listed above.

DEPARTMENT OF DEFENSE PHARMACY DATA TRANSACTION SERVICE

According to Army reports, the prescription of pain management medications is handled inconsistently at military medical facilities, particularly in theater, where prescription data is not transmitted to the De-

partment of Defense's Pharmacy Data Transaction Service. The Assistant Secretary of Defense (Health Affairs) is directed to provide a report to the congressional defense committees on the obstacles and steps toward such transmission not later than 60 days after enactment of this Act.

JOINT PATHOLOGY CENTER AND NATIONAL TISSUE REPOSITORY

The Joint Pathology Center (JPC) was established in accordance with Section 722 of the National Defense Authorization Act, 2008. Given the importance of the JPC and its assigned mission in medical research, education, consultation and management of the National Tissue Repository, the Assistant Secretary of Defense (Health Affairs) is directed to include funding for the JPC in the upcoming fiscal year 2012 budget request.

SMOKING CESSATION IN THE MILITARY

There are significant burdens caused by tobacco use in the United States military including its impact on readiness and productivity. The Department of Defense shall continue implementing the recommendations outlined in the Institute of Medicine report Combating Tobacco Use in Military and Veterans Populations."

TRAUMATIC BRAIN INJURY AND PSYCHOLOGICAL HEALTH

The Secretary of Defense is directed to report to the congressional defense committees not later than 60 days after enactment of this Act on the availability of appropriate and accessible counseling to servicemembers and their families who live in locations that are not close to military treatment facilities, other Military Health System health facilities or TRICARE providers. Initiatives, such as telehealth, clinical standards supporting TBI and psychological health, and training and education outreach should also be included.

CENTERS OF EXCELLENCE AT WALTER REED ARMY MEDICAL CENTER (WRAMC)/WALTER REED NATIONAL MILITARY MEDICAL CENTER (WRNMMC)

The recommendation includes the budget request for the following Centers of Excellence at the current Walter Reed Army Medical Center: Breast Care, Gynecologic, Prostate, Pain and Neuroscience, and Integrated Cardiac Health (Wellness). The Secretary of Defense is directed to include full funding for the Centers of Excellence at WRAMC and WRNMMC in the fiscal year 2012 budget submission as these centers are the forefront in the advancement of modern medical care.

TITLE VII—RELATED AGENCIES

CLASSIFIED ANNEX

Adjustments to the classified programs are addressed in a separate detailed and comprehensive classified annex. The Intelligence Community, Department of Defense and other organizations are expected to fully comply with the recommendations and directions in the classified annex accompanying the Department of Defense Appropriations Act, 2011.

CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM FUND

For the Central Intelligence Agency Retirement and Disability System Fund, \$292,000,000 is provided for fiscal year 2011.

INTELLIGENCE COMMUNITY MANAGEMENT ACCOUNT

For the Intelligence Community Management Account, \$649,732,000 is provided for fiscal year 2011.

INTELLIGENCE COMMUNITY BUSINESS TRANSFORMATION

To meet the statutory requirement of achieving an unqualified National Intelligence Program financial audit by September 30, 2013, a business transformation transfer fund has been created for the Director of the Business Transformation Office and the designated functional lead intelligence element to identify to the congressional intelligence committees and the Office of Management and Budget which of the following intelligence elements; the National Geospatial-Intelligence Agency, the National Security Agency, the Central Intelligence Agency, the National Reconnaissance Office, and the Defense Intelligence Agency, will take the lead for the following business areas: Acquire-to-Retire, Budget-to-Report, Procure-to-Pay, Hire-to-Retire, Data Center Infrastructure and Data Security. The lead intelligence element will select the single business system for each functional area by April 15, 2011, and lead the implementation and business process standardization of that specific business area for the other four Intelligence elements and the Office of the Director of National Intelligence. There are two general provisions in Title VIII of this Division that provide the authority for the lead element to leverage the existing business system program of record funds and to expend the transfer fund dollars under the policy direction and architectural guidance of the Director of the Business Transformation Office. Not later than 15 days prior to making such transfers, the Director of National Intelligence shall submit a report on such transfers to the congressional intelligence committees.

TITLE VIII GENERAL PROVISIONS

The recommendation includes general provisions which address requests by the Administration for various authorities, the continuation or modification of provisions carried in Acts from previous years, or new matters of specific concern. The bill also includes rescissions to prior year appropriations, as detailed in the table below.

(RESCISSIONS)

Language is included that rescinds \$1,113,536,000 from the following programs:

2009 Appropriations:

Weapons and Tracked Combat Vehicles, Army:	
Future Combat Systems	\$86,300,000
Other Procurement, Army:	
Armored Security Vehicles	55,000,000
Force XXII Battle Command Brigade and Below	30,600,000
Semi-trailers, Flatbed Aircraft Procurement, Navy:	
KC-130J	12,000,000
F/A-18E/F	14,100,000
Aircraft Procurement, Air Force:	
Global Hawk excess funds	49,000,000
C-130 AMP	31,900,000
HC/MC updated pricing	36,000,000

2010 Appropriations:

Aircraft Procurement, Army:	
Tactical SIGINT Payload	14,000,000
Weapons and Tracked Combat Vehicles, Army:	
Future Combat Systems spin-outs	19,600,000

Improved Recovery Vehicle	8,700,000	Other Procurement, Air Force:	
MK-19 Grenade Machine Gun Modifications	7,700,000	FAB-T	36,600,000
Missile Procurement, Army:		Research, Development, Test and Evaluation, Army:	
GMLRS	9,171,000	Aircraft Avionics—JTRS AMF	10,200,000
Aircraft Procurement, Navy:		HFDS	15,000,000
EA-18G MYP savings ...	89,120,000	Future Combat System—Class IV UAV	
F/A-18E/F MYP savings	72,727,000	Program of Record ...	12,000,000
F-18 Series ECO	17,000,000	TUAV-TSP	16,300,000
E-6 Series	6,000,000	Research, Development, Test and Evaluation, Air Force:	
Procurement of Ammunition, Navy and Marine Corps:		B-2	90,000,000
General Purpose Bombs	11,576,000	Classified Program	10,000,000
Shipbuilding and Conversion, Navy:		Alternative Fuels	10,000,000
DDG-51main reduction gear savings	22,000,000	Small Diameter Bomb	22,000,000
Other Procurement, Navy:		Engine CIP	15,000,000
Minesweeping System		JSTARS	14,600,000
Replacement	5,400,000	RQ-4 UAV	18,000,000
Aircraft Launch Recovery	3,642,000	C-5 Airlift Squadrons ..	19,000,000
Aircraft Procurement, Air Force:		Research, Development, Test and Evaluation, Defense-Wide:	
B-2A	5,900,000	BMD Hercules	10,000,000
B-52	39,300,000		
C-17 Modifications	12,200,000		
C-130J updated pricing	7,000,000		
C-130 AP updated pricing	15,100,000		
HC/MC-130 AP	46,900,000		
HC/MC-130 updated pricing	13,200,000		
Initial Spares—Joint Stars Re-engining	11,700,000		

TITLE IX—OVERSEAS CONTINGENCY

OPERATIONS

REPORTING REQUIREMENTS

The Secretary of Defense is directed to provide a report to the congressional defense committees not later than 30 days after enactment of this Act on the allocation of the funds within the accounts listed in this title. The Secretary shall submit updated reports 30 days after the end of each fiscal quarter until funds listed in this title are no longer

available for obligation. These reports shall include: a detailed accounting of obligations and expenditures of appropriations provided in this title by program and subactivity group for the continuation of military operations in Iraq and Afghanistan and a listing of equipment procured using funds provided in this title. It is expected that, in order to meet unanticipated requirements, the Secretary of Defense may need to transfer funds within these appropriations accounts for purposes other than those specified in this report. The Secretary of Defense is directed to follow normal prior approval reprogramming procedures should it be necessary to transfer funding between different appropriations accounts in this title.

Additionally, the Secretary of Defense is directed to continue to report incremental contingency operations costs for Operation New Dawn and Operation Enduring Freedom on a monthly basis in the Cost of War Execution report as required by Department of Defense Financial Management Regulation, Chapter 23, Volume 12. Further, the Secretary of Defense is directed to continue to provide the Cost of War Reports to the congressional defense committees that include the following information by appropriation: funding appropriated, funding allocated, monthly obligations, monthly disbursements, cumulative fiscal year obligations, and cumulative fiscal year disbursements.

MILITARY PERSONNEL

For Military Personnel, funds are to be available for fiscal year 2011, as follows:

[in thousands of dollars]:

M-1	Budget Request	Recommendation
MILITARY PERSONNEL, ARMY		
BA-1: PAY AND ALLOWANCES OF OFFICERS		
BASIC PAY	1,237,779	1,237,779

AFGHANISTAN INFRASTRUCTURE FUND

At the request of the Secretary of Defense and the Secretary of State, the recommendation includes a new appropriation to fund infrastructure projects in Afghanistan. These projects will be jointly formulated by the Department of Defense and the Department of State and will be executed in support of the counterinsurgency strategy in Afghanistan. The Secretary of Defense is directed to notify the appropriate committees of Congress not fewer than 15 days prior to making transfers or obligations to or from this Fund.

AFGHANISTAN SECURITY FORCES FUND

The Secretary of Defense is directed to follow guidance included in Senate Report 111-295 regarding the oversight of the Afghanistan Security Forces Fund (ASFF) and contracts, except for the following changes. The ASFF Executive Council shall include representatives from the Under Secretary of Defense (Comptroller); Under Secretary of Defense (Acquisition, Technology, and Logistics); the senior contracting executives of the Defense Logistics Agency and relevant military departments; Commander, Central Command; Commander, NTM-A/CSTC-A; Director, Defense Security Cooperation Agency; Director, Defense Contract Audit Agency (DCAA); and Director, Defense Contract Management Agency (DCMA) and shall meet on a quarterly basis at a minimum. The Council shall ensure the development of an acquisition strategy to fulfill the commander's needs and clearly articulate contract requirements. Appropriate procedures and personnel shall be in place in CONUS and Afghanistan for sound financial steward-

ship of the ASFF to include following all required federal regulations, oversight of all service and equipment contracts, and review of contractor invoices. DCMA and DCAA are responsible for pre and post-award peer reviews for large contracts and the Council shall ensure the distribution of peer-review lessons learned. In addition to the responsibilities outlined above, the Steering Council should encourage building the capacity of Afghans to perform contracting, accounting and payroll functions that are currently being performed by Department of Defense and contract personnel.

TASK FORCE FOR BUSINESS AND STABILITY
OPERATIONS IN AFGHANISTAN

Temporary authority has been included for the Task Force for Business and Stability Operations in Afghanistan only for fiscal year 2011 to assist the International Security Assistance Force and the U.S. Embassy, Kabul in developing economic stability and opportunity in Afghanistan through strategic business and economic projects. Those efforts must be jointly coordinated and approved by the U.S. military and civilian leadership in Afghanistan, and be directly linked to the Government of Afghanistan's economic development strategy. Projects may only be carried out subject to the direction and oversight of the Secretary of Defense and with the concurrence of the Secretary of State.

This authority has been granted in order to avoid disrupting projects currently underway that are viewed by the leadership of both U.S. Forces—Afghanistan and U.S. Embassy, Kabul as important to achieving U.S.

objectives in Afghanistan. These projects clearly fall outside the normal jurisdiction and expertise of the Department of Defense and should have been developed and resourced by the Afghan government or U.S. civilian entities operating in Afghanistan. If it is required to continue these projects and efforts beyond fiscal year 2011 then the Department of Defense, in coordination with the Department of State and the U.S. Agency for International Development must develop and implement a transition plan to the respective civilian entities for fiscal year 2012 and beyond. This transition plan shall be delivered to the Congress concurrent with the President's fiscal year 2012 budget submission.

INFORMATION OPERATIONS

The Overseas Contingency Operations budget request includes \$61,000,000 for information operations programs in Iraq. The recommendation fully funds the request. However, it is directed that not more than \$31,000,000 of the funds provided may be expended by the Department of Defense until 15 days after the Undersecretary of Defense (Comptroller) submits a report to both the Committees on Appropriations of the House and the Senate which details in writing a formal spending plan for all fiscal year 2011 funding provided for this purpose.

PROCUREMENT

For Procurement, funds are to be available for fiscal year 2011, as follows:

[in thousands of dollars]:

MINE RESISTANT AMBUSH PROTECTED (MRAP)
AND MINE RESISTANT AMBUSH PROTECTED
ALL TERRAIN VEHICLES (MATVS)

The recommendation provides \$3,415,000,000, equal to the request, to address MRAP and M-ATV requirements, as identified by the Department. The Department shall continue to adhere to the execution and reporting requirements contained in section 8122 of Public Law 110-116.

NATIONAL GUARD AND RESERVE EQUIPMENT

The recommendation for the National Guard and Reserve Equipment Account is \$850,000,000. Of that amount, \$250,000,000 is for the Army National Guard; \$250,000,000 is for the Air National Guard; \$140,000,000 is for the U.S. Army Reserve; \$70,000,000 is for the

Navy Reserve; \$70,000,000 is for the Marine Corps Reserve; and \$70,000,000 is for the Air Force Reserve to meet urgent equipment needs that may arise this fiscal year.

This funding will allow the Guard and reserve components to procure high priority equipment that may be used by these units for both their combat missions and their missions in support of State governors. In addition to the items previous listed in Senate Report 111-295, this funding will allow the Guard and reserve components to procure high priority items such as: Generation 4 Advanced Targeting Pods; Lightweight Airborne Radio Systems; Active Electronically Scanned Array radars; Helmet Mounted Integrated Targeting Systems; Upgraded air ground power units; Real Time in Cockpit

Tactical Datalink Capability; C-130 Loadmaster Crashworthy Seats; secure radios; Security Forces equipment; digital computer communications equipment; Family of Medium Tactical Vehicles; Light Utility Helicopter Mission Enhancement Program; Climate Regulated Cargo Trailer; Modular Small Arms Training Systems; Joint Threat Emitters; tactical radios; tactical trailers; and field engineering, logistics, and maintenance equipment.

RESEARCH, DEVELOPMENT, TEST AND
EVALUATION

For Research, Development, Test and Evaluation, funds are to be available for fiscal year 2011, as follows:

INTELLIGENCE, SURVEILLANCE AND
RECONNAISSANCE (ISR) PROGRAMS

The Act includes an increase of \$112,000,000 for an ISR Sensor Pilot Program (Research, Development, Test and Evaluation, Air Force). These funds are provided to allow the Secretary of the Air Force the opportunity to fund programs that may provide game-changing capabilities with significant savings to the taxpayer. The Secretary of the Air Force shall fund at least one Predator C aircraft as a prototype platform and shall fund a prototype capability using commercial-off-the-shelf long range, dual-band electro-optical/infrared solutions for the

MQ-9 that are currently in use by partner nations and derived from sensors currently utilized on the Air Force's U-2. Further, the Secretary of the Air Force shall review other programs such as active near-infrared imaging for high resolution ISR, counter-IED capabilities, sensors which provide signals intelligence tracking capability, and/or a sensor testbed aircraft as a surrogate platform for MQ-9 testing. The Secretary of the Air Force is directed to provide an execution plan for these funds not later than 60 days after enactment of this Act and prior to obligation to the congressional defense committees. Subsequent updates shall be provided at

the beginning of the first and third quarter of each fiscal year until all funds are obligated and expended.

REVOLVING AND MANAGEMENT FUNDS
DEFENSE WORKING CAPITAL FUNDS

For the Defense Working Capital Funds, \$485,384,000 is provided for fiscal year 2011.

GENERAL PROVISIONS—THIS TITLE

The recommendation includes general provisions which address requests by the Administration for various authorities, the continuation or modification of provisions carried in Acts from previous years, or new matters of specific concern.

DISCLOSURE OF EARMARKS AND
CONGRESSIONALLY DIRECTED SPENDING ITEMS

Following is a list of congressional earmarks and congressionally directed spending items (as defined in clause 9 of rule XXI of the Rules of the House of Representatives and rule XLIV of the Standing Rules of the Senate, respectively) included in the bill or this explanatory statement, along with the

name of each Senator, House Member, Delegate, or Resident Commissioner who submitted a request to the House or Senate Committee of jurisdiction for each item so identified. Neither the bill nor the explanatory statement contains any limited tax benefits or limited tariff benefits as defined in the applicable House and Senate rules.

DIVISION D—ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2011

Following is an explanation of the effects of Division D, which makes appropriations for the energy and water development and related agencies for fiscal year 2011. As provided in Section 4 of the consolidated bill, this explanatory statement shall have the same effect with respect to the allocation of funds and the implementation of this division as if it were a joint explanatory statement of a committee of conference.

TITLE I
CORPS OF ENGINEERS—CIVIL
DEPARTMENT OF THE ARMY
CORPS OF ENGINEERS—CIVIL

The summary tables included in this title set forth the dispositions with respect to the individual appropriations, projects, and activities of the Corps of Engineers. Additional items of the Act are discussed below.

Five-year Plan.—Historically the Administration has been directed to provide five-year investment plans for all the agencies within the Energy and Water jurisdiction, particularly the Corps. The five-year plan should be based on realistic assumptions of project funding needs.

The executive branch has traditionally been unwilling to project five-year horizons for projects they do not support through the

budget process. This leaves a considerable percentage of Corps funding that relies upon congressional direction and a year-to-year horizon for planning purposes. It would be beneficial for Congress, the Administration, and project partners to have a comprehensive plan to outline requirements for all projects that receive an appropriation. The Committees on Appropriations would welcome a dialogue to reach a mutually-agreeable way to comprehensively plan for all ongoing projects.

Inland Waterways Trust Fund.—For guidance on the Inland Waterways Trust Fund, reference Senate Report 111-228.

INVESTIGATIONS

The allocation for projects and activities within the Investigations account is shown in the following table:

Interbasin Control of Great Lakes—Mississippi River Aquatic Nuisance Species, Illinois, Indiana, Ohio, Wisconsin.—Within the funds provided, the Corps is directed to include interim studies providing the costs and benefits of hydrologic separation of the Great Lakes watershed from the Mississippi River watershed.

Great Lakes Remedial Action Plans and Sediment Remediation—Michigan, Illinois, Indiana, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin.—Studies on the Black, Cuyahoga

and Maumee Rivers, Ohio shall be undertaken within the funds provided.

Coastal Field Data Collection.—The Wave Data Study should be continued within the funds provided.

Planning Support Program.—\$744,000 over the budget request is provided for the Planning Support Program. The Corps has a number of Planning Centers of Expertise, however, these Centers do not have the resources necessary to make them truly effective. The additional funds provided should be utilized to ensure the effectiveness of these Centers and the Corps is urged to budget necessary

resources in future budgets to ensure that these Centers of Expertise remain viable assets for the Corps' planning program.

Tribal Partnership Program.—Within the funds provided studies with tribes in New Mexico and with the Lower Brule Sioux Tribe in South Dakota should be undertaken.

Ozark-Jeta Taylor, Arkansas.—This is another case where Administration investments in our infrastructure seem to be penny-wise and pound-foolish. The budget request provided no funds for this on-going continuing contract. Termination costs for this continuing contract are estimated to be \$20,000,000. Energy losses over the past 3 fiscal years exceed \$25,000,000 due to forced outages of the hydropower units. Funds are provided to complete the rehabilitation work on turbine unit 3.

Oakland Harbor, California.—Within the funds provided, \$2,087,000 is for a repayment to the Port of Oakland to settle the port's payments in excess of the local cost share on the 42-foot construction project DACW07-95-003.

Everglades and South Florida Ecosystem Restoration, Florida.—For activities in the Central and South Florida Project \$136,426,000 is provided for Picayune Strand including Faka Union Pump Station; Indian River Lagoon South; C-111 (South Dade); for testing of the Pilot Projects; for West Palm Beach Canal; and E&D for CERP including Adaptive Assessment and Monitoring.

Tampa Harbor, Florida.—\$200,000 is provided above the budget request to complete the

General Reevaluation Report of the federal project.

Olmsted Locks and Dam, Ohio River, Illinois and Kentucky.—Funds are provided to continue construction of this project. None of the funds provided for the Olmsted Locks and Dam Project or any other construction funds are to be used to reimburse the Claims and Judgment Fund.

Muddy River, Boston and Brookline, Massachusetts.—Funding is included to continue project design and construction, including ecosystem restoration features.

Rural Nevada, Nevada.—For guidance on the expenditure of these funds reference Senate Report 111-228.

North Dakota [EI], North Dakota.—Within the funds provided: \$1,600,000 is recommended for the Mandan Raw Water Intake; \$75,000 for the Southeast Water Users District SEWUD; \$1,700,000 for the Grafton Water Treatment Plant Improvements; \$1,375,000 for the North Prairie Rural Water District; \$1,575,000 for the Park River Water Distribution System Improvements; \$900,000 for the Walsh Rural Water District Ground Storage Expansion; \$1,500,000 for the Grand Forks Water Treatment Plant—Pilot Testing and Design; \$275,000 for the Fargo Water Treatment

Plant Facility Study Plan; \$1,825,000 for the McKenzie County Regional Water Service; \$750,000 for the Williams Rural Water Phase I; \$1,500,000 for the Greater Ramsey Water District expansion; \$100,000 for the Williston Waste Water Treatment System Improvements; \$425,000 for the LaMoure Sanitary Sewer Lining Project; and \$700,000 for the Traill Rural Water District Phase III project.

Rural Utah, Utah.—For guidance on the expenditure of these funds reference Senate Report 111-228.

Shore Line Erosion Control Development and Demonstration Program.—\$2,500,000 is provided for construction of a shoreline erosion abatement device at Oil Piers in Ventura County, California, as well as monitoring programs and other appropriate activities under this authority.

Continuing Authorities Program.—For guidance on the Continuing Authorities Program, reference Senate Report 111-228.

GRAND TOTAL	240,000	325,000

Yazoo Basin, Big Sunflower Basin, Mississippi.—Not more than \$2,130,000 should be used for the continued construction of these water quality and sedimentation reduction measures. Water quality funds shall be used for the monitoring and establishment of water quality reference indicators and the development of total maximum daily loads target loads on Yazoo Basin projects.

Yazoo Basin, Delta Headwaters Project, Mississippi.—Funds are provided for the Corps to undertake construction work in the following watersheds: Abiaca Creek, Batupan Bogue, Black Creek, Coldwater River, Cane-Mussacana Creek, Hurricane-Wolfe Creek, Hickahala-Senatobia Creek, Hotophia Creek, Long Creek, Pelucia Creek, Otoucalofa Creek, Toby-Tubby Creek, Yalobusha River,

and Skuna River. The Corps shall design and construct future work, acquire real estate, and monitor results for all watersheds in fiscal year 2011 and for future work as required for completion of the total program.

Coyote Valley Dam, Lake Mendocino and Dry Creek (Warm Springs) Lake and Channel.—All funding above the budget request for these items is to be utilized to implement relevant measures, particularly Reasonable and Prudent Alternative 3, described in the National Marine Fisheries Service Biological Opinion for Water Supply, Flood Control and Channel Operations and Maintenance in the Russian River Watershed, dated September 24, 2008.

San Francisco Harbor, California.—Fiscal year 2011 funds may be used to perform required annual maintenance dredging and to finalize planning studies and the environmental requirements for the potential project. The Corps shall proceed to construction of a beach and dune nourishment project as quickly as possible, and that initiation of the construction shall be undertaken no later than fiscal year 2012.

Michigan Great Lakes Harbor Maintenance and Dredging, Michigan.—The Corps shall propose a maintenance program for fiscal year 2011 that would most effectively utilize both the budgeted funds along with the funds provided in this line item for these harbor and waterway projects.

New York Great Lakes Harbor Maintenance and Dredging, New York.—The Corps shall propose a maintenance program for fiscal year 2011 that would most effectively utilize

both the budgeted funds along with the funds provided in this line item for these harbor and waterway projects.

Wilmington Harbor, North Carolina.—\$300,000 is provided for studies and modeling of potential erosion impacts on adjacent shorelines at the southern end of Wilmington Harbor.

Garrison Dam and Lake Sakakawea, North Dakota.—\$100,000 above the budget request is provided for mosquito control in the Williston area due to shallow water habitat created by the impoundment of Lake Sakakawea.

Asset Management/Facilities and Equipment Maintenance.—For guidance on the expenditure of these funds reference Senate Report 111–228.

Coastal Data Information Program.—Additional funding recommended above the budget request along with the budget request is directed toward the maintenance of wave observations and the expansion of the national wave monitoring network. The Corps is requested to report back to the Committees on Appropriations on its plan to address critical data gaps in this system.

Great Lakes Navigation, IN, IL, MI, MN, NY, OH, PA & WI.—The Corps shall propose a maintenance program for fiscal year 2011 that would most effectively utilize these

funds along with the funds provided for harbor and waterway projects bordering the Great Lakes.

EXPENSES

Within the funds provided, \$2,365,000 is for the Mid-Atlantic River Basin Commissions. Inclusion of this funding should not be construed as a commitment by the Congress to providing any funding for these commissions in the future.

TITLE II

DEPARTMENT OF THE INTERIOR

BUREAU OF RECLAMATION

WATER AND RELATED RESOURCES

(INCLUDING TRANSFERS OF FUNDS)

Reprogramming.—To ensure that the expenditure of funds in fiscal year 2011 is consistent with congressional direction, to minimize the movement of funds, and to improve overall budget execution, the bill includes a legislative provision outlining the circumstances under which the Bureau of Reclamation may reprogram funds.

The allocation for projects and activities within the Water and Related Resources account is shown in the following table:

BUREAU OF RECLAMATION—WATER AND RELATED RESOURCES

Central Valley Project—Friant Division.—Funds provided for the San Joaquin River Restoration should be used in conjunction with and in advance of those funds available from the San Joaquin River Restoration Fund.

St. Mary Project.—\$1,000,000 has been recommended for the St. Mary Diversion Rehabilitation Project. These funds should be utilized using applicable Reclamation Law and as directed in this Act.

Pick-Sloan Missouri Basin, Garrison Diversion Unit, North Dakota.—Within the funds provided, \$2,000,000 is for the Northwest Area Water Supply; \$7,000,000 is for the South Central Regional Water District; \$7,000,000 is for the Southwest Pipeline; and, \$3,120,000 is for the Standing Rock Sioux Tribe Irrigation Project.

Drought Emergency Assistance.—Within the funds provided, the Bureau of Reclamation is directed to recognize the unique conditions in Hawaii and provide full and fair consideration of the request for drought assistance from the State of Hawaii and fund if meritorious.

POLICY AND ADMINISTRATION

Five-year Plan.—The Administration is directed to provide the Committees on Appropriations with a five-year plan. The five-year plan will include the following: (1) two funding scenarios, one which reflects the Administration's expenditure ceilings and a second which reflects an expenditure level consistent with the fiscal year 2011 appropriation, including inflation for the out-years; (2) a list of active projects, as defined by a project receiving funding in the previous three years, for which funding is not proposed in the plan; (3) a full accounting of all rural water, Tribal water settlement, and Title XVI projects that are currently authorized, the total authorization, the balance to complete, and total appropriations to date; (4) an estimate of the total cost of extraordinary and emergency operation and maintenance to address the backlog of project needs due to the aging of Reclamation infrastructure; and, (5) an explanation of the methodology used in determining the project allocations, together with the direction provided to field offices in the preparation of the five-year plan.

TITLE III

DEPARTMENT OF ENERGY

The summary tables at the end of this title set forth the congressional direction with respect to the individual appropriations, programs, and activities of the Department of Energy. Additional items in the Act are discussed below.

The bill provides funding to continue the three Energy Innovation Hubs established in fiscal year 2010. The initial grants for these hubs were awarded at or near the end of fiscal year 2010, and the level of funding provided in this bill for fiscal year 2011 together with funding provided in fiscal year 2010 are intended to fund the hubs through the end of September 2011. Since funding for the hubs provided under this Act is an acknowledgment of a change in the hubs' five-year timelines to begin late in fiscal year 2010 and is not intended to reduce their overall five-year funding projections, the Department is directed to adjust its funding timeline and plan to reflect this delayed start rather than to change the scope of its research activities.

The Department's Under Secretary of Science and the National Nuclear Security Administration (NNSA) Administrator are directed to prepare, within 120 days of enactment of this Act, a joint, integrated strategy

and program plan on how the Office of Science's Advanced Scientific Computing Research and NNSA's Advanced Simulation and Computing programs will share responsibilities and coordinate research and development activities to reach exascale computing required for national security, energy, environmental, and other science missions and to retain the United States' global leadership and competitiveness in advanced computing.

The Department is prohibited from funding fellowship and scholarship programs in fiscal year 2011 unless they appeared in the fiscal year 2011 congressional budget request documents and are supported in this bill. Any new or ongoing fellowship programs that the Department wishes to fund in fiscal year 2012 must be detailed in the fiscal year 2012 budget request documents.

The Department's efforts to achieve greater transparency in financial and programmatic performance have resulted in substantial improvements in the Department's financial reporting. This has particularly been demonstrated in the execution of the American Recovery and Reinvestment Act. In other more focused efforts, greater transparency has exposed significant financial risks and liabilities facing the Department, such as those liabilities arising from contractor managed defined benefit pension liabilities and other contractor benefits. The Committees on Appropriations direct the Department to apply the same degree of transparency to its base programs and mission support activities by the end of fiscal year 2011.

Cost-Share Requirements.—Section 988 of the Energy Policy Act of 2005 (EPACT) imposes statutory cost-share requirements on Department of Energy grants that vary for basic research and development, applied research and development, and demonstration projects. The Secretary has the authority to waive cost-share requirements on individual projects. While the well-reasoned, judicious use of this authority may be warranted in individual cases, the Department should extend its commitment to transparency to its use of cost-share waivers. The Department is therefore directed to notify the Committees on Appropriations, within three days of awarding funding, of the specific terms of any cost-share waiver or modification granted to the recipient.

CONGRESSIONAL DIRECTION

The Department of Energy is directed to operate in a manner fully consistent with the following reprogramming guidelines. For the first year, reprogramming requirements are included in statute owing to the Department's failure to comply with existing reprogramming guidelines. A reprogramming request must be submitted to the House and Senate Committees on Appropriations for consideration before any implementation of a reorganization proposal which includes moving previous appropriations between appropriation accounts. The Department is directed to inform the Committees promptly and fully when a change in program execution and funding is required during the fiscal year. To assist the Department in this effort, the following guidance is provided for programs and activities funded in the Energy and Water Development and Related Agencies Appropriations Act. The Department is directed to follow this guidance for all programs and activities unless specific reprogramming guidance is provided for a program or activity.

Definition.—A reprogramming includes the reallocation of funds from one activity to an-

other within an appropriation, or any significant departure from a program, project, activity, or organization described in the agency's budget justification as presented to and approved by Congress, except where specific deviations are allowed in the text that follows. For construction projects, a reprogramming constitutes the reallocation of funds from one construction project identified in the justifications to another project or a significant change in the scope of an approved project.

Any reallocation of new or prior year budget authority or prior year de-obligations must be submitted to the House and Senate Committees on Appropriations in writing and may not be implemented prior to approval by the Committees.

COST ESTIMATING

There continues to be concern with the Department's ability to manage large construction projects within estimated cost and schedule. The Department has several multi-billion dollar facilities underway, and it is critical that improvements be made in project management. For some projects, the Department is making critical decisions for state-of-the-art nuclear facilities prior to 90 percent completion of design. The Department is directed in its project management order to specifically define the required levels of design maturity that are necessary at each critical decision point, and to ensure that these levels are consistent with accepted construction industry best practices. In addition, the Department's policies for gauging the maturity of new technologies being developed or proposed for its projects are inconsistent with best practices used by other federal agencies. The Government Accountability Office has found that the Department's policies allow a project to proceed with construction with insufficient assurance that a new technology is adequately mature. Therefore, the Department is directed to evaluate where its policies, orders, and guidance for gauging the maturity of new technologies is inconsistent with best practices and, as appropriate, revise them to ensure consistency or specifically justify why such differences are necessary or appropriate.

Another concern is the current organization of the Department's cost estimating offices. The newer Office of Cost Analysis (OCA) is separate from the Department's existing office that performs a similar but broader cost review function. Placing the OCA under the office that manages the Department's finances, the Office of the Chief Financial Officer (CFO), may limit the OCA's independence, ability to conduct objective analysis, and access to relevantly skilled staff. This may lead to duplication of efforts and does not reflect best practices. Centralizing a cost estimating team, rather than maintaining separate teams, facilitates sharing resources and using standard processes. This organization is also inconsistent with Congress' recent action to establish an independent cost estimating office at the Department of Defense, whose project management responsibilities are similar to those of the Department of Energy. The Department was directed in fiscal year 2009 and 2010 to move the OCA from the CFO and consolidate the OCA with the existing cost estimating group within the Management Office. The Department did not respond directly to this direction; however, it is currently reviewing its policy. Upon completion of this review, and not later than 90 days after enactment of this Act, the Department is directed to provide the Committees on Appropriations with

a report outlining the organizational justification for the future of the cost estimating office(s) at the Department, and to provide a detailed analysis of how this arrangement will better serve the Department's dismal cost estimating record.

ENERGY PROGRAMS

ENERGY EFFICIENCY AND RENEWABLE ENERGY

Reporting Requirements.—In some cases, of the amount directed to each specific program or activity, the Department has redirected a significant fraction to other purposes within the account. Sometimes as high as 11 or 12 percent of each program's appropriated budget, this "tax" on the individual programs includes some justifiable purposes, such as reserving 2.8 percent of funds for Small Business Innovation Research and Small Business Technology Transfer grants. However, the remaining unexplained redirection of funds in many cases appears counter to congressional direction and lacks transparency. The Department is therefore directed to report to the Committees on Appropriations, not later than 90 days after enactment of this Act, for each funding level provided in this Act, the exact quantity of funds allocated by the Department for that purpose, and the specific reasons and redirected funding amounts for any program whose allocation is less than that directed by the bill.

As the nation continues to focus on ways to improve energy efficiency, the Department is requested to update its 1995 report on the Impacts of Landscaping for Energy Efficiency (DOE/GO-10095-046).

Minority Outreach Programs.—In fiscal year 2009, the Department was directed to implement an aggressive program to take advantage of the Historically Black Colleges and Universities and Hispanic Serving Institutions across the country in order to deepen the recruiting pool of diverse scientific and technical staff available to support the growing renewable energy marketplace. The Department is encouraged to continue these programs as a means to tap the nation's full diversity of talent as the Department works with the public and private sectors to meet our nation's energy challenges.

Hydrogen Technology.—Within available funds, the bill includes \$15,000,000 for Technology Validation, at least half of which is focused on vehicle and hydrogen infrastructure applications; \$47,000,000 for hydrogen fuels R&D, with a particular focus on the synergies between hydrogen and renewable energy and deriving hydrogen from renewable resources; and \$15,000,000 for Market Transformation in early markets, particularly for stationary sources (not safety codes and standards).

Biomass and Biorefinery Systems Research and Development.—Within available funds, the bill provides \$59,000,000 for integrated biorefineries; \$10,000,000 for analysis and sustainability; \$85,080,000 for conversion technologies; \$10,710,000 for the sustainable production within the feedstocks activity; and \$10,710,000 for logistics within the feedstocks activity.

The bill provides a total of \$30,000,000 for algae biofuels, to include \$5,000,000 for research and development activities for halophilic algae applications in partnership with a university-led consortia having expertise in this area and ready access to a wide variety of high-salinity algae strains. The bill provides \$10,000,000 for the cellulosic reverse auction; as the Department is considering devoting \$4,500,000 from fiscal year 2008 to a reverse auction, the Department is urged to delay such action and combine pre-

vious year funds with fiscal year 2011 funds to make the reverse auction more compelling.

The bill provides \$2,000,000 for coordination with the Fuels Technology subprogram under Vehicle Technologies to continue testing the effects of intermediate fuel blends (15–20 percent ethanol mixed with 80–85 percent gasoline) on Tier 1 vehicles and small engines. The testing will provide data on how these blends may affect materials, durability, performance and emissions of legacy engines. Work should be done in coordination with the Vehicle Technologies Program. The bill further provides \$2,500,000 for a demonstration of a catalytic process to convert liquid ethanol into gaseous ethylene.

Solar Energy.—Within available funds, the Department is directed to provide \$50,000,000 for concentrating solar power demonstration projects as proposed in the budget request. The Department is encouraged to designate and fund, in fiscal year 2011, a center for solar energy innovation to be located in close proximity to high-quality solar resources and the site chosen by the Department for its Solar Demonstration Zone Project. The center should support the research, development, and deployment of the essential components of the solar energy supply chain to promote the integration of solar technologies and products into utility, building and commercial systems, and to improve their reliability, affordability and rapid deployment across the Southwest region and the United States.

The Department is encouraged to continue its efforts to invest in promising high efficiency, low-cost concentrated photovoltaic solar technology that will accelerate the achievement of grid parity.

Solar films can provide significant cost and efficiency advantages to thin film and crystalline silicon modules, and the Department is encouraged to expand the funding of solar films research and development to support the development of a cross-cutting advanced solar films program to improve the cost-effectiveness of solar technologies.

Geothermal Technology.—The Department is directed to make not less than \$5,000,000 available to continue development and deployment of low-temperature geothermal systems. The Department shall provide the Committees on Appropriations with a copy of its report required by section 621 of Public Law 110-140 evaluating the Department's progress implementing the geothermal provisions of Public Law 110-140 and evaluating additional advanced concepts and technologies to maximize the geothermal resource potential of the United States.

Water Power.—Within the funds provided, \$14,000,000 is for conventional hydropower activities and \$41,000,000 is for marine and hydrokinetic activities. Within available funds, the Department is directed to provide not less than \$6,000,000 for the construction of necessary testing infrastructure for marine and hydrokinetic systems, and \$1,000,000 for research and development of tidal barrage technology.

Vehicle Technologies.—The Department is directed to make \$3,000,000 available to continue efforts on both stationary and in-motion inductive power transfer technology to a national laboratory and university consortium.

Batteries that reach the end of their useful lives in electric vehicles will have remaining capacity for other uses, and the Department is directed to use \$2,000,000 in conjunction with the Office of Electricity Delivery and Energy Reliability to commence work on the

secondary use program authorized in section 915 of the Energy Policy Act of 2005. The Department is further directed to establish a program to collect and synthesize data on the use of plug-in electric drive vehicles and provide technical assistance to communities that want to prepare for plug-in electric drive vehicle deployment.

Building Technologies.—Within the funds provided, \$5,000,000 is for the solar decathlon, and \$16,000,000 is for the Energy Efficient Building Systems Design Energy Innovation Hub.

The bill provides \$10,000,000 for the Bright Tomorrow Lighting Prize to fund prizes for competitions specified in section 655 of the Energy Independence and Security Act of 2007 that have been previously announced by the Department.

Further, an additional \$26,809,000 is for solid state lighting research and development. While solid state lighting is still too expensive to compete with existing general lighting products, solid state lighting has the potential to substantially reduce energy consumption while cutting energy bills. To reduce product costs, the Department was encouraged in fiscal year 2010 to fund research and development aiming to lower solid state lighting manufacturing costs, and the Department did so with Recovery Act funds but has yet to devote any regular fiscal year funding. The bill therefore includes \$6,500,000 for new research and development awards, from within the amount provided, of which no less than \$3,200,000 is provided for new awards for manufacturing research and development.

The bill includes \$1,500,000 for research and development activities for advanced sensing and control technologies for task-intuitive lighting systems, and the Department is directed to identify a university-led partnership with experience in this field.

The Energy Policy Conservation Act of 1975 authorized the Department to issue efficiency standards for a list of products, and to date televisions are the only item for which the Department has failed to issue a standard. The Secretary is encouraged to complete a rulemaking process to establish effective efficiency standards for televisions, as expeditiously as possible.

Industrial Technologies.—Within the funds provided, \$30,000,000 is for research, development, demonstration and market transformation of large, medium, and small scale combined heat and power generation systems, to include not less than \$8,000,000 for small scale systems at or below 20 kilowatts generation capacity.

The bill includes not less than \$6,832,000 for Industries of the Future (Specific), to include activities to improve production processes in the glass industry, and to include \$4,205,000 for the steel industry for improvements in production.

District energy and combined heat and power (CHP) systems can significantly reduce primary energy usage by taking advantage of economies of scale and capturing waste energy that would otherwise go unused. District energy systems offer near-term opportunities to increase the energy efficiency and ambit of existing networks through the addition of combined heat and power systems, connection with additional buildings dependent on single-building-based heating and cooling, and conversion from fossil-fuel to renewable fuel sources including biomass. Recent investments made by the Department in these systems are to be commended, and the Department is encouraged to consider avenues for further improving related technologies, addressing their

barriers to deployment, and encouraging their widespread use.

Federal Energy Management Program.—The bill includes \$1,000,000 for the Department to conduct an assessment of the most appropriate places to deploy electric vehicles in the federal fleet and to begin a pilot program to deploy electric vehicles based on the assessment.

The FEMP is intended to assist federal agencies—which together spend roughly \$10,000,000,000 annually on energy procurements—in achieving energy savings. In its recent audit report on the FEMP, the Department's Inspector General (OIG) found

that the FEMP “had not always maintained up-to-date energy efficiency specifications; could not demonstrate that it had adequately pursued the development of new energy efficiency specifications; and had not effectively managed relevant contractor efforts essential to the program.” The Department is directed to deliver by March 15, 2011 an action plan to address the problems identified by the OIG.

Facilities and Infrastructure.—The bill provides \$57,500,000 for facilities and infrastructure, to include \$39,500,000 for construction of the Energy Systems Integration Facility (ESIF) at the National Renewable Energy

Laboratory. It is expected that this funding, in conjunction with two prior year appropriations, is the final appropriation required to construct and fully equip ESIF and that the Department will begin construction of the facility without further delay.

Program Support.—Within the funds provided, \$2,000,000 is to continue the United States-Israel energy cooperation agreement.

State Energy Program.—The bill provides \$40,000,000 for formula grants and \$10,000,000 for competitive grants.

Congressionally Directed Projects.—The bill provides \$211,580,000 for the following congressionally directed projects and activities.

CONGRESSIONALLY DIRECTED ENERGY EFFICIENCY AND RENEWABLE ENERGY PROJECTS

PROJECT	AMOUNT
21st Century Renewable Fuels, Energy, and Materials Initiative	\$400,000
Adams State College Solar Project (CO)	\$400,000
Advanced Closed-Cycle Turbine Generator (WA)	\$1,000,000
Advanced Energy Studies (ND)	\$1,500,000
Advanced Solid State Lithium Ion Battery Domestic Manufacturing Initiative (MI)	\$300,000
Alexander Hamilton High School Solar Power Project	\$250,000
Algae Biofuels Research (WA)	\$2,000,000
Algae to Biofuels Fully Integrated System	\$1,000,000
Alternative and Unconventional Energy Research and Development (UT)	\$10,000,000
Alternative Energy Medical Complex (NV)	\$500,000
Bio-Energy Research Center (MT)	\$800,000
Biofuel from Nevada's Municipal Wastes (NV)	\$500,000
Biofuel Micro-Refinery for Local Sustainability, Memphis, TN	\$750,000
Biofuels, Biopower and Biomaterials Initiative	\$1,250,000
Biomass Boiler and Steam Absorption Chiller Plant (SD)	\$650,000
Biomass Boiler at Ferrum College (VA)	\$300,000
Blue Ridge Alternative Fuels Training Program	\$200,000
Borough of Rochester Police Headquarters Emergency Power Demonstration Project	\$175,000
Bucknell University Marcellus Shale Research Initiative (PA)	\$200,000
Carolinas Energy Training Center	\$800,000
Center for Biomass Utilization (ND)	\$2,000,000
Center for Ocean Renewable Energy (NH)	\$500,000
Center for Ozark Community Biomass Energy Development (MO)	\$1,500,000
Chicago Public Schools Solar Energy Capital Improvement Program	\$300,000
Chittenden County Natural Gas Refueling Project (VT)	\$1,000,000
CHRISTUS Center for Healthy Living and Energy Efficient LEED Technology (LA)	\$300,000
City of Grand Rapids City Building Solar and Wind Renewable Energy Demonstration Project (MI)	\$400,000
City of Lansing Bioenergy Generation Demonstration Project (MI)	\$400,000
City of Los Angeles LED Street Lighting Project	\$500,000
City of Madison Renewable Energy and Sustainability Center	\$1,000,000
City of San Jose Smart LEED Streetlights, CA (CA)	\$600,000
City of Yreka Biomass Facility, CA (CA)	\$500,000
Clean Energy and Education Fuel Cell Initiative	\$800,000
Clean Energy Infrastructure Educational Initiative (OH)	\$200,000
Co-Gen Electrostatic Precipitator (NY)	\$700,000
Collaboration on Renewable Energy Job Creation Strategies (NV)	\$300,000
Community Transportation Infrastructure Options Now (ACTION) Project	\$1,000,000
Consortium for Plant Biotechnology Research	\$2,000,000
Delaware Energy Efficiency (DE)	\$55,000
Development of High Yield Tropical Feedstocks and Biomass Conversion Technology for Renewable Energy Production (HI)	\$6,000,000
Eastern Gateway Community College Wind Turbine Technology Program	\$300,000
Energy Audit and Weatherization Mobile Field Unit	\$225,000
Energy Conservation, Solar Energy Education and Research (LA)	\$300,000
Energy Recovery at the Water Reclamation Facility (MT)	\$750,000
Englewood Cliffs Solar Array Project	\$300,000
Ethanol from Agriculture for Arkansas and America	\$1,000,000
Farm Solar Share (DE)	\$645,000
Farm-Based Renewable Energy (WA)	\$400,000
Fremont School District Wind Turbine	\$200,000
FL Garland Geothermal	\$760,000
Garry Elementary Solar Panel Construction and Installation	\$120,000
Genetic Improvement of Switchgrass for Biofuels (RI)	\$500,000
Geothermal Conversion Project (IN)	\$1,000,000
Geothermal Heating and Cooling Project	\$900,000
Geothermal Power Generation Plant at Oregon Institute of Technology	\$400,000
Geothermal Renovation of Residences Pilot Project	\$500,000
Going Green Solar Panel Demonstration	\$210,000
Great Basin College—Direct Use Geothermal Demonstration Project (NV)	\$1,000,000
Green Energy Sustainable Loan Program (NY)	\$700,000
Green Impact Zone—Energy & Healthy Homes Nexus Study	\$1,000,000
Green Jobs Education and Training Program	\$700,000
Hampton University Geothermal Heating System	\$1,125,000
Hawaii Energy Sustainability Program	\$6,000,000
Hawaii Renewable Energy Development Venture (HI)	\$6,000,000
High Performance Computing Infrastructure for Modeling Solar Energy	\$950,000
High Speed Wind Turbine Noise Model with Suppression (MS)	\$1,000,000
High-Tech Solid State Lighting Demonstration for Manadas and LLC	\$550,000
Home Energy Efficiency Research and Development Initiative (PA)	\$500,000
Hoonah IPEC Hydroelectric Project (AK)	\$1,500,000

CONGRESSIONALLY DIRECTED ENERGY EFFICIENCY AND RENEWABLE ENERGY PROJECTS—Continued

PROJECT	AMOUNT
Illinois Community College Sustainability Network Green Jobs Centers	\$600,000
Improving Fuel Cell Durability and Reliability	\$2,000,000
Industrial Technologies Program Language (NV)	\$1,000,000
Iowa Central Community College Renewable Fuels Laboratory (IA)	\$500,000
Kaukauna Utilities Hydroelectric Generator Replacement (WI)	\$1,000,000

YWCA Carolyn House Geothermal Improvements	\$600,000

ELECTRICITY DELIVERY AND ENERGY
RELIABILITY

Cyber Security for Energy Delivery Systems Research and Development.—It is critical that the Department works to ensure the deployment of smart grid technologies does not jeopardize the reliability or security of the nation's electrical infrastructure. The Department is directed to work with its national laboratories on research to evaluate the potential impacts of new technologies on grid reliability and security. The Department shall report to the Committees on Appropriations not later than 60 days after enactment of this Act, on its efforts to coop-

eratively work with the private sector on grid security standards and implementation.

Smart Grid Research and Development.—Growing constraints and requirements on the nation's electric power delivery system have resulted in various efforts to modernize the grid by realizing energy efficiency improvements in power transmission and distribution. While recent programs focused on transmission, smart metering, and in-home energy management technologies, other important approaches, such as those that increase the efficiency of the distribution grid, have received less public attention. As the Department has recently highlighted the importance of optimizing the entire electric de-

livery supply chain, the Department is encouraged to advance distribution-based technologies that increase energy efficiency by means of reducing energy loss that occurs during electricity distribution, and that optimize the load levels through voltage controls on the distribution system. Such grid-based technologies can greatly enhance energy savings across the electric power delivery system and are essential for the integration of renewable and distributed energy resources, electric vehicles and demand response applications.

Congressionally Directed Projects.—The bill provides \$11,050,000 for the following congressionally directed projects and activities.

CONGRESSIONALLY DIRECTED ELECTRICITY
DELIVERABILITY AND ENERGY RELIABILITY PROJECTS

PROJECT	AMOUNT
Advanced Cyber-Controlled Smart Grid with Renewable Energy Sources	\$1,000,000
Dubuque Smarter Energy Project (IA)	\$500,000
Emerging Smart Grid Technology Study	\$200,000
Energy Development and Reliability (ND)	\$300,000
Great Lakes Energy Institute	\$950,000
Heber Light and Power Automated Metering Infrastructure	\$500,000
Legal and Regulatory Implications of a Smart Electric Grid (Phase II)	\$900,000

CONGRESSIONALLY DIRECTED ELECTRICITY DELIVER-
ABILITY AND ENERGY RELIABILITY PROJECTS—Contin-
ued

PROJECT	AMOUNT
Navajo Nation Electrification Program (NM)	\$900,000
Northern Westchester Energy Action Consortium Smart Grid	\$400,000
Renewable Energy for South Texas Colonias	\$500,000
Research for Operation of High Voltage Transmission Lines at Overloads	\$850,000
Smart Grid Simulation Technology (ND)	\$800,000
Technology Development (ND)	\$750,000

CONGRESSIONALLY DIRECTED ELECTRICITY DELIVER-
ABILITY AND ENERGY RELIABILITY PROJECTS—Contin-
ued

PROJECT	AMOUNT
University of Arizona Compressed Air Energy Storage	\$500,000
University of Toledo, Energy and Innovation Infrastructure, Pilot Project	\$1,000,000
UNR—Energy Storage for Intermittent Renewable Energy Sources (NV)	\$1,000,000

NUCLEAR ENERGY
NUCLEAR ENERGY RESEARCH AND
DEVELOPMENT

Nuclear Energy Enabling Technologies.—Within the funds provided, \$16,000,000 is for the Modeling Simulation Energy Innovation Hub, \$31,320,000 is for Cross-cutting Technology Development, and no funds are provided for Transformative Nuclear Concepts.

Integrated University Program.—The bill provides \$5,000,000 for the Integrated University Program.

Reactor Concepts Research, Development, and Demonstration.—The bill provides \$196,830,000, of which \$55,000,000 is for Small Modular Reactors, \$17,500,000 is for Light Water Reactor (LWR) Sustainability, and \$15,870,000 is for Advanced Concepts.

The bill provides \$103,000,000 for the Next Generation Nuclear Plant (NGNP). There continues to be serious questions regarding the participation of industry and its cost-share contribution to the project. This has brought the future of the project, as currently configured, into question. The Department has delayed the Secretarial decision on proceeding to Phase 2 of the NGNP project until August 2011. The justification for the slippage in the Secretarial decision is unclear given the technology readiness analysis

and Nuclear Energy Advisory Committee report will be completed by May. If by the end of June 2011, the Secretary has not decided to advance the NGNP project to Phase 2, the Department is directed to use \$23,000,000 of NGNP funds to advance the Small Modular Reactors program.

Fuel Cycle Research and Development.—Within the funds provided, \$15,000,000 is provided to continue the multi-year effort deep-burn research and development of high-performance ceramic-particle-based fuels for the current nuclear reactor fleet and future light-water and high-temperature gas reactors and demonstrate concept feasibility and initial fuel performance for utilization in commercial reactors within 2 years. Further, \$3,500,000 is provided to issue a competitive solicitation requesting industry teams (fuel suppliers, utilities and advanced ceramic developers) for cost-shared proposals to develop and test advanced LWR fuel with ceramic cladding, with the capability of very high burn up and with the objective of achieving readiness for Lead Test Rod operation in commercial reactors within 5 years.

The bill includes \$45,000,000 for Used Nuclear Fuel Disposition, of which \$26,000,000 is to establish a Center of Excellence for Nuclear Waste Management. The Center's research agenda shall be informed by the rec-

ommendations of the President's Blue Ribbon Commission on America's Nuclear Future and be supportive of and consistent with other nuclear waste management research activities. The Center will be competitively awarded to preserve and build upon the expertise and science formerly within the Office of Civilian Radioactive Waste Management. Within 60 days of the enactment of this Act, the Department is directed to submit a report on (1) how the Center of Excellence for Nuclear Waste Management will support the used nuclear fuel research agenda and (2) plans to retain the federal and contractor expertise on geological waste repositories and archive all scientific documentation relating to the Yucca Mountain project.

RADIOLOGICAL FACILITIES
MANAGEMENT

Space and Defense Infrastructure.—Within the funds provided, \$15,160,000 is for nuclear infrastructure at Oak Ridge.

CONGRESSIONALLY DIRECTED
PROJECTS

Congressionally Directed Projects.—The bill provides \$7,800,000 for the following congressionally directed projects and activities.

CONGRESSIONALLY DIRECTED NUCLEAR ENERGY
PROJECTS

PROJECT	AMOUNT
Nuclear Engineering Research Center (UT)	\$500,000
Nuclear Fabrication Consortium (OH)	\$2,000,000
Nuclear Power Operator Simulator	\$800,000
Ohio State Nuclear Reactor Laboratory Facility Research and Education Expansion	\$2,000,000
Oversight of Yucca Mountain Shut Down and Reclamation (NV)	\$2,500,000

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

Fuels and Power Systems.—The bill provides \$10,000,000 in addition to sums allocated for university research, to initiate the National Energy Technology Laboratory (NETL)-Regional University Alliance for Energy Innovation and the Department's support for this initiative is encouraged. Within Innovations at Existing Plants, \$5,000,000 is for the mercury research program. The bill provides \$155,000,000 for Carbon Sequestration activities, including funds for the integrated emission reduction initiative, a Focus Area for Carbon Sequestration Science, and \$12,000,000 for an initiative focused on innovative concepts for the beneficial use of carbon dioxide for non-geological activities.

Natural Gas Technologies.—The bill includes \$15,000,000 for methane hydrates research. The bill has restored the hydrates technology program to this account and does not support funding a gas hydrates research program within the Office of Science. Within available funds, funding is provided to continue research that targets small, independent producers for exploration and production and safety activities, including completion and well control technology, and for

efforts to minimize the environmental impacts of natural gas development, including advancement of water resources treatment technologies. The bill supports initiatives to treat produced water, including for beneficial reuse, and includes funding to support demonstration-scale projects to treat water resources associated with domestic natural gas development. The bill also includes funding for continued support of unconventional natural gas production from basins that contain tight gas sands, shale gas, and coal bed methane resources.

Unconventional Fossil Energy Technologies.—The bill provides \$20,000,000 to continue the implementation of the Department's research, development, and deployment technology strategy for unconventional fossil energy resources. Within this amount, \$15,000,000 is for activities to address technological, economic, and environmental challenges associated with development of unconventional resources in the Western Energy Corridor of which \$8,000,000 is for oil shale and tar sands activities. The bill also provides \$1,200,000 to continue the Risk Based Data Management System. Within available funds, the bill supports the stripper

well program as well as ongoing research being conducted for small producers for enhanced oil recovery, exploration and production, safety, and environmental solutions. The bill does not provide funding for methane hydrates research and development in the Unconventional Fossil Energy Technologies account.

There is deep concern that the Department disregarded Congressional direction and reprogramming guidelines by improperly augmenting the \$17,833,000 provided in the Fiscal Year 2010 conference agreement for methane hydrates research with \$4,000,000 from the Unconventional Fossil Energy Technologies account. It is expected that the Department will avoid the use of such transfers to exceed congressionally established spending limits, and will strictly adhere to those limits in the future.

Program Direction.—Within the funds provided, \$129,400,000 is for program direction at NETL.

Congressionally Directed Projects.—The bill provides \$23,000,000 for congressionally directed projects in the following table.

CONGRESSIONALLY DIRECTED FOSSIL ENERGY PROJECTS

PROJECT	AMOUNT
Advanced Coal Gasification Research and Development	\$500,000
Carbon Dioxide Capture Project	\$250,000
Carbon Management Center	\$1,000,000
Clean Energy Technology (ND)	\$2,000,000
Fossil Fuel Research and Development (ND)	\$3,000,000
Gulf of Mexico Hydrates Research Consortium	\$1,000,000
Hydrogen Fuel Dispensing Station (WV)	\$750,000
Innovative Carbon Dioxide Science and Technology	\$400,000

CONGRESSIONALLY DIRECTED FOSSIL ENERGY
PROJECTS—Continued

PROJECT	AMOUNT
Long Term Environmental and Economic Impacts of the Development of a Coal Liquefaction Sector in China (WV)	\$750,000
National Center for Hydrogen Technology (ND)	\$3,000,000
Oklahoma State University Energy Center—Natural Gas Technology Training	\$1,100,000

CONGRESSIONALLY DIRECTED FOSSIL ENERGY
PROJECTS—Continued

PROJECT	AMOUNT
Sunbury Generation/Calera Carbon Capture Project (PA)	\$750,000
Ultra-Low CO ₂ Emission Coal Fuel Cell Technology	\$500,000
University of Kentucky Coal-Derived Low Energy Materials for Sustainable Construction Project (KY)	\$1,000,000
Utah Center for Ultra-Clean Coal Utilization and Heavy Oil Research (UT)	\$7,000,000

NON-DEFENSE ENVIRONMENTAL CLEANUP

Reprogramming Authority.—In fiscal year 2011, the Department may transfer funding between operating expense-funded projects within the controls listed below. All capital construction line item projects remain separate controls from the operation projects. The Committees on Appropriations must be formally notified in advance of all reprogrammings, and the Department is to take no financial action in anticipation of a congressional response. The following are the reprogramming control points: Fast Flux Test Reactor Facility, Gaseous Diffusion Plants, Small Sites, West Valley Demonstration Project, and construction line-items.

Internal Reprogramming.—In fiscal year 2011, Environmental Management site managers may transfer up to \$2,000,000, one time, between accounts listed above to reduce health and/or safety risks, gain cost savings, or complete projects as long as a program or project is not increased or decreased by more than \$2,000,000 in total during the year. The reprogramming authority may not be used to initiate new programs or to change funding for programs specifically denied, limited, or increased by Congress in the Act or report. The Committees on Appropriations must be notified within 30 days after the use of the internal reprogramming authority.

Economic Development.—None of the Non-Defense Environmental Management funds, including those provided in the Non-Defense Environmental Cleanup and Uranium Enrichment Decontamination and Decommissioning Fund, are available for economic development activities.

URANIUM ENRICHMENT DECONTAMINATION AND DECOMMISSIONING FUND

The bill provides \$550,000,000 for activities funded from the Uranium Enrichment Decontamination and Decommissioning Fund. The bill includes \$200,000,000 for Oak Ridge, Tennessee; \$85,000,000 for Paducah, Kentucky; and \$265,000,000 for Portsmouth, Ohio.

SCIENCE

Basic Energy Sciences.—\$16,000,000 is provided for the Fuels from Sunlight Energy In-

novation Hub, \$11,000,000 is provided for the proposed Batteries and Energy Storage Energy Innovation Hub, and no funding is provided to establish additional Energy Frontier Research Centers. The bill provides \$17,500,000 for the Experimental Program to Stimulate Competitive Research. The bill provides no funding for a research program in gas hydrates within the Office of Science, but rather provides funding within Fossil Energy for the program. No funding is provided for the proposed new effort in the area of multiscale models for advanced engine design.

Biological and Environmental Research.—Within available funds, the bill provides \$11,000,000 for artificial retina research. The Department is directed to provide to the Committees on Appropriations, not later than 120 days after enactment of this Act, a plan for collaboration with the National Institutes of Health (NIH) to produce an artificial retina meeting the goal of more than 1,000 electrodes, in which the Department of Energy provides its expertise in materials, engineering, and the physical sciences, and the NIH utilizes its expertise in medicine and human biological science. The bill provides no funding for nuclear medicine research in this program, but instead provides funding within the Nuclear Physics program.

Fusion Energy Sciences.—Within available funds, the bill provides \$4,000,000 for ongoing experiments using krypton fluoride lasers to advance inertial fusion energy. The Department is directed to submit a 10-year plan, not later than 12 months after enactment of this Act, on the Department's proposed research and development activities in magnetic fusion under four realistic budget scenarios. The report shall (1) identify specific areas of fusion energy research and enabling technology development in which the United States can and should establish or solidify a lead in the global fusion energy development effort and (2) identify priorities for facility construction and facility decommissioning under each of the four budget scenarios. The Department is encouraged to use a similar approach adopted by the Particle Physics

Project Prioritization Panel that developed a 10-year strategic plan for the Department's high energy physics program.

Nuclear Physics.—Within the funds provided, \$15,400,000 is for nuclear medicine research with human application. The Department is directed to report to the Committees on Appropriations, not later than 120 days after enactment of this Act, a plan to transition this research to the National Institutes of Health (NIH). The plan should include how the Department of Energy can provide its expertise in nuclear science and fundamental research applicable to diagnostic and therapeutic tools to support NIH's applications in human medicine and biological sciences.

Workforce Development for Teachers and Scientists.—Within the funds provided, up to \$6,500,000 is for the graduate fellowship program, and the Department is directed to provide to the Committees on Appropriations, not later than 90 days after enactment of this Act, a plan on the objectives of this program and funding needs over the next 10 years at a level that is sustainable and within realistic budgetary constraints.

The bill provides \$2,000,000 for the Department to contract with the National Academy of Sciences to conduct an independent study of best practices to support implementation of college and career ready standards for math and science. The study will include development and alignment of curriculum, alignment of professional development, alignment to teacher and school leader preparation program curriculum and training, and development of a comprehensive assessment system aligned to such standards. The Department is directed to report on the findings of the study to the Committees on Appropriations and appropriate authorizing committees not later than September 30, 2012.

Science Laboratories Infrastructure.—The bill provides \$115,500,000 for Science Laboratories Infrastructure.

Congressionally Directed Projects.—The bill provides \$61,650,000 for the following congressionally directed projects and activities.

CONGRESSIONALLY DIRECTED OFFICE OF SCIENCE PROJECTS		CONGRESSIONALLY DIRECTED OFFICE OF SCIENCE PROJECTS—Continued		CONGRESSIONALLY DIRECTED OFFICE OF SCIENCE PROJECTS—Continued	
PROJECT	AMOUNT	PROJECT	AMOUNT	PROJECT	AMOUNT
Advanced Computer Simulation Initiative (NV)	\$1,000,000	Functional Nanoparticles for Improved Ultra Capacitor De- vices (MS)	\$1,000,000	RNAi Research	\$300,000

Fordham Green Sciences Instrumentation, Research, Teaching and Learning Initiative	\$400,000	Research Program in Transparent, Flexible, and Ultrathin Silicon Solar Cells	\$1,000,000		

TITLE 17 INNOVATIVE TECHNOLOGY LOAN
GUARANTEE PROGRAM

The bill provides \$8,000,000,000 in loan authority for nuclear power facilities and \$4,000,000,000 in loan authority for fossil energy facilities which includes coal and petroleum coke-based power generation and industrial gasification projects that incorporate carbon capture and sequestration (CCS), pipelines, and transportation of CO₂. The bill also provides \$405,982,000 in credit subsidy for renewable projects.

ATOMIC ENERGY DEFENSE ACTIVITIES
NATIONAL NUCLEAR SECURITY
ADMINISTRATION

The NNSA is directed to submit to the Committees on Appropriations both a classified and unclassified report 90 days after the completion of the B61 Phase 6.2/2A study with (1) a description of the safety and security features the NNSA would add to a refurbished B61 and (2) a cost and benefit analysis of installing the proposed features in the warhead. The cost and benefit analysis should include (1) the costs of science, technology, and engineering to install new safety and security features, (2) the costs of assessing the impact the new features may have on the performance of the nuclear explosive package at the national laboratories, (3) the extent to which the proposed safety and security features address specific safety and security concerns, and (4) why current safety and security features would not be sufficient.

Upon completion of the report above, the NNSA is further directed to commission an independent assessment from the JASON Group of scientific advisers that would set forth meaningful criteria for evaluating how much intrinsic nuclear warhead safety and security is enough when measured against the plausible range of deployment scenarios and threats likely to confront the future stockpile, and analyze the specific costs and benefits of installing such feature or features in a warhead. The NNSA is also directed to take actions to improve the management of the life extension program as recommended by the GAO in report GAO-09-385.

The Administrator of the NNSA is directed to review the current surveillance program and report to the Committees on improvements that should be made and an implementation plan for such improvements, along with budgetary requirements, within 120 days of the enactment of this Act.

WEAPONS ACTIVITIES

DIRECTED STOCKPILE WORK

Stockpile Systems.—Within the funds provided, \$26,000,000 is for the new W78 life extension study as described in the budget justification. No budget request was made for a Phase 2/2A study. Within these funds, the bill provides \$165,000,000 to support surveillance activities.

Weapons Dismantlement and Disposition.—Within the funds provided, \$27,500,000 shall be used for weapons dismantlement and disposition work at Pantex. The NNSA is directed to provide the Committees on Appropriations an annual report on the progress on the backlog, including, but not limited to, how many weapons and weapons components are planned for dismantlement, how many were dismantled, the remainder awaiting dismantlement and future year plans.

Stockpile Services.—Within the funds provided, at least \$74,000,000 shall be used to support surveillance activities and \$84,100,000 shall be used for scheduled weapons assembly, disassembly and dismantlement work at Pantex.

CAMPAIGNS

Science Campaign.—Within the funds provided, \$44,501,000 shall be used at the Sandia National Laboratory's Z facility.

Inertial Confinement Fusion Ignition and High Yield Campaign.—Within the funds provided, at least \$62,477,000 and \$48,000,000 shall be used at the Omega facility and the Z facility, respectively.

NNSA did not attempt the first ignition shot at the National Ignition Facility (NIF) at the end of fiscal year 2010, as originally planned, because of scientific and technical challenges and management weaknesses. The first ignition shot has now been delayed to

the end of fiscal year 2011—a delay of 1 year. For this reason, the NNSA, within 120 days of enactment of this Act, is directed to establish an independent federal advisory committee made up of subject-matter experts that will regularly evaluate experiments planned on NIF, identify potential weaknesses to the experimental plan, and recommend, if necessary, alternative and innovative approaches to address scientific and technical challenges to achieve ignition by the end of fiscal year 2011. The federal advisory committee meetings and their results should be open to the scientific community where proposals, component designs, and the ignition shot plan are discussed and debated. Timely access to raw scientific data by outside users will be an essential first step to attracting a user community when NIF becomes a national user facility.

READINESS IN TECHNICAL BASE AND
FACILITIES

NNSA is directed in the budget request to identify funds for the Kansas City Responsive Infrastructure Manufacturing and Sourcing project as a separate line item under the RTBF account with an explanation of how the funds will be used to support the project.

SITE STEWARDSHIP

The NNSA is directed to submit with the fiscal year 2012 budget request the list of projects under the energy modernization and investment program. The list of projects should include the total cost of each project, the expected cost savings and other benefits of each project and when those cost savings will be realized, and the extent to which they contribute to NNSA's energy conservation goals.

CONGRESSIONALLY DIRECTED
PROJECTS

The bill provides \$2,000,000 for the following congressionally directed projects and activities.

CONGRESSIONALLY DIRECTED WEAPONS ACTIVITIES PROJECTS	
PROJECT	AMOUNT
Center for Innovation through Visualization and Simula- tion, Purdue University-Calumet, IN	\$2,000,000

DEFENSE NUCLEAR NONPROLIFERATION

The NNSA is directed to provide a report by April 1, 2011, with (1) the measures and indicators it will use to assess the progress in meeting the 4 year goal of securing all vulnerable nuclear materials, (2) the progress it has made toward meeting the goals 2 years into the effort, and (3) additional measures it must take and funding requirements for the last 2 years. Such measures should include the fraction of the total number of sites in the world with nuclear weapons or weapons-usable materials where all of those stocks have been eliminated and the fraction that have demonstrated that their security systems are performing effectively and could protect against a broad range of outsider and insider threats.

NONPROLIFERATION AND VERIFICATION RESEARCH AND DEVELOPMENT

The bill includes \$10,000,000 for National Nuclear Security Administration (NNSA) laboratories to use their expertise for space situational awareness and at least \$500,000 for the Global Seismographic Network equipment replacement. The NNSA is directed to submit a report with the fiscal year 2012 budget to the Committees on Appropriations on each project with the baseline cost, scope and schedule, deliverables, the public or private entity performing the research and development, and the proposed user.

INTERNATIONAL NUCLEAR MATERIALS PROTECTION AND COOPERATION

The NNSA is directed to submit a report to the Committees on Appropriations not later than 90 days of enactment on (1) whether Russia has taken steps to implement the Joint Transition Plan, (2) the remaining challenges in sustaining security upgrades and how NNSA plans to address those challenges, and (3) U.S. resources, whether direct or indirect, needed after fiscal year 2012 to support U.S.-funded MPC&A activities.

FISSILE MATERIALS DISPOSITION

The bill provides \$918,213,000 for Fissile Materials Disposition. The bill includes \$248,940,000 for U.S. Surplus Fissile Material Disposition, of which \$82,999,000 is for the Pit

Disassembly and Conversion facility (PDCF). This reduction is due to adjustments in the schedule and scope of the PDCF project that result in the deferment of costs into fiscal year 2012.

The NNSA is directed to submit a report to the Committees on Appropriations not later than 90 days after enactment of this Act on what actions it has taken to inform utilities about the MOX fuel program and related incentives and how it plans to increase the number of customers for MOX fuel.

The bill includes \$30,500,000 for Russian Surplus Fissile Material Disposition. There is strong support for the nonproliferation goal of this program to dispose of 34 metric tons of Russian surplus weapons-usable plutonium. However, this bill does not provide the funding request for this program because of delays in establishing the infrastructure and milestones required for Russia to receive U.S. contributions and the NNSA does not plan on providing any funding to Russia until fiscal year 2012. The NNSA is directed to submit a report to the Committees on Appropriations not later than 90 days after enactment of this Act on how the United States will spend the \$400,000,000 to help Russia dispose of excess plutonium and the milestones in the program that Russia must meet before the United States releases any of these funds.

GLOBAL THREAT REDUCTION INITIATIVE

The bill includes \$568,838,000 for the Global Threat Reduction Initiative. The bill provides the requested funding level for Highly-Enriched Uranium Reactor Conversion.

The bill includes \$355,691,000 for Nuclear and Radiological Material. If by the end of the third quarter of fiscal year 2011 NNSA has not entered into an agreement with South Africa to remove South African highly enriched uranium, the NNSA is directed to use \$27,000,000 of the \$108,000,000 appropriated for gap nuclear material removal activities for domestic material protection activities.

The bill includes \$95,147,000 for Nuclear and Radiological Material Protect of which not less than \$35,147,000 should be used for Do-

mestic Material Protection in the United States.

USE OF PRIOR YEAR FUNDS

Use of prior-year balances.—The Department is directed to use \$20,000,000 of prior year balances associated with the Elimination of Weapons Grade Plutonium Production Program.

NAVAL REACTORS

The NNSA is directed to submit a report within 90 days of enactment of this Act on its facilities recapitalization plan including a project-by-project description; the funding profile for the next five years; the prioritization scheme employed to support the funding profile and schedule; the operations and maintenance cost savings resulting from replacing facilities; the environmental remediation costs associated with recapitalization; and the project management and controls in place to ensure projects are completed on-cost and on-schedule.

OFFICE OF THE ADMINISTRATOR

Support to Minority Colleges and Universities.—The bill provides \$25,000,000 for the Office of the Administrator's support for Historically Black Colleges and Universities (HBCU), Hispanic Serving Institutions (HSI), and minority outreach at other colleges and universities. Of this amount, \$10,000,000 is for HBCUs, fully supporting the Dr. Samuel Massie Chairs of Excellence; up to \$10,000,000 is for HSIs; and \$5,000,000 is for the Educational Advancement Alliance HBCU Graduate program, including a National Conference for Potential Scholars and an endowment. Additionally, the bill includes \$6,000,000 in Weapons Activities, \$3,000,000 in Nonproliferation, and \$1,000,000 in Naval Reactors to engage HBCUs, and further directs the engagement of HSIs and minority outreach at other colleges and universities in research areas directly supporting program activities.

Congressionally Directed Projects.—The bill provides \$13,150,000 for the following congressionally directed projects and activities.

CONGRESSIONALLY DIRECTED OFFICE OF THE
ADMINISTRATOR (NNSA) PROJECTS

PROJECT	AMOUNT
Achieving a College Education Program at Maricopa County Community Colleges	\$1,000,000
GEAR UP Collaborative HBCU Graduate Program	\$1,750,000
Historically Black Colleges and Universities Program	\$10,000,000
Minority Energy Science Research and Education Initiative	\$400,000

ENVIRONMENTAL AND OTHER DEFENSE
ACTIVITIESDEFENSE ENVIRONMENTAL CLEANUP
(INCLUDING TRANSFER OF FUNDS)

The bill provides \$5,620,135,000 for the Defense Environmental Cleanup program, including \$10,000,000 for hazardous worker training.

Reprogramming Authority.—In fiscal year 2011, the Department may transfer funding between operating expense-funded projects within the controls listed below. All capital construction line item projects remain separate controls from the operating projects. The Committees on Appropriations must be formally notified in advance of all reprogrammings, and the Department is to take no financial action in anticipation of a congressional response. The following are the reprogramming control points: Closure Sites; Hanford site; Idaho National Laboratory; NNSA sites; Oak Ridge Reservation; Office of River Protection; Savannah River site; Waste Isolation Pilot Plant; Program Direction; Program Support; Technology Development and Deployment; Safeguards and Security; and all capital construction line items, regardless of site.

Internal Reprogramming.—Consistent with Section 301 of the bill, Environmental Management (EM) site managers may transfer up to \$5,000,000, one time, between accounts listed above to reduce health and/or safety risks, gain cost savings, or complete projects as

long as a program or project is not increased or decreased by more than \$5,000,000 in total during the year. The reprogramming authority may not be used to initiate new programs or to change funding for programs specifically denied, limited, or increased by Congress in the Act or report. The Committee on Appropriations must be notified within 30 days after the use of the internal reprogramming authority.

Prioritization of Cleanup Projects.—The Department is directed to submit, within 120 days of enactment of this Act, a report describing in detail how EM prioritizes its projects, including a list of the factors considered in prioritization and the relative weight assigned to each factor.

Nuclear Waste Treatment.—The Department is directed to report, within 15 days of a decision to modify current policy, any modifications regarding waste loading within EM's waste treatment strategy for high-level waste.

Hanford Site.—The Department is directed to carry out maintenance and public safety efforts at the B Reactor. Funding for the Hazardous Materials Management and Emergency Response facilities are provided for within available funds.

Oak Ridge Reservation.—The amount provided for cleanup activities at ORNL shall include the 2000 Area slabs and soils remediation and the Isotope Area decommissioning and demolition.

Waste Isolation Pilot Plant.—The bill provides funding for educational support and infrastructure improvements.

Technology Development and Deployment.—The Department is directed to continue its partnership with industry to transfer and demonstrate international technologies and approaches to the cleanup program. The Committees on Appropriations also encourage the Department to work with industry to improve the transition of international technology into practice.

OTHER DEFENSE ACTIVITIES
ACQUISITION WORKFORCE
IMPROVEMENT

The Department did not submit a comprehensive plan to justify a new, stand-alone initiative. Therefore, the bill includes no funding for the acquisition workforce improvement initiative under Other Defense Activities. The Committees on Appropriations fully support a robust acquisition and contracting workforce and will work with the Department to ensure that program direction under the various accounts is sufficient to meet the requirements of the agency to ensure proper management and oversight of the acquisition process.

CONGRESSIONALLY DIRECTED
PROJECTS

The bill provides \$2,000,000 for the following congressionally directed projects and activities.

CONGRESSIONALLY DIRECTED OTHER DEFENSE ACTIVITIES
PROJECTS

PROJECT	AMOUNT
Burlington Atomic Energy Commission Plant and Ames Laboratory Former Workers Medical Surveillance Programs (IA)	\$1,000,000
Medical Monitoring at Paducah, KY, Portsmouth, OH, and Oak Ridge, TN (TN)	\$1,000,000

¹ Totals include alternative financing costs, reimbursable agreement funding, and power purchase and wheeling expenditures. Offsetting collection totals reflect funds collected for annual expenses, including power purchase and wheeling.

TITLE IV

INDEPENDENT AGENCIES

Funding levels for appropriations by independent agency within this Act, and comparisons to last year's level and the budget request, can be found in the table at the end of this division. Additional items in the Act are discussed below.

NUCLEAR REGULATORY COMMISSION

SALARIES AND EXPENSES

The bill provides \$1,053,483,000 for the Nuclear Regulatory Commission (NRC) salaries and expenses. The additional \$10,000,000 of funding supplements the \$5,000,000 included in the budget request for NRC participation in an Integrated University Program as directed by section 313 of Public Law 111-8. Further, \$10,000,000 of this amount is to be used to support university education programs relevant to the NRC mission. In addition, not less than \$5,000,000 of this amount will be used for grants to support research projects that do not align with programmatic missions but are critical to maintaining the discipline of nuclear science and engineering. The NRC is encouraged to work with the Department of Energy on Small

Modular Reactors so that technical issues can be resolved as early as possible. The Commission is directed to continue to provide semi-annual reports on the status of its licensing and other regulatory activities.

NUCLEAR WASTE TECHNICAL REVIEW BOARD

The Committees on Appropriations expect NWTRB to be involved in the Blue Ribbon Commission on America's Nuclear Future on issues involving nuclear waste disposal. The NWTRB shall support the Department of Energy and Nuclear Regulatory Commission's effort to archive and preserve Yucca Mountain-related documents and physical materials of scientific value.

TENNESSEE VALLEY AUTHORITY

NNSA Tritium Program.—The Tennessee Valley Authority is directed to bill the National Nuclear Security Administration (NNSA) on a quarterly basis for the work supporting the NNSA's tritium program.

Reports.—The Inspector General is directed to forward copies of all audit and inspection reports to the Committees on Appropriations immediately after they are issued, and immediately make the Committees aware of any review that recommends cancellation of,

or modification to, any major acquisition project or grant, or which recommends significant budgetary savings. The Inspector General is also directed to withhold from public distribution for a period of 15 days any final audit or investigation report that was requested by the Committees on Appropriations.

DISCLOSURE OF EARMARKS AND CONGRESSIONALLY DIRECTED SPENDING ITEMS

Following is a list of congressional earmarks and congressionally directed spending items (as defined in clause 9 of rule XXI of the Rules of the House of Representatives and rule XLIV of the Standing Rules of the Senate, respectively) included in the bill or this explanatory statement, along with the name of each Senator, House Member, Delegate, or Resident Commissioner who submitted a request to the House or Senate Committee of jurisdiction for each item so identified. Neither the bill nor the explanatory statement contains any limited tax benefits or limited tariff benefits as defined in the applicable House or Senate rules.

Department of Energy	Energy Efficiency and Renewable Energy	Springfield Fast-Fill CNG Facility (MO)	\$1,000,000	Baird	Murray, Cantwell
Department of Energy	Energy Efficiency and Renewable Energy	Strategic Biomass Initiative (MS)	\$500,000	---	Bond
Department of Energy	Energy Efficiency and Renewable Energy	Sun Grant Initiative, South Dakota State University Regional Biomass Feedstock Research and Development (SD)	\$500,000	---	Cochran, Wicker
Department of Energy	Energy Efficiency and Renewable Energy	Sustainable Biofuel Production - Consolidated Bioprocessing Strategy for Biomass Conversion (MA)	\$2,000,000	Herseht Sandlin	Johnson, Thune
Department of Energy	Energy Efficiency and Renewable Energy	Sustainable Campus Initiative of Sierra Nevada College at Lake Tahoe (NV)	\$600,000	---	Kerry
Department of Energy	Energy Efficiency and Renewable Energy	Sustainable Energy Homeowner Outreach Program (VT)	\$400,000	---	Reid
Department of Energy	Energy Efficiency and Renewable Energy	Sustainable Energy in Schools (VT)	\$200,000	---	Sanders
Department of Energy	Energy Efficiency and Renewable Energy	Sustainable Energy Institute (IA)	\$500,000	---	Sanders
Department of Energy	Energy Efficiency and Renewable Energy	Switched Reluctance Motor Technology for Zero Emission Mobility	\$500,000	---	Harkin, Grassley
Department of Energy	Energy Efficiency and Renewable Energy	TCC Green Workforce	\$9,000,000	Childers	Cochran, Wicker
Department of Energy	Energy Efficiency and Renewable Energy	Town of North Hempstead Solar Farm	\$500,000	Bocieri	---
Department of Energy	Energy Efficiency and Renewable Energy	Training for Employment in the Algae Economy (TEALE)	\$400,000	Boyd	---
Department of Energy	Energy Efficiency and Renewable Energy	Tri-County Biomass Energy Pilot Project (MT)	\$350,000	Ackerman	---
Department of Energy	Energy Efficiency and Renewable Energy	Truckee Meadows Water Reclamation Facility Environmental and Energy Enhancement(NV)	\$600,000	Davis (CA)	---
Department of Energy	Energy Efficiency and Renewable Energy	Tullahoma City Schools Solar Roof Demonstration	\$800,000	---	Tester, Baucus
Department of Energy	Energy Efficiency and Renewable Energy	UDC Renewable Energy Institute	\$1,000,000	---	Reid
Department of Energy	Energy Efficiency and Renewable Energy	Utah Natural Gas Fueling Station (UT)	\$500,000	Davis (TN)	---
Department of Energy	Energy Efficiency and Renewable Energy	University of Arkansas at Little Rock Nanostructured Composite Project	\$300,000	Norton	---
Department of Energy	Energy Efficiency and Renewable Energy	University of Georgia MidSouth/Southeast BioEnergy Consortium	\$1,000,000	Snyder	Bennett
Department of Energy	Energy Efficiency and Renewable Energy	University of Louisville Research and Energy Independence Program (KY)	\$1,100,000	Scott (GA), Barrow	Pryor, Lincoln
Department of Energy	Energy Efficiency and Renewable Energy	UNLV - Intermountain West Sustainable Development Project (NV)	\$2,000,000	---	Chambliss
Department of Energy	Energy Efficiency and Renewable Energy	UNR - Great Basin Center for Geothermal Energy (NV)	\$500,000	---	McConnell
Department of Energy	Energy Efficiency and Renewable Energy	Urban Wind Demonstration Project	\$250,000	---	Reid
Department of Energy	Energy Efficiency and Renewable Energy	Utah Center for Energy Innovation and Commercialization (UT)	\$300,000	Crowley	Gillibrand
Department of Energy	Energy Efficiency and Renewable Energy	Vermont Biofuels and Carbon Harvest Initiative (VT)	\$3,400,000	---	Bennett
Department of Energy	Energy Efficiency and Renewable Energy	Vermont Biomass Energy Resource Center (VT)	\$750,000	---	Leahy
Department of Energy	Energy Efficiency and Renewable Energy	Veronoma Sustainable Schools (OR)	\$1,000,000	---	Leahy
Department of Energy	Energy Efficiency and Renewable Energy		\$300,000	---	Wyden, Merkley

Department of Energy	Energy Efficiency and Renewable Energy	Village of Alsip Wind and Solar	\$675,000	Rush	---
Department of Energy	Energy Efficiency and Renewable Energy	Warburg College Wind Energy Demonstration Project	\$1,000,000	Brakey (IA)	---
Department of Energy	Energy Efficiency and Renewable Energy	White Earth Tribal Biomass Bio Fuel Project (MN)	\$700,000	---	Klobuchar, Franken
Department of Energy	Energy Efficiency and Renewable Energy	Wind Energy Infrastructure (ND)	\$550,000	---	Dorgan
Department of Energy	Energy Efficiency and Renewable Energy	Wind Energy Materials Development (ND)	\$2,000,000	Pomeroy	Dorgan
Department of Energy	Energy Efficiency and Renewable Energy	Wind Energy Technology Training Program (WA)	\$500,000	---	Murray
Department of Energy	Energy Efficiency and Renewable Energy	Wind Energy Training and Infrastructure (ND)	\$1,000,000	Pomeroy	Dorgan
Department of Energy	Energy Efficiency and Renewable Energy	Wind Power Exploration (MT)	\$100,000	---	Tester, Baucus
Department of Energy	Energy Efficiency and Renewable Energy	Wind Resource Monitoring and Training Program (NV)	\$1,000,000	---	Reid
Department of Energy	Energy Efficiency and Renewable Energy	Winthrop Hospital Solar Array System	---	Meeks (NY); McCarthy	---
Department of Energy	Energy Efficiency and Renewable Energy	Wireless Turbine Blade Sensor System Research (NY)	\$700,000	(NY)	Schumer
Department of Energy	Energy Efficiency and Renewable Energy	YWCA Carolyn House Geothermal Improvements	\$1,000,000	---	---
Department of Energy	Electricity Delivery and Energy Reliability	Advanced Cyber-Controlled Smart Grid with Renewable Energy Sources	\$600,000	Slaughter	---
Department of Energy	Electricity Delivery and Energy Reliability	Dubuque Smarter Energy Project (IA)	\$1,000,000	Towns	Gillibrand
Department of Energy	Electricity Delivery and Energy Reliability	Emerging Smart Grid Technology Study	\$500,000	---	Harkin
Department of Energy	Electricity Delivery and Energy Reliability	Energy Development and Reliability (ND)	\$200,000	Schiff	---
Department of Energy	Electricity Delivery and Energy Reliability	Great Lakes Energy Institute	\$300,000	---	Dorgan
Department of Energy	Electricity Delivery and Energy Reliability	Heber Light and Power Automated Metering Infrastructure	\$950,000	Fudge; Ryan (OH)	Voinovich, Sherrod Brown
Department of Energy	Electricity Delivery and Energy Reliability	Legal and Regulatory Implications of a Smart Electric Grid (Phase II)	\$500,000	Matheson	---
Department of Energy	Electricity Delivery and Energy Reliability	Navajo Nation Electrification Program (NM)	\$900,000	Welch	---
Department of Energy	Electricity Delivery and Energy Reliability	Northern Westchester Energy Action Consortium Smart Grid	\$900,000	Kirkpatrick (AZ); Lujan	Bingaman; Tom Udall
Department of Energy	Electricity Delivery and Energy Reliability	Renewable Energy for South Texas Colonias	\$400,000	Hall (NY); Lowey	---
Department of Energy	Electricity Delivery and Energy Reliability	Research for Operation of High Voltage Transmission Lines at Overloads	\$500,000	Cuellar	---
Department of Energy	Electricity Delivery and Energy Reliability	Smart Grid Simulation Technology (ND)	\$850,000	Gordon (TN)	---
Department of Energy	Electricity Delivery and Energy Reliability	Technology Development (ND)	\$800,000	Pomeroy	Dorgan
Department of Energy	Electricity Delivery and Energy Reliability	University of Arizona Compressed Air Energy Storage	\$750,000	---	Dorgan
Department of Energy	Electricity Delivery and Energy Reliability	University of Toledo, Energy and Innovation Infrastructure, Pilot Project	\$500,000	Pastor (AZ)	---
Department of Energy	Electricity Delivery and Energy Reliability	UNR - Energy Storage for Intermittent Renewable Energy Sources (NV)	\$1,000,000	Kapur	---
Department of Energy	Electricity Delivery and Energy Reliability	Nuclear Engineering Research Center (UT)	\$1,000,000	---	Reid
Department of Energy	Nuclear Energy	Nuclear Fabrication Consortium (OH)	\$500,000	---	Bennett
Department of Energy	Nuclear Energy	Nuclear Power Operator Simulator	\$2,000,000	---	Voinovich
Department of Energy	Nuclear Energy	Ohio State Nuclear Reactor Laboratory Facility Research and Education Expansion	\$800,000	Lynch; Tsongas; Delahunt	Kerry
Department of Energy	Nuclear Energy	Oversight of Yucca Mountain Shut Down and Reclamation (NV)	\$2,000,000	Kilroy	Voinovich
Department of Energy	Fossil Energy	Advanced Coal Gasification Research and Development	\$2,500,000	---	Reid
Department of Energy	Fossil Energy	Carbon Dioxide Capture Project	\$500,000	Chandler	---
Department of Energy	Fossil Energy	Carbon Management Center	\$250,000	Larson (CT)	---
Department of Energy	Fossil Energy	Clean Energy Technology (ND)	\$1,000,000	Perlmutter	Mark Udall, Bennet
Department of Energy	Fossil Energy	Fossil Fuel Research and Development (ND)	\$2,000,000	---	Dorgan
Department of Energy	Fossil Energy	Gulf of Mexico Hydrates Research Consortium	\$3,000,000	Pomeroy	Dorgan, Conrad
Department of Energy	Fossil Energy	Hydrogen Fuel Dispensing Station (WV)	\$1,000,000	Childers	Cochran, Wicker
Department of Energy	Fossil Energy	Innovative Carbon Dioxide Science and Technology	\$750,000	---	Rockefeller
Department of Energy	Fossil Energy	Long Term Environmental and Economic Impacts of the Development of a Coal Liquefaction Sector in China (WV)	\$400,000	Capuano	---
Department of Energy	Fossil Energy	National Center for Hydrogen Technology (ND)	\$750,000	---	Rockefeller
Department of Energy	Fossil Energy	Oklahoma State University Energy Center - Natural Gas Technology Training	\$3,000,000	Pomeroy	Dorgan, Conrad
Department of Energy	Fossil Energy	Sunbury Generation/Calera Carbon Capture Project (PA)	\$1,100,000	Boren	---
Department of Energy	Fossil Energy	Ultra-Low CO2 Emission Coal Fuel Cell Technology	\$750,000	---	Specter
Department of Energy	Fossil Energy	University of Kentucky Coal-Derived Low Energy Materials for Sustainable Construction Project (KY)	\$500,000	Sutton; Ryan (OH)	---
Department of Energy	Fossil Energy	Utah Center for Ultra-Clean Coal Utilization and Heavy Oil Research (UT)	\$1,000,000	---	McConnell
Department of Energy	Office of Science	Advanced Computer Simulation Initiative (NV)	\$7,000,000	---	Bennett
Department of Energy	Office of Science	Alaska Climate Center	\$1,000,000	---	Reid
Department of Energy	Office of Science	Antibodies Research (ND)	\$500,000	Young (AK)	Murkowski; Begich
Department of Energy	Office of Science	Brown University Carbon Sequestration	\$4,000,000	---	Dorgan, Conrad
			\$1,200,000	Langevin; Kennedy	---

Department of Energy Office of Science	Center for Diagnostic Nanosystems (WV)	\$2,000,000	---	Rockefeller
Department of Energy Office of Science	Center for Nanoscale Energy (ND)	\$7,000,000	Pomeroy	Dorgan, Conrad
Department of Energy Office of Science	Center for Sustainable Energy at Bronx Community College	\$300,000	Serrano	---
Department of Energy Office of Science	Center for Sustainable Energy Solutions	---	Brown, Corrine; Grayson,	---
Department of Energy Office of Science	Characteristics and Cleanup of the U.S. Nuclear Legacy (MS)	\$500,000	Meek (FL)	---
Department of Energy Office of Science	Climate Model Evaluation Program (AL)	\$3,500,000	---	Cochran; Wicker
Department of Energy Office of Science	Computing Capability (ND)	\$2,000,000	---	Shelby; Sessions
Department of Energy Office of Science	Development of Nontechnology-enhanced Solar Cells with Low Cost and High Conversion Efficiency (NV)	\$2,000,000	Pomeroy	Dorgan, Conrad
Department of Energy Office of Science	Eastern Michigan University Biofuels Laboratory	\$500,000	---	Reid
Department of Energy Office of Science	Energy and Environmental Engineering and Sustainability	\$500,000	Conyers; Dingell	Levin; Stabenow
Department of Energy Office of Science	Energy Research (MS)	\$500,000	Bordallo	---
Department of Energy Office of Science	Environmental Radioactivity Monitoring Laboratory: Monitoring/Assessment of the Radioactive Pollutants in the South-West Mississippi (MS)	\$250,000	---	Cochran
Department of Energy Office of Science	Fordham Green Sciences Instrumentation, Research, Teaching and Learning Initiative	\$750,000	---	Cochran; Wicker
Department of Energy Office of Science	Functional Nanoparticles for Improved Ultra Capacitor Devices (MS)	\$400,000	Serrano	---
Department of Energy Office of Science	Fusion Energy Spheromak Turbulent Plasma Experiment	\$1,000,000	---	Cochran; Wicker
Department of Energy Office of Science	Houston Works Urban Energy to Science Education Initiative	---	Boyd, Brown, Corrine; Meek	---
Department of Energy Office of Science	Idaho National Laboratory Center for Advanced Energy Studies (ID)	\$1,100,000	(FL)	---
Department of Energy Office of Science	Institute for Integrated Sciences	\$600,000	Green, Gene; Green, Al	---
Department of Energy Office of Science	KU Cancer Research Equipment (KS)	\$1,000,000	---	Crapo; Risch
Department of Energy Office of Science	Lincoln Memorial University/ORNL Partnership on Geothermal Energy (TN)	\$2,000,000	Markley (MA)	Kerry
Department of Energy Office of Science	Material Science Smart Coatings (NE)	\$4,000,000	---	Brownback; Roberts
Department of Energy Office of Science	Metal-Enhanced Fluorescence Research and Development	\$2,000,000	---	Alexander
Department of Energy Office of Science	Missouri University Research Reactor Reflector Shield (MO)	\$500,000	---	Ben Nelson
Department of Energy Office of Science	Morris College STEM Infrastructure Improvement Project	\$750,000	Cummings	Mikulski; Cardin
Department of Energy Office of Science	MST Minority Graduate Program	\$1,000,000	---	Bond
Department of Energy Office of Science	Nanotechnology Initiative	\$600,000	Spratt	---
Department of Energy Office of Science	Nevada Water Resources Data, Modeling, and Visualization (DMV) Center (NV)	\$2,250,000	Fattah	---
Department of Energy Office of Science	Oregon Sustainability Center	---	Courtney; Larson (CT);	Dodd; Lieberman
Department of Energy Office of Science	Research Program in Transparent, Flexible, and Ultrathin Silicon Solar Cells	\$750,000	DeLauro	Reid
Department of Energy Office of Science	RNAi Research	\$300,000	Titus; Berkley	Wyden; Merkley
Department of Energy Office of Science	S/TEMicroscope and Electron-Beam Lithography Tool for Nanotechnology Research	\$1,000,000	Blumenauer; Schrader; Wu	---
Department of Energy Office of Science	Solid State Preparation and Characterization Lab (NV)	\$300,000	McGovern	Kerry
Department of Energy Office of Science	Southern Illinois University Research (IL)	\$300,000	Price (NC); Miller (NC);	Hagan
Department of Energy Office of Science	St. Edwards University Science, Technology, Engineering, and Mathematics (STEM) Equipment	\$2,500,000	Etheridge	Reid
Department of Energy Office of Science	Sustainable Bioenergy Development Center	\$500,000	---	Dubin
Department of Energy Office of Science	Technology Transfer & Commercialization of Technologies at DOE (NM)	\$750,000	---	---
Department of Energy Office of Science	The Center for Science Education at Emmanuel College	\$1,000,000	Doggett	---
Department of Energy Office of Science	Thurgood Marshall College Fund Minority Science Initiative	\$500,000	Markley (CO)	---
Department of Energy Office of Science	TU Algae to Green Fuels Energy Project (OK)	\$500,000	---	Bingaman; Tom Udall
Department of Energy Office of Science	UMass New Laboratory Science Building Laboratory Outfitting and Equipment	\$1,400,000	Capuano	---
Department of Energy Office of Science	University of California, San Diego Seismic Research (CA)	---	Jackson (IL); Cummings;	---
Department of Energy Office of Science	University of Rhode Island Regional Earth Systems Center	---	Towns; Sestak; Butterfield;	---
Department of Energy Office of Science	University of South Dakota Project on Renewable Energy and the Economy (SD)	\$2,500,000	Hastings (FL)	Inhofe
Department of Energy Office of Science	Center for Innovation through Visualization and Simulation, Purdue University-Calumet, IN	\$750,000	---	---
Department of Energy Office of Science	Achieving a College Education Program at Maricopa County Community Colleges	\$2,000,000	Oliver	Feinstein
Department of Energy Office of Science	GEAR UP Collaborative HBCU Graduate Program	\$1,500,000	---	Reed; Whitehouse
Department of Energy Office of Science	NSA-Weapons Activities	\$350,000	Langevin	Johnson
Department of Energy Office of Science	NSA-Office of the Administrator	\$350,000	Herseht Sandlin	---
Department of Energy Office of Science	NSA-Office of the Administrator	\$2,000,000	Vislosky	---

COMPARATIVE STATEMENT OF NEW BUDGET AUTHORITY FY 2011

[Amounts in thousands]

	FY 2010 En-acted	FY 2011 Re-quest	FY 2011 This Bill	This Bill vs En-acted	This Bill vs Re-quest
TITLE I—DEPARTMENT OF DEFENSE—CIVIL					
DEPARTMENT OF THE ARMY					
Corps of Engineers—Civil					
Investigations	160,000	104,000	150,000	-10,000	+46,000
Emergency appropriations (Public Law 111-212)	5,400			-5,400	
Subtotal, Investigations	165,400	104,000	150,000	-15,400	+46,000
Construction	2,031,000	1,690,000	1,823,625	-207,375	+133,625
Mississippi River and tributaries	340,000	240,000	325,000	-15,000	+85,000
Emergency appropriations (Public Law 111-212)	18,600			-18,600	
Recission		-23,000			+23,000
Recission of emergency funding		-35,000			+35,000
Subtotal, Mississippi River and tributaries	358,600	182,000	325,000	-33,600	+143,000
Operations and maintenance	2,400,000	2,361,000	2,475,000	+75,000	+114,000
Emergency appropriations (Public Law 111-212)	173,000			-173,000	
Subtotal, Operations and maintenance	2,573,000	2,361,000	2,475,000	-98,000	+114,000
Regulatory program	190,000	193,000	193,000	+3,000	
FUSRAP	134,000	130,000	130,000	-4,000	
Flood control and coastal emergencies		30,000	30,000	+30,000	
Emergency appropriations (Public Law 111-212)	20,000			-20,000	
Subtotal, Flood control and coastal emergencies	20,000	30,000	30,000	+10,000	
Expenses	185,000	185,000	187,375	+2,375	+2,375
Office of Assistant Secretary of the Army (Civil Works)	5,000	6,000	6,000	+1,000	
Total, title I, Department of Defense—Civil	5,662,000	4,881,000	5,320,000	-342,000	+439,000
Appropriations	(5,445,000)	(4,939,000)	(5,320,000)	(-125,000)	(+381,000)
Emergency appropriations	(217,000)			(-217,000)	
Recissions		(-23,000)			(+23,000)
Recission of emergency funding		(-35,000)			(+35,000)
TITLE II—DEPARTMENT OF THE INTERIOR					
Central Utah Project Completion Account					
Central Utah project construction	38,800	38,810	38,810	+10	
Fish, wildlife, and recreation mitigation and conservation	1,500	2,500	2,500	+1,000	
Subtotal	40,300	41,310	41,310	+1,010	
Program oversight and administration	1,704	1,694	1,694	-10	
Total, Central Utah project completion account	42,004	43,004	43,004	+1,000	
Bureau of Reclamation					
Water and related resources	951,158	913,582	938,600	-12,558	+25,018
Subtotal, Water and related resources	951,158	913,582	938,600	-12,558	+25,018
Central Valley project restoration fund	35,358	49,915	49,915	+14,557	
California Bay-Delta restoration	40,000	40,000	40,000		
Policy and administration	61,200	61,200	61,200		
Total, Bureau of Reclamation	1,087,716	1,064,697	1,089,715	+1,999	+25,018
General Provisions					
Emergency Drought Relief (emergency appropriations)	10,000			-10,000	
Total, title II, Department of the Interior	1,139,720	1,107,701	1,132,719	-7,001	+25,018
Appropriations	(1,129,720)	(1,107,701)	(1,132,719)	(+2,999)	(+25,018)
Emergency appropriations	(10,000)			(-10,000)	
TITLE III—DEPARTMENT OF ENERGY					
Energy Programs					
Energy efficiency and renewable energy	2,242,500	2,355,473	2,242,500		-112,973
Electricity delivery and energy reliability	171,982	185,930	172,000	+18	-13,930
Nuclear energy	786,637	824,052	775,000	-11,637	-49,052
Fossil energy research and development	672,383	586,583	672,000	-383	+85,417
Naval Petroleum and Oil Shale Reserves	23,627	23,614	23,514	-13	
Strategic petroleum reserve	243,823	209,861	209,861	-33,962	
Recission		-71,000			+71,000
Subtotal, Strategic petroleum reserve	243,823	138,861	209,861	-33,962	+71,000
Northeast home heating oil reserve	11,300	11,300	11,300		
Energy Information Administration	110,595	128,833	111,000	+405	-17,833
Non-defense environmental clean up	244,673	225,163	244,163	-510	+19,000
Uranium enrichment decontamination and decommissioning fund	573,850	730,498	550,000	-23,850	-180,498
Offsetting collections		-200,000			+200,000
Subtotal, UEDDF	573,850	530,498	550,000	-23,850	+19,502
Science	4,903,710	5,121,437	4,904,000	+290	-217,437
Nuclear Waste Disposal	98,400			-98,400	
Advanced Research Projects Agency-Energy		299,965	200,000	+200,000	-99,965
Innovative Technology Loan Guarantee Program	43,000	58,000	58,000	+15,000	
Offsetting collection	-43,000	-58,000	-58,000	-15,000	
Proposed change in subsidy cost		500,000	405,982	+405,982	-94,018
Additional loan volume		360,000	120,000	+120,000	-240,000
Additional subsidy cost		300,000			-300,000
Loan volume (recission)			-180,000	-180,000	-180,000
Subtotal, Innovative Technology Guarantee Pgm		1,160,000	345,982	+345,982	-814,018
Advanced technology vehicles manufacturing loans program	20,000	9,998	9,998	-10,002	
Departmental administration	288,684	288,872	288,872	+188	
Miscellaneous revenues	-119,740	-119,740	-119,740		

COMPARATIVE STATEMENT OF NEW BUDGET AUTHORITY FY 2011—Continued

(Amounts in thousands)

	FY 2010 En-acted	FY 2011 Re-quest	FY 2011 This Bill	This Bill vs En-acted	This Bill vs Re-quest
Net appropriation	168,944	169,132	169,132	+ 188	
Office of the Inspector General	51,927	42,850	42,850	- 9,077	
Atomic Energy Defense Activities					
National Nuclear Security Administration					
Weapons activities	6,384,431	7,008,835	7,008,835	+ 624,404	
Subtotal, Weapons activities	6,384,431	7,008,835	7,008,835	+ 624,404	
Defense nuclear nonproliferation	2,136,709	2,687,167	2,575,167	+ 438,458	- 112,000
Subtotal, Defense nuclear nonproliferation	2,136,709	2,687,167	2,575,167	+ 438,458	- 112,000
Naval reactors	945,133	1,070,486	945,133		- 125,353
Office of the Administrator	420,754	448,267	438,267	+ 17,513	- 10,000
Subtotal, National Nuclear Security Administration	9,887,027	11,214,755	10,967,402	+ 1,080,375	- 247,353
Defense environmental cleanup	5,642,331	5,588,039	5,260,135	- 382,196	- 327,904
Other defense activities	847,468	866,317	866,317	+ 18,849	
Acquisition workforce capacity and capabilities		11,892			- 11,892

**DIVISION E—FINANCIAL SERVICES AND
GENERAL GOVERNMENT APPROPRIATIONS
ACT, 2011**

Following is an explanation of the effects of Division E, which makes appropriations for financial services and general government for fiscal year 2011. As provided in Section 4 of the consolidated bill, this explanatory statement shall have the same effect with respect to the allocation of funds and the implementation of this division as if it were a joint explanatory statement of a committee of conference.

REPROGRAMMING GUIDELINES

The Act includes a provision (section 608) establishing the authority of agencies to reprogram funds and the limitations on that authority. The provision specifically requires the advance approval of the Committees on Appropriations of any proposal to reprogram funds that meets specified criteria.

Each agency is required to submit an operating plan to the House and Senate Committees on Appropriations not later than 60 days after the enactment of this Act. This operating plan establishes the baseline for application of reprogramming and transfer authorities provided in this Act. Specifically, each agency should provide a table for each appropriation with columns displaying the budget request; adjustments made by Congress; adjustments for rescissions, if appropriate; and the fiscal year enacted level. The table shall delineate the appropriation both by object class and by program, project, and activity. The report must also identify items of special congressional interest.

Agencies should submit reprogramming requests in a timely manner and provide a thorough explanation of the proposed reallocations, including a detailed justification of increases and reductions and the specific impact the proposed changes will have on the budget request for the following fiscal year. Except in emergency situations, reprogramming requests should be submitted no later than June 30. When an agency submits a reprogramming or transfer request to the Committees on Appropriations and does not receive identical responses from the House and the Senate Committees, it is the responsibility of the agency to reconcile the House and the Senate differences before proceeding, and if reconciliation is not possible, to consider the request to reprogram funds denied.

AGENCY REPORTS

As a measure to reduce costs and conserve paper, agencies funded by this Act that currently provide separate copies of periodic reports (such as Performance and Accountability Reports) to the Chairs of the House and Senate Appropriations Committees and Subcommittees on Financial Services and General Government, and also to the Ranking Members of the Committees and Subcommittees, should send only one copy jointly addressed to the Chairs of the Committee and Subcommittee and one copy jointly addressed to the Ranking Members of the Committee and Subcommittee (separate copies should be sent to the House and the Senate). This will reduce by half (from eight to four) the copies of periodic reports agencies send to the Committees.

COMPARISONS

Funding levels for appropriations by account and comparisons to last year's levels and the budget request can be found in the table at the end of this division.

**TITLE I
DEPARTMENT OF THE TREASURY
DEPARTMENTAL OFFICES
SALARIES AND EXPENSES
(INCLUDING TRANSFERS OF FUNDS)**

Office of Financial Education and Financial Access.—Within the Financial Policies and Programs budget activity, the Act provides an increase of \$1,000,000 above the amount assumed in the budget request for the Department's Office of Financial Education and Financial Access.

Operating Plan.—The Department is directed to submit to the Committees on Appropriations an operating plan for the fiscal year 2011 resources provided to the Department, including all offices and bureaus, not more than 60 days after enactment. This requirement is further addressed by section 608 of this Act. The plan must include information on program increases and major procurements at the Department and incorporate input from all senior level managers of the Department and, once submitted, be made available to those managers.

Office of Foreign Assets Control and Cuba Sanctions.—The resource allocation decisions of the Office of Foreign Assets Control (OFAC) should be made on the basis of the most pressing national security threats facing the United States. The Government Accountability Office (GAO) had previously reported, in November 2007, that Cuba embargo-related cases constituted 61 percent of OFAC's investigatory caseload, while comprising only three percent of the investigation caseload of the Commerce Department's Bureau of Industry and Security/Office of Export Enforcement and just 0.2 percent of the investigation caseload of the Department of Homeland Security's Bureau of Immigration and Customs Enforcement.

While a 2009 regulatory change ensures that Americans will no longer be subject to OFAC enforcement action for visiting family members in Cuba, Cuba embargo enforcement cases are still a disproportionate focus of OFAC's work, effectively limiting OFAC efforts in other areas more critical to the national security needs of the United States. The November 2007 GAO report recommended that the Secretary of the Treasury direct OFAC to assess its allocation of resources for investigating and penalizing violations of the Cuba embargo with respect to the numerous other sanctions programs OFAC administers. The Department is directed to report to the Appropriations Committees, within 60 days of enactment, as to steps it is taking to realign OFAC's resources toward the most urgent national security needs.

Economic Sanctions and Divestments.—The Department is directed to fully implement the sanctions and divestment measures applicable to North Korea, Burma, Iran, Sudan, and Zimbabwe. The Department is further directed to promptly notify the Appropriations Committees of any resource constraints that adversely impact the implementation of these sanctions programs.

Management of Capital Investments and Information Security.—The Treasury Office of Inspector General (OIG) continues to cite the Department's management of capital investments and information security as top management challenges. The Chief Information Officer is directed to ensure that adequate oversight and resources are devoted both to projects in the capital phase and to proper maintenance and modernization of existing systems and that all projects are tracked properly and described completely in the annual Capital Investment Plan required under section 118 of this Act.

Management of the Financial Crisis.—Treasury's OIG continues to identify the management of the Treasury's new authorities related to distressed financial markets as a major management challenge facing the Department. Under these programs, the Department has an unprecedented role in managing billions in taxpayer dollars. The Department is directed to ensure that these programs are administered soundly and efficiently in order to minimize risks to the taxpayer. The Department's management is directed to maintain focus on the Treasury's other critical missions—including terrorism and financial intelligence and assistance to community development financial institutions—in addition to management of policies and programs related to stabilizing the economy.

Charitable Donors and Blocked Assets.—The Office of Terrorism and Financial Intelligence faces complex challenges in thwarting terrorist activity without obstructing law-abiding organizations that perform legitimate charity work. The Department is directed to report to the Appropriations Committees, within nine months of the date of enactment, with the following information: (1) the total amount of charitable funds that are blocked, (2) the total amount of funds of U.S.-based charities that are blocked, and (3) the total amount of charitable funds that have gone from being blocked to forfeiture since 2000.

Proceeds of Corruption.—Corrupt politicians, terrorists and those involved in organized crime are often able to hide their identity behind a corporate veil, allowing them to enjoy the proceeds of corruption and bribery, including on U.S. soil. The Department is directed to use its rulemaking authority to strengthen customer due diligence requirements for U.S. financial institutions, consistent with applicable statutory authorities and international standards, including by identifying the beneficial owner of corporate vehicles, where appropriate.

The Department is also directed, in consultation with the other members of the United States delegation to the Financial Action Task Force (FATF), to take a leadership role in prioritizing prevention of the illicit flow of corrupt funds, including by strengthening FATF anti-corruption requirements and by conducting an extensive typology exercise on foreign corruption. The typology exercise will inform financial institutions on how to recognize the proceeds of corruption and therefore help prevent the flow of illicit funds into the United States. The U.S. delegation is urged to work with other member states to assess the implementation of the FATF's 40+9 Recommendations in practice, as well as in law, to ensure that the task force's recommendations are being effectively implemented and enforced by all countries.

The Department is further directed to provide a written report to the Appropriations Committees as well as to the House Financial Services Committee and the Senate Committee on Banking, Housing, and Urban Affairs within 180 days of enactment on activities related to preventing the flow of proceeds of corruption into the United States, specifically including activities related to identifying the beneficial ownership of corporate vehicles, where appropriate, and participation in FATF activities and initiatives.

Foreclosure Crisis.—In implementing changes to the Home Affordable Modification Program (HAMP), the Department is directed to focus on mortgage modifications and principal reductions when it is financially beneficial to the borrower and lender.

The Department is also directed to ensure that servicers comply with HAMP agreements and to provide outreach to educate servicers about their responsibilities under the program.

Departmental Responsiveness.—Language included in Senate Report 111-238 is reiterated regarding the responsiveness of the Department to questions and requests for information.

Stored Value Cards.—Pursuant to the Credit Card Accountability Responsibility and Disclosure Act of 2009 (Public Law 111-24), the Department was required to issue regulations implementing the Bank Secrecy Act regarding the sale, issuance, redemption, or international transport of stored value, including stored value cards. The Department is directed to address the issue of international transport of stored value devices, which continues to be a major concern for law enforcement agencies. The Department is directed, in coordination with the Department of Homeland Security, to submit a written report to the Appropriations Committees, not later than 90 days after enactment of this Act, on the status of the regulations on the international transportation of stored value devices.

DEPARTMENT-WIDE SYSTEMS AND CAPITAL
INVESTMENTS PROGRAMS
(INCLUDING TRANSFER OF FUNDS)

The Act provides \$11,000,000 for systems and capital investments. Within the overall amount, \$6,000,000 is provided for the Financial Innovation and Transformation Program instead of \$17,000,000 as included in the budget request. The funding provided for this program will allow the Department to develop a comprehensive plan and begin implementing Government-wide solutions for processing financial transactions. Future funding recommendations will be considered for the program based on its progress and performance in fiscal year 2011 and on detailed spending plans for future years. Within 60 days of enactment, the Department shall provide a detailed budget justification for funding provided in fiscal year 2011, including specific cost estimates for each portion or discrete project within the program.

OFFICE OF INSPECTOR GENERAL
SALARIES AND EXPENSES

The Act provides \$32,269,000 for the Office of Inspector General (OIG). The increase above the budget request is provided to support additional audits and investigations beyond the limited scope supportable within current resources, given the OIG's increased workload resulting from required reviews of certain bank failures. The OIG is directed to place the highest priority for such additional audits on the Bank Secrecy Act Information Technology Modernization project currently being planned and implemented by the Financial Crimes Enforcement Network. The OIG is further directed to submit a written report to the Appropriations Committees regarding this project, including contractor oversight and progress regarding budget and schedule, on March 31, 2011 and semiannually thereafter. In addition, the OIG is directed to perform audits on Treasury's anti-money laundering and counterterrorist financing activities, capital investment spending and planning, the Community Development Financial Institutions Fund, and areas identified by the OIG as presenting a high risk to taxpayer-funded spending.

FINANCIAL CRIMES ENFORCEMENT NETWORK
SALARIES AND EXPENSES

The Act provides \$121,000,000 for salaries and expenses of the Financial Crimes En-

forcement Network (FinCEN). Of the amount provided, \$45,835,000 is included to support FinCEN's efforts to modernize the technical environment for implementation of the Bank Secrecy Act (BSA) in accordance with the estimate provided for that project for fiscal year 2011.

The proposal to fund the BSA Information Technology Modernization Project using proceeds of the Treasury Forfeiture Fund is rejected. Of the increase above the request, \$19,750,000 is for the BSA Information Technology Modernization project. FinCEN is also directed to submit a semiannual report to the Appropriations Committees summarizing the agency's progress regarding the project, including milestones planned and achieved, progress on cost and schedule, management of contractor oversight, strategies to involve stakeholders, and acquisition management efforts.

An increase above the request is included to enhance efforts to fight fraud and illicit financing by expanding FinCEN's analytical support to the network of more than 300 law enforcement and regulatory authorities comprised of Federal, state, and local agencies, United States Attorneys offices, State attorneys general, and local district attorneys.

TREASURY FORFEITURE FUND
(RESCISSION)

The Act includes a rescission of \$370,000,000 of the unobligated balances in the Treasury Forfeiture Fund. The Committees direct the Department to include information in the fiscal year 2012 budget request, as well as updates every 60 days thereafter, on the status of the Treasury Forfeiture Fund balances, including the projected amount of Super Surplus available for obligation in fiscal year 2012.

ALCOHOL AND TOBACCO TAX AND TRADE
BUREAU
SALARIES AND EXPENSES

The Department is directed to place a high priority on the bureau's criminal enforcement activities and to include funding in the Department's fiscal year 2012 budget request to annualize the cost of new special agents and related support personnel funded in the fiscal year 2010 Appropriations Act.

COMMUNITY DEVELOPMENT FINANCIAL
INSTITUTIONS FUND PROGRAM ACCOUNT

The Act provides \$277,400,000 for the Community Development Financial Institutions (CDFI) Fund program. Within this amount, up to \$26,000,000 is for Administrative expenses and \$12,000,000 is for technical assistance and other purposes for Native American, Native Hawaiian, and Alaskan Native communities.

In addition, of the funds provided, \$1,000,000 is included for a competitive grants program, aimed at providing financial counseling services to prospective homebuyers, as authorized by Public Law 110-289.

Further, of the funds provided, \$25,000,000 is included for the Healthy Food Financing Initiative, which is to increase the availability of affordable, healthy foods in underserved urban and rural communities, particularly through grants and technical assistance to CDFIs for the development or equipping of grocery stores and other healthy food retailers. The Appropriations Committees require detailed information on how this program is being executed; therefore, the Department of Treasury is directed to provide the Committees with a status report within 60 days of enactment of this Act, including the specific criteria that is used to make grant awards.

Also, \$52,400,000 is provided for a new initiative called "Bank on USA" that will pro-

mote access to affordable and appropriate financial services and basic consumer credit products for households without access to such products and services. Of funding recommended for the Bank on USA program, \$2,400,000 is provided for an eligible entity or entities located in Hawaii. The CDFI Fund is directed to submit a detailed spending plan on the Bank on USA program to the Committees within 120 days of enactment.

Within the amount provided, \$5,000,000 is for grants to qualified CDFIs for the purpose of building sufficient capital to support loans of \$2,500 or less pursuant to section 1206 of Public Law 111-203. Such "small dollar loans" will provide consumers access to mainstream financial institutions and alternatives to payday loans and other predatory lending.

The Committees on Appropriations recommend continuing the temporary waiver of matching fund requirements for CDFI programs so that CDFIs can continue to invest in and assist underserved communities during the economic crisis, but intend to reinstate matching fund requirements when capital markets return to normal function.

The Department is directed to fund the Bank Enterprise Award program at a level not less than \$22,000,000.

Poverty, lack of economic opportunity, and lack of low-cost financial services continue to be problems across much of the Nation, particularly in the Territories, and in many Hispanic-American, African-American, Native American, Asian American, Pacific Islander and other minority communities. The Appropriations Committees appreciate the ongoing efforts of the CDFI Fund to work to remedy the particular problems in these communities and strongly encourage the CDFI Fund to continue to place a heavy emphasis on these efforts.

INTERNAL REVENUE SERVICE
TAXPAYER SERVICES

The Act includes \$2,338,215,000 for Taxpayer Services. Within the overall amount, not less than \$10,500,000 is for low-income taxpayer clinic grants, and not less than \$6,500,000 is for the Tax Counseling for the Elderly program. Not less than \$212,500,000 is provided for operating expenses of the IRS Taxpayer Advocate Service.

In addition, within the overall amount, \$14,000,000, available until September 30, 2012, is included to continue the Community Volunteer Income Tax Assistance matching grants program. In administering this program, the IRS is not permitted to treat any in-kind contributions from the IRS as counting toward the \$14,000,000 appropriation, nor shall the IRS reduce any current contributions toward tax return preparation services.

The funding level also includes an additional \$3,500,000 on top of the Administration's budget request for further improvements in the IRS telephone hotline level of service. The IRS is directed to continue working on efforts to maximize the level of service on the 1-800 line and is further directed to include in the fiscal year 2011 Operating Plan a specific plan for the use of these additional funds, along with the projected level of service.

The IRS is directed that, if it proposes reductions in taxpayer services, such reductions must be consistent with the budget justification, operating plan, and Taxpayer Assistance Blueprint, and the IRS must demonstrate that such reductions will not result in a decline in voluntary compliance. Where such reductions involve a reduction in face-to-face service, the IRS must demonstrate that the proposed reductions do not adversely impact compliance by taxpayers who are dependent on such services.

The IRS, in conjunction with the IRS Oversight Board and the IRS Taxpayer Advocate, is directed to report to the Appropriations Committees with annual updates to the Taxpayer Assistance Blueprint, beginning with the submission of the fiscal year 2012 budget. Such updates should identify any changes to the strategic plan for taxpayer service, including the results of any new research and relevant findings, and any open issues requiring additional research.

The IRS is directed to provide an annual report to the Appropriations Committees on its efforts to protect and increase staffing levels at the Martinsburg and Beckley, West Virginia IRS facilities. Given the remote distance of Alaska and Hawaii from the U.S. mainland and the difficulty experienced by Alaska and Hawaii taxpayers in receiving needed tax assistance by the national toll-free line, the IRS is directed to continue to staff each Taxpayer Advocate Service Center in each of these States with a Collection Technical Advisor and an Examination Technical Advisor in addition to the current staffing complement.

E-Filing.—The IRS is directed, in consultation with stakeholders, including the National Taxpayer Advocate, to implement a strategy to achieve the 80 percent e-file goal.

Impact on IRS of Healthcare Implementation.—The Administration, the Secretary of the Treasury, and the IRS Commissioner are strongly urged to evaluate the impact of healthcare mandates on the IRS's overall mission and take all appropriate actions to prevent any decline in the quality and effectiveness of service or taxpayer perception. The IRS is directed to specifically identify in its fiscal year 2012 budget submission and operating plan any proposed increases in spending to be designated to implement the healthcare mandates, as well as any proposed changes in spending or prioritization in other mission-critical IRS programs as a result of the healthcare responsibilities.

Taxpayers Facing Economic Distress.—The Committees appreciate the steps the IRS has taken to assist unemployed taxpayers and others facing financial hardship. At the same time, however, the Committees are concerned by the finding of the IRS Taxpayer Advocate that the IRS lacks a strategic, cross-functional approach toward meeting the needs of low-income taxpayers. The IRS is directed to report to the Appropriations Committees, within 90 days of enactment of this Act, as to the steps it is taking to address the recommendations of the Taxpayer Advocate in this area.

Oversight of First-Time Homebuyer Tax Credit.—Congress has enacted a series of legislative provisions that have enabled first-time homebuyers to claim a refundable credit on their 2008, 2009, or 2010 individual Federal tax returns. The Committees acknowledge that the IRS has taken steps, including installing filters to intercept fraud, to improve its oversight of the program, since a TIGTA report issued in September 2009 identified deficiencies. However, a new TIGTA report issued in June 2010 found a significant and disturbing level of fraudulent and erroneous payments in the First-Time Homebuyer Credit Program. The IRS is directed to intensify its scrutiny of questionable claims for this credit to reduce the incidence of fraud and erroneous payments under this beneficial program.

ENFORCEMENT

(INCLUDING TRANSFER OF FUNDS)

The Act provides \$5,709,547,000 for Enforcement. Within the amount provided, \$97,527,000 is for a new initiative, as discussed

in the Administration's budget request, to target offshore tax evasion. The IRS is directed to provide the Appropriations Committees with detailed information about the actual costs, revenues, and return on investment after the first and successive years of the implementation of the new enforcement initiatives.

Misclassification of Contractors.—The IRS is directed, prior to making any staffing reductions at the SS-8 processing locations, to provide a report to the Appropriations Committees that details the past five years of staffing levels and employee productivity, SS-8 receipt volumes, and rationale for the proposed workforce changes.

OPERATIONS SUPPORT

The IRS is directed to include, as part of its fiscal year 2011 operating plan, details on any planned reorganization, job reductions or increases to offices or activities within the agency, and modifications to any service or enforcement activity. The IRS is further directed to obtain and include comments of the IRS Oversight Board as part of its operating plan submission to the Appropriations Committees. The IRS should promptly notify the Appropriations Committees and the IRS Oversight Board of any substantial changes to these plans.

IRS Information Technology Infrastructure.—The Administration and the IRS are directed to include within the fiscal year 2012 budget request a proposed long-term multiyear funding strategy within the Operations Support account to upgrade and modernize the aging legacy IRS information technology infrastructure.

IRS Information Security.—The IRS continues to make progress in working to fix its information security vulnerabilities. At the same time, however, reports from GAO and TIGTA show that further improvements are still needed. For example, GAO reported in March 2010 that, of the previously identified security weaknesses and program deficiencies reported as unresolved at the completion of GAO's prior-year audit, 69 percent remained unresolved or unmitigated. The IRS is directed to report to the Appropriations Committees, within 90 days of enactment of this Act, on the steps being taken to further improve IRS information security, including IRS actions regarding the GAO findings that remained unresolved or unmitigated as of the March 2010 GAO report.

BUSINESS SYSTEMS MODERNIZATION

Business Systems Modernization (BSM) is the IRS's highest management and administrative priority. The BSM program is presently at a critical juncture in its evolution, and funding is provided to permit the IRS to complete the new taxpayer account database for the 2012 filing season. The replacement of the aging, vintage 1969 individual master file with the new customer account database will permit more frequent updating of individual tax accounts. With this relational database as its centerpiece, systems modernization by the IRS promotes enhanced customer service delivery, more expeditious refund processing, and improved administration of the tax system. The Department is directed to notify the Committees, if BSM management funds are reallocated to the capital asset acquisition program, at least seven days prior to such reallocation.

ADMINISTRATIVE PROVISIONS—INTERNAL REVENUE SERVICE

(INCLUDING TRANSFER OF FUNDS)

Long-standing administrative provisions are continued in sections 101 through 105.

ADMINISTRATIVE PROVISIONS—DEPARTMENT OF THE TREASURY

(INCLUDING TRANSFERS OF FUNDS)

Long-standing administrative provisions are continued, with one modification: section 107, allowing for transfer authority among non-IRS bureaus of the Treasury Department, has been modified to include the SIGTARP as well. In addition, the following administrative provisions are included:

—section 117 allowing Treasury law enforcement organizations to utilize funding for the Treasury Forfeiture Fund only upon the advance approval of the Appropriations Committees, and

—section 118 requiring the Secretary to submit a Capital Investment Plan to the Appropriations Committees.

TITLE II

EXECUTIVE OFFICE OF THE PRESIDENT AND FUNDS APPROPRIATED TO THE PRESIDENT

THE WHITE HOUSE

SALARIES AND EXPENSES

The Act provides \$59,859,000 for The White House. This amount includes \$1,400,000 for the White House Office of National AIDS Policy. The Administration is directed to continue to coordinate a government-wide effort to develop and implement a domestic AIDS strategy, including the development of targets for improved prevention and treatment outcomes.

The Committees on Appropriations expect that officials designated by the President to coordinate policy agendas across executive departments and agencies will keep Congress fully and currently informed of such activities. The Committees direct each official designated by the President to serve in a position not recognized by statute and who is responsible for interagency development or coordination of any rule, regulation, or policy to submit a semiannual report describing the activities of the official and the office of such official, including a detailed explanation of the development or issuance of any rule, regulation, directive or policy on which that official or the office of such official participated or assisted. The first such report shall be submitted not later than March 31, 2011.

OFFICE OF ADMINISTRATION

SALARIES AND EXPENSES

The Act provides \$115,280,000 for the Office of Administration. Included in this amount is \$12,777,000 for continued modernization of information technology infrastructure.

As part of its annual budget submission, the Office of Administration is directed to provide an annual report to the Committees on Appropriations, detailing its progress on information technology modernization, including the amounts obligated and expended (and for what purposes), specific milestones achieved, and requirements and specific plans for further investment.

The Office of Administration is directed to place a top priority on the implementation of comprehensive policies and procedures for the preservation of all records, including electronic records, as required by law, and to work closely with the National Archives and Records Administration in doing so. The Office of Administration is expected to keep the Committees on Appropriations fully apprised of funding needs related to records preservation.

OFFICE OF MANAGEMENT AND BUDGET

SALARIES AND EXPENSES

The Act provides \$92,863,000 for the Office of Management and Budget (OMB). OMB is

expected to provide timely and complete responses to the Committees to all requests for information, including requests related to the budget request for OMB and the Executive Office of the President.

In October, 2009, the President issued Executive Order 13514 to require Federal agencies to achieve goals and targets for environmental sustainability and energy efficiency. Agencies are required to report to the Director of OMB and the Chair of the Council on Environmental Quality on their plans to meet these goals by June of each year. To monitor compliance with this Executive Order, GAO is directed to report to the Committees on Appropriations in September of each year from 2011 through 2013.

OMB is directed to submit a written report to the Committees within 120 days of enactment specifying a plan to modernize the Federal Government's core budgeting system.

OMB is directed to summarize, by agency, the results of the Presidential memorandum regarding disposal of unneeded Federal real estate, the real property cost savings and innovation plans in a report due to the Committees not later than 45 days after enactment.

GOVERNMENT-WIDE MANAGEMENT COUNCILS (INCLUDING TRANSFER OF FUNDS)

The Act provides \$17,000,000 for Government-wide Management Councils. The Executive Office of the President is directed to continue to include a budgetary justification for each council in the annual budget request and to clearly note in the budget justification any items requested in the budget for Government-wide initiatives led or coordinated through the councils.

OFFICE OF NATIONAL DRUG CONTROL POLICY SALARIES AND EXPENSES

The Act provides \$27,900,000 for Office of National Drug Control Policy (ONDCP) salaries and expenses.

ONDCP submitted a report to the Committees on Appropriations to address recommendations of the study conducted by the National Academy of Public Administration, and while some positive steps have been taken, room for improvement still exists. The Committees direct ONDCP to provide an updated report by May 13, 2011 on further actions and improvements taken.

The Committees on Appropriations remain concerned about the lateness of reports required by the Committees as well as the lengthy clearance process, both of which delay the receipt of information required by the Committees in a timely manner in order to make proper funding decisions.

ONDCP is directed to continue the quarterly staffing reports, including current levels, vacancies, new hires, and plans for new hires.

FEDERAL DRUG CONTROL PROGRAMS HIGH INTENSITY DRUG TRAFFICKING AREAS PROGRAM

(INCLUDING TRANSFERS OF FUNDS)

The Act provides \$239,000,000 for the High Intensity Drug Trafficking Areas (HIDTA) Program. ONDCP is directed to provide funding for the existing HIDTAs at no less than the fiscal year 2010 level. Additionally, ONDCP is directed to consult with HIDTAs in advance of deciding programmatic spending allocations for discretionary funding.

ONDCP is directed that HIDTA funds be transferred to the appropriate drug control agencies expeditiously.

OTHER FEDERAL DRUG CONTROL PROGRAMS (INCLUDING TRANSFERS OF FUNDS)

The Act provides \$150,825,000 for Other Federal Drug Control Programs. The following

allocations are made within the amount provided:

National Youth Anti-Drug Media Campaign	\$40,000,000
Drug-Free Communities Program	96,000,000
(National Community Anti-Drug Coalition training	2,000,000)
National Drug Court Institute	1,500,000
United States Anti-Doping Agency	10,000,000
World Anti-Doping Agency (U.S. membership dues) ..	1,900,000
National Alliance for Model State Drug Laws ..	1,187,500
Performance Measures Development	237,500

The Act provides \$40,000,000 for the media campaign, which should include methamphetamine prevention ads. ONDCP is directed that not more than 10 percent of the amount appropriated for the media campaign may be used for administrative costs.

The Act provides \$1,187,500 to the National Alliance for Model State Drug Laws (NAMSDDL). ONDCP is directed to provide the entire amount directly to NAMSDDL within 30 days of enactment of this Act.

INTEGRATED, EFFICIENT AND EFFECTIVE USES OF INFORMATION TECHNOLOGY (INCLUDING TRANSFER OF FUNDS)

The Act provides \$37,500,000 for the Integrated, Efficient and Effective Uses of Information Technology (IEEUIT) program to improve the Federal Government's investments in information technology, as directed by the Director of the Office of Management and Budget.

The Executive Office of the President is expected to regularly apprise the Committees on Appropriations of how Government-wide efforts under the IEEUIT affect agency-specific projects and missions on a case-by-case basis and directs IEEUIT shall not be a substitute for the Committees' routine consideration of agency needs in accordance with the regular budget process. Finally, the Executive Office of the President is directed to notify the Committees immediately upon any change in an agency spending plan pursuant to the IEEUIT or any other effort to modernize, streamline, or improve Federal IT projects.

ADMINISTRATIVE PROVISIONS—EXECUTIVE OFFICE OF THE PRESIDENT AND FUNDS APPROPRIATED TO THE PRESIDENT

(INCLUDING TRANSFERS OF FUNDS)

Long-standing administrative provisions are included unchanged unless otherwise noted below.

Section 204 continues and modifies long-standing language specifying that not to exceed \$1,000,000 of ONDCP appropriations may be reprogrammed upon advance approval of the Committees on Appropriations.

TITLE III THE JUDICIARY

SUPREME COURT OF THE UNITED STATES SALARIES AND EXPENSES

The Act includes \$77,758,000 for the salaries and expenses of the Supreme Court, which includes funding to provide twelve new police officers to staff new posts and increase staffing at additional posts.

The Committees on Appropriations continue to include Act language making \$2,000,000 available until expended for the purpose of making information technology investments. The Committees request that the Court include an annual report with its

budget justification materials, showing information technology carryover balances and describing in detail each expenditure made in the previous fiscal year and planned expenditures in the budget year.

As noted in Senate Report 111-238, filed on July 29, 2010, during the past year, difficulties have been encountered in securing detailed and specific information in response to questions. Without more information, the ability to assess the project management, and track and document prior spending is hampered. Resources cannot be allocated prudently without receiving detailed justifications for requests and plans for expenditures from any agency or entity requesting resources. As a result, certain fiscal year 2011 funding will be available only upon receipt of a detailed report as required under the "Care of Building and Grounds" account.

CARE OF THE BUILDING AND GROUNDS

The Committees on Appropriations are aware that numerous major capital improvement projects have been ongoing at the Court, but has not been presented with a clear understanding of the details of the projects and their budgets. The Court is directed to provide to the Committees a detailed report not later than 90 days after enactment of this Act, on each major capital project, including descriptions; timelines; milestones; and funding committed, obligated, and expended, as well as any unobligated balances. The report should include the complete modernization project and also address any additional capital enhancement projects planned for the future. The report shall be updated and provided to the Committees on June 15, 2011, and again on September 30, 2011.

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

The Act provides \$5,177,568,000 for the salaries and expenses of the Courts of Appeals, District Courts, and Other Judicial Services, which does not include a cost-of-living-adjustment for judges.

The Committees on Appropriations direct the Judiciary to take into account the exigent circumstances of the Fort Lauderdale courthouse as it considers recommendations for future feasibility studies.

The Committees on Appropriations are interested in obtaining data from the Federal Judiciary on contract awards to minority-owned and women-owned businesses, and are dismayed that a procurement module will not be implemented in the courts until 2013. As an interim measure, the Administrative Office of the Courts (AO) is directed to implement a process for fiscal year 2011 for the courts to compile and report on contract awards, including awards to minority-owned and women-owned businesses, and to provide a report to the Committees on Appropriations no later than November 30, 2011 on fiscal year 2011 contracting actions in the Federal courts.

The Committees on Appropriations are concerned about racial and ethnic diversity of law clerks for Federal judges, and believes that the Judiciary could, and should, do more to attract minority candidates. Accordingly, the Committees direct the AO to submit a report within 120 days of enactment of this Act detailing the Federal Judiciary's plans to increase the diversity of law clerks in the Federal courts. The report should include the impact of a student loan repayment program, and a discussion of the recruitment process for law clerks as well as

initiatives underway to reach out to, and recruit, minorities for Federal clerkship positions.

DEFENDER SERVICES

The Act provides \$1,050,458,000 for Defender Services. The Act provides an increase in the hourly rate for panel defense attorneys in non-capital cases from \$125 to \$130 per hour, which makes progress toward the full estimated "catch up" adjustment authorized by the Criminal Justice Act of \$141 per hour. Compensation for panel attorneys in capital cases is adjusted for annual inflation.

COURT SECURITY

(INCLUDING TRANSFERS OF FUNDS)

The Judiciary is directed to develop a judiciary-wide implementation plan for review based on the less costly options in the recent Courthouse Perimeter Security Pilot Project report that would provide unity of command, Court Security Officer guards at all current Federal Protective Service posts, and standardized security coverage. Section 306 authorizing the pilot is continued in order to allow the Judiciary to maintain the pilot at the seven existing locations and to allow for possible expansion of the pilot to a limited number of new locations in order to examine the cost-effectiveness of the less costly options.

ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS

SALARIES AND EXPENSES

The Act provides \$86,968,000 for the salaries and expenses of the Administrative Office of the United States Courts, which includes funds for inflationary adjustments and four court support positions.

ADMINISTRATIVE PROVISIONS—THE JUDICIARY

(INCLUDING TRANSFER OF FUNDS)

Long-standing administrative provisions are included unchanged unless otherwise noted below.

Section 307 continues language extending temporary judgeships in Ohio, Kansas, and Hawaii.

TITLE IV

DISTRICT OF COLUMBIA

FEDERAL FUNDS

FEDERAL PAYMENT FOR RESIDENT TUITION SUPPORT

The Act includes \$35,100,000 for a Federal payment for tuition support. As part of the annual budget submission, the Mayor of the District of Columbia and the Office of the State Superintendent of Education are directed to provide updates on efforts to enhance retention and graduation rates and the continued use of cost containment measures.

FEDERAL PAYMENT FOR EMERGENCY PLANNING AND SECURITY COSTS IN THE DISTRICT OF COLUMBIA

The Act provides \$15,000,000 for a Federal payment to the District of Columbia for the costs associated with emergency planning and security. The District of Columbia is directed to provide a report to the Committees on Appropriations, within 60 days of the end of the fiscal year, outlining the purposes and amounts expended using the funds, including details on any deviation from the initial justification.

FEDERAL PAYMENT FOR THE DISTRICT OF COLUMBIA COURTS

The Act provides \$258,168,000 as a Federal payment to the District of Columbia Courts. Within this amount, \$12,998,000 is for the District of Columbia Court of Appeals,

\$110,149,000 is for the District of Columbia Superior Court, \$65,371,000 is for the District of Columbia Court System and \$69,650,000 is for capital improvements to Court facilities. Increases provided for capital improvements above the budget request should be directed to renovations for the Moultrie Courthouse cell block and completion of the security perimeter.

FEDERAL PAYMENT TO THE PUBLIC DEFENDER SERVICE FOR THE DISTRICT OF COLUMBIA

The Act includes \$40,690,000 for a Federal payment to the District of Columbia Public Defender Service (PDS). The Act provides authority in section 818 for the PDS to obtain professional liability insurance for its attorneys, staff, and board members.

FEDERAL PAYMENT TO THE CRIMINAL JUSTICE COORDINATING COUNCIL

The Act provides \$1,800,000 to the Criminal Justice Coordinating Council (CJCC). As part of its annual budget submission, the CJCC is directed to report on performance measures and progress made on individual initiatives to the Committees on Appropriations.

FEDERAL PAYMENT TO THE OFFICE OF THE CHIEF FINANCIAL OFFICER FOR THE DISTRICT OF COLUMBIA

The Act provides \$1,475,000 for a Federal payment to the Office of the Chief Financial Officer (CFO) for the District of Columbia. The funding is for grants to the following organizations with the requirement that the funds be spent primarily in the District of Columbia to benefit District residents:

<i>Recipient/Purpose</i>	<i>Amount</i>
Bread for the City, Washington, DC, Two-chair dental clinic serving 2,000 low income D.C. residents	\$125,000
Children's National Medical Center, Washington, DC, cardiac critical care center renovations	1,000,000
Recreation Wish List Committee, Washington, DC, Academic, cultural, fitness programs	100,000
The University of the District of Columbia, Washington, DC, Urban Teacher Residency Academy	250,000

Each grantee is directed to submit a comprehensive budget and report on the activities carried out with the funds no later than 60 days after enactment of this Act and the District CFO is directed to submit a comprehensive report no later than June 1, 2011 to the Committees on Appropriations.

FEDERAL PAYMENT FOR SCHOOL IMPROVEMENT

The Act includes \$72,400,000 for a Federal payment for school improvement. Within this amount, \$43,000,000 is for public schools, \$20,000,000 is for public charter schools, and \$9,400,000 is to provide opportunity scholarships.

The District is directed to submit, no later than 60 days after enactment of this Act, a comprehensive spending plan to the Committees on Appropriations detailing how the funding provided will be allocated and explaining what performance measures will be used to evaluate the success of the outcomes of the funding.

FEDERAL PAYMENT FOR HOUSING FOR THE HOMELESS

The Act provides \$10,000,000 for a Federal payment for housing for the homeless. The District of Columbia government is directed to continue to submit quarterly reports detailing the number of individuals and families provided housing through this Federal payment.

FEDERAL PAYMENT FOR HOUSING FOR REDEVELOPMENT OF THE ST. ELIZABETHS HOSPITAL CAMPUS

The Act provides \$2,000,000 for a Federal payment for costs associated with planning for the redevelopment of St. Elizabeths Hospital's East Campus. The District of Columbia government is directed to submit a spending plan for these funds within 45 days of enactment of this Act.

FEDERAL PAYMENT FOR HOUSING FOR HIV/AIDS PREVENTION

The Act provides \$5,000,000 for a Federal payment for HIV/AIDS prevention initiatives in the District of Columbia. The District of Columbia government is directed to submit a spending plan for these funds within 45 days of enactment of this Act.

DISTRICT OF COLUMBIA FUNDS

This Act provides Federal funding totaling \$169,650,000 for the District of Columbia. As transmitted to the Mayor by the District of Columbia Council, the District of Columbia's fiscal year 2011 proposed budget and financial plan provides \$10,440,946,000 for operating expenses.

TITLE V

INDEPENDENT AGENCIES

COMMODITY FUTURES TRADING COMMISSION

SALARIES AND EXPENSES

The CFTC is directed to submit a detailed spending plan including staffing allocations and IT investments no later than 30 days following enactment.

CONSUMER PRODUCT SAFETY COMMISSION

SALARIES AND EXPENSES

(INCLUDING RESCISSION)

The Act provides \$120,600,000 for the Consumer Product Safety Commission (CPSC).

CPSC is directed to continue providing drywall reports on a quarterly basis, although CPSC should update the Appropriations Committees of notable developments should they occur outside the quarterly reporting schedule.

GAO is directed to conduct a follow-up report, within 270 days of enactment, to its August 2009 report regarding CPSC's oversight of imported products.

Within funds provided, the CPSC is directed to address the needs of Limited English Proficient persons both through additional staffing of the CPSC toll-free hotline and by enhancing the CPSC website.

Within the funds provided, CPSC is directed to expand its import safety activities above the levels assumed in the fiscal year 2011 budget request. The CPSC is directed to include, as part of its operating plan, specific descriptions of its revised plans for using fiscal year 2011 funds to enhance the safety of imported products.

ELECTION ASSISTANCE COMMISSION

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

The Act provides \$17,100,000 for salaries and expenses of the Election Assistance Commission (EAC), including \$750,000 for the Help America Vote College Program and \$300,000 for mock election programs. The GAO is directed to evaluate the effects of the Help America Vote Act (HAVA) on the administration of elections to determine whether these changes have improved the accuracy, accessibility, and security of voting; and what challenges the Help America Vote Act did not anticipate or did not address. The GAO should include an assessment of whether the Federal funding provided is sufficient to ensure that States hold open, fair, and accurate elections in the future. The GAO is directed to report its findings to the Committees on Appropriations within 16 months of

enactment. The GAO is directed to perform an audit within six months of the passage of this Act of the staffing mix within the EAC to determine if the current staffing structure is appropriate to meet the requirements established under HAVA. The EAC is directed to keep the Committees informed of new hires and significant staffing changes, and any other major developments.

ELECTION REFORM PROGRAMS

The bill includes no funding for Election Reform programs, consistent with the budget request. The Committees on Appropriations note that due to budget constraints, many States are having difficulty meeting the 5 percent matching funds required to receive requirements payments. To ease this burden, in fiscal year 2011, States may use the interest earned on prior State appropriations to the Election Fund required by Section 254(b) towards meeting the 5 percent match requirement.

FEDERAL COMMUNICATIONS COMMISSION

SALARIES AND EXPENSES

The Federal Communications Commission (FCC) oversees the Universal Service Fund (USF), which allocates twenty times as much as the FCC's own funding. The FCC's Broadband Plan contemplates using the USF to pursue universal broadband service. The GAO is directed to analyze spending by the USF, how it sets priorities, how well it accomplishes the goals of the USF, and the challenges and advantages in having the USF pursue universal broadband service.

Within six months after the date of enactment, the FCC shall report to the Appropriations Committees on the source and scope of its existing authority to combat child pornography and actions taken in the last two years under that authority.

Because public, educational, and governmental (PEG) stations perform an important service to American public life, the Committees on Appropriations urge the FCC to resolve as soon as practicable any complaints about difficulty accessing PEG stations.

The FCC should have the goal that all persons living under the American flag, including those living in the United States territories, should have equal access to communications services.

The Committees on Appropriations applaud the Commission's work with the broadcasting industry to develop family-friendly programming and direct the Commission to pursue these efforts. As a result of the Commission's efforts, many cable and satellite television operators are developing family-friendly packages for consumers. The Committees direct the Commission to continue its endeavors with the broadcast industry to empower parents with the resources and tools to effectively navigate the various broadcast channels.

ADMINISTRATIVE PROVISIONS—FEDERAL COMMUNICATIONS COMMISSION

Sections 501 and 502 continue long-standing administrative provisions concerning the FCC.

FEDERAL TRADE COMMISSION

SALARIES AND EXPENSES

The Act provides \$316,500,000 for salaries and expenses of the Federal Trade Commission (FTC). The Act also estimates that the amount provided will be partially offset by \$96,000,000 of collections from Hart-Scott-Rodino premerger filing fees and \$21,000,000 of collections from Do-Not-Call list fees. Of this amount, \$19,174,000 is to cover relocation costs associated with the upcoming expiration of the lease on a building occupied by the FTC.

The FTC is directed to make its website more user friendly to consumers. The Committees on Appropriations also encourage the FTC to address the vulnerability of the Hispanic population to fraud by making the amount of material and its presentation on the FTC's Spanish language website as helpful as that found on its English pages and by increasing outreach to the Hispanic community and increasing law enforcement efforts against unfair or deceptive practices that target Spanish speakers.

The FTC is directed to conduct research into real-time bidding, which is the practice of using constantly updated online and offline data sources to facilitate automated auctions through which the winner is able to deliver a highly-targeted advertisement to a consumer.

The Committees on Appropriations continue to be concerned with the potential for market manipulation and anticompetitive behavior in the oil and natural gas industries. The FTC is encouraged to continue its investigations and other activities related to these concerns and is directed to keep the Committees apprised of findings made regarding fuel prices, as well as other planned activities and investigations regarding the oil and gas industries.

In September 2000, the FTC released a report entitled: "Marketing Violent Entertainment to Children: A Review of Self-Regulation and Industry Practices in the Motion Picture, Music Recording & Electronic Game Industries." The FTC should continue with, and expand upon, its efforts in this area. The FTC is directed to continue to engage in consumer research and workshops, underage shopper-retail compliance surveys, and marketing data collection and analysis.

GENERAL SERVICES ADMINISTRATION

The General Services Administration (GSA) is directed to include in future GSA-owned and leased buildings, signage displayed next to all banks of elevators or on elevator doors in GSA buildings, at the entrance to all nonemergency use public stairwells, and at the base of escalators, indicating the location of and encouraging use of the stairs; and that design of new buildings promote the use of stairs. The Committees on Appropriations recommend that GSA aim to achieve the above-mentioned directive by September 30, 2011. In order to ascertain precisely how much progress has been made and how much remains, GSA is directed to provide quarterly reports on the percentage of Federal buildings with such signage as well as on actions undertaken with regard to the design of new facilities, with a view to increasing the likely use of stairs.

GSA is directed to report within 120 days after enactment of this Act the locations within the greater New Orleans metropolitan area that have space available, either in an existing office building or a site for the location of an office building, that are compliant with the latest Federal Anti-Terrorism/Force Protection standards, applicable hurricane protections and USDA ISC security level guidelines as of September 30, 2010.

The Committees on Appropriations are aware that Executive Order 12072 requires an agency to give first consideration to the centralized community business areas of cities when choosing office location, are troubled by the possible relocation of Federal Government offices outside of the central business district in Rockford, Illinois, and are aware of ample office space in downtown Rockford, including the Stanley J. Roszkowski United States Courthouse. GSA is expected to fully comply with Executive Order 12072 and is di-

rected to work with the city of Rockford to retain Federal Government offices in the central business district.

REAL PROPERTY ACTIVITIES

FEDERAL BUILDINGS FUND

LIMITATIONS ON AVAILABILITY OF REVENUE

GSA is directed to expand the use of on-site renewable energy in Federal buildings, in order to reduce greenhouse gas emissions and moderate energy price fluctuations.

CONSTRUCTION AND ACQUISITION

The Act limits funds for construction to \$492,722,000 and provides funds for the following projects:

Lakewood, Colorado, Denver Federal Center Remediation	\$7,957,000
Washington, DC, St. Elizabeths DHS Consolidation and Development	267,675,000
Washington, DC, St. Elizabeths Historic Preservation Mitigation	4,990,000
Washington, DC, St. Elizabeths Highway Interchange	8,350,000
Calais, Maine, Ferry Point Land Port of Entry	1,552,000
White Oak, Maryland, Food and Drug Administration Consolidation	173,773,000
Detroit, Michigan, P.V. McNamara Federal Building FBI Garage	3,658,000
Martinsburg, West Virginia, IRS Annex	24,767,000

GSA is prohibited from using any of the nearly \$400,000,000 in funding which has been appropriated for the courthouse project for the Central District of California, Los Angeles division for any other purpose. Further, should the land purchased for the courthouse project be sold, GSA is prohibited from using the proceeds of the sale of the land to be used for any other purpose than addressing the housing needs of the Los Angeles division of the Central District of California. The Committees on Appropriations are pleased that the project scope has now been reduced, resulting in a lower cost facility than previously estimated.

The Committees on Appropriations are concerned about the number of years required for construction of land ports of entry, and urges GSA to make every effort to streamline, avoid duplication, and increase efficiency in the completion of these projects, including coordination and cooperation with other appropriate Federal agencies.

Concerns have been brought to the attention of the Committees on Appropriations about a lack of community planning regarding certain GSA work. With respect to the San Ysidro Land Port of Entry, GSA is directed to work with the surrounding community to develop a design plan that incorporates the interests of surrounding commercial and business areas and that incorporates community-supported pedestrian, parking and transit design elements before beginning construction.

REPAIRS AND ALTERATIONS

The Act limits resources for repairs and alterations to \$500,014,000 and provides funding for repairs and alterations for the following projects:

Richmond, California, Frank Hagel Federal Building	\$113,620,000
Van Nuys, California, James C. Corman Federal Building	11,039,000

Washington, DC, West Wing Design Phase II	6,245,000
Indianapolis, Indiana, Major Emmett J. Bean Federal Center	65,813,000
New York, New York, Daniel Patrick Moynihan United States Courthouse	28,000,000
Energy and Water Retrofit Fire Prevention Program ..	15,000,000
Wellness and Fitness Program	10,000,000
Judiciary Capital Security Program	3,500,000
Basic Repairs and Alterations	20,000,000
	226,797,000

GSA shall submit a report to the Committees on Appropriations within 90 days of enactment of this Act that outlines its plan to allocate funding for the Judiciary Capital Security Program.

Additional projects for which prospectuses have been fully approved may be funded under this category only if advance approval is obtained from the Committees on Appropriations. The amounts provided in this or any prior Act for "Repairs and Alterations" may be used to fund costs associated with implementing security improvements to buildings necessary to meet the minimum standards for security in accordance with current law and in compliance with the reprogramming guidelines of the Appropriations Committees.

RENTAL OF SPACE

Leased space is now just over half of the Public Buildings Service inventory occupied by agencies. In GSA's annual performance report as part of its fiscal year 2011 budget justification, GSA stated that administering leased space loses revenue each year, operating at a 2.1 percent deficit or \$98 million a year. In order to achieve the original purpose of the Fund, the GSA is encouraged to decrease the amount of space that it leases.

GENERAL ACTIVITIES

GOVERNMENT-WIDE POLICY

The Committees on Appropriations remain supportive of the Office of Federal High-Performance Green Buildings but note its slow rate of spending. Therefore, GSA is directed to submit to the Committees on Appropriations a detailed expenditure plan for this Office within 30 days of enactment of this Act, which should describe the budget, timeline, objectives, and benefits of the Office. GSA is further directed to provide quarterly reports on the obligation of these funds.

ELECTRONIC GOVERNMENT FUND

(INCLUDING TRANSFER OF FUNDS)

The Committees on Appropriations are supportive of the concepts contemplated in the e-Gov account for fiscal year 2011. However, due to funding constraints as well as lack of detail and clearly defined information regarding spending requests, the Committees are reducing funding for e-Gov programs for fiscal year 2011. GSA is directed to report to the Committees on Appropriations within 120 days after enactment of this Act on the feasibility of consolidating Federal agency data centers into existing Government-owned/Government-operated facilities with multiple Federal tenants and is required to submit a spending plan prior to obligating funds.

FEDERAL ACQUISITION WORKFORCE INITIATIVES FUND

(INCLUDING TRANSFERS OF FUNDS)

For fiscal year 2011, the Committees recommend \$10,000,000. This is a new initiative

that is proposed to be housed in GSA but carried out in coordination with the Office of Federal Procurement Policy of OMB. The Federal Acquisition Workforce Initiative is provided \$6,000,000 to create and maintain the contractor inventory database required by section 743 of Division D of Public Law 111-117, and \$4,000,000 for salaries, curriculum development, competency management, certification management and career management.

ADMINISTRATIVE PROVISIONS—GENERAL SERVICES ADMINISTRATION

(INCLUDING TRANSFERS OF FUNDS)

Long-standing administrative provisions are included unchanged unless otherwise noted below.

Section 517 clarifies the authorities of the Federal Acquisition Workforce Training Fund, as requested by GSA.

Section 518 authorizes GSA to release GSA interests in real property in Tracy, California at a fair market price.

Section 519 permits GSA to reprogram funds provided in Public Law 111-5 with advance approval of the Committees on Appropriations.

Section 520 rescinds \$1,400,000 in unobligated balances from Policy and Operations for Governor's Island and the Lorton Correctional Facility.

Section 521 requires GSA to submit to Congress a building project survey report on a consolidated headquarters for the Federal Bureau of Investigation within 120 days and to identify a preferred strategy.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

OPERATING EXPENSES

In its fiscal year 2012 budget justification, the National Archives and Records Administration (NARA) is directed to specifically address the resource needs of the Office of Government Information Services.

ELECTRONIC RECORDS ARCHIVES

Because reliable access to electronic government records far into the future, regardless of changes in technology, is of utmost importance, the Appropriations Committees have directed ongoing GAO program oversight and review of annual Electronic Records Archives (ERA) spending plans. Past deficiencies in clearly identifying specific functions to be delivered has hampered the Committees' ability to assess the extent of progress on ERA that should be expected through particular investments.

NARA is directed to provide quarterly progress reports on ERA beginning 60 days after enactment. The reports should clearly state: (1) the functionality that is currently in place, including the functionality that has recently been added to ERA, (2) new functionality planned to be added in the subsequent quarter, and (3) functionality that had been planned for the most recent quarter but not added, along with the reasons why it was not added, the problems encountered, and the estimated cost increases and schedule delays as a result.

Language included in Senate Report 111-238 is reiterated regarding NARA's lack of a contingency plan for the ERA system in the event of a failure or disruption. NARA is directed to devote resources to establish a robust online backup and restoration service and to ensure that adequate capabilities are in place for managing restricted information.

NARA is directed to promptly report to the Appropriations Committees any delays, cost overruns, or other issues impeding the progress of ERA.

OFFICE OF PERSONNEL MANAGEMENT

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF TRUST FUNDS)

The Act provides a general fund appropriation of \$96,439,000 for salaries and expenses of the Office of Personnel Management (OPM). The amount includes \$6,004,000 for the Enterprise Human Resources Integration project and \$1,416,000 for the Human Resources Line of Business project.

The Act also provides \$121,738,000 for administrative expenses to be transferred from trust funds. This amount includes \$9,495,000 for the cost of implementing the new integrated financial system as well as automating the retirement record-keeping systems. The GAO should continue to monitor and provide recommendations on OPM's efforts toward developing and implementing the retirement modernization program. OPM is directed to work with GAO to develop program goals, performance measures, and project timelines and to submit a report on its progress within 120 days of enactment. OPM is also directed to continue to provide the Committees on Appropriations and GAO with quarterly reports on the implementation of the retirement modernization program, which should reflect a detailed, complete, and accurate assessment of the status of the program.

Additionally, OPM is directed to submit a report to the Committees on Appropriations within 120 days of enactment on ways in which it has streamlined Federal hiring practices, including its efforts to create a central registry of qualified applicants for the most recruited positions in the Federal Government.

Background investigations for Federal civilian, military, contract employment and eligibility for access to classified national security information are performed by Federal and contract investigators working throughout the United States and abroad. Given the national security implications of this work, OPM is directed to provide an updated report to the Committees within 60 days of enactment on the number of fraud cases involving fabricated background investigations, the number of cases prosecuted in Federal court (including case disposition), and what, if any, quality control measures OPM has implemented to prevent further fraud in this program as well as to ensure early detection of fabricated reports.

The Intergovernmental Personnel Act Mobility Program (IPA) provides for the temporary assignment of personnel between the Federal Government and state and local governments, colleges and universities, Indian tribal governments, Federally funded research and development centers, and other eligible organizations. 5 CFR part 334 regulates this program, and it defines "State" as "a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, the Northern Mariana Islands, and a territory or possession of the United States; and an instrumentality or authority of a State or States; and a Federal- State authority or instrumentality." OPM is directed to post this more complete definition on its IPA website so that Federal employees know the full range of opportunities and experiences provided through this program.

In April 2010, OPM provided a report to Congress on nursing faculty and the IPA, along with findings and recommendations on the current nurse and nurse faculty shortage. OPM is expected to provide regular, 6-month updates on next steps as outlined in Senate Report 111-238.

OPM's Federal Human Capital Survey provides important data for independent analyses of Federal employee satisfaction. OPM shall continue to make agencies' survey data publicly available in a consistent and consolidated format, and in a timely manner.

OPM is urged to increase its efforts to encourage Federal agencies to reach out to diverse populations in their recruitment efforts. The recent Federal Equal Opportunity Recruitment Program Report noted that Hispanics and women lag in representation within the Federal workforce, compared to the civilian labor force. OPM is urged to continue to look for ways to diversify the Federal workforce. OPM is directed to continue to provide its current report as an appendix to a more streamlined analysis that provides a straightforward breakdown of the Federal workforce, management, and executives by race, ethnicity, and gender for all Federal employees. The report should also include, for each agency, an agency-specific breakdown that is accompanied with a narrative about that agency's substantive efforts to promote diversity through outreach and recruiting practices. The report should conclude with a discussion of OPM's current strategy for expanding diversity within the Federal government and a projected five-year strategy with performance metrics based on the methods it intends to use to implement this strategy. OPM is also directed to establish a forum so that agencies may share best practices in recruiting and retaining employees.

OPM should spearhead an effort to encourage federal agencies to increase recruitment efforts within the United States Territories, home to many U.S. citizens not fully aware of the job opportunities within the Federal Government. GAO is directed to review the agencies' progress in reaching out to and recruiting from the Territories and to submit a report to the Committees within 120 days of enactment.

The issue of continuous and sustained inappropriate use of temporary hiring authority by Federal agencies remains unresolved. OPM is directed to report to the Committees on Appropriations, no later than 90 days after enactment of this Act, on options and recommendations, as outlined in Senate Report 111-238, to remedy this problem.

OFFICE OF INSPECTOR GENERAL

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF TRUST FUNDS)

The Act provides \$25,885,000 for salaries and expenses of the Office of Inspector General, with \$3,997,000 as a general fund appropriation and \$21,888,000 as a transfer from OPM trust funds. Additional funding is provided to augment base resources and permit hiring of additional audit and investigative staff.

GOVERNMENT PAYMENT FOR ANNUITANTS, EMPLOYEES HEALTH BENEFITS

The Act provides such sums as necessary for health benefits payments.

GOVERNMENT PAYMENT FOR ANNUITANTS, EMPLOYEE LIFE INSURANCE

The Act provides such sums as necessary for life insurance payments.

PAYMENT TO CIVIL SERVICE RETIREMENT AND DISABILITY FUND

The Act provides such sums as necessary for retirement and disability payments.

POSTAL REGULATORY COMMISSION

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

As outlined in Senate Report 111-238, the Postal Regulatory Commission is directed to

report to the Appropriations Committees, not later than April 1, 2011, on the potential economic impacts if restrictions on the consolidation or closure of small rural and other small post offices were removed. The report should include an assessment of the Postal Service's efforts to enhance customer access, improve revenue and reduce costs through the co-location of postal services in grocery stores and other existing retail outlets.

PRIVACY AND CIVIL LIBERTIES OVERSIGHT BOARD

SALARIES AND EXPENSES

The Act provides \$1,500,000 for salaries and expenses of the Privacy and Civil Liberties Oversight Board, to remain available for obligation until September 30, 2012. The Board has not yet been reconstituted as required by Public Law 110-53, and, therefore, the new entity's funding requirements have not been firmly established or justified. Once reconstituted, the Board should present the Committees on Appropriations with a detailed budget plan as quickly as possible.

SECURITIES AND EXCHANGE COMMISSION

SALARIES AND EXPENSES

The Securities and Exchange Commission (SEC) Office of Global Security Risk is directed to submit quarterly reports of its activities to the Committees on Appropriations, with a particular focus on corporate disclosures involving conflict minerals, extractive industries, and mining safety matters as well as SEC's efforts to address concerns that American investors may be unwittingly investing in companies with ties to countries that sponsor terrorism or are linked to human rights violations.

To facilitate greater access to companies' disclosures concerning their business activities in or with state sponsors of terrorism, the SEC is directed to promptly issue final rules that require each issuer to disclose activities that may subject it to sanctions under section 5 of the Iran Sanctions Act of 1996.

SMALL BUSINESS ADMINISTRATION

SALARIES AND EXPENSES

The Act provides \$459,125,000 for the salaries and expenses account of the Small Business Administration (SBA). An additional amount for initiatives related to small business development and entrepreneurship is provided under SBA administrative provisions.

The Committees on Appropriations have been frustrated that recent SBA congressional justifications have been unnecessarily complicated. SBA is directed to revise the format of the congressional justification for fiscal year 2012 so that the budget detail provided ties directly to enacted and requested appropriated amounts.

Not less than the following amounts shall be dedicated to the non-credit programs of the SBA:

[In thousands of dollars]

Small Business Development Centers (SBDCs)	\$115,250
Veterans Business Development ..	2,750
SCORE	7,750
Women's Business Centers	14,500
National Women's Business Council	1,900
Drug Free Workplace	1,030
Microloan Technical Assistance ..	22,000
PRIME	8,000
Native American Outreach	1,625
7(j) Technical Assistance	3,700
HUBZone	2,350
Hispanic Business Centers	1,000
Entrepreneurial Development	9,000

Total, non-credit initiatives 190,855

The SBA shall not reduce these non-credit programs from the amounts specified above and the SBA shall not merge any of the non-credit programs without advance written approval from the Committees. Further, the SBA is directed to support no less than the fiscal year 2010 level of funding for the National Ombudsman; the Office of Advocacy, including support for the Advocacy Database; and the international trade programs. SBA is also directed to report to the Committees on Appropriations within 30 days of enactment on the strategies and goals of each initiative, methodologies for assessing the performance of each initiative and each individual project selected under each initiative, and methodologies planned for selection of individual projects and recipients; and to provide an operating plan individually addressing each proposed initiative and detailing funding planned for grants, contracts, and salaries and expenses of both current and new SBA employees, including travel expenses.

The Committees recommend that up to \$9,000,000 shall be available for the Entrepreneurial Development program administered by the SBA, including for the Emerging Leaders Initiative and Clusters initiative proposed in the budget. SBA is directed to allocate such funds to the maximum extent possible to its current partners—namely, SBDCs, Women's Business Centers, the Service Corps of Retired Executives (SCORE), and Veterans Business Outreach Centers—and to notify the Committees not less than 15 days prior to obligation of funds provided. Included in the amount for non-credit initiatives is \$1,000,000 for a Hispanic Business Centers pilot program to provide financial assistance to educational institutions, non-profit organizations, and State and local departments and agencies providing management and technical assistance to Hispanic small businesses. The SBA is directed to consider the Women's Business Centers program as a model for the pilot program.

Of the amounts provided, \$268,270,000 is for operating expenses of the SBA. In addition, a total of \$349,000,000 from other SBA accounts may be transferred to and merged with the salaries and expenses account. Within the amounts recommended for SBA's operating expenses, \$15,347,700 is provided for the agency-wide effort to modernize SBA's loan management and accounting systems. SBA is directed to place a top priority on ensuring a successful modernization of current systems. SBA shall submit a quarterly written report to the Committees on Appropriations summarizing the agency's progress regarding modernization efforts, including milestones planned and achieved and progress on cost and schedule.

SBA is directed to continue to work to ensure that there is equitable distribution of resources to all 8(a) participants. GAO is directed to, within 180 days of enactment of this Act, report on 8(a) program participants, the number and disadvantaged status of the owners of the businesses who have participated in the program in recent years, and such other criteria as may be developed during consultation with the Committees on Appropriations. Further, GAO is directed to provide a report to the Committees on Appropriations on the capability of SBDCs to offer technical assistance in more than one language by May 1, 2011.

SBA is directed to coordinate with the Forest Service and the Bureau of Land Management concerning the small business timber sale set-aside program that serves many

small rural communities and small timber mills. SBA is also directed to provide a written report to the Committees on Appropriations within 60 days of enactment detailing SBA's current and planned activities related to communication with timber businesses in small rural communities, including potentially designating an industrial specialist (forestry) position in Portland, Oregon.

The Committees on Appropriations note that there is no Procurement Center Representative located in the regions of Puerto Rico or the U.S. Virgin Islands and directs that a Procurement Center Representative be physically located in Puerto Rico to service both regions.

OFFICE OF INSPECTOR GENERAL

The Inspector General is directed to continue routine analysis and reporting on SBA's modernization of its loan management and accounting systems, including acquisition, contractor oversight, implementation, and progress regarding budget and schedule.

BUSINESS LOANS PROGRAM ACCOUNT (INCLUDING TRANSFER OF FUNDS)

The Committees direct SBA to continue to conduct outreach to existing financial entities that may be well-suited to participate in the Microloan program so that the program can grow and expand access to microcapital across the country. SBA shall submit a written report to the Committees on Appropriations within 90 days of enactment summarizing the agency's plans for expanding the reach of the Microloan program. Additionally, SBA, in coordination with the Federal Reserve, is directed to submit a written report to the Committees on Appropriations within 90 days of enactment on the feasibility and benefits of enhanced data collection on small business lending, including but not limited to data on loan origination and loan size.

DISASTER LOANS PROGRAM ACCOUNT (INCLUDING TRANSFER OF FUNDS)

The Committees on Appropriations urge SBA to seek out emergency funding in the

event of a disaster requiring loan assistance and direct SBA to continue providing updates on available resources for the disaster loans program on a monthly basis.

ADMINISTRATIVE PROVISIONS—SMALL BUSINESS ADMINISTRATION

(INCLUDING TRANSFER OF FUNDS)

Long-standing administrative provisions are continued without change unless otherwise noted below.

Section 532 makes a technical correction to Public Law 111-8 and Public Law 111-117.

Section 533 makes technical changes to Public Law 111-240.

Section 534 provides \$47,575,000 for small business development and entrepreneurship initiatives, including programmatic and construction activities, to be awarded as follows:

Project Name	Amount
4 Ag Hawaii, Improved Food Security through Small Business Development, Haleiwa, HI	\$300,000

UNITED STATES POSTAL SERVICE

PAYMENT TO THE POSTAL SERVICE FUND

The Postal Service and the Postal Regulatory Commission are directed to take into consideration the accessibility of Federally-regulated financial institutions in surrounding areas before closing a postal facility.

As outlined in Senate Report 111-238, the Postal Service is strongly urged to continue to expand the co-location of postal services and pursue other innovative approaches to serving customers.

In light of the Postal Regulatory Commission's report that the Postal Service has overpaid into the CSRS pension fund, OPM is urged to apply a fair and equitable methodology for calculating the payment allocation and adjust the Postal Service's contributions into the fund accordingly.

UNITED STATES TAX COURT

SALARIES AND EXPENSES

The Act includes \$55,053,000 for salaries and expenses of the United States Tax Court. Of this amount, \$2,852,000 is available until September 30, 2012 for perimeter security improvements to the U.S. Tax Court headquarters.

TITLE VI

GENERAL PROVISIONS—THIS ACT

Sections 601 through 617, Section 619, and Section 621 continue general provisions that were included in title VI of Division D of Public Law 111-117.

Section 618 rescinds \$1,500,000 in unobligated balances from the Privacy and Civil Liberties Oversight Board.

Section 620 allows political subdivisions of States and territories to be eligible for pool safety grants.

Section 622 deems certain Help America Vote Act grants in Fiscal Year 2004 to have been authorized.

Section 623 directs the President to transmit deficiency and supplemental requests from judicial and legislative branches.

Section 624 permits the Abraham Lincoln Bicentennial Foundation to receive matching funds from sale of the Lincoln Bicentennial coin.

Section 625 rescinds prior year unobligated balances from the Federal Communications Commission.

The Act does not include the provision passed by the House Subcommittee on Financial Services and General Government concerning the Stanford Ponzi scheme that the Congressional Budget Office subsequently estimated to have a cost of \$550 million in fiscal year 2011.

TITLE VII

GENERAL PROVISIONS—GOVERNMENT-WIDE

DEPARTMENTS, AGENCIES, AND CORPORATIONS

Sections 701 through 732 and Sections 734 through Section 740 continue general provisions that were included in title VII of Division D of Public Law 111-117.

Section 733 updates long-standing authority to transfer funds between agencies to en-

sure the uninterrupted, continuous operation of the Midway Atoll Airfield.

Section 741 revises Section 743 of Division D of Public Law 111-117 to strengthen the inventory of contractor services.

Section 742 eliminates pay increases in 2011 for many non-career employees in the Executive Branch.

Section 743 continues the provision concerning the non-application of these general provisions to title IV and title VIII.

Section 744 directs the GAO to study federal payment of interchange fees.

TITLE VIII

GENERAL PROVISIONS—DISTRICT OF COLUMBIA

(INCLUDING TRANSFER OF FUNDS)

Sections 801 through 817 continue general provisions that were included in title VIII of Division D of Public Law 111-117.

Section 818 permits the Public Defender Service for the District of Columbia to purchase professional liability insurance for its attorneys, staff, and board members.

Section 819 modifies the frequency of management evaluations by the Government Accountability Office of the District of Columbia's chartering authority for public charter schools.

Section 820 specifies that references to this Act in this title or title IV are treated as referring only to the provisions of this title and title IV.

DIVISION F—DEPARTMENT OF HOMELAND SECURITY APPROPRIATIONS ACT, 2011

The following is an explanation of the effects of Division F, which makes appropriations for the Department of Homeland Security for fiscal year 2011. As provided in section 4 of the consolidated bill, this explanatory statement shall have the same effect with respect to the allocation of funds and implementation of this division as if it were a joint explanatory statement of a committee of conference. The language and allocations contained in Senate Report 111-222 should be complied with, and carry the same emphasis as the language included in the explanatory statement, unless specifically addressed to the contrary in the bill or this explanatory statement. While repeating some report language for emphasis, this explanatory statement does not intend to negate the language referred to above unless expressly provided herein. When this explanatory statement refers to the Committees or the Committees on Appropriations, unless otherwise noted, this reference is to the House Subcommittee on Homeland Security and the Senate Subcommittee on the Department of Homeland Security. In cases where the explanatory statement directs the submission of a report, such report shall be provided to the Committees on Appropriations by February 9, 2011, unless otherwise directed. In cases where the explanatory statement directs a briefing, such briefing shall be provided to the Committees by February 16, 2011, unless otherwise directed.

This explanatory statement refers to the following laws and organizations as follows: Implementing Recommendations of the 9/11 Commission Act of 2007, Public Law 110-53, is referenced as the 9/11 Act; Security and Accountability for Every Port Act of 2006, Public Law 109-347, is referenced as the SAFE Port Act; Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93-288 is referenced as the Stafford Act; the American Recovery and Reinvestment Act of 2009, P.L. 111-5 is referenced as the Recovery Act; the Department of Homeland Security is referenced as DHS; the Government Accountability Office is referenced as GAO; and the Office of Inspector General of the Department of Homeland Security is referenced as the IG. In addition, any reference to "full-time equivalents" shall be referred to as FTE; any reference to "program, project, and activity" shall be referred to as PPA; any reference to a "Homeland Security Presidential Directive" shall be referred to as HSPD; and any reference to the Secretary shall be interpreted to mean the Secretary of Homeland Security.

Classified Programs

Recommended adjustments to classified programs are addressed in a classified annex accompanying this explanatory statement.

TITLE I DEPARTMENTAL MANAGEMENT AND OPERATIONS

OFFICE OF THE SECRETARY AND EXECUTIVE MANAGEMENT

The bill provides \$150,126,000 for the Office of the Secretary and Executive Management. Funding shall be allocated as follows:

Immediate Office of the Secretary	\$5,427,000
Deputy Secretary	1,974,000
Office of the Chief of Staff	3,158,000
Office of Counternarcotics Enforcement	3,700,000
Executive Secretary	8,717,000
Office of Policy	46,000,000

Office of Public Affairs	6,200,000
Office of Legislative Affairs	7,150,000
Office of Intergovernmental Affairs	3,519,000
Office of General Counsel ..	24,363,000
Office for Civil Rights and Civil Liberties	24,000,000
Citizenship and Immigration Services Ombudsman	6,800,000
Privacy Officer	9,118,000
Total	\$150,126,000

The Secretary shall provide the Committees semiannual reports, no later than February 16, 2011, and July 1, 2011, which provide a priority list of efficiencies being pursued as a result of the Secretary's Efficiency Review and an accounting of progress against that list; a list of components and specific procurements where additional oversight personnel are needed and where such personnel are being assigned; and an accounting of how reforms in the headquarters structure and function are providing better support and management for the Department's operators in the field.

The Deputy Secretary shall work to develop a coordinated and integrated approach for securing chemical facilities, ensuring companies do not misuse regulation to delay Federal safety investigations following chemical accidents, and providing the reports and briefings required in Senate Report 111-222. The Department shall also brief the Committees on the plans to resolve the differences between and standardize risk evaluations for chemical facilities regulated under Chemical Facility Anti-Terrorism Standards and the Maritime Transportation Security Act.

The Deputy Secretary shall examine which entity among the Office of Inspector General (IG), U.S. Customs and Border Protection (CBP), and U.S. Immigration and Customs Enforcement (ICE) should coordinate and take the lead on integrity investigations, establish clear lines of authority for the different types of investigations, and report on these decisions no later than 90 days after the date of enactment of this Act.

The Office of Counternarcotics Enforcement is directed to brief the Committees no later than 90 days after the date of enactment of this Act on its efforts to address the recommendations made in OIG-10-80.

The Office of Policy shall submit an expenditure plan for fiscal year 2011 no later than 60 days after the date of enactment of this Act in the fiscal year 2010 plan format.

Within the \$6,200,000 for the Office of Public Affairs is \$386,000 for the National Joint Information Center, as requested. The Office should develop a plan for operating for the full fiscal year at this level without a reprogramming request.

The Office for Civil Rights and Civil Liberties shall submit an expenditure plan as outlined in Senate Report 111-222.

The Citizenship and Immigration Services Ombudsman shall brief the Committees on the Virtual Ombudsman System as outlined in Senate Report 111-222.

The Department shall ensure that enacted FTE numbers included in the budget justification documents for fiscal year 2012 accurately reflect the FTE levels funded in this Act.

The Department shall include a separate appropriation justification for the Working Capital Fund (WCF) in the fiscal year 2012 budget request as outlined in House Report 111-298. Prompt notifications of changes to

the WCF are expected, and the WCF is not to be used to fund disapproved activities.

The Department shall continue to report on detailees on a semiannual basis, as outlined in Senate Report 111-222.

The Department shall track its reception and representation expenses and brief the Committees in detail on those expenses on a semiannual basis. The Department shall review reception and representation allowances for equitable alignment among components at or below the current combined maximum total funding level and propose any suggested changes in the fiscal year 2012 budget request.

The Department shall report semi-annually on the current projects tasked to Federally-Funded Research and Development Centers, the funding obligated by component, including the purposes for the funds, and any projects completed in the prior six-month period, with the first report due February 16, 2011.

The Department shall submit the implementation plan for the small vessel security strategy expeditiously, including resource requirements.

OFFICE OF THE UNDER SECRETARY FOR MANAGEMENT

The bill provides \$242,233,000 for the Office of the Under Secretary for Management. Funding shall be allocated as follows:

Immediate Office of the Under Secretary for Management	\$2,770,000
Office of Security	72,864,000
Office of the Chief Procurement Officer	75,527,000
Office of the Chief Human Capital Officer	42,130,000
Office of the Chief Administrative Officer	48,942,000
Salaries and Expenses	[43,942,000]
Nebraska Avenue Complex	[5,000,000]
Total	\$242,233,000

The Office of Security shall review policies for all DHS components' controlled information designations, develop a common set of designations for use by all components, and establish a uniform policy on the use of such designations. The Office shall brief the Committees quarterly on its progress beginning March 1, 2011.

The Department shall refrain from placing unreasonable information control burdens on university researchers partnering with DHS components, especially when the partnered research does not require access to controlled information.

The Department is directed to continue the acquisition workforce centralized training program at its current level.

The Office of the Chief Procurement Officer (OCPO) shall brief the Committees on its Department-wide assessment to determine gaps in key acquisition disciplines no later than 60 days after its completion. The briefing shall include the planned distribution of funded positions and FTE by office. Sustained funding for the acquisition workforce initiative is expected in the fiscal year 2012 budget request.

OCPO shall continue reporting on major acquisitions as outlined in Senate Report 111-31, but on a semiannual basis.

The Office of the Chief Human Capital Officer (OCHCO) shall provide quarterly briefings summarizing vacancy data at the Department as outlined in Senate Report 111-222, including the results of the fiscal year 2010 performance metrics established by DHS for OCHCO. OCHCO shall also brief the Committees on the strategic plans for overhauling the hiring process as outlined in Senate Report 111-222.

The Under Secretary for Management and OCHCO shall brief the Committees on all components' progress on carrying out the Department's "Balanced Workforce Strategy" as detailed in Senate Report 111-222 no later than February 16, 2011. The Department shall provide an implementation plan, including an overall priority list of conversions, and an accounting of progress against that list and description of associated savings. All Departmental components are to give priority attention to conducting their workforce reviews and promptly implement any changes.

The Department shall maintain an appropriate funding level for environmental planning, historic preservation, and internal control activities proposed to be cut in the budget request.

The Department shall provide to the Committees its comprehensive management integration strategy and alternatives analysis regarding a nationwide backup for the Global Positioning System as outlined in Senate Report 111-222.

OFFICE OF THE CHIEF FINANCIAL OFFICER

The bill provides \$64,480,000 for the Office of the Chief Financial Officer (CFO). The CFO shall continue to keep the Committees informed on the progress of the Transformation and Systems Consolidation (TASC) initiative through reports as outlined in the explanatory statement accompanying P.L. 111-83, including information on how the recommendations of GAO (GAO-04-536 and GAO-10-76) are being implemented, and provide the approved TASC implementation plan to the Committees no later than 15 days after the date of enactment of this Act. TASC is to be capable of tracking obligations by PPA. The CFO shall brief the Committees on the feasibility of outfitting current financial systems with this capability on an interim basis until TASC is fully operational with the same functionality.

The CFO shall ensure that adequate justification is given to each increase, decrease, transfer, and staffing change proposed in the fiscal year 2012 budget justification, and that each item directed by the Committees to be provided as a part of the fiscal year 2012 budget justification is delivered as mandated.

The CFO shall submit as part of the fiscal year 2012 budget justification the following: detailed information by appropriations account and PPA on all reimbursable agreements and significant uses of the Economy Act for each fiscal year; a detailed table identifying the last year that authorizing legislation was provided by Congress for each PPA; the amount of the authorization and the appropriation in the last year of authorization; and a report on the status of overdue Committee reports, plans and briefings for fiscal years 2010 and 2011. In addition, with the Department's Explanation of Changes to General Provisions, the CFO shall provide the text and citation of all Department appropriations provisions enacted to date that are permanent law.

OFFICE OF THE CHIEF INFORMATION OFFICER

The bill provides \$375,359,000 for the Office of the Chief Information Officer (CIO). Within this total is \$83,948,000 for data center development, \$16,000,000 for e-mail consolidation, \$12,268,000 for single sign-on upgrades, and \$9,609,000 for the Administration's proposed cross-enterprise information-sharing initiative and data quality and coherence initiatives. The CIO shall provide a detailed expenditure plan no later than 60 days after

the date of enactment of this Act that includes how the costs for the data quality and information-sharing initiatives are being shared with the CIO's partners. No funding is provided for the Homeland Top Secret/Sensitive Compartmented Information network initiative. Should the CIO wish to pursue this initiative in future years, a more complete justification and cost estimate should be provided to the Committees.

The shift of funding for communications security modernization activities is approved. Funding shall be allocated as follows:

Salaries and Expenses	\$82,727,000
Information Technology Services	53,079,000
Infrastructure and Security Activities	181,644,000
National Security Systems	57,909,000
Total	\$375,359,000

The CIO shall provide quarterly briefings on single sign-on and messaging consolidation, as well as OneNet implementation and migration to Network. The CIO shall continue providing quarterly briefings on CIO and department-wide information technology (IT) priorities as outlined in House Report 111-298, and add information on all IT acquisitions financed directly or managed by the CIO to those briefings.

In addition to funding within this account, \$78,463,000 is included in various components for data center consolidation, for a total fiscal year 2011 funding level of \$162,411,000. The following chart displays the funding levels by component:

DHS headquarters	\$83,948,000
U.S. Customs and Border Protection	25,370,000
U.S. Immigration and Customs Enforcement	10,400,000
United States Secret Service	12,600,000
National Protection and Programs Directorate	2,000,000
US-VISIT	15,000,000
Federal Emergency Management Agency	5,900,000
United States Citizenship and Immigration Services	7,193,000
Total	\$162,411,000

ANALYSIS AND OPERATIONS

The bill provides \$340,000,000 for Analysis and Operations, which funds both the Directorate for Intelligence and Analysis (I&A) and the Directorate for Operations Coordination. Additional information is provided in the classified annex to this explanatory statement. As in past years, the Under Secretary for Intelligence shall submit an expenditure plan for I&A within 60 days after the date of enactment of this Act. The plan shall meet the requirements listed in Senate Report 111-222. The expenditure plan shall focus the activities of the Office on areas where the Department can provide unique expertise or serve intelligence customers who are not supported by other components of the Intelligence Community, consistent with current statute and executive orders, and in a way that does not impair intelligence support to the senior leadership of the Department of Homeland Security.

State and Local Fusion Centers

Historical appropriations made for the program indicate strong support for State and local fusion centers (SLFCs), but I&A still needs to more fully identify and quantify the Federal benefits and return on investment

generated by this spending. Furthermore, although I&A has requested to establish a new program management office bureaucracy to oversee the SLFC program, the Department has submitted little documentation to explain the need for this level of overhead or how, precisely, this new activity will function. A statutory provision in the bill requires I&A to develop and submit, as part of a notification pursuant to section 503 of this Act, such robust programmatic justification prior to establishing any new program management office to oversee SLFCs. I&A is also directed to provide quarterly briefings to the Committees on the fusion center program, as detailed in Senate Report 111-222.

National Immigration Information Sharing Operation

The bill continues to restrict operations of the National Immigration Information Sharing Operation until the Secretary certifies that the program will comply with all statutory privacy and civil liberties requirements and that certification is reviewed by the Government Accountability Office.

Classified Programs

Recommended adjustments to classified programs are addressed in a classified annex accompanying this explanatory statement.

Office of Inspector General

The bill provides a total of \$131,806,000 for the Office of Inspector General (IG), including a direct appropriation of \$115,806,000 and a transfer of \$16,000,000 from the Disaster Relief Fund (DRF). The IG is required to notify the Committees no less than 15 days prior to any transfer from the DRF. Increased resources are provided for integrity investigations. The IG is directed to submit a plan for expenditure of these funds no later than 90 days after the date of enactment of this Act. The plan shall be developed in coordination with CBP and ICE.

The IG is directed to continue to manage audit and investigation reports as directed in House Report 111-298.

The IG is directed to report on disaster housing as discussed under FEMA "Disaster Relief."

TITLE II

SECURITY, ENFORCEMENT, AND INVESTIGATIONS

U.S. CUSTOMS AND BORDER PROTECTION

SALARIES AND EXPENSES

The bill provides \$8,239,377,000 for U.S. Customs and Border Protection (CBP) Salaries and Expenses; makes not less than \$1,700,000 available until September 30, 2012 for the Global Advanced Passenger Information/Passenger Name Record (API/PNR) international program; and requires the Border Patrol to maintain an agent workforce of not less than 20,500 full-time equivalent positions.

Within this total, the bill provides: \$15,000,000 for the intellectual property rights (IPR) initiative, for which CBP is directed to submit to the Committees on Appropriations a detailed implementation plan in conjunction with its fiscal year 2012 budget submission; \$123,497,000, as requested, for the Western Hemisphere Travel Initiative (WHTI); \$10,000,000 above the request for officer integrity activities, including the hiring of additional polygraph personnel in order to eliminate the backlog in testing and to test all new hires; \$3,000,000 to restore funding for the Global API/PNR program; an additional \$5,200,000 to expand the Immigration Advisory Program to three new overseas locations, which CBP shall identify in its fiscal year 2012 budget submission; \$158,100,000 for

Inspection and Detection Technology Investments, including \$3,000,000 for competitive awards for operational testing of spreader bar and other innovative systems that could help overcome logistical challenges to scanning cargo for nuclear or radiological materials that exist at major transshipment ports and seaports that depend on on-dock rail transfer; \$62,009,000, \$4,000,000 above the fiscal year 2010 level, to support CBP intelligence programs; \$311,052,000 for Air and Marine Operations, including \$12,000,000 above the request to restore unmanned aircraft system (UAS) operators, pilots, and other positions reduced in the fiscal year 2011 request, and \$900,000 for positions associated with the additional UAS; and \$4,750,000 for textile transshipment enforcement.

The following table specifies funding by budget program, project, and activity:

Headquarters Management and Administration:	
Management and Administration, Border Security Inspections and Trade Facilitation	\$519,182,000
Management and Administration, Border Security and Control Between Ports of Entry ...	492,242,000
Rent	400,573,000
Subtotal, Headquarters Management and Administration	1,411,997,000
Border Security Inspections and Trade Facilitation:	
Inspections, Trade, and Travel Facilitation at Ports of Entry	2,499,572,000
Harbor Maintenance Fee Collection (Trust Fund)	3,274,000
International Cargo Screening	103,438,000
Other International Programs	11,247,000
Customs-Trade Partnership Against Terrorism Trusted Traveler Programs	50,000,000
Inspection and Detection Technology Investments	11,500,000
Automated Targeting Systems	158,100,000
National Targeting Center	35,500,000
Training	45,785,000
	20,800,000
Subtotal, Border Security Inspections and Trade Facilitation	2,939,216,000
Border Security and Control between Ports of Entry:	
Border Security and Control	3,540,833,000
Training	36,279,000
Subtotal, Border Security and Control between POEs	3,577,112,000
Air and Marine Operations	311,052,000
Total	\$8,239,377,000

CBP shall brief the Committees not later than February 16, 2011, on the following:

1. How CBP will use the funds provided for officer integrity in this bill and in P.L. 111-230, the fiscal year 2010 border supplemental, to eliminate the investigation backlog and other efforts as discussed in Senate Report 111-222;

2. The performance and deployment of WHTI systems and technology;

3. CBP plans for the Container Security Initiative program, with associated financial and staffing plans, and how International Cargo Screening efforts enhance CBP's capability to prevent high risk, US-bound cargo from being loaded abroad;

4. The CBP financial plan for Automated Targeting Systems (ATS), to include a status report on implementation of recommendations contained in OIG-10-34 regarding commercial cargo targeting;

5. The status of fiscal year 2011 National Targeting Center (NTC) initiatives, to include a counterterrorism response team, and integrating drug trafficking organization trends into the work of the NTC;

6. Violence experienced by CBP personnel in connection with border enforcement efforts, and strategies and tactics used, in cooperation with Mexican and local community partners, to include sharing of forensic and other information, as well as coordination of operations;

7. The status of planning and funding of tactical communications investments for interoperability on the U.S. borders and remote areas where CBP has limited communications capability;

8. The status of efforts to assist the Mexican government procure and deploy license plate readers (LPR), and sharing of LPR data with Mexico;

9. How additional CBP officers funded in this bill and assigned to air ports of entry will help reduce airport wait times, including at model port of entry airports;

10. The status of solutions for tracking and managing in-bond shipments; and 11. How CBP is implementing the transition to a reduced presence at U.S. Postal Service facilities, and the impact of such reductions on CBP targeting and inspection of mail, and on CBP treatment of express courier and air cargo operators.

CBP is directed to submit a strategic plan for its non-intrusive inspection investment and deployment strategy in conjunction with its fiscal year 2012 budget submission, to include a financial plan for each of fiscal years 2012-2017.

CBP is directed, as part of its fiscal year 2012 budget submission, to identify and itemize consolidated elements of all its targeting and screening programs, by PPA; and to identify funding devoted to enhance information sharing between its ATS and the National Counterterrorism Center and the Terrorist Screening Center, and to identify technological or resource barriers to more expedient information exchange. CBP shall submit its cyber security plan to the Committees in conjunction with its fiscal year 2012 budget, including associated funding and personnel resources devoted to securing CBP systems and cyber infrastructure.

CBP shall submit a report not later than 90 days after the date of enactment of this Act on its five year staffing and deployment plan for the Border Patrol, taking into account the 1,000 additional agents funded in the fiscal year 2010 border supplemental appropriations Act.

CBP is directed to review, in consultation with other appropriate federal agencies, whether there would be benefits from reopening previously operational land border crossings located between the Presidio and Del Rio, Texas ports of entry, and report its findings, to include costs, alternatives, and recommendations, in conjunction with the fiscal year 2012 budget submission.

CBP is also directed to notify the Committees of plans for a study of cruise ship pas-

senger and crew screening, as described in GAO report GAO-10-400, and report to the Committees on its findings.

CBP is directed to ensure that activities of its Textile and Apparel Policies and Programs Office are maintained at the level of prior years, and to submit a report with its fiscal year 2012 budget on the execution of its five-year textile transshipment enforcement strategic plan.

CBP is directed to review how it collects and manages information about individuals arrested and detained in custody for less than 72 hours, the facilities used for short-term custody, the duration of such custody by processing disposition, and to develop a plan to report statistics for agency management and Congressional oversight, including possible inclusion in the DHS statistical yearbook. The review should examine data quality, definitions, development of practical data collection and reporting systems, and emphasize using information collected under existing authority and systems. CBP shall brief the Committees not later than April 4, 2011, on the status of this review and plan. In addition, CBP should report to the Committees not later than April 4, 2011, on its policies and practices related to conditions of custody facilities, and how CBP monitors the duration and conditions of short-term custody.

CBP shall submit to the Committees the updated resource optimization model required pursuant to section 403 of the SAFE Port Act.

CBP is directed to continue submitting monthly staffing and hiring reports, and to brief the Committees on a quarterly basis on its hiring progress.

CBP shall report quarterly to the Committees on the results of CBP quarterly reviews of obligations in carryover accounts that should be deobligated through its validation and verification process, pursuant to CBP Directive 1220-011C.

CBP, in coordination with the DHS CFO, is directed to carry out semiannual briefings on user fee revenue, and include in those briefings steps to mitigate collection shortfalls.

CBP shall provide semiannual briefings to the Committees, beginning the third quarter of fiscal year 2011, on those sea ports and airports for which passenger wait times have exceeded sixty minutes, which shall include, for each port: actual average and maximum wait times, numbers of passenger arrivals, CBP Officer staffing, and plans to meet increased workload at the ports of entry.

CBP is advised to use, as appropriate, commercial flights to voluntarily repatriate unaccompanied alien children to their countries of origin.

CBP is directed to fund activities associated with control of invasive species, such as Carrizo cane from within the Border Security Fencing, Infrastructure, and Technology account.

CBP should comply with direction in Senate Report 111-222 to work with the U.S. Department of Agriculture and the Hawaii Department of Agriculture to ensure their respective inspection and quarantine activities provide biosecurity protection for the State of Hawaii; and to work with Hawaii State officials to devise a plan for a joint inspection facility.

CBP is directed to work with tribal governments as they seek to develop tribal identification cards.

AUTOMATION MODERNIZATION

The bill includes \$347,575,000 for Automation Modernization. In the required expenditure plan, CBP should continue to report on

its progress in implementing the International Trade Data System, including recruitment of participating government agencies. CBP should continue its briefings on the status of the Automated Commercial Environment on a semi-annual basis.

**BORDER SECURITY FENCING, INFRASTRUCTURE,
AND TECHNOLOGY**

The bill includes \$574,173,000 for Border Security Fencing, Infrastructure and Technology (BSFIT), and makes \$75,000,000 unavailable for obligation until the Commissioner submits an expenditure plan, reviewed by GAO, not later than 90 days after the date of enactment of this Act, which meets the statutory conditions set forth under this heading in P.L. 111-83, and includes a detailed environmental mitigation plan and report on mitigation efforts, as described in House Report 111-298. The bill continues requirements for statutory notifications to the Committees on Appropriations to be made by the Commissioner.

The Department shall continue to submit quarterly Secure Border Initiative reports, as directed in Senate Report 111-222. Those reports shall continue to include updates on Northern Border and tactical communication investments. CBP shall brief the Committees semiannually on the status of BSFIT programs and investments.

The bill includes a new provision authorizing the transfer of BSFIT funds for environmental planning and mitigation to the Department of Interior, per interagency agreement, to permit the Secretary of Interior to acquire land or interests in land to mitigate or offset adverse environmental impacts from construction, operation, and maintenance activities related to border security. CBP is expected to continue its coordinated effort with the Department of Interior and other agencies with environmental responsibilities on the border as well as with State and local government and subject matter experts from the scientific and environmental communities.

To the extent the fiscal year 2011 BSFIT expenditure plan includes funding for additional pedestrian or vehicle barriers, the plan shall contain analyses of alternatives as described in House Report 111-157.

CBP is directed to fund any activities associated with control of invasive species and associated mitigation efforts from within the BSFIT account.

**AIR AND MARINE INTERDICTION, OPERATIONS,
MAINTENANCE, AND PROCUREMENT**

The bill provides \$511,751,000 for Air and Marine Interdiction, Operations, Maintenance, and Procurement, including increases of \$5,500,000 for equipment and supplies needed to support two additional unmanned aircraft systems funded in the fiscal year 2010 border supplemental appropriations Act, and \$3,000,000 to support system upgrades for the Air and Marine Operations Center.

CONSTRUCTION AND FACILITIES MANAGEMENT

The bill provides \$282,740,000 for Construction and Facilities Management, including \$4,000,000 for equipping and constructing the Advanced Training Center, and \$3,000,000 for additional forward operating bases. CBP is directed to brief the Committees not later than February 16, 2011, with proposed sites for these new bases and a timetable for their completion. CBP is also directed to devote funding, if available, to increase the number of housing units in remote areas where there is a lack of private housing for Border Patrol agents or CBP Officers. CBP is also directed to ensure that the rescission required pursuant to Section 575 complies with directions

in Senate Report 111-222 regarding funding for alteration projects, avoiding any impact on the plans to replace the Oroville, Washington Border Patrol station, and the submission of a revised rescission plan consistent with this direction.

**U.S. IMMIGRATION AND CUSTOMS
ENFORCEMENT**

SALARIES AND EXPENSES

(Including Transfer of Funds)

The bill includes \$5,508,555,000 for U.S. Immigration and Customs Enforcement (ICE) Salaries and Expenses. Within this amount, the bill allocates \$2,000,000,000 to finance ICE's various efforts to identify undocumented individuals with criminal records who are incarcerated or at-large, and to remove those who are judged deportable in immigration court. Of this amount, \$259,825,000 is provided for continued expansion of the Secure Communities program, which is discussed in more detail below. The following table reflects ICE funding by program, project, and activity:

Headquarters Management and Administration:	
Personnel Compensation and Benefits, Services and Other Costs	\$274,360,000
Headquarters Managed Information Technology Investments	209,363,000
Subtotal, Headquarters Management and Administration	483,723,000
Legal Proceedings	221,666,000
Domestic Investigations	1,732,538,000
International Investigations:	
International Operations	113,689,000
Visa Security Program	37,986,000
Subtotal, International Investigations	151,675,000
Intelligence	76,107,000
Detention and Removal Operations:	
Custody Operations	1,791,168,000
Fugitive Operations	229,682,000
Criminal Alien Program	192,539,000
Alternatives to Detention	75,000,000
Transportation and Removal Program	294,632,000
Subtotal, Detention and Removal Operations	2,583,021,000
Identification and Removal of Criminal Aliens	259,825,000
Total, ICE Salaries and Expenses	\$5,508,555,000

Identifying and Removing Criminal Aliens

Each year, over 600,000 illegal aliens convicted of crimes are released from law enforcement custody instead of facing deportation, according to statistics provided by ICE. Furthermore, a GAO study found that over 97 percent of incarcerated criminal aliens have been arrested before—on average eight times. When designing its immigration enforcement efforts, ICE must maintain perspective on which undocumented immigrants represent the most significant threat to the nation's social and economic fabric. Given the corrosive effect crime has on society, the most pragmatic approach is for ICE to continue prioritizing the identification of criminal aliens who are judged removable from the country.

In order to maximize its ability to locate criminal aliens, ICE has initiated the Secure Communities program. Secure Communities

allows the review of criminal records and immigration status of individuals who are booked into police custody and to take appropriate action to remove those convicted of the most dangerous crimes. The bill includes \$259,825,000 for the continued implementation of Secure Communities, an additional \$59,825,000 over the request. This funding will allow ICE to sustain investments made to date and strengthen ICE operational efficiency to prepare for the growing volume of criminal aliens who will be removed from the country as Secure Communities is fully deployed. Of this additional amount, \$30,625,000 shall be for investments in ICE information technology systems; \$1,100,000 shall be for Law Enforcement Support Center personnel; \$13,100,000 shall be for additional removal costs associated with increased criminal deportations; \$10,000,000 shall be for the strategic planning, financial management, and outreach efforts of the Secure Communities Program Management Office; and \$5,000,000 shall be for operational planning by staff within ICE Detention and Removal Operations.

As in past years, ICE is required to continue quarterly reporting on the Secure Communities program and to submit those reports within 45 days of the close of the quarter. In particular, ICE must provide a better explanation of the impact Secure Communities will have on ICE detention facilities, the docket for the Executive Office of Immigration Review, and the speed with which ICE is able to remove criminal aliens from the country once they are judged deportable. The agency should report on how the detention of additional criminals will affect ICE's detention policies and standards, the impact such changes will have on non-criminals detained by ICE, and any changes ICE predicts in detention throughput as a result of a larger criminal population in custody.

ICE must also ensure the appropriate oversight and management of the Secure Communities program. In particular, ICE should develop a robust public complaint review process so that the agency can ensure the program is successful at identifying and removing truly dangerous criminal aliens. It is not the intent or purpose of this program to target certain populations simply to determine immigration status. ICE should update more regularly information provided to the public about the success of the Secure Communities program, including statistics on the number of criminal aliens identified, prosecuted and removed, by crime type and location, both to improve the transparency of ICE operations but also to clarify the program's focus, intent and purpose.

**ICE Support to State and Local Law
Enforcement**

The bill includes \$117,668,000 for ICE State and Local programs, as requested. Within this total, \$68,321,000 is for the 287(g) program; \$14,357,000 is for the Forensics Documentation Laboratory, which supports all ICE investigatory programs and offers specialized assistance to State and local law enforcement agencies; and \$34,990,000 is for the Law Enforcement Support Center.

The 287(g) program is a voluntary program that allows ICE to train local law enforcement agents to enforce Federal immigration laws. After training, local law enforcement personnel can determine an individual's immigration status and file requests to ICE for the removal of individuals they believe are illegal immigrants. Pursuant to its internal policies, ICE is supposed to provide robust oversight of the local officers enrolled in the

287(g) program to ensure participants comply with all applicable Federal law enforcement policies and procedures. A recent IG review of the 287(g) program noted a number of shortcomings in ICE's 287(g) training and program oversight. The IG made 33 recommendations for ICE to improve the program. To maintain the integrity of the 287(g) program, ICE is to implement the IG recommendations as expeditiously as possible, and is to be commended for having already started this process. This includes appropriate accountability and training standards and instruction on multicultural communication and the avoidance of racial profiling.

The Secure Communities program also requires careful oversight and monitoring, but the approach has several advantages to 287(g): it requires minimal training by ICE for local employees, it is integrated into existing booking procedures at prisons and jails, and it imposes no additional workload on local employees. Further, Secure Communities reduces the risk of potentially biased status checks by local officials since the backgrounds of all individuals in local custody are checked in an identical manner. Most importantly, Secure Communities also clearly delineates the respective roles of Federal and local authorities in immigration enforcement. In light of these advantages, ICE is to be commended for its efforts expanding the Secure Communities program.

ICE Investigations

The bill provides \$1,732,538,000 for ICE domestic investigations, which includes increases above the budget request of \$3,500,000 for investigations of intellectual property rights violations and \$2,000,000 for ICE efforts to combat criminal gang conspiracies. The bill provides \$151,675,000 for ICE international investigations, an increase of \$7,300,000 above the request to expand the Visa Security Program to three additional locations. Of the total budget for ICE investigations, the bill specifies no less than \$250,000,000 be allocated to efforts focused along the Southwest border. An additional \$80,000,000 in supplemental appropriations was provided to ICE for investigations in the Southwest border region. Given the extreme and on-going violence in and around the Mexican city of Juarez, ICE is directed to continue to build its programs that investigate border violence and organized crime in the El Paso-Juarez corridor. ICE is directed to brief the Committees no later than February 16, 2011, on its efforts to establish or enhance a centralized Southwest border operations command to coordinate the various ICE roles played in cross-border issues.

ICE Intelligence

The bill provides \$76,107,000 for ICE intelligence programs, an increase of \$5,000,000 above the budget request. Additional funds shall be used to expand the Operation Angel Watch program, which helps ICE identify travel patterns of convicted sex offenders who may attempt to exploit children in foreign countries. As required in the Senate report, ICE is directed to provide an updated intelligence staffing briefing no later than 60 days after the date of enactment of this Act.

Alternatives to Detention

The bill provides \$75,000,000 for ICE Alternatives to Detention programs, \$2,925,000 more than requested. ICE is directed to continue to implement the program nationwide. The Fiscal Year 2010 DHS Appropriations Act required ICE to report on the cost and schedule for nationwide deployment, but the agency submitted an analysis that, while

meeting the letter of the law, did not include any realistic framework for achieving a national program. As a result, the bill includes a revised statutory provision requiring ICE to resubmit a fuller analysis of nationwide deployment of Alternatives to Detention, and encourages the agency to work with the Committees to ensure that all necessary information is included in the submitted report.

Detention Standards and Detainee Care

ICE is to be commended for its efforts to improve the oversight of conditions and practices at immigration detention facilities; however, many facilities still do not comply with existing detention standards. In addition, ICE has made little observable progress implementing detention center reforms recommended in a comprehensive analysis titled Immigration Detention Overview and Recommendations and submitted to the agency in October, 2009. The budget request did not include any additional funds for implementing recommendations in the report. A recently-completed assessment of ICE medical services was also unaddressed in the budget request. The Committees strongly encourage ICE to continue implementing improvements to its detention standards, and to request adequate funds in the fiscal year 2012 budget to implement recommendations made in various audits of its operations. As in past years, the Committee continues the requirement for the Department to notify the Congress and the DHS IG within 48 hours of any death that occurs in ICE custody.

Textile Transshipment Enforcement

Section 352 of the Trade Act of 2002 authorizes funding for Customs Service textile transshipment enforcement, and specifies how the funds must be spent. The bill includes \$4,750,000, as authorized, to continue these activities. ICE is directed to report on these enforcement activities with its fiscal year 2012 budget request on its actual and projected obligations of this funding, covering fiscal years 2005 to 2011. The report should include staffing levels by fiscal year since 2005, and a five-year enforcement plan for transshipment violations.

ICE Headquarters Management and Administration

The bill provides \$483,723,000 for ICE Headquarters and Administration. This amount includes \$10,400,000 for data center consolidation, \$5,000,000 for additional workforce integrity activities, and \$40,000,000 for ICE field office collocation.

Security for the Assistant Secretary of Immigration and Customs Enforcement

Like other senior Federal law enforcement officials, the Assistant Secretary for ICE could be targeted by the criminal organizations that are under ICE investigation. Although there is no current evidence of specific threats against the Assistant Secretary for ICE, the Committees have no objection to on-going security evaluations and the provision of any protective security measures determined necessary.

AUTOMATION MODERNIZATION

The bill provides \$84,700,000 for ICE automation modernization. Up to \$30,600,000 may be transferred to this account from "Salaries and Expenses" to pay for information technology investments related to the identification and removal of aliens convicted of a crime and judged deportable.

ICE must make more progress implementing its electronic health records (eHR) program. Given that ICE detainees are often

transferred between several detention facilities before their immigration cases are decided, portable medical records are an important part of ensuring the health of all those held in the agency's custody. The ICE Chief Information Officer is directed to update the Committees on the status of the eHR initiative and the anticipated timeline for a fully-implemented system.

TRANSPORTATION SECURITY

ADMINISTRATION

AVIATION SECURITY

The bill provides \$5,452,037,000 for Aviation Security. In addition to the amounts appropriated, a mandatory appropriation totaling \$250,000,000 is available through the Aviation Security Capital Fund. Statutory language reflects the collection of \$2,100,000,000 from aviation user fees, as authorized. The following table specifies funding by budget activity:

Screening Operations:	
Screener Workforce:	
Privatized screening	\$142,678,000
Screener personnel, compensation, and benefits	2,953,971,000
Subtotal, screener workforce	3,096,649,000
Screener training and other:	263,000,000
Checkpoint support:	360,026,000
EDS/ETD Systems:	
EDS procurement and installation	320,000,000
Screening technology maintenance and utilities	323,325,000
Subtotal, EDS/ETD systems	643,325,000
Subtotal, Screening Operations	4,363,000,000
Aviation Security Direction and Enforcement:	
Aviation regulation and other enforcement	368,363,000
Airport management and support	574,926,000
Federal flight deck officer and flight crew training	25,694,000
Air cargo	120,054,000
Subtotal, Aviation Security Direction and Enforcement	1,089,037,000
Total, Aviation Security ..	\$5,452,037,000

Privatized Screening

The bill provides \$142,678,000 for Privatized Screening. The Transportation Security Administration (TSA) shall brief the Committees on Appropriations on the re-evaluation of the screening partnership program when it is concluded.

Screener Personnel, Compensation, and Benefits

The bill provides \$2,953,971,000 for Screener Personnel, Compensation, and Benefits. Within this total, \$191,369,000 is approved for the 5,355 positions requested for new advanced imaging technology (AIT) screeners, realigned from the budget proposal to reflect delays in AIT systems deployment. No funding has been provided for new behavior detection officers (BDO). TSA is directed to focus on completing internal changes to the BDO program and address GAO recommendations contained in GAO-10-763. This should include, but not be limited to, a cost-benefit analysis of the BDO program and a risk assessment of deployment options, including

the risk if BDOs are not deployed. TSA shall brief the Committees no later than 60 days after the date of enactment of this Act on its progress.

Since fiscal year 2007, the Homeland Security Appropriations Act has carried a statutory requirement that high ranking legislative and executive branch officials shall not be exempt from Federal passenger and baggage screening. For Federal officials traveling with an approved federal law enforcement security detail, TSA follows a specialized screening protocol, which includes identity verification, but not physical screening. Not later than 45 days after the date of enactment of this Act, TSA shall report on the options available to physically screen these individuals.

Checkpoint Support

The bill provides \$360,026,000 for Checkpoint Support, including full funding for 503 additional AITs as requested. TSA shall work closely with local airport authorities to ensure that all space and facility requirements and constraints have been taken into consideration before AIT units are deployed. Within the funding provided for checkpoint support, up to \$65,473,000 is available, as requested, for terminal modifications if it is determined that no other designs to accommodate the installation of AIT equipment are possible. In addition, TSA is developing automated target recognition (ATR) capability to be deployed with its 2011 AIT procurements, potentially eliminating the need for a remote viewing room. The Committees are concerned that the reliability of the ATR technology has not yet been tested in the field even though the request included significant funding for its deployment. Therefore, TSA only should deploy ATR technology when operational field tests demonstrate that it provides a level of security equal to or greater than current AIT screening procedures.

TSA shall regularly brief the Committees on the development of AIT, including information on AIT procurement costs, the schedule to deploy and staff the AIT units, ATR development and associated funding requirements, facility modification costs, details on the latest detection capabilities and limitations, and ongoing efforts to improve the technology.

TSA is preparing to acquire automated wait time collection technology, which will permit the collection and display of real time data for the traveling public at all large airports and a limited number of smaller ones. To address concerns with increased wait times related to the deployment of advanced technology at screening checkpoints and to ensure that the agency maximizes its utilization of screening resources, TSA shall measure and report to the Committees beginning with the third quarter, and quarterly thereafter, passenger screening wait times during periods of peak passenger traffic at all airports collecting automated data. The report is to be provided within 45 days of the end of the quarter.

As discussed in the Senate report, TSA is encouraged to ensure high risk airports have working security cameras in place at checkpoints and secure exits and is directed to report on recommendations to improve airport security at locations where passengers exit the sterile area of an airport.

Explosives Detection Systems

A total of \$570,000,000 is available for Explosives Detection Systems (EDS) procurement and installation. Within this total, the bill provides \$320,000,000 in discretionary

funding. An additional \$250,000,000 in mandatory funding is available from the Aviation Security Capital Fund. Not less than 9 percent of the funds provided shall be available for the purchase and installation of certified EDS at medium- and small-sized airports. Consistent with fiscal year 2010, TSA shall include as part of the fiscal year 2012 budget request a report on savings achieved and anticipated (by fiscal year) from the installation of new optimal in-line systems. TSA is encouraged to use funds for dedicated pre-engineered structures related to optimal screening solutions for EDS installations.

Consistent with prior years, TSA shall submit an EDS, checkpoint, and air cargo expenditure plan 60 days after the date of enactment of this Act. As part of the fiscal year 2011 EDS plan, TSA should identify those airports that incurred eligible costs for EDS without being reimbursed and any funding in the plan that may be allocated to them. TSA is encouraged to establish a reimbursement program as authorized by the 9/11 Act. While TSA is no longer required to submit updates to the EDS and checkpoint reports quarterly, the agency shall provide quarterly briefings to the Committees, highlighting any deviations from the plan. These briefings shall also include updates on TSA's competitive process for all three classes of EDS machines, results from certification and operational testing, and efforts to avoid acquisition delays.

Aviation Regulation and Other Enforcement

As discussed in Senate Report 111-222, TSA is to brief the Committees on its progress in implementing the new international program initiatives funded in this Act, no later than 90 days after the date of its enactment.

Air Cargo

The bill provides \$120,054,000 for Air Cargo including \$2,500,000 for a pilot screening program of international inbound cargo using CBP's automated targeting system. TSA shall continue its regular briefings on compliance with the 100-percent air cargo screening mandate, with a specific emphasis on international air cargo. In addition, TSA shall update the Committees regularly on efforts to enhance cargo screening on all-cargo aircraft following the recent bombing attempts. Finally, TSA is to comply with the recommendations contained in OIG-10-119, related to air cargo screening and shall brief the Committees on the execution of these recommendations no later than 120 days after the date of enactment of this Act.

Perimeter Security

TSA shall report to the Committees no later than 90 days after the date of enactment of this Act on actions TSA has taken to secure commercial airport perimeters as discussed in Senate Report 111-222.

SURFACE TRANSPORTATION SECURITY

The bill provides \$137,558,000 for Surface Transportation Security. Within this total, \$39,947,000 is for surface transportation staffing and operations and \$97,611,000 is for surface transportation security inspectors and canines. TSA shall report to the Committees on Appropriations; the House Homeland Security Committee; and the Senate Commerce, Science, and Transportation Committee on the feasibility and merits of establishing a Deputy Assistant Secretary for Surface Transportation to lead the security programs and personnel for non-aviation transportation security no later than 270 days after the date of enactment of this Act.

TRANSPORTATION THREAT ASSESSMENT AND CREDENTIALING

The bill provides a direct appropriation of \$159,124,000 for Transportation Threat Assess-

ment and Credentialing, of which \$84,637,000 is provided for Secure Flight and \$74,487,000 is for crew and other vetting programs. Of the total provided for crew and other vetting, \$43,200,000 is for infrastructure modernization. This funding, coupled with carry-over balances, will provide a total funding of \$69,500,000 for infrastructure modernization for fiscal year 2011, the amount TSA indicates is needed to keep this effort on track. TSA is to brief the Committees quarterly on the development of this system.

Not later than 90 days after the date of enactment of this Act, TSA shall report on performance of the Secure Flight name matching system since becoming operational, including effectiveness of the system in accurately identifying passengers on the terrorist watch list while reducing number of passengers misidentified; a description of how the assessment was conducted; and how TSA has used the results to determine if Secure Flight should be modified to pre-clear misidentified passengers. TSA is also to report on its efforts to address security concerns associated with fraudulent documentation by December 31, 2010.

TRANSPORTATION SECURITY SUPPORT

The bill provides \$1,039,777,000 for Transportation Security Support as follows:

Headquarters administration	\$267,866,000
Information technology	479,284,000
Human capital services	254,839,000
Intelligence	37,788,000

Subtotal, Transportation

Security Support \$1,039,777,000

TSA shall continue semiannual briefings on covert testing activities, including trends on operational errors and equipment failures. As discussed in Senate Report 111-222, TSA shall brief the Committees as part of the fiscal year 2012 budget request, on its compliance with recommendations contained in OIG-10-72 on contractor usage and oversight. This briefing is to include a discussion of TSA's review of inherently governmental functions and efforts to strengthen contracting officer's technical representatives training. Finally, TSA should issue reports on risk-based decision making, as detailed in the Senate Report, to be delivered with the fiscal year 2012 budget request.

FEDERAL AIR MARSHALS

The bill provides \$945,015,000 for the Federal Air Marshals (FAMs), including \$820,200,000 for management and administration and \$124,815,000 for travel and training. TSA shall continue to provide quarterly reports on FAMs mission coverage, staffing levels, and hiring rates as directed in previous appropriations Acts, and immediately submit the overdue assessment of long-term FAMs staffing levels and include as part of this report a detailed rationale on the need to continue enhanced flight coverage at the same levels as immediately after the December 25, 2009, incident.

COAST GUARD

OPERATING EXPENSES

The bill includes \$6,951,973,000 for Coast Guard Operating Expenses. The funds shall be allocated as follows:

Military pay and allowances:	
Military pay and allowances	\$2,792,210,000
Military health care	415,507,000
Permanent change of station	170,763,000

Subtotal, Military pay and allowances

3,378,480,000

Civilian pay and benefits ...	757,303,000
Training and recruiting:	
Training and education ..	101,535,000
Recruitment	100,558,000

Subtotal, Training and recruiting	202,093,000
---	-------------

Operating funds and unit level maintenance:	
---	--

Atlantic Command	177,835,000
Pacific Command	198,090,000
1st District	60,610,000
5th District	21,901,000
7th District	80,499,000
8th District	48,269,000
9th District	31,483,000
11th District	17,749,000
13th District	22,824,000
14th District	19,109,000
17th District	29,647,000

Headquarters directorates	248,324,000
---------------------------------	-------------

Headquarters managed units	155,532,000
----------------------------------	-------------

Other activities	871,000
------------------------	---------

Subtotal, Operating funds and unit level maintenance	1,112,743,000
--	---------------

Centrally managed accounts	346,787,000
----------------------------------	-------------

Intermediate and depot level maintenance:	
---	--

Aeronautical	329,860,000
Electronic	164,678,000
Civil/ocean engineering and shore facilities	180,890,000
Vessel	212,349,000

Subtotal, Intermediate and depot level maintenance	887,777,000
--	-------------

Overseas Contingency Operations (emergency appropriations)	254,000,000
--	-------------

Marine safety and response personnel	12,790,000
--	------------

Total, Operating Expenses	\$6,951,973,000
---------------------------------	-----------------

The Commandant shall develop and share with the Committees a new workforce action plan that outlines the following: projected staffing levels, both military and civilian, needed to carry out all Coast Guard missions, as well as to bring "in house" government responsibilities being executed by contractors; gaps between those levels and current staffing, organizational structure and funding; a plan for addressing those gaps, including specific strategies for hard-to-fill positions; and an outline of any additional authorities and resources necessary to address the aforementioned requirements.

The bill includes \$12,790,000 for additional inspectors, investigators, engineers and incident management personnel for marine safety and response activities. The Coast Guard shall provide an expenditure plan for these funds no later than February 16, 2011.

The Coast Guard shall brief the Committees by February 16, 2011, on the Coast Guard's near-term and long-term plans for operations in Iraq, including details on efforts to train Iraqi personnel to assume maritime security responsibilities.

Funds are restored for four of the five Maritime Safety and Security Teams (MSST) that were to be decommissioned under the request. The Coast Guard shall conduct a comprehensive analysis of the MSST program as outlined in OIG-10-89 and brief the Committees on it no later than 120 days after the date of enactment of this Act. The Coast Guard shall continue operations of two of the four High Endurance Cutters that were to be decommissioned under the request, as

outlined in Senate Report 111-222. The Coast Guard shall comply with the reporting requirements in Senate Report 111-222 on the decommissioning of the National Strike Force Coordinating Center if it chooses to proceed with its decommissioning. Sufficient industrial work shall be assigned to the Coast Guard Yard.

ENVIRONMENTAL COMPLIANCE AND RESTORATION

The bill provides \$13,329,000 for Environmental Compliance and Restoration.

RESERVE TRAINING

The bill provides \$135,675,000 for Reserve Training.

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

The bill includes \$1,518,613,000 for Acquisition, Construction, and Improvements. Funding is provided as follows:

Vessels and Critical Infrastructure:	
Response boat-medium	\$52,000,000
140-foot icebreaker fleet refurbishment	21,200,000

Subtotal, Vessels and Critical Infrastructure	73,200,000
---	------------

Other Equipment:	
------------------	--

National distress and response system modernization (Rescue 21) ..	36,000,000
--	------------

Subtotal, Other Equipment Personnel and Related Support:	36,000,000
--	------------

Core acquisition costs	510,000
-----------------------------	---------

Direct personnel costs	107,051,000
-----------------------------	-------------

Subtotal, Personnel and Related Support	107,561,000
---	-------------

Integrated Deepwater Systems:	
-------------------------------	--

Aircraft:	
Maritime patrol aircraft	40,000,000
HH-60 conversions	32,000,000
HC-130H conversion/sustainment	25,000,000
HC-130J fleet introduction	4,000,000
Unmanned Aircraft Systems	2,000,000

Subtotal, Aircraft	103,000,000
--------------------------	-------------

Surface Ships:	
----------------	--

National Security Cutter	615,002,000
Offshore Patrol Cutter ...	45,000,000
Fast Response Cutter	240,000,000
IDS small boats	3,000,000
Medium Endurance Cutter sustainment	30,000,000

Subtotal, Surface Ships	933,002,000

Military Housing	2,000,000
------------------------	-----------

Total, Acquisition, Construction, and Improvements	1,518,613,000
--	---------------

Of the \$615,002,000 provided for the National Security Cutter, \$77,000,000 is for long-lead time materials for NSC #6 and the remainder

is for production of NSC #5. Sufficient funding is provided to award long lead-time materials and production contracts for NSC #5, as post-production costs for NSC #4 and NSC #5 are not estimated to be required until fiscal year 2015. Delaying NSC #5 until post-production costs are available will postpone delivery by at least one year, result in increased project costs, and further exacerbate challenges associated with decreased availability and increased maintenance costs of the High Endurance Cutter fleet.

The Commandant shall continue to provide quarterly acquisition and mission emphasis reports consistent with deadlines articulated under section 360 of division I of P.L. 108-7. The Coast Guard shall continue submitting these reports as outlined in Senate Report 111-222, and providing quarterly briefings to the Committees on the status of all major acquisitions.

The Coast Guard shall consider phasing out the Deepwater construct in favor of a less differentiated public accounting for all of the Coast Guard's acquisition programs. The Coast Guard shall report to the Committees within 30 days after the date of enactment of this Act on what would be needed to effect such a change and what its impact would be. Should the Coast Guard choose to phase out the Deepwater construct, all budget materials should include crosswalks to the current PPA structure to ensure transparency.

The Department shall make note in its fiscal year 2012 budget submission of how coordinated acquisition efforts between the Coast Guard and CBP are being carried out to ensure interoperability and realize reduced acquisition and support costs.

The Coast Guard shall continue quarterly briefings on the status of the Rescue 21 program, including any changes to the schedule outlined in the request. It is expected that the Coast Guard will stay on top of the program's need for technology refreshment, and that funding for deployment of Rescue 21 to the Western Rivers will be included in the Coast Guard's fiscal year 2012 budget request.

ALTERATION OF BRIDGES

The bill provides \$4,000,000 for Alteration of Bridges.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

The bill includes \$32,534,000 for Research, Development, Test, and Evaluation (RDT&E). Within this funding, \$8,000,000 is for a ship-based unmanned aircraft system advanced concept technology demonstration and \$4,500,000 is for research specifically to improve the Coast Guard's capability to address oil spills from the full range of wellheads, drilling platforms, and vessels in operation. The Administration's budget materials for fiscal year 2012 shall include and justify a unified and coordinated Federal approach for oil spill research that includes the Department of the Interior, the Department of Energy, the National Oceanographic and Atmospheric Administration, and the Coast Guard.

The Coast Guard shall produce a report that details the RDT&E program's progress against the goals outlined in the fiscal year 2010 request, and what the plan is for conducting fiscal year 2011 research activities within the level appropriated. The report is to include information on how the research plan has evolved since the submission of the fiscal year 2011 budget request, and reflect the program's response to Congressional direction. This report is due no later than

three months after the date of enactment of this Act.

RETIRED PAY

The bill provides \$1,400,700,000 for Retired Pay.

UNITED STATES SECRET SERVICE

SALARIES AND EXPENSES

The bill provides \$1,574,642,000 for Secret Service Salaries and Expenses. This amount includes \$7,000,000 for the cost to implement a new Secret Service Uniformed Division pay system and \$69,960,000 for recapitalization costs for Secret Service information technology equipment. Within the explanatory charts showing funding levels for the Secret Service there is a new program line for Information Integration and Technology Transformation programs. This discrete funding display was developed in order to increase transparency for the investments necessary to modernize the Secret Service information technology systems and to prevent reallocation of these resources without advance Congressional notification.

The bill also provides \$61,158,000 for the Electronic Crimes Task Force program, including \$4,000,000 for the Secret Service to continue its training program for State and local law enforcement at the National Computer Forensics Institute (NCFI). The Secret Service is to continue to administer NCFI in the same manner as fiscal year 2010. An additional \$4,000,000 is provided for domestic investigations as discussed in Senate Report 111-222.

The following table reflects Secret Service funding by program, project, and activity:

Headquarters Management and Administration	\$201,216,000
Information Integration and Technology Transformation	69,960,000
Protection:	
Protection of persons and facilities	773,042,000
Protective intelligence activities	68,914,000
Presidential candidate nominee protection	17,867,000
National Special Security Event fund	1,000,000
White House mail screening	25,315,000
Subtotal, Protection	886,138,000
Investigations:	
Domestic field operations	261,412,000
International field office administration, operations, and training	31,171,000
Electronic Crimes Special Agent Program and Electronic Crimes Task Forces	61,158,000
Support for missing and exploited children	8,366,000
Subtotal, Investigations	362,107,000
Rowley training center	55,221,000
Total, Salaries and Expenses	\$1,574,642,000

Financial Management

Secret Service spending on campaign-related protection must be subject to adequate

financial controls. On April 27, 2010, the GAO informed the Committees that at the end of the 2008 campaign, the Secret Service violated the Antideficiency Act by spending more than had been appropriated for the security of the 2009 presidential inauguration. This follows a similar breakdown in Secret Service financial controls at the end of the 2004 presidential campaign, which was also noted by the Committees in previous appropriations reports.

As required by law, the Secret Service “shall report immediately to the President and Congress all relevant facts and a statement of actions taken” to rectify the violation of the Antideficiency Act. At this point, the Secret Service has not complied with this requirement. Furthermore, since this is not the first case of a significant failure to manage protective costs accurately, the Secret Service, in consultation with the DHS Chief Financial Officer (CFO), is directed to file the appropriate notifications of an Antideficiency Act violation and to submit a strategic plan for implementing strict financial controls for all 2012 campaign costs, including a schedule of monthly deadlines and deliverables required to rectify this problem fully. The Secret Service and the DHS CFO are also directed to provide regular updates on the implementation of such plan to ensure this situation does not recur.

ACQUISITION, CONSTRUCTION, IMPROVEMENTS, AND RELATED EXPENSES

The bill includes \$3,975,000 for Acquisition, Construction, Improvements, and Related Expenses.

TITLE III

PROTECTION, PREPAREDNESS, RESPONSE, AND RECOVERY

NATIONAL PROTECTION AND PROGRAMS DIRECTORATE

MANAGEMENT AND ADMINISTRATION

The bill provides \$45,387,000 for Management and Administration of the National Protection and Programs Directorate (NPPD). Within this amount, \$2,000,000 is for NPPD data center consolidation. Funding for administrative activities is reduced by \$750,000 due to a high level of position vacancies.

Risk Management and Analysis

Within the total, \$9,790,000 is provided for NPPD's risk management and analysis (RMA) function. A recent study of RMA by the National Academy of Sciences (NAS) highlights shortcomings in the program. Notably, because the validity and reliability of DHS risk models are untested, NAS finds that the Department's risk analysis capabilities and methods are inadequate to support DHS decision making. The NPPD Office of the Under Secretary is directed to brief the Committees within 30 days after the date of enactment of this Act on how RMA can be managed in a way that generates demonstrable benefits to DHS—whether through reforms to ensure the organization achieves its full potential as a Department-wide risk analysis capability or through reorganization or dissolution of the office in recognition of distributed risk modeling across DHS agencies.

INFRASTRUCTURE PROTECTION AND INFORMATION SECURITY

The bill provides \$874,923,000 for Infrastructure Protection and Information Security (IPIS). Funding shall be allocated as follows:

Infrastructure Protection:	
Identification and Analysis	\$88,595,000
Coordination and Information Sharing	48,715,000
Mitigation Programs	198,426,000
Subtotal, Infrastructure Protection	335,736,000
National Cyber Security Division (NCS):	
Cyber Security Protection and Response:	
US Computer Emergency Response Team (US-CERT)	80,406,000
Network Security Deployment	175,425,000
Federal Network Security	29,245,000
Subtotal, Cyber Security Protection and Response	285,076,000
Cyber Security Standards, Workforce Development, and Awareness	76,017,000
Cyber Security Coordination	7,500,000
Cyber Security Management and Administration	17,086,000
Subtotal, National Cyber Security Division	385,679,000
Office of Emergency Communications	45,339,000
National Security/Emergency Preparedness Telecommunications:	
Priority Telecommunications Services	57,413,000
Next Generation Networks	22,364,000
Programs to Study and Enhance Telecommunications	14,079,000
Critical Infrastructure Protection Programs ...	14,313,000
Subtotal, National Security/Emergency Preparedness Telecommunications	108,169,000
Total, Infrastructure Protection and Information Security	\$874,923,000

At the request of NPPD, this new budget display for fiscal year 2011 reflects more appropriate groupings for NPPD programs, projects and activities (PPAs). However, this new budget allocation structure makes historical comparisons to previous appropriations Acts extraordinarily difficult. As a result, the following table reflects the historical appropriations comparisons for each new PPA. NPPD is directed to submit its fiscal year 2012 budget in the exact format and structure as enacted for fiscal year 2011.

	FY 2008	FY 2009	FY 2010	FY 2011
Infrastructure Protection:				
Identification and Analysis	\$76,245,000	\$87,326,000	\$90,610,000	\$88,595,000
Coordination and Information Sharing	62,098,000	55,644,000	59,582,000	48,715,000
Mitigation Programs	134,253,000	170,830,000	197,111,000	198,426,000
National Cyber Security Division				
US-CERT	46,962,000	66,015,000	83,305,000	80,406,000
Network Security Deployment	57,826,000	154,467,000	192,135,000	175,425,000

	FY 2008	FY 2009	FY 2010	FY 2011
Federal Network Security	9,324,000	14,959,000	19,541,000	29,245,000
Cyber Security Standards, Workforce Development, and Awareness	46,566,000	64,346,000	79,571,000	76,017,000
Cyber Security Coordination			5,000,000	7,500,000
Cyber Security Management and Administration	49,985,000	13,971,000	18,466,000	17,086,000
Office of Emergency Communications	35,700,000	38,299,000	44,754,000	45,339,000
Nat'l Security/ Emerg. Preparedness Telecom				
Priority Telecom. Services	79,699,000	59,834,000	57,831,000	57,413,000
Next Generation Networks	20,599,000	49,277,000	25,863,000	22,364,000
Programs to Study and Enhance Telecom	15,695,000	14,869,000	14,523,000	14,079,000
Critical Infrastructure Protection Programs	15,946,000	11,112,000	11,124,000	14,313,000
NCCC	3,832,000	5,963,000		
Total, Infrastructure Protection and Information Security	\$654,730,000	\$806,912,000	\$899,416,000	\$874,923,000

Funding for the National Computer Forensics Institute (funded under US-CERT in fiscal year 2010) is provided under United States Secret Service "Salaries and Expenses".

INFRASTRUCTURE PROTECTION

NPPD is directed to comply with Senate Report 111-222 concerning: on-going work with the University of Southern Mississippi to address the range of potential and actual threats and risks to safety and security at venues with large crowds; effective communications between chemical facility owners and local law enforcement and first responders, as part of Risk Based Performance Standard 9 under the Chemical Facility Antiterrorism Standards; review of products cleared by the Food and Drug Administration under the SAFETY Act and that are on the Department of Defense list of approved treatments for possible use; and on-going work at the National Infrastructure Simulation and Analysis Center in conjunction with the National Incident Management Systems and Advanced Technologies Institute at the University of Louisiana at Lafayette. The bill includes not less than \$18,000,000 for the National Infrastructure Simulation and Analysis Center.

The National Infrastructure Protection Plan Management and the Critical Infrastructure and Key Resources Partnerships and Information Sharing programs jointly receive \$33,933,000. GAO is directed to review NPPD efforts to implement these programs and to make recommendations to improve coordination and efficiency, as directed in the Senate report.

Within the total provided, not less than \$26,521,000 is to conduct vulnerability assessments.

CYBER SECURITY

The National Cyber Security Division, which implements DHS responsibilities identified in the Comprehensive National Cyber Security Initiative, receives \$385,679,000. The Cyber Security Standards, Workforce Development, and Awareness program, which includes a variety of specialized analysis activities and training programs, receives \$76,017,000 in the bill, including \$3,000,000 for State and local cyber security training administered by the University of Texas at San Antonio.

A provision is included which withholds \$100,000,000 of the NCSD budget until NPPD provides a detailed expenditure plan for all DHS NCSD activities.

CONTROL SYSTEMS SECURITY

More and more of our nation's physical infrastructure, such as electric utility grids, water and sewage systems, and transportation infrastructure and networks, is connected to the Internet. While this technology has generated efficiencies in the operation and control of complex systems, many of these network devices are vulnerable to hostile takeover or malicious attacks, as evidenced by the recent "Stuxnet" malware attack on certain types of industrial cen-

trifuges. Integrating agreed-upon industry standards into the development and manufacturing process for future control system products offers a high likelihood of successfully countering automation vulnerabilities. Current DHS-industry efforts are projected to take up to 10 years to promulgate the full range of envisioned industrial standards, a timeframe that is unacceptably long given the rapidly evolving cyber threat. DHS, in conjunction with industry partners, is directed to accelerate the development timeline for control system security standards. NPPD is directed to brief the Committees on the process to expedite standards development no later than 90 days after the date of enactment of this Act.

MULTI-STATE INFORMATION SHARING AND ANALYSIS CENTER

DHS has an on-going program with the Multi-State Information Sharing and Analysis Center (MS-ISAC) for security-related operations designed to protect State and municipally-owned computer networks. MS-ISAC provides world class service to its customers and serves as the premier State and local government cyber security entity. Additional funds will allow the Center to expand its managed security services, situational awareness, incident response, cyber security assessments and cyber research and analysis to other States and localities. In addition to amounts requested by DHS, the bill includes \$3,000,000 for expansion of MS-ISAC activities so that the center can serve as many other States and municipalities as possible.

OFFICE OF EMERGENCY COMMUNICATIONS

The bill includes \$45,339,000 for the Office of Emergency Communications, \$1,000,000 over the requested level based on the reconfigured budget structure. Additional funding is for SEARCH, the National Institute for Emergency Communications Interoperability, to continue training State, regional, and local first responders responsible for managing interoperable communications systems.

NATIONAL SECURITY/EMERGENCY PREPAREDNESS TELECOMMUNICATIONS

The bill provides \$108,169,000 for the National Security/Emergency Preparedness Telecommunications programs, which is the requested level based on the reconfigured budget structure.

As in past years, the bill withholds \$10,000,000 of funding for the Next Generation Networks (NGN) program until NPPD submits an expenditure plan showing how funds provided for NGN will be used to achieve the program's goals.

FEDERAL PROTECTIVE SERVICE

The bill includes \$1,115,000,000 for the Federal Protective Service (FPS), as requested, for fiscal year 2011; this amount is fully offset by collections of security fees.

ADEQUACY OF FEDERAL PROTECTIVE SERVICE RESOURCES

The bill requires the Secretary and the Director of the Office of Management and

Budget to adjust FPS security fees to ensure that the agency employs a staff of at least 1,348 personnel by September 1, 2011, of which 1,011 are required to be in-service field staff directly engaged on a daily basis protecting and enforcing laws at Federal buildings. Further, the bill requires FPS to be fully funded during fiscal year 2011, therefore the staff level shall be no less than 1,200 employees, including at least 900 Police Officers, Inspectors, Area Commanders, and Special Agents through September 1, 2011, at which time the additional employees shall be on board. Given recent attacks on Federal employees in Austin, Texas; Las Vegas, Nevada; and the Pentagon, the Administration needs to recognize the growing gap between the security needs for Federal facilities and the limited resources with which FPS is expected to protect these same government installations.

Since FPS is currently authorized as a fee-for-service agency, these activities must continue to be financed by collection of security fees from agencies unless the FPS statutory authorization is changed. It is imperative that the Administration construct a fiscal year 2012 budget that identifies the fee resources necessary to provide adequate security at Federal facilities nationwide, consistent with the FPS workforce analysis. Although NPPD was directed in Senate Report 111-188 to submit this analysis no later than September 12, 2010, to date the Committees have not received it. To ensure this analysis is appropriately accounted for in the budget, FPS is directed to submit it to the Committees on Appropriations and GAO without delay.

In addition, the Committee directs FPS to review its use of contract guard services at Federal facilities, as recommended by GAO, and to provide a briefing on its findings no later than six months after the date of enactment of this Act.

UNITED STATES VISITOR AND IMMIGRANT STATUS INDICATOR TECHNOLOGY

The bill provides \$339,263,000 for United States Visitor and Immigrant Status Indicator Technology (US-VISIT), of which \$50,000,000 is available until September 30, 2012, and \$125,000,000 is unavailable for obligation until the Committees on Appropriations receive an expenditure plan containing the elements specified in Public Law 110-329. The bill includes \$4,650,000 above the request for Identity Management and Screening Services to permit the Biometric Support Centers to meet increased workload and demand for law enforcement and intelligence analyses, and reduce overstay resolution backlog. Bill language is included reserving \$50,000,000 of prior year balances solely for biometric air exit. The rescission of \$28,000,000 in prior year balances contained in section 582 shall not result in a reduction in balances available to meet the requirement in the bill to obligate \$50,000,000 solely for purposes of implementation of a biometric air exit system.

US-VISIT shall brief the Committees not later than February 16, 2011, on plans to

eliminate the backlog of “unvetted” overstay records, to include schedule and resource requirements. US-VISIT is directed to sustain critical efforts to: achieve interoperability with other agencies, including the Departments of Justice, State, and Defense; integrate new biometric technology; and support data sharing with international partners. US-VISIT is also directed, in conjunction with other agencies as appropriate, to provide semiannual briefings on interagency interoperability; planning for biometric exit solutions, to include data sharing with Canada and Mexico, and in redesign or replacement of ports of entry; and, as described in the Senate report, ongoing efforts to share biometric information with other countries about criminals, immigration violators, and known or suspected terrorists, as well as steps underway to strengthen DHS’ leadership position in biometric and identity management.

OFFICE OF HEALTH AFFAIRS

The bill provides \$157,984,000 for the Office of Health Affairs (OHA). Included in the total, \$113,505,000 is for the BioWatch program, including all generations of the technology currently in use or undergoing development, of which no less than \$4,500,000 is for further testing of Generation 3 technology. OHA is directed to use the Bioterrorism Risk Assessment process to examine the costs and benefits of the BioWatch program and revisit its goals. OHA should provide evidence of the capabilities of the Generation 3 technology, as well as a cost benefit analysis, with any request for funding a program expansion. OHA shall notify the Committees 15 days prior to deploying any BioWatch device to new locations. OHA is directed to provide an expenditure plan for the BioWatch program within 60 days after the date of enactment of this Act.

The bill provides \$11,250,000 for the National Biosurveillance Integration System (NBIS), of which \$4,750,000 is for the North Carolina Collaboratory for Bio-Preparedness to continue a demonstration project for the statewide system to analyze public health trends and detect incidents. Within the remaining amount, \$3,500,000 is withheld from obligation until OHA delivers to the Committees a strategic plan for the NBIS, including progress on implementing the recommendations in GAO-10-171.

The bill provides \$3,900,000 for the Rapidly Deployable Chemical Detection System, of which \$1,500,000 provided above the request is to complete at least one additional demonstration project, to be competitively selected. The bill includes \$2,276,000 for planning and coordination. This amount includes sufficient funding to maintain OHA’s role in HSPD through the Food, Agricultural and Veterinary Defense Division.

FEDERAL EMERGENCY MANAGEMENT AGENCY MANAGEMENT AND ADMINISTRATION

The bill provides \$764,296,000 for the Federal Emergency Management Agency (FEMA) Management and Administration activities. FEMA is directed to provide an expenditure plan not later than 75 days after the date of enactment of this Act. The expenditure plan shall present information aggregated by directorate and office, showing all sources of funding. Specific information regarding the transfer of funding from the State and Local Programs appropriation should be included, with the same level of detail currently provided to the Committee. FEMA is directed to meet with the Committee within 5 days of the date of enactment of this Act to reach an agreed upon for-

mat for this reporting requirement. The Committees shall be notified within 15 days if any office receives or transfers out more than 5 percent of the total amount allocated in the expenditure plan. A provision is included requiring FEMA to submit its fiscal year 2012 budget request by office with the level of detail currently provided in the congressional justification materials.

Included in the total is \$4,000,000 for the Emergency Management Assistance Compact (EMAC), as requested, and \$11,000,000 for the Emergency Management Institute (EMI). FEMA is directed to identify the request for EMI and EMAC in future budget requests. The bill includes the requested \$23,300,000 for capital upgrades. FEMA shall report any differences from the capital improvement plan outlined in the fiscal year 2011 congressional justification, and provide a justification for such differences.

The bill provides \$18,213,000, as requested, for the Integrated Public Alert and Warning System, of which up to \$2,000,000 is to study the Radio Broadcast Data System technology as directed in the Senate report, to be competitively awarded.

The President requested \$71,076,000 for the Office of the Chief Information Officer, which is provided; however, the amount should be treated in the same manner as all other funds requested and not as a PPA as listed in the Senate report. FEMA is directed to brief the Committees on any variations from the request prior to the changes being implemented. Within this amount, \$5,900,000 is provided for data center migration, as requested.

The bill provides \$38,000,000 for the Urban Search and Rescue Response System, \$10,000,000 above the request. FEMA is directed to provide an expenditure plan not later than 90 days after the date of enactment of this Act. The expenditure plan should include the results of a review of the program to ensure the capacity is meeting the needs as outlined in Senate Report 111-222.

The bill includes \$7,049,000 for the Office of National Capital Region Coordination and a provision requiring the inclusion of the Governors of the State of West Virginia and the Commonwealth of Pennsylvania in the National Capital Region decision-making and planning process for mass evacuation. The Department is directed to include officials from the counties and municipalities that contain the evacuation routes and their tributaries into the planning process.

FEMA is directed to brief the Committees not later than 30 days after the date of enactment of this Act regarding the agency’s efforts to delegate certain authorities from headquarters to the offices of the Regional Administrators. The briefing shall include a list of authorities that have been or will be delegated; a timeframe for implementation; and what procedures will be instituted to ensure consistent application of FEMA policies across the Nation.

FEMA is directed to brief the Committees quarterly on its core administrative functions, as directed in the Senate report; however, the briefings shall be provided by the Deputy Administrator.

The Committees appreciate the effort of the Federal, State, Local, and Tribal Preparedness Task Force and the timely report transmitted to the Congress in October, 2010 which included recommendations related to homeland security and emergency management policies, grants, and assessments. FEMA, in cooperation with the Office of Intergovernmental Affairs, is directed to

brief the Committees no later than 30 days after the date of enactment of this Act on the findings of the Task Force. The briefing shall include the specific process (including timelines) that will be used to adjudicate the current recommendations and how the accepted recommendations will be implemented; specific topics identified for additional study and how the information will be obtained; and the process by which the Task Force will engage the larger user community to clarify and solidify recommendations and items needing further discussion. The briefing shall include recommendations on any new authorities needed to fulfill the recommendations. Additionally, all briefings required of FEMA in this Explanatory Statement that address a topic for which a recommendation was made shall address that recommendation in the briefing.

The Office of Individual and Community Preparedness is directed to brief the Committees within 60 days after the date of enactment of this Act on actions that will be taken to increase individual and community preparedness and the FEMA resources being devoted to this purpose. FEMA is directed to create an inventory of products that have been developed by the Citizen Corps program to further individual and community preparedness, as directed in Senate Report 111-222.

FEMA, in conjunction with the appropriate research entity, is directed to provide a report on the status of planning, as directed in Senate Report 111-222.

FEMA is directed to report, within 180 days after the date of enactment of this Act, on its comprehensive approach to training and education, identifying any gaps and a plan to address those gaps as specified in the Senate report. This report shall be coordinated with and submitted in conjunction with the report on continuing training as required under the heading State and Local Programs.

Additional efforts are required to clarify leadership and coordination issues within the draft National Disaster Recovery Framework, which was released in February 2010. FEMA is directed to remain focused on this effort and provide the necessary resources to improve, finalize, and implement the framework.

STATE AND LOCAL PROGRAMS (Including Transfer of Funds)

The bill provides \$3,080,450,000 for State and Local programs. Funding is allocated as follows:

State Homeland Security Grant Program	\$950,000,000
Operation Stonegarden ...	[60,000,000]
Citizen Corps Program ...	[10,000,000]
Urban Area Security Initiative	977,500,000
Nonprofit Security grants	[19,000,000]
Radiological and Nuclear Detection	[20,000,000]
National Special Security Events State and local reimbursement ...	[17,500,000]
Regional Catastrophic Preparedness Grants	35,000,000
Metropolitan Medical Response System	41,000,000
Public Transportation Security Assistance and Railroad Security Assistance	350,000,000
Amtrak	[25,000,000]
Over-the-Road Bus Security Assistance	[12,000,000]
Port Security Grants	350,000,000

Buffer Zone Protection Program Grants	35,000,000
Interoperable Emergency Communications Grant Program	35,000,000
Emergency Operations Centers	50,000,000
National Programs:	
National Domestic Preparedness Consortium	159,500,000
Center for Counterterrorism and Cyber Crime	2,450,000
National Exercise Program	38,000,000
Technical Assistance	13,000,000
Continuing Training Grants	30,000,000
Evaluations and Assessments	14,000,000
Subtotal, National Programs	256,950,000
Total, State and Local Programs	\$3,080,450,000

FEMA is required to brief the Committees five days prior to any announcement of the intention to make a grant award under State and Local Programs. Such briefings shall include detailed information on the risk analysis employed, the process for determining effectiveness, the process or formula used for selecting grantees, and any changes to methodologies used in the previous fiscal year.

FEMA is required to report to the Committees, not later than 90 days after the date of enactment of this Act, following a review of its practices and policies regarding the grant process, including but not limited to, the environmental and historic review process and investment justification reviews. The agency should examine what processes are in place because of law, regulation, and agency policy and suggest changes that would streamline the process to allow grantees to access funds faster while still ensuring accountability. In addition to examining its own processes, FEMA should include recommendations to incentivize grantees to draw down funds in a more prompt manner. As a part of this review FEMA is expected to examine the workload of Grants Programs Directorate staff and evaluate whether that workload provides for appropriate oversight of the grants.

FEMA should ensure that it uses risk models that are validated by external experts and subject to rigorous peer review. FEMA is directed to brief the Committees on the process it will undertake to implement external validation of its risk models for the 2012 grant cycle.

FEMA should continue to consider the needs for mass evacuation planning and prepositioning of equipment for areas potentially impacted by mass evacuations in allocating first responder funds.

In accordance with section 2006 of the Homeland Security Act of 2002, the Law Enforcement Terrorism Prevention Program (LETPP) is funded through a required set-aside of 25 percent of the State Homeland Security Grant Program and Urban Area Security Initiative (UASI) programs. FEMA shall provide clear guidance to States and urban areas to ensure the intent of the LETPP is fully realized and the program is fully maximized. Further, FEMA is expected to comply with provisions of current authorizing statute regarding policies regarding paying salaries for intelligence analysts, as well as for distribution of UASI grants on the basis of risk.

All awards under Operation Stonegarden shall be made on a competitive basis to areas of the greatest risk and need. All border

states shall be eligible to apply for grants under Operation Stonegarden in fiscal year 2011. Operation Stonegarden's eligible costs include, but shall not necessarily be limited to: overtime; vehicle maintenance; vehicle and equipment rental costs; reimbursement for mileage; fuel costs; equipment replacement costs; and travel costs for law enforcement entities assisting other local jurisdictions in law enforcement activities. The Committees direct that only CBP and FEMA make recommendations on award decisions. No administrative costs shall be deducted from Operation Stonegarden award totals by States. In order to continue to monitor the program's efficiency and ensure funding is being allocated to areas of greatest need and risk, FEMA and CBP are required to undertake a thorough analysis using the most current data and brief the Committees on the information it will use to assess which areas are in greatest need of funding.

The Citizen Corps program shall be administered consistent with previous years, and shall retain an all hazards focus.

Within the funding provided for UASI is \$20,000,000 for the purchase of radiological and nuclear detection equipment.

Also within the amount provided for UASI, \$17,500,000 is provided to reimburse actual costs incurred by State and/or local governments affected by National Special Security Events, including use of services, personnel, equipment, and facilities. FEMA shall brief the Committees within 60 days after the date of enactment of this Act regarding the process to distribute this funding, including the application process and eligible costs. Funds shall remain available until expended and are not subject to any legislated timeframes required under "State and Local Programs".

The Committees are aware of press reports of diverted Federal grant money being used for executive transport and serious allegations of fraud in "Project Shield". The Committees are aware that the DHS IG is currently reviewing all UASI expenditures in the Chicago area, including a review of such allegations. The Committees direct the GAO to also review and report on the propriety of UASI expenditures in Cook County, Illinois.

FEMA, and the grant subject matter experts, in the allocation of funds for Buffer Zone Protection Program Grants and Non-profit Security Grants, are directed to consult and incorporate the input of State, local, and private partners in assessing risk and need.

FEMA is urged to ensure coordination between the Metropolitan Medical Response System and other FEMA programs, such as the National Exercise Program. FEMA should fully leverage this program's unique role as a bridge between emergency management and medical response disciplines.

FEMA is directed, in conjunction with the Office of Health Affairs (OHA), to report to the Committees regarding the current state of disaster preparedness capabilities of Emergency Medical Service (EMS) providers. This report is due no later than six months after the date of enactment of this Act and shall include an analysis of the gap between current and target capabilities. Further, in conjunction with OHA, FEMA is directed to review the amount of first responder grant funding emergency medical service providers are receiving and evaluate whether current funding levels are sufficient to meet capability requirements for disaster preparedness. Further, the Department should develop guidance on proposed approaches to utilize grant funding to address those gaps in order to ensure EMS preparedness and the

use of EMS services to reduce strains on hospitals during a mass casualty event.

FEMA is directed to fully fund the graduate and executive level homeland security education programs currently supported by the Department. The Department is directed to maintain its strong support for these proven curricula, and to continue to leverage them where appropriate as the Department meets the growing need for education within its own ranks and by States and localities around the Nation. The Committees note the importance of Mobile Education Teams providing homeland security seminars for State and local elected officials and senior staff.

Within the funding provided for Continuing Training Grants, grants for state and local government intelligence awareness training shall not be less than \$1,000,000 above the levels funded in fiscal year 2010. Not later than 180 days after the date of enactment of this Act, FEMA is directed to report on the needs being met by the continuing training grants to date including any gaps in specific evolving needs, as required in Senate Report 111-222. This report shall be coordinated with and submitted in conjunction with the report on training and education as required under the heading Management and Administration.

The Office of the Administrator is directed to brief the Committees on a quarterly basis on the progress of implementing an outcomes based preparedness assessment. The initial brief shall include a review of how other nations have attempted to complete such an effort. Additionally, the initial brief shall include a discussion on the recommendations related to capabilities and assessments from the report "Perspectives on Preparedness: Taking Stock Since 9/11, September 2010", including how FEMA intends to respond to the recommendations, complete with timeframes.

The Department is encouraged to require State and local governments to include non-governmental field and hospital based emergency medical service providers in their interoperability planning. The Department is encouraged to require State and local governments to address child care services in response and recovery plans, exercises and training. The Department is further encouraged to require State and local governments to include tribal governments, rural water associations, and chief information officers in planning efforts.

FEMA is directed to allow transit agencies to permit States to be subgrantees to facilitate regional planning and programs.

Administration and implementation of the Regional Catastrophic Preparedness Grant Program shall be as outlined in Senate Report 111-222, including treatment of the cost share.

The Committees expect that grantees must certify to FEMA that the necessary investments are being made for an effective interoperable communications process to ensure plans are kept up-to-date and federal funds are not wasted.

FEMA is encouraged to continue to provide training to first responders through the Domestic Preparedness Equipment Technical Assistance Program.

Funding for Emergency Operations Centers shall be allocated for projects as specified in the bill, and the remaining funding shall be competitively awarded.

FIREFIGHTER ASSISTANCE GRANTS

The bill provides \$840,000,000 for Firefighter Assistance Grants, including \$420,000,000 for firefighter assistance grants and \$420,000,000 for firefighter staffing grants. The bill includes a provision to waive certain cost

shares and maintenance of effort provisions associated with firefighter staffing grants. FEMA is directed to continue administering the grant programs consistent with previous years as specified in the conference report accompanying P.L. 111-83. FEMA is directed to submit the U.S. Fire Needs Assessment concurrent with the fiscal year 2012 budget submission. FEMA is further directed to brief the Committees on Appropriations no later than 60 days after the date of enactment of this Act on the implementation of recommendations in GAO-10-64 to improve the grant process.

EMERGENCY MANAGEMENT PERFORMANCE GRANTS

The bill provides \$345,000,000 for Emergency Management Performance Grants.

RADIOLOGICAL EMERGENCY PREPAREDNESS PROGRAM

The bill provides for the receipt and expenditure of fees collected, as authorized by P.L. 105-276.

UNITED STATES FIRE ADMINISTRATION

The bill provides \$45,930,000 for the United States Fire Administration. FEMA is directed to identify the funding level for the National Fire Incident Management System in future budget requests.

DISASTER RELIEF

(Including Transfers of Funds)

The bill includes \$1,950,000,000 for the Disaster Relief fund. FEMA is directed to submit an estimate for obligations which are expected to occur during the 2012 fiscal year and have been excluded from formulation of the underlying President's budget request, including those associated with catastrophic events concurrent with the budget submission. A provision is included in the bill requiring FEMA to submit an expenditure plan to the Committees detailing the use of funds for the disaster readiness and support account not later than 60 days after the date of enactment of this Act. FEMA shall provide quarterly reports detailing obligations against the expenditure plan and a justification for any changes in spending. As required in the bill, FEMA is directed to continue monthly reports detailing allocations, obligations and undistributed amounts related to all disasters in the same level of detail as currently presented to the Committees. Within the amount provided \$16,000,000 shall be transferred to the DHS IG for audits and investigations related to disasters and \$145,600,000 shall be transferred to FEMA "Management and Administration".

FEMA is required to notify the Committees prior to closing or moving logistics distribution centers.

FEMA is directed to maintain the Florida long-term recovery office as long as there is sufficient work to be done following the 2004 and 2005 hurricanes that struck the State. FEMA is directed to notify the Committees 60 days prior to closing the office.

The DHS IG is directed to report, not later than 120 days after the date of enactment of this Act, on the costs associated with the Disaster Housing Assistance Program, the benefits that have been provided, and the percent of funding provided to program management and oversight.

FEMA is instructed to report to the Committees not later than 60 days after the date of enactment of this Act on its implementation of recommendations on the 2009 IG report entitled "Improvements Needed in Disaster Contract Management".

DISASTER ASSISTANCE DIRECT LOAN PROGRAM ACCOUNT

The bill provides \$295,000 for the cost of direct loans. As outlined in Senate Report 111-

222, FEMA is directed to continue assistance for Special Community Disaster Loan waiver applications, and for loans which are not cancelled, FEMA is directed to assist with extended repayment deadlines.

FLOOD HAZARD MAPPING AND RISK ANALYSIS

The bill provides \$194,000,000 for flood hazard mapping and risk analysis. FEMA shall continue to focus funds on reviewing, updating, and maintaining maps to accurately reflect flood hazards. The goal shall be to review and, where necessary, to update and maintain data, methodologies, models and maps that have been modernized, and to issue map updates no later than five years past the modernized dates of the maps. FEMA is directed to provide no less than 20 percent of the funds provided under this heading for map updates and maintenance conducted by Cooperating Technical Partners (CTPs) that provide at least a 25 percent cash match and have a strong record of working effectively with FEMA on floodplain mapping activities. When allocating map modernization funds, FEMA is encouraged to prioritize as criteria the number of stream and coastal miles within the State, the Mississippi River Delta region, and the participation of the State in leveraging non-federal contributions. FEMA is strongly encouraged to partner with and leverage all available resources from Federal agencies, State and local governments, academia and CTPs towards acquiring elevation data.

With the 2012 budget request, FEMA shall submit a status report on the progress made towards the five year Risk Mapping, Assessment, and Planning (RiskMAP) strategy. FEMA is directed to establish a RiskMAP Advisory Committee to include Federal, state and local government representatives, non-governmental organizations, and private sector stakeholders. FEMA is strongly encouraged to include CTPs on the Advisory Committee. FEMA shall submit an annual report with the first one due no later than 180 days after the date of enactment of this Act on the recommendations of the Committee and any actions taken by FEMA.

FEMA is directed to report, not later than 180 days after the date of enactment of this Act, on its efforts to transition to database driven digital maps.

The Committees recognize that, consistent with Senate Report 111-188 related to the Supplemental Appropriations Act, 2010 (Public Law 111-212), FEMA has created an inter-agency task force to resolve concerns regarding flood maps, and GAO has begun its review of this effort. Therefore, the Senate report requirement to begin these efforts is no longer necessary. FEMA and GAO are directed to continue implementing these requirements expeditiously.

NATIONAL FLOOD INSURANCE FUND

The bill provides \$22,145,000 for salaries and expenses and \$146,855,000 for flood plain management and mapping. Based on updated estimates from FEMA, the bill authorizes \$110,000,000 for operating expenses and \$963,339,000 for commission and taxes of agents. Further, the bill authorizes \$40,000,000 for the severe repetitive loss program.

FEMA is directed to review and report on its existing Community Assistance Program grant process and allocation methodology to ensure equitable distribution of funds in relation to existing and anticipated floodplain management and mapping activities. FEMA shall submit a report to the Committees by March 1, 2011, documenting the existing process and allocation methodology and any

proposed changes to be implemented in fiscal year 2012.

NATIONAL PREDISASTER MITIGATION FUND

The bill provides \$85,000,000, including funding for the following projects at the following locations. The remaining funding shall be competitively awarded.

Predisaster mitigation projects

	<i>Amount</i>
Borough of Hatboro, PA	\$74,000
Campbell Police Department, CA	180,000
City of Arvada, CO	1,000,000
City of Binghamton, NY	500,000
City of Covina, CA	375,000
City of Hammond, IN	750,000
City of Kannapolis, NC	900,000
City of Minneapolis, MN	1,000,000
City of Paris, KY	70,000
City of Salem, MA	1,000,000
City of San Mateo-Department of Public Works, CA	1,000,000
City of Venus, TX	80,000
County of Los Angeles, CA	520,000
County of Sonoma, CA	1,000,000
Henry County, GA	960,000
Hinds County Board of Supervisors, MS	500,000
Logan County Government, CO ...	140,000
Lucas County Engineer, OH	400,000
Memphis-Shelby County Airport Authority, TN	1,000,000
Monterey County Water Resources Agency, CA	1,000,000
Ohio University, OH	460,000

Township of Hopewell, NJ	353,000
Vienna Police Department, VA ...	175,000

EMERGENCY FOOD AND SHELTER

The bill provides \$150,000,000 for the Emergency Food and Shelter program.

TITLE IV

RESEARCH AND DEVELOPMENT, TRAINING, AND SERVICES

UNITED STATES CITIZENSHIP AND IMMIGRATION SERVICES

The bill provides \$297,993,000 in discretionary appropriations for United States Citizenship and Immigration Services (USCIS). This amount includes \$176,400,000 for USCIS to process refugee applications and asylum claims, rather than funding these activities through surcharges on other immigrants' application filing fees. No funding is provided for the cost of military naturalizations, which will be paid by the Department of Defense, as proposed in the budget. Within the total provided, \$7,193,000 is for USCIS data center consolidation. No discretionary funding is provided for the Systematic Alien Verification for Entitlements (SAVE) program or for the salaries and expenses of the immigrant integration program. USCIS is directed to submit a reprogramming to the Committees as soon as possible to reflect fee-derived expenditures for SAVE and immigrant integration salaries and expenses.

USER FEE FUNDED PROGRAMS

The budget estimates that USCIS will make \$2,426,557,000 in fee-funded expenditures in fiscal year 2011. Revenues from fees paid by persons applying for immigration benefits constitute the majority of USCIS's resources, and support adjudication of applications for immigration benefits as well as

government investigations aimed at preventing fraud within the immigration system.

On November 23, 2010, USCIS increased fees charged to immigration applicants. However, given the variability in the USCIS revenue projections, it is not clear whether such pricing changes will be sufficient to finance the agency's on-going operational activities over the long term. USCIS is directed to brief the Committees on the steps it is taking to ensure that operations are properly sized to match processing goals with cash flow estimates.

Within the total fees collected, USCIS is directed to provide no less than \$29,000,000 to convert immigration records to digital format, as requested. No more than \$10,000 of the fees collected shall be used for official reception and representation expenses.

Refugee Applications and Asylum Claims

The bill provides \$176,400,000 for USCIS to process refugee applications and asylum claims without charge to any immigration applicant, which is \$30,600,000 below the budget request. This reduction reflects the fact that the Administration did not finalize a revised rule for USCIS application fees until November 23, 2010, meaning that USCIS collected surcharges for processing asylum and refugee applications until that date.

Since the processing of refugee and asylum claims in fiscal year 2011 will be paid for by the American taxpayer, USCIS should be prepared to provide more information to Congress about how it manages the processes for administering these adjudications. USCIS is directed to brief the Committees at least quarterly in fiscal year 2011 on the application volumes, processing times, and country-by-country quotas and actual admissions for refugees and asylum seekers. USCIS is also directed to develop and report program performance measures that illustrate how the agency is ensuring that refugee status or asylum protection cases are adjudicated fairly and in an appropriate length of time. Finally, given concerns about the appropriateness of certain DHS policies that result in detention of asylum claimants, USCIS is also directed to work jointly with ICE, the Department's Office of Policy, and the Department of Justice Executive Office of Immigration Review to develop a Department-wide policy to ensure that people who claim asylum, yet are subject to physical detention, have their cases adjudicated as expeditiously as appropriate and to report to the Committees by March 1, 2011, on progress in implementing this policy.

E-Verify

The bill provides \$103,400,000 for the E-Verify Program, as requested. An updated audit of E-Verify shows that USCIS has made progress improving the accuracy of the system. However, USCIS must also ensure that there are appropriate controls and analytical systems in place to identify inappropriate use of the E-Verify Program by employers who would take advantage of its functionality for exploitative or illegal purposes. As a result, USCIS is directed to provide regular briefings on its progress implementing a robust compliance review program for E-Verify, including any actions taken to address instances of misuse of the system.

Naturalization Ceremonies

The Committee directs USCIS to identify, in the 2012 budget submission, all funds allocated to naturalization and oath of allegiance ceremonies. In addition, the Committee directs USCIS to work with local pub-

lic and private groups to hold naturalization and oath of allegiance ceremonies as part of community Flag Day, Independence Day, and Constitution Day celebrations.

Special Immigrant Visa Process for Iraqis

Special Immigrant Visas (SIVs) for certain Iraqi nationals were authorized in section 1244 of the National Defense Authorization Act for fiscal year 2008 to provide immigration benefits for Iraqis facing ongoing, serious threats resulting from their employment by or on behalf of the U.S. government. The application process for SIVs has been burdensome and confusing for many applicants. USCIS is encouraged to work with the Department of State to examine and reform SIV application procedures, including revisions to communicate clearly with denied applicants the reasons for their denials and to establish a review process for denied applications.

FEDERAL LAW ENFORCEMENT TRAINING CENTER

SALARIES AND EXPENSES

The bill provides \$234,500,000 for the Federal Law Enforcement Training Center (FLETC) Salaries and Expenses, of which \$30,000,000 is for Management and Administration. The requested transfer of the National Computer Forensics Institute (NCFI) to FLETC is denied. Funding for the NCFI is provided under the Secret Service.

ACCREDITATION

The bill provides \$1,419,000, in a separate account, for accreditation activities to measure and assess the quality and effectiveness of Federal law enforcement training programs, facilities, and instructors. The Committees have created a separate accreditation account to increase the visibility of this activity.

ACQUISITIONS, CONSTRUCTION, IMPROVEMENTS, AND RELATED EXPENSES

This bill provides \$38,456,000 for Acquisitions, Construction, Improvements, and Related Expenses.

SCIENCE AND TECHNOLOGY

MANAGEMENT AND ADMINISTRATION

The bill provides \$145,959,000 for Science and Technology (S&T) Management and Administration. This reflects no funding for data center migration, and \$3,000,000 for management of research and development transferred from the Domestic Nuclear Detection Office. S&T shall provide semiannual briefings to the Committees on the status of testing and evaluation of all level one acquisitions. S&T is directed to brief the Committees not later than February 16, 2011, on amounts deobligated from projects during fiscal year 2010, and the projects to which such funds were subsequently obligated, and to provide such briefings thereafter in conjunction with submission of its annual budget requests.

S&T shall report to the Committees, in conjunction with the submission of its fiscal year 2012 budget, and annually thereafter in each succeeding budget request, on results of its research and development efforts in the previous fiscal year. This report shall include new technologies or capabilities delivered to front line users, and whether such deliverables were the result of projects reviewed as part of integrated product team processes. S&T shall brief the Committees not later than February 16, 2011, on the quality of test and evaluation capacity in DHS, and S&T efforts to assist test and evaluation efforts by other DHS component agencies.

RESEARCH, DEVELOPMENT, ACQUISITION, AND OPERATIONS

The bill provides \$902,651,000 for Research, Development, Acquisition, and Operations. The following table specifies funding by budget program, project, and activity:

Border and Maritime Security	\$39,936,000
Chemical and Biological	200,800,000
Command, Control, and Interoperability	77,550,000
Explosives	120,800,000
Human Factors	15,400,000
Infrastructure and Geophysical	56,965,000
Innovation	44,000,000
Laboratory Facilities	122,000,000
Radiological and Nuclear ..	109,000,000
Test and Evaluation/Standards	23,100,000
Transition	43,100,000
University Programs	50,000,000

Total, Research, Development, Acquisition, and Operations

\$902,651,000

S&T is directed to brief the Committees not later than February 16, 2011, on: (1) status of its port security testbed for maritime situation awareness; (2) the impact of reductions in funding on research on cyber insider threats, law enforcement data processing intelligent sensors, forensic methodology, and terrorist countermeasures, and how the integrated product team approach can mitigate these impacts; (3) progress on Virtual USA; and (4) the status of new explosives detection technologies research efforts. S&T is encouraged to evaluate the most effective approaches to detecting and interdicting south-bound contraband, and make recommendations as addressed in Senate Report 111-222.

For human factors, the bill includes \$2,000,000 above the request to restore reductions in socio-behavioral research and enhance risk analysis and management. S&T shall brief the Committees not later than February 16, 2011, on status of its human factors research portfolio, including biometric research. S&T shall make efforts to further social science expertise in its Human Factors Division and Centers of Excellence, and work with the DHS Risk Management and Analysis Office to improve risk analysis and management Department wide.

S&T, in coordination with TSA, should convene a National Academy of Sciences panel of behavioral experts to assess the effectiveness of the Screening Passengers by Observation Techniques (SPOT) program, to support GAO recommendations that the S&T validation of SPOT be peer reviewed. S&T shall brief the Committees not later than February 16, 2011, on the status of efforts and plans to carry out this assessment.

For laboratory facilities, \$122,000,000 is provided. Included in this amount is \$20,000,000 for infrastructure upgrades and construction at the Transportation Security Laboratory.

For infrastructure and geophysical, funds for the Southeast Region Research Initiative are as outlined in Senate Report 111-222.

S&T is directed to notify the Committees when the Unified Incident Command and Decision Support architecture is complete.

For innovation, the bill includes \$44,000,000. S&T is to brief the Committees on its planned allocation of these funds no later than 45 days after the date of enactment of this Act. S&T shall brief the Committees not later than February 16, 2011, on its tunnel research.

For university programs, the bill includes \$50,000,000. Within this total, not less than

\$39,000,000 is for centers of excellence, and not less than \$3,866,000 is for minority serving institutions.

S&T shall conduct an independent review of all current research projects in the radiological and nuclear detection area, including private sector research, before determining its fiscal year 2011 research priorities. S&T is encouraged to review simultaneous and passive radiation detection of shielded and unshielded nuclear materials, such as muon tomography and advanced electron accelerator for nonintrusive detection of weapons of mass destruction.

S&T shall brief the Committees not later than February 16, 2011, on its expenditure plan for projects requested by the First Responders Integrated Product Team.

DOMESTIC NUCLEAR DETECTION OFFICE MANAGEMENT AND ADMINISTRATION

The bill provides \$36,400,000 for Domestic Nuclear Detection Office (DNDO) Management and Administration, and includes a proviso requiring DNDO to submit to the Committees on Appropriations not later than May 15, 2011, an investment plan for closing domestic gaps in the global nuclear detection architecture (GNDA), including such vectors as rail, small vessels, and general aviation. Funding is \$592,000 below the request to reflect reduced staffing due to chronic delays in hiring for GNDA efforts.

RESEARCH, DEVELOPMENT, AND OPERATIONS

The bill provides \$191,242,000 for Research, Development, and Operations. The following table specifies funding by budget program, project, and activity:

Systems Engineering and	
Architecture	\$35,800,000
Systems Development	59,000,000
Assessments	40,000,000
Operations Support	33,900,000
National Technical Nuclear Forensics Center	22,542,000

Total, Research, Development, and Operations	\$191,242,000
--	---------------

DNDO plans for using Systems Engineering and Architecture funds should be spelled out in the GNDA investment plan required in the bill. DNDO is directed to brief the Committees on Appropriations semi-annually on progress in developing architecture to guide technology research and applications, the details on associated engineering and architectural studies, and the status of associated new technology.

The bill reflects a \$10,033,000 reduction from the request for Cargo Advanced Automated Radiography Systems. DNDO should complete testing to make decisions on technology to deploy for radiation scanning of on-dock rail and transshipment seaports; ensure all technologies under consideration by operating agencies are assessed under operational test conditions, and report on its plans to complete this research to the Committees by February 16, 2011. DNDO is directed to brief the Committees on a semi-annual basis on the status of development of automated radiography systems, its ongoing analysis of non-intrusive inspection technology, human portable radiation detection systems, and development of alternatives to Helium-3; and to notify the Committees when it plans to solicit for prototype development and pilots.

DNDO is directed to brief the Committees on a semi-annual basis on red team exercises and net assessments, to include vulnerabilities identified and recommendations for addressing them.

DNDO is directed to brief the Committees not later than February 16, 2011, on steps planned or underway to address recommendations included in the recently completed study on nuclear forensics by the National Academy of Sciences.

SYSTEMS ACQUISITION

The bill provides \$52,000,000 for Systems Acquisition. This includes \$14,000,000 for radiation portal monitors to address the gap in coverage at U.S. ports of entry and \$38,000,000 for human portable radiation detection systems. DNDO is directed to submit to the Committees its assessment of the Securing the Cities program upon its completion.

TITLE V

GENERAL PROVISIONS

(Including Transfers and Rescissions of Funds)

Major changes from the general provisions contained in the Department of Homeland Security Appropriations Act, 2010 (Public Law 111-83) include:

Section 503: Language is continued and modified that amends certain reprogramming and transfer procedures for the funds provided in this Appropriations Act. A detailed funding table identifying each Congressional control level for reprogramming purposes is included at the end of the accompanying statement. These reprogramming guidelines shall be complied with by all agencies funded by the Department of Homeland Security Appropriations Act, 2011.

The Department shall submit reprogramming requests on a timely basis and provide complete explanations of the reallocations proposed, including detailed justifications of the increases and offsets, and any specific impact the proposed changes will have on the budget request for the following fiscal year and future-year appropriations requirements. Each request submitted to the Committees on Appropriations should include a detailed table showing the proposed revisions at the account, program, project, and activity level to the funding and staffing (full-time equivalent position) levels for the current fiscal year and to the levels requested in the President's budget for the following fiscal year.

The Department shall manage its programs and activities within the levels appropriated. The Department should only submit reprogramming or transfer requests in the case of an unforeseeable emergency or situation that could not have been predicted when formulating the budget request for the current fiscal year. When the Department submits a reprogramming or transfer request to the Committees on Appropriations and does not receive identical responses from the House and Senate, it is the responsibility of the Department to reconcile the House and Senate differences before proceeding, and if reconciliation is not possible, to consider the reprogramming or transfer request not approved.

The Department is not to submit a reprogramming or transfer of funds after May 31 except in extraordinary circumstances, which imminently threaten the safety of human life or the protection of property. If a reprogramming or transfer is needed after May 31, the notice should contain sufficient documentation as to why it meets this statutory exception.

Section 515: Language is continued and modified on TSA air cargo reporting requirements.

Section 518: Language is continued and modified on the human resource management system.

Section 519: Language is continued and modified to reflect permanency of the Secret Service's investigative operation authority.

Section 521: Language is continued and modified prohibiting use of funds pertaining to the Principal Federal Official with certain exceptions.

Section 524: Language is included prohibiting use of funds to violate Executive Order 13423.

Section 526: Language is continued that prohibits the Department from carrying out section 872 of the Homeland Security Act of 2002. However, this prohibition is not intended to prevent the Department from carrying out routine reallocations within components.

Section 528: Language is continued and modified to reflect permanency of the horse and equine provision.

Section 541: Language is continued and modified pertaining to the sale of Plum Island assets and how proceeds may be used.

Section 542: Language is included pertaining to the construction of the National Bio- and Agro-defense Facility in Manhattan, Kansas.

Section 547: Language is continued and modified to make permanent the definition of a rural area in the Homeland Security Act.

Section 550: Language is continued and modified pertaining to the Registered Traveler Program.

Section 555: Language is included that provides a total of \$270,800,000 for consolidation of the new DHS headquarters at St. Elizabeths and consolidation of mission support activities. Within 60 days after the date of enactment of this Act, the Secretary must submit an expenditure plan to the Committees highlighting how these funds will be allocated. Quarterly briefings on the consolidation plans, including any deviation from the expenditure plan, status of approvals, and project schedule should occur thereafter.

Section 556: Language is included that provides \$10,000,000 for new acquisition workforce staff and permits the Secretary to transfer funds after notification. These funds can only supplement, not supplant, existing acquisition workforce staffing.

Section 557: Language is continued and modified pertaining to the sale of Loran-C sites and the use of any proceeds.

Section 558: Language is included that requires certification that the 100 percent screening of air cargo carried on passenger aircraft mandate has been met and biannual reports on the strategy to meet this mandate if certification does not occur 180 days after the date of enactment of this Act.

Section 559: Language is included that requires the Secretary to ensure screening of passengers and crews for transportation and national security purposes are consistent with applicable laws, regulations, and guidance on privacy and civil liberties.

Section 560: Language is included that authorizes the Secretary to direct GSA to sell ICE Service Processing Centers and detention facilities that no longer meet the mission and use the funds for other ICE real property needs.

DHS shall report to the Committees not later than February 9, 2011, with recommendations for savings from the identification of any DHS excess property as described in the June 10, 2010, Presidential Memorandum entitled "Disposing of Unneeded Federal Real Estate".

Section 561: Language is included that modifies civil and criminal penalty sections of the U.S. Code and requires each airport

operator to ensure signs are posted providing notice of penalties. Persons may be fined without regard to signage.

Section 562: Language is included that amends the McKinney-Vento Homeless Assistance Act to update the names of two entities that participate in the Emergency Food and Shelter program.

Section 563: Language is included that permits construction related to hazard mitigation in Findlay, Ohio.

Section 564: Language is included that permits the Secretary to transfer funds for an immigration emergency.

Section 565: Language is included that authorizes the Secretary of Homeland Security to transfer funds from amounts available for fiscal year 2009 or thereafter for CBP "Border Security Fencing, Infrastructure, and Technology" to the Department of Interior to mitigate adverse impacts on endangered species resulting from construction, operation, and maintenance activities related to border security.

Section 566: Language is included that permits the Coast Guard to enter into agreements with the Navy for the disposal of Coast Guard vessels at no additional cost to the Navy.

Section 567: Language is included that permanently authorizes CBP's Advanced Training Center to charge a fee for any service and/or thing of value it provides to Federal government or non-government entities so long as fees charged do not exceed the full costs.

Section 568: Language is included related to the federal share for damages resulting from certain disasters in the State of New Jersey.

Section 569: Language is included that directs FEMA to consider as non-discretionary the decision to award grants for the construction and equipping of any interoperable communications systems for which construction was initiated before June 1, 2009.

Sections 570–590 include rescissions from unobligated balances within components of the Department of Homeland Security.

DISCLOSURE OF EARMARKS AND CONGRESSIONALLY DIRECTED SPENDING ITEMS

Following is a list of congressional earmarks and congressionally directed spending items (as defined in clause 9 of rule XXI of the Rules of the House of Representatives and rule XLIV of the Standing Rules of the Senate, respectively) included in the bill or this explanatory statement, along with the name of each Senator, House Member, Delegate, or Resident Commissioner who submitted a request to the House or Senate Committee of jurisdiction for each item so identified. Neither the bill nor the explanatory statement contains any limited tax benefits or limited tariff benefits as defined in the applicable House and Senate rules.

FUNDING RECOMMENDATIONS

Detailed funding recommendations for programs are contained in the table listed below.

DISCLOSURE OF EARMARKS AND CONGRESSIONALLY DIRECTED SPENDING ITEMS

Following is a list of congressional earmarks and congressionally directed spending items (as defined in clause 9 of rule XXI of

the Rules of the House of Representatives and rule XLIV of the Standing Rules of the Senate, respectively) included in the bill or this explanatory statement, along with the name of each Senator, House Member, Delegate, or Resident Commissioner who sub-

mitted a request to the House or Senate Committee of jurisdiction for each item so identified. Neither the bill nor the explanatory statement contains any limited tax benefits or limited tariff benefits as defined in the applicable House and Senate rules.

DIVISION G—DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND RELATED AGENCIES

Following is an explanation of the effects of Division G, which makes appropriations for the Department of the Interior, the Environmental Protection Agency, the Forest Service, the Indian Health Service and related agencies for fiscal year 2011. As provided in Section 4 of the consolidated bill, this explanatory statement shall have the same effect with respect to the allocation of funds and the implementation of this division as if it were a joint explanatory statement of a committee of conference.

This explanatory statement addresses only those agencies and accounts for which there is a need for greater explanation than provided in the Act. Funding levels for appropriations by account, program and activity, with comparisons to Fiscal Year 2010 levels and the Fiscal Year 2011 budget request, can be found in the table at the end of this division. Except as expressly provided otherwise, any reference to "this Act" or "at the end of this statement" shall be treated as referring only to the provisions of this division.

FIXED COSTS—The bill contains \$25,737,000 for fixed costs for the Department of the Interior, which is approximately 25 percent of the total amount the Department expects to incur. The increases for fixed costs are displayed by account in the table in the back of this division. Each bureau should apply the increase proportionately among its budget activities. The Department is directed to report to the Appropriations Committees within 30 days of enactment on the final distribution by budget activity.

CHALLENGE COST SHARE GRANTS—The bill includes \$9,000,000 for Challenge Cost Share Grants distributed to the Bureau of Land Management, the Fish and Wildlife Service and the National Park Service. This is approximately 50% of the funds provided last year and reflects concerns raised by the Inspector General's report. The Secretary is directed to implement all of the IG recommendations and the IG is asked to report to the Committees on Appropriations on the Department's implementation of those recommendations.

REPROGRAMMING GUIDELINES—The reprogramming guidelines included in the Joint Explanatory Statement of the Committee on Conference which accompanied Public Law 111-88 (Department of the Interior, Environment, and Related Agencies Appropriations Act, 2010) are continued for Fiscal Year 2011. Under the heading "General Guidelines for Reprogramming," the following is added: (e) New programs requested in the budget should not be initiated before enactment of the bill without notification to, and the approval of, the Committees on Appropriations. This restriction applies to all such actions regardless of whether a formal reprogramming of funds is required to begin the program.

TITLE I—DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT MANAGEMENT OF LANDS AND RESOURCES

The bill provides \$954,633,000 for Management of Lands and Resources. Bill language included in the Title I General Provisions provides for certain oil and gas inspection fees; \$20,000,000 will be collected through this authority, which will help the Bureau increase inspection and compliance activities in the field and implement recommendations of recent GAO reviews.

Land Resources—The bill provides an increase of \$1,250,000 for climate change im-

pacts instead of the requested \$2,500,000. An increase of \$1,000,000 above the request is provided for air quality data mapping and a general program increase of \$350,000 for soil, water, and air management is also provided.

Realty and Ownership Management—The bill provides an increase of \$975,000 for new wilderness areas, which is \$325,000 less than the request, and an increase of \$2,250,000 instead of \$3,000,000 as requested for the renewable energy initiative. The bill also continues the Utah GIS program with \$300,000 in the Cadastral Survey subactivity.

Wild Horse and Burro Management—The Department's increased emphasis on this program is encouraging but the Bureau has an over-reliance on extensive gathering of excess wild horses and a focus on permanent long-term holding. Instead, the Bureau should: (1) gather and release contracepted mares and do so only at the time of year when the vaccine is most efficacious; (2) increase the development of improved contraception methods with partners and the USGS; (3) enhance demographic sampling and modeling of wild horse populations; (4) hire an animal welfare specialist; and (5) improve range condition evaluation and assessment. All Federal agencies that need and use horses to fulfill their responsibilities are encouraged to first seek to acquire a wild horse from BLM and, prior to seeking another supplier for usable horses, document why the BLM cannot meet the needs of the inquiring Federal agency. Rather than buy land for an expensive horse preserve as was requested, the bill provides language which will facilitate long-term contracts, at less public expense, which would be advantageous to both the captured wild horses and the ranchers maintaining them. The Bureau should retain the goal of managing wild horses and burros in the wild rather than permanently retaining animals in long-term holding. The Secretary is encouraged to enter into cooperative agreements pursuant to Public Law 92-195 (popularly known as the "Wild Free-Roaming Horses and Burros Act"; 16 U.S.C. 1336) with nonprofit corporations and others to care for wild horses and burros. Such cooperative agreements may allow for payment of an annual stipend for each such wild free-roaming horse or burro in the care of such entity.

The Committees on Appropriations expect to be consulted on a regular basis as the Departments of the Interior and Agriculture develop policies related to the permitting of renewable energy projects. The two Secretaries are directed to prepare interim guidelines for siting renewable energy projects, as directed in the report to the fiscal year 2010 appropriation, within 60 days of enactment of this Act.

The Committees request that the Secretary of the Interior thoroughly consider methods proposed by the California Desert and Solar Working Group to improve project screening, eliminate speculative projects, and improve environmental reviews. The Secretary is urged to reject solar development applications from entities that do not complete necessary field studies, plans for water, and plans to connect to the grid within one year of filing an application. The Secretary is directed to complete a report evaluating the possible solar energy study areas in the West Mojave that respect designated off-road vehicle routes and provide the report to the Committees on Appropriations within 60 days of enactment of this Act.

The increased allocation for the National Fish and Wildlife Foundation partnership should be used for various youth-oriented

projects and activities. The Bureau should retain its current level of support for the National Conservation Training Center; funds shall be available to NCTC within 60 days of enactment.

CONSTRUCTION

The bill provides \$4,066,000 for construction. In addition to the requested projects, \$250,000 is provided for City of Mesquite, NV multi-purpose trail construction and a total of \$424,000 is provided for architectural and engineering services.

LAND ACQUISITION

The bill provides \$36,550,000 for land acquisition. The bill does not include the requested funds for the National Wild Horse Preserve. The Bureau is directed to use the increase above the request in acquisition management to investigate and pursue options for the care of wild horses and burros and consult with the Appropriations Committees before agreeing to any final course of action. The funds provided by the bill are distributed as follows:

State	Project	Amount
AZ	Grand Canyon-Parashant National Monument	\$1,600,000
CA	Big Morongo Canyon Area of Critical Environmental Concern	1,650,000
CA	California Wilderness	1,800,000
CA	Carrizo Plain National Monument	2,200,000
CA	Santa Rosa and San Jacinto Mountains National Monument	1,000,000
CA	Trinity National Wild and Scenic River ..	1,800,000
CA	Upper Sacramento River Area of Critical Environmental Concern	2,500,000
CO	Canyons of the Ancients National Monument	2,500,000
ID	Snake River Rim Recreation Area/Oregon National Historic Trail	400,000
ID	Upper Snake/South Fork Snake River Area of Critical Environmental Concern/Special Recreation Management Area	2,500,000
MT	Chain-of-Lakes Recreation Management Area/Lewis and Clark National Historic Trail	1,000,000
MT	Upper Madison River Special Recreation Management Area	1,000,000
NM	Lesser Prairie Chicken Habitat Preservation Area of Critical Environmental Concern	750,000
OR	Cascade-Siskiyou National Monument ...	6,000,000
OR	Crooked National Wild and Scenic River	1,200,000
OR	Sandy River Area of Critical Environmental Concern/Oregon National Historic Trail	1,500,000
UT	Grand Staircase-Escalante National Monument	700,000
WY	North Platte River Special Recreation Management Area	2,450,000
Subtotal, Line Item Projects		32,550,000
Acquisition Management		2,500,000
Inholdings, Emergencies, and Hardships		1,500,000
Total, BLM Land Acquisition		\$36,550,000

UNITED STATES FISH AND WILDLIFE SERVICE

RESOURCE MANAGEMENT

The bill provides \$1,296,770,000 for Resource Management. Specific changes to the request and direction include:

Endangered Species—The bill provides \$189,526,000 for endangered species. Changes to the request include: (1) Candidate conservation: \$1,000,000 for sage grouse in western states; (2) Listing: an increase of \$1,000,000 to restore a proposed general program reduction; and (3) Recovery: \$1,500,000 for competitive endangered species grants for salmon to be administered by the National Fish and Wildlife Foundation; \$1,000,000 to continue the wolf livestock demonstration program; \$350,000 for Lahontan cutthroat trout; \$350,000 for Alaska sea urchin; \$3,000,000 for monitoring white nose syndrome in bats; \$4,000,000 to respond to rapidly declining bird populations, which is \$1,000,000 above the request, and of which \$2,000,000 is

for endangered birds in Hawaii; and \$3,000,000 for declining species, which is \$1,000,000 below the request. The Committees on Appropriations encourage the Landscape Conservation Cooperatives (LCCs) throughout the sage grouse's historic range to leverage funding with State and Tribal Wildlife grants to fill the critical science needs necessary for the goals in the State plans. The Committees also maintain support for Aplomado falcon and California condor recovery and encourage continued support for these successful recovery efforts.

Habitat Conservation.—The bill provides \$121,922,000 for habitat conservation. Changes to the request include: (1) Partners for fish and wildlife: \$350,000 for the Maine lakes milfoil project; \$350,000 for historic Nevada steelhead and salmon habitat; \$350,000 for the Nevada Biological Resources Research Center; \$350,000 for the Natural Resources Economic Enterprise program at Mississippi State University; and \$100,000 for the Resources First Foundation in Maine; (2) Coastal program: \$625,000 to restore a proposed general program reduction and; (3) National wetlands inventory: \$250,000 to restore a proposed program reduction. The Secretary is directed to designate a renewable energy coordination office and develop permitting policies focused on Endangered Species Act (ESA) compliance of renewable energy projects on private lands. The Secretary is encouraged to publish a rule under section 4(d) of the ESA during Fiscal Year 2011 to address this concern.

National Wildlife Refuge System.—The bill provides \$504,246,000. Changes to the request include: (1) Wildlife and habitat management: \$2,500,000 for challenge cost share partnerships and \$2,700,000 for general operations to restore a proposed program reduction; (2) Refuge visitor services: \$1,000,000 for challenge cost sharing partnerships and \$1,000,000 for the volunteers program to restore a proposed reduction; (3) Conservation planning: \$1,000,000 to restore a proposed reduction for refuge planning; and (4) Refuge maintenance: \$750,000 for the annual maintenance base program and a decrease of \$4,250,000 for deferred maintenance that was for the Midway Atoll project and has been moved to the line item construction account. FWS is urged to request funding for large construction projects in the construction account.

Migratory Birds, Law Enforcement and International Conservation.—The bill provides \$133,281,000. Changes to the request include the following: (1) Migratory bird management: \$1,000,000 for the joint venture program to restore a proposed program reduction; (2) Law enforcement operations: \$2,000,000 to restore a proposed program reduction; (3) International conservation: \$150,000 for the Caddo Lake RAMSAR Center and \$1,000,000 for the Wildlife Without Borders program to restore a proposed program reduction.

Fisheries.—The bill provides \$147,837,000. Changes to the request include the following: (1) National fish hatchery operations: \$500,000 for freshwater mussel recovery and \$500,000 to restore a proposed hatchery program reduction; and (2) Aquatic habitat and species conservation: \$1,800,000 for the West Virginia Fish and Wildlife Conservation Office; \$1,000,000 for Hawaii invasive species; \$1,500,000 for Lake Tahoe region invasive mussel prevention; and \$60,000 to restore a proposed program reduction. Funding for sea otter programs are maintained at the fiscal year 2010 level. FWS is directed to continue managing snakehead fish and determining the cause of cancer in bullhead catfish in the

Potomac and South River watersheds. FWS is urged to conclude its California Bay-Delta Study by the National Academy of Sciences in 2011.

General Administration.—The bill provides \$153,179,000. Changes to the request include an increase of \$750,000 to restore a proposed program reduction and an additional increase of \$725,000 for operations and maintenance for the National Conservation Training Center.

General Guidance.—The Committees on Appropriations direct that when the Secretaries of the Interior and Agriculture implement wildlife and habitat conservation programs, the departments have a clear roadmap that describes the: 1) roles of these initiatives and programs in delivering conservation; 2) methodologies to be used; 3) conservation goals and objectives; and 4) benchmarks of success, including using key species and specific outcomes. The fiscal year 2012 budget justifications for the Interior and Agriculture Departments should include this information.

Landscape Conservation Cooperatives (LCCs).—The Secretaries of the Interior and Agriculture are encouraged to develop a national steering committee to guide implementation, methodologies and participation in the LCCs. The steering committee should include representatives of Federal, State and Tribal government agencies, non-government organizations, congressionally-chartered conservation foundations, local community planning organizations, and private citizens. The LCCs should have specific, outcome-based benchmarks that link to the National Fish and Wildlife Adaptation Strategy, which Interior is developing and the best available science to identify key species within landscapes to serve as indicators for conservation actions within particular habitats.

CONSTRUCTION

The bill provides \$35,676,000 for construction. From within this amount, the following is provided for line item construction projects:

State	Project Description	Funding Level
	National Wildlife Refuge Projects.	
AK	Kenai NWR-visitor facility	\$2,448,000
AR	Pond Creek NWR-maintenance shop.	1,030,000

Subtotal, Line Item Projects.		\$81,925,000
	Acquisition Management	11,000,000
	User pay cost share	2,000,000
	Exchanges	2,000,000
	Inholdings, Emergencies, and Hardships.	5,000,000
Total, FWS Acquisition ..		\$101,925,000

The Sharkey Restoration Research Site, Delta NF.—The Secretaries of the Interior and Agriculture are directed to study and report back to the Committees on Appropriations within 180 days of enactment, on potential exchange proposals for approximately 1,700 acres currently managed by the U.S. Fish and Wildlife Service in Sharkey County, Mississippi and generally depicted on a map titled “The Sharkey Restoration Research Site, Delta NF” for lands of equal or approximate value managed by the U.S. Forest Service in Mississippi.

COOPERATIVE ENDANGERED SPECIES CONSERVATION FUND

The Committee encourages the Service to continue its efforts to clarify its policy regarding the Section 6 Cooperative Endangered Species Conservation Fund to ensure that local funds and fees may be used to fulfill the requirement for non-federal matching funds for HCP land acquisition grants.

MULTINATIONAL SPECIES CONSERVATION FUND

The bill provides \$12,000,000 for the Multinational Species Conservation Fund. An increase of \$1,000,000 above the request shall be used for tiger conservation.

NATIONAL PARK SERVICE OPERATION OF THE NATIONAL PARK SYSTEM

The bill provides \$2,298,577,000 for the Operation of the National Park System. From within this amount, the bill makes changes to the budget request as follows: \$2,000,000 for Ocean and Coastal Resource Stewardship; \$500,000 for Interpretive Media Transformation; \$1,000,000 for the Expand Land Use Management Program; \$1,000,000 for Challenge Cost Share Grants; \$3,000,000 to consolidate workforce management offices; and \$16,011,000 for Centralized Information Technology Costs. For the program to consolidate workforce management offices, the Appropriations Committees will consider an additional increase next year when progress can be demonstrated. Additional funding above the request for continued financial support of the concerts staged on the Capitol grounds and for operating costs of Ford's Theater have been provided in the National Recreation and Preservation account.

Cuyahoga Valley National Park.—The Service is encouraged to work with surrounding communities by maximizing its authority to support the local road system and to establish maintenance priorities.

Civil War Sesquicentennial.—The Service is urged to begin preparations with stake-

holders and to ensure that any observance of the sesquicentennial of the Civil War is inclusive and appropriately recognizes the experiences and points of view of all people affected by the Civil War.

Petersen House.—The Service is expected to complete the project in fiscal year 2011.

NPS/Flight 93 Memorial.—The Service is strongly encouraged to devote the resources necessary to properly archive, maintain, and preserve the invaluable collections, including some 35,000 personal tributes and over 1,200 hours of audio interviews, associated with this memorial.

North Country National Scenic Trail.—The Service is directed to submit a plan to the Appropriations Committees within 120 days of enactment that outlines plans to move the North Country NST staff to facilities in closer proximity to the trail. The Service should not, however, plan to move the Ice Age Trail NST staff from its current location.

PARK PARTNERSHIP PROJECT GRANTS

The bill does not include funds for the Park Partnership Project Grants. If, however, the Service chooses to use Recreational Fee program funding to implement the Park Partnership program, it is directed to ensure that projects undertaken are fully consistent with the guidelines of the Fee program.

NATIONAL RECREATION AND PRESERVATION

The bill provides \$67,958,000 for the National Recreation and Preservation account. Specific directives are as follows:

Cultural Programs.—The bill provides \$4,000,000 for the Japanese-American Confinement Site Grants program.

Heritage Partnership Program.—The bill provides \$18,085,000, which is sufficient to provide grants to authorized areas at the fiscal year 2010 level, not to exceed \$700,000 to areas with approved plans, \$150,000 to areas without approved plans and \$300,000 for areas with recently approved plans. The overall funding constraints faced this year make necessary the imposition of a modest spending cap. From this amount, the bill provides \$1,009,000 for administrative support.

The Appropriations Committees are concerned that the Service has completed only one of the National Heritage Area evaluations authorized in Division II of the Omnibus Parks and Public Lands Management Act of 1996. The Service is encouraged to include in these evaluations the impact of these areas on historic preservation, education, economic development and the leveraging of public-private funding according to the authorizing legislation and management plans for the areas. Further, the Appropriations Committees instruct the Service to continue to support these areas whether or not the evaluations have been completed.

Statutory or Contractual Aid.—The bill provides \$3,850,000 for Statutory or Contractual Aid, including increased support of the concerts staged on the Capitol grounds and for operating costs of Ford's Theater. The funds provided are to be distributed as follows:

State	Project	Amount
CA	Yosemite schools, PL 109-131.	\$400,000
DC	National Building Museum	300,000
DC	Ford's Theater Operating Costs.	300,000
DC	Capitol Concert Series	350,000
HI	National Tropical Botanical Garden, PL 111-11.	500,000
HI	Native Hawaiian Culture & Arts Program, PL 99-498.	500,000
NH	Lamprey Wild & Scenic River, PL 90-542.	200,000
NJ	Great Falls National Historical Park.	700,000

State	Project	Amount
NY	Lower East Side Tenement Museum.—97 Orchard Street.	300,000
UT	Crossroads of the West Historic District.	300,000
Total, Line Item Projects		\$3,850,000

Civil War Sesquicentennial Grants.—The bill provides an increase of \$3,000,000 above the budgeted amount of \$1,500,000 for grants authorized by Public Law 111-11, Title VII, Subtitle D, Section 7301(b). The additional funds are directed for a competitive grant program to fund programs and projects related to the sesquicentennial of the American Civil War.

HISTORIC PRESERVATION FUND

The bill provides \$78,000,000 for the Historic Preservation Fund. Specific directives are as follows:

Save America's Treasures.—The bill includes \$20,000,000 for Save America's Treasures, of which \$10,675,000 is for competitive grants. The balance of the Save America's Treasures funds are to be distributed according to the project list in the table entitled “Incorporation of Congressionally Requested Projects” at the end of this division.

Historically Black Colleges and Universities.—The bill includes \$2,500,000 for this program. The Service is directed to review, and report to the Committees on Appropriations on the effect the match requirement has on this program and the ability of the HBCUs to meet the most critical historic preservation needs.

CONSTRUCTION

The bill provides \$197,105,000 for Park Service Construction.

Line Item Construction. The bill allocates funding for line item construction projects and activities as follows:

State	Project Description	Disposition
AK	Lake Clark National Park and Preserve.	\$1,243,000
CA	Golden Gate National Recreation Area (Alcatraz).	5,000,000
DC	National Mall and Memorial Parks (National Mall water drainage system).	10,835,000
FL	Big Cypress National Preserve.	3,559,000
FL	Everglades National Park	8,000,000
MI	Keweenaw National Historical Park (Quincy).	800,000
MN	Mississippi National River and Recreation Area.	3,000,000
MO	Jefferson National Expansion Memorial.	5,460,000
NC	North Shore Road	4,000,000
NY	Gateway National Recreation Area.	6,541,000
NY	Statue of Liberty National Monument.	25,263,000
PA	Flight 93 National Memorial (water and sewer infrastructure).	3,700,000
TN	Great Smoky Mountains National Park (Cosby wastewater).	800,000
TN	Great Smoky Mountains National Park (curatorial facility).	3,500,000
UT	Bryce Canyon National Park.	3,052,000
WA	Olympic National Park	20,000,000
WY	Yellowstone National Park	2,996,000
VA	Battle of New Market Heights Memorial and Visitor's Center.	1,000,000
Total, Line Item Projects ..		\$108,749,000

Dyke Marsh, George Washington Memorial Parkway, VA.—The Service is directed to install boundary markers delineating the Dyke Marsh in Northern Virginia to discourage hunting and poaching in Federally protected wildlife areas.

Potomac Heritage National Scenic Trail.—The Service is directed to report within 60 days

of enactment on a schedule for completion of a management plan for this trail.

Blytheville Aeroplex (AR).—The Service is directed to complete a reconnaissance survey, within 12 months of enactment, of the historic Blytheville Aeroplex site to determine whether or not it is likely to meet established criteria for inclusion as a park unit.

Waco Mammoth National Monument, TX.—The Service is directed to begin work on the Waco Mammoth National Monument General Management Plan, subject to authorization of the site as a unit of the National Park System.

St. Croix National Scenic Riverway.—From within the funds provided for General Management Plans, \$200,000 is directed for a boundary study of the St. Croix National Scenic Riverway in Wisconsin and Minnesota.

LAND ACQUISITION AND STATE ASSISTANCE

The bill provides \$143,423,000 for land acquisition and state assistance, to be distributed as shown in the following table.

State	Project	Amount
AK	Glacier Bay National Park & Preserve	\$1,700,000
AK	Wrangell-St. Elias National Park and Preserve	500,000
AZ	Petrified Forest National Park	5,890,000
CA	Golden Gate National Recreation Area	4,090,000
CA	Mojave National Preserve	1,250,000
CA	Santa Monica Mtns. National Recreation Area	3,000,000
CO	Sand Creek Massacre National Historic Site	259,000
GA	Chattahoochee River National Recreation Area	2,200,000
LA	Jean Lafitte National Historic Park and Preserve	1,500,000
MA	Minute Man National Historical Park	2,170,000
MD	Catoctin Mountain Park	640,000
MD/	Captain John Smith National Historic Trail	900,000
DE	Acadia National Park	1,764,000
ME	Sleeping Bear Dunes National Lakeshore	380,000
MN	Voyageurs National Park	367,000
MS	Natchez National Historical Park	500,000
NM	Pecos National Historical Park	810,000
NY	Home of FDR National Historic Site	1,575,000
NY	Saratoga National Historical Park	650,000
OH	Cuyahoga Valley National Park	5,497,000
SC	Congaree National Park	1,400,000
SD	Wind Cave National Park	4,557,000
TN	Big South Fork National Recreation Area	550,000
TX	Palo Alto National Historic Site	2,000,000
TX	San Antonio Missions National Historical Park	1,760,000
VA	Captain John Smith National Historic Trail	1,000,000
VA	Prince William Forest Park ...	6,000,000
VA	Fredericksburg and Spotsylvania National Military Park	1,758,000
VI	Virgin Islands National Park	2,250,000
VT	Appalachian National Scenic Trail	625,000
WA	Ebey's Landing National Historical Reserve	1,000,000
WA	Mount Rainier National Park	1,543,000
WV	New River Gorge National River	4,138,000
WI	Ice Age National Scenic Trail	2,000,000
WI	St. Croix National Scenic Riverway	200,000
	Subtotal, Line Item Projects	66,423,000
	Acquisition Management	10,000,000
	Inholdings and Exchanges	6,000,000
	Emergencies, and Hardships ...	5,000,000
	American Battlefield Protection Grants	6,000,000
	Total, NPS Land Acquisition	93,423,000
	Assistance to States	\$50,000,000
	Stateside Conservation Grants	47,200,000
	"Stateside Grants"	42,200,000

State	Project	Amount
	Parks and Greenspace Demonstration Grants	5,000,000
	Administrative expenses	2,800,000
	Total, NPS Land Acquisition and Assistance to States	\$143,423,000

State Assistance Grants.—The Secretary is directed to provide \$5,000,000 for a new, nationally competitive, demonstration grant program using the authorities found in Sections 3, 5 and 6 of P.L. 88-578. The Secretary is directed to consider grant applications from States for projects which: 1) connect communities to protected public and private lands and natural resource assets through trails, open space, greenways and blueways; 2) increase access for children and youth to nature and the outdoors; and, 3) enhance open space conservation and outdoor recreation resources in metropolitan and urban areas. The Secretary should require at least a 30 percent match from recipients and favor grant applications that engage multiple jurisdictions and multiple partners. The Secretary is directed to report to the Appropriations Committees on the design of the demonstration program prior to issuing a formal "Request for Proposals".

UNITED STATES GEOLOGICAL SURVEY SURVEYS, INVESTIGATIONS, AND RESEARCH

The bill provides \$1,154,179,000 for Surveys, Investigations and Research. Changes to the request include the following:

Geographic Research, Investigations and Remote Sensing.—In agreement with the request, an increase of \$13,350,000 is provided to support the Landsat Data Continuity Mission. The Survey should work with the National Aeronautics and Space Administration in the formulation of a follow-on to the Landsat Data Continuity Mission to ensure continuity in medium resolution land imagery of proven benefit for a broad range of research and applied purposes.

Geologic Hazards, Resources and Processes.—Increases to the request include \$1,000,000 for LIDAR and high risk seismology activities; \$1,350,000 for the Global Seismographic Network; \$500,000 for the Weston Observatory, MA; \$250,000 for the University of Hawaii, Manoa/Hawaii Volcano Observatory research and monitoring partnership in Hawaii; and \$500,000 to continue the Nye County minerals assessment project, NV.

Water Resources Investigations.—Increases to the request include \$500,000 for Maryland coastal plain groundwater monitoring; \$500,000 for the Shelby County, TN groundwater study, and \$1,500,000 to conduct a hydrology study, in cooperation with the Delaware River Basin Commission and other partners, assessing the potential cumulative environmental impacts of natural gas drilling in the Marcellus Shale; \$500,000 to continue the US-Mexico Transboundary Aquifer Assessment Program; \$400,000 to continue the Survey's participation in the work of the Long Term Estuary Assessment Group, LA; an additional \$346,000 for Lake Champlain Basin streamflow monitoring and toxic studies to provide a total of \$500,000 for those activities; \$500,000 for water resources monitoring, investigations and research in Hawaii; and \$2,000,000 for endocrine disruptor research, equally divided between the national water quality assessment program and the toxic substances hydrology program. An additional \$1,000,000 for endocrine disruptor research is provided in the biological research and monitoring activity, as noted below.

Biological Research.—Increases to the request include \$1,000,000 for San Francisco Bay salt ponds restoration monitoring and research, \$600,000 for tropical ecosystems and watershed research; \$350,000 to continue monitoring of aquatic invasive species in the Columbia River Basin in collaboration with Washington State University and its partners; and \$1,000,000 for endocrine disruptor research. The bill continues the fiscal year 2010 funding levels of support to coordinators of the national network of State conservation data agencies and for the National Biological Information Infrastructure.

Facilities.—The bill provides \$2,500,000 for construction within deferred maintenance and capital improvement, but the Survey should not create a separate activity for construction as proposed in the budget request.

Global Climate Change.—The Survey should clearly delineate activities and funding for the National Climate Change and Wildlife Science Center in future budget requests and accomplishment reports.

BUREAU OF OCEAN ENERGY MANAGEMENT, REGULATION, AND ENFORCEMENT

(FORMERLY THE MINERALS MANAGEMENT SERVICE)

ROYALTY AND OFFSHORE MINERALS MANAGEMENT

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$436,003,000 for Royalty and Offshore Minerals Management, an increase of \$94,056,000 above the fiscal year 2010 enacted level. This funding level is partially offset with \$154,890,000 in receipts and cost recovery fees as requested and \$60,000,000 from inspection fees as provided by General Provision section 112.

In response to the nation's greatest environmental disaster, the BP-Transocean Deepwater Horizon oil disaster in the Gulf of Mexico, this bill supports the Department's efforts to reorganize and reform the former Minerals Management Service. The bill provides significant increases in all aspects of offshore energy development and production, including inspections, leasing, environmental safeguards, internal investigative capacity, and financial audits. However, the bill differs from the Administration's September 2010 amended budget request in three areas:

First, the budget amendment proposed to offset the \$100,000,000 budget increase by increasing OCS inspection fees by \$25,000,000, rescinding \$25,000,000 from unobligated balances intended to complete the OCS-Connect data system, and prohibiting a \$50,000,000 transfer for ultra-deepwater research. The bill increases the OCS inspection fees by \$50,000,000; the \$25,000,000 rescission of balances has already been enacted in the continuing resolution (P.L. 111- 242).

Second, the bill supports the addition of 217 positions which, among other priorities, would double the size of the OCS inspection workforce. However, since it will take time to hire the new employees, the bill includes savings of \$8,254,000 below the request.

Third, funding for studies, contracts, and consultants is reduced from the requested \$16,279,000 to \$9,879,000, since it will take time to implement the new organizations.

The bill also provides all of the requested increases for offshore renewable energy development and the costs associated with the elimination of the royalty-in-kind program. Bill language is also included allowing certain transfers of funds in order to facilitate the Secretary of the Interior's efforts to further reform the Bureau. Included in the

amount recommended for Resource Evaluation is \$900,000 for the Center for Marine Resources and Environment in Mississippi.

OIL SPILL RESEARCH

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$11,768,000 for Oil Spill Research, an increase above fiscal year 2010 of \$5,000,000 for research and \$465,000 for staffing. Considering the BP- Transocean Deepwater Horizon oil disaster, the Bureau needs a new strategy and vision for oil spill research, including the promotion of increased oil spill response capabilities, and for oil spill financial responsibility certifications of offshore platforms and pipelines. The Administration's budget materials for fiscal year 2012 shall include and justify a unified and coordinated Federal approach for oil spill research that includes the Department of the Interior, the Environmental Protection Agency, the Department of Energy, the National Oceanographic and Atmospheric Administration and the Coast Guard.

OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

ABANDONED MINE RECLAMATION FUND

Environmental Restoration.—The bill includes \$4,559,000 to be retained and distributed at the sole discretion of the Secretary, either to address declared coal mine emergencies in States without approved abandoned mine reclamation programs, or to provide grants to cover catastrophic situations in States with approved abandoned mine reclamation programs.

BUREAU OF INDIAN AFFAIRS AND BUREAU OF INDIAN EDUCATION OPERATION OF INDIAN PROGRAMS

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$2,404,029,000 for the Operation of Indian Programs. Specific changes to the request and direction are the following:

Trust Natural Resources Management.—The bill provides \$170,075,000. Specific increases and direction to the request include: Rights protection implementation: \$2,000,000. The Bureau of Indian Affairs (BIA) is directed to use this increase to maintain the activities and their funding level at fiscal year 2010 funding levels to conserve native fisheries, wetlands and other natural resources. Tribal management development program: \$1,326,000 of which \$500,000 is for the Cheyenne River Sioux Tribe's prairie management program and \$826,000 is a general program increase; Fish Wildlife and Parks: \$660,000 for hatchery operations.

Education.—The bill provides \$808,446,000. Specific increases and direction to the request include: Indian School Equalization Program: \$800,000 to support funding for the students and facilities necessitated by the addition of a new school, as directed in the bill; Post Secondary Programs: \$2,651,000 of which \$1,320,000 is for Haskell and Southwestern Indian Polytechnic Institute, \$886,000 is for United Tribes Technical College and \$445,000 is for Navajo Technical College; Education Program Management: \$500,000. BIA is directed to use this increase to update the students eligible for Johnson-O'Malley Program funding, in coordination with the Department of Education, and in consultation with the Tribes and report the results to the Committees within 180 days of enactment of this Act. The Committees urge BIA to reestablish the full-time permanent Johnson-O'Malley coordinator position.

Public Safety and Justice.—The bill provides \$350,575,000 for public safety and justice. This includes the following direction and changes

from the request: Detention centers and correction is provided \$77,328,000; tribal law enforcement is provided \$19,774,000; and tribal courts is provided \$28,861,000. The bill does not provide the requested \$19,000,000 to fund Federal Bureau of Investigation (FBI) personnel. During the public witness hearings, numerous tribal leaders expressed concern about funding FBI agents out of the BIA. The FBI has been provided direction and guidance for funding these positions in another division in this Act. The Department is urged to improve recruitment and retention of BIA officers, correct wage grade inequities for BIA law enforcement personnel and develop procedures to streamline the hiring of officers from other bureaus.

Coordination of Programs Between Agencies.—The Secretaries of the Interior and Health and Human Services, the Administrator for the Environmental Protection Agency and the Chief of the Forest Service are directed to provide the Committees within 90 days of enactment of this Act, a report on: (1) How these agencies can use the consultation process to streamline and coordinate grant programs and funding opportunities for Native American programs under their jurisdiction; and (2) opportunities for each agency and bureau to enter into new compacts with Tribes under the Indian Self Determination and Education Assistance Act.

CONSTRUCTION

(INCLUDING TRANSFER OF FUNDS)

Education.—The bill provides \$62,854,000 of which \$44,567,000 is provided for education facilities improvement and repair.

Detention Centers.—BIA is encouraged to consider establishing regional detention centers at new or existing facilities, such as the Shoshone-Bannock Tribes' Justice Center. The Committees support efforts by the BIA and Department of Justice (DOJ) to improve coordination for constructing, staffing, and maintaining tribal detention centers. The Committees encourage BIA and DOJ to work together, and in consultation with the Tribes, through BIA's Tribal Budget Advisory Committee to develop methodologies for constructing tribal detention centers, including regional detention centers, based on need and best use of resources. The Department is strongly encouraged to update the Committees, at least quarterly, on their achievements and actions.

DEPARTMENTAL OFFICES OFFICE OF THE SECRETARY

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$121,987,000. The Department is directed to work collaboratively with interested parties, including the Congress, States, local communities, Tribal governments and others in making national monument designations.

Additional Guidance.—Equal Access to Justice Act (EAJA) Reporting.—The Department is directed to report annually to the Appropriations Committees detailed information on the amount of program funds being used, and a list of recipients, for EAJA fee payments. The Committees direct that these reports be made publically available.

INSULAR AFFAIRS

ASSISTANCE TO TERRITORIES

The bill provides \$88,507,000 for Assistance to Territories. It includes \$10,699,000, an increase of \$1,619,000, for the Office of Insular Affairs to implement recommendations from the GAO report, "Opportunities Exist to Improve Interior's Grant Oversight and Reduce

the Potential for Mismanagement" (GAO-10-347). The Office of Insular Affairs should use the increase to hire qualified grants specialists and evaluators who hold professional certifications in accounting or engineering and also establish a Guam Field Office.

COMPACT OF FREE ASSOCIATION

The bill provides \$5,318,000 and continues authority for obligations related to the Palau compact of free association.

OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS

FEDERAL TRUST PROGRAMS

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$168,115,000. From within these funds \$7,900,000 is to reimburse litigation support costs incurred by the Department of Justice due to the approximately 95 tribal trust claims filed against the Department of the Interior.

DEPARTMENT-WIDE PROGRAMS

WILDLAND FIRE MANAGEMENT

(INCLUDING TRANSFERS AND RECISSION OF FUNDS)

The bill provides \$825,452,000 for Department of the Interior Wildland Fire Management, which is partially offset by a rescission of \$145,000,000 in unobligated balances from previous appropriations. Included in this appropriation is \$287,968,000 in new budget authority for wildfire suppression. There is also \$96,000,000 in additional large fire suppression funding in the FLAME Wildfire Suppression Reserve Fund. These amounts for suppression, when added to the \$250,000,000 in balances carried over from fiscal year 2010, provides significantly more funding than has ever been needed by the Department for wildland fire suppression activities in any previous year.

The Forest Service and the Interior Department must use independent panels to examine every individual wildfire incident which results in suppression expenses greater than \$10,000,000 and report these evaluations promptly to the Congress and on agency websites.

The Department is encouraged to train crews in Alaska, particularly existing Native crews, to reduce the cost of transporting fire crews from the continental U.S. to Alaska.

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

(INCLUDING TRANSFERS OF FUNDS)

Longstanding general provisions are continued unless otherwise noted and several new items are noted:

Section 112 provides authority for the Bureau of Ocean Energy Management, Regulation, and Enforcement to receive offsetting collections for the costs of environmental and safety inspections on off-shore oil and gas production facilities.

Section 114 makes permanent the joint ticketing authority for the Pearl Harbor Naval Complex, HI.

Section 115 establishes onshore inspection fees for oil and gas energy production and authorizes the Bureau of Land Management to collect such fees.

Section 116 authorizes the Bureau of Land Management to establish an oil and gas internet leasing program.

Section 121, as proposed by the Administration, extends the time period that the Department of the Interior has to review an off-shore oil and gas exploration plan. This will provide more time to determine if statutory and regulatory requirements are being met.

Section 122 protects public lands within the Mojave Desert, CA that were previously donated for the purpose of conservation.

Section 123 amends the distribution of geothermal receipts to include counties where such receipts were generated.

Section 124 ratifies a reconfiguration of Bureau of Land Management lands in Nevada.

Section 125 requires the Secretary of the Interior to make recommendations on the recognition of a Native Hawaiian governing entity.

TITLE II—ENVIRONMENTAL PROTECTION AGENCY SCIENCE AND TECHNOLOGY

The bill provides \$852,197,000 for Science and Technology programs and transfers \$24,527,000 from the Hazardous Substance Superfund account to this account. The bill makes changes to the request by providing the following specific funding levels and direction:

Research: Clean Water.—Within the funds provided, \$8,350,000 is for green infrastructure research.

Research: National Priorities.—The bill provides \$6,000,000, of which \$5,000,000 shall be used for extramural research grants to fund high-priority water quality and availability research by not-for-profit organizations who often partner with the Agency. Funds shall be awarded competitively with priority given to partners proposing research of national scope. The bill provides \$1,000,000 for the Southwest Consortium for Environmental Research Program. The Agency is directed to allocate funds to grantees within 180 days of enactment of this Act.

Research: Human Health and Ecosystems.—The bill provides \$257,738,000, of which \$3,000,000 is directed for research activities on the environmental impacts of subsea dispersant use. The Agency is directed to provide a report to the Appropriations Committees that details how funds will be used. Funding for videoconferencing equipment has not been included, and the bill includes the following additional changes to the request:

—A total of \$22,983,000 for Research: Human Health and Ecosystems STAR grants, equal to the enacted level;

—A total of \$8,700,000 for Endocrine Disruptor STAR grants; and,

—An increase of \$3,000,000 for children's environmental health research centers of excellence and for research on the effects of environmental chemicals and toxins on children, for a total of \$9,580,000, to be distributed as in fiscal year 2010.

Computational Toxicology.—The Agency is directed through its National Center for Computational Toxicology to continue its efforts to develop ToxCast and to: (a) evaluate the endocrine-relevant ToxCast assays using in vitro assays and appropriate reference substances for assessing estrogen, androgen, and thyroid systems; and (b) expand its collaborations on proof of concept investigations of toxicological pathways in the ToxCast program.

International Partnership to Eliminate Lead Paint.—The Appropriations Committees encourage the Agency, in conjunction with the U.S. Department of State, to support the establishment of a program to conduct education and outreach in support of the goals of the international partnership and to develop a third-party certification program for non-lead paint for targeted introduction in countries with substantial lead paint production.

ENVIRONMENTAL PROGRAMS AND MANAGEMENT

The bill provides \$2,926,881,000 for Environmental Programs and Management and

makes changes to the request by providing the following specific funding levels and direction:

Air Toxics and Quality.—The bill provides \$219,906,000, which reflects a reduction of \$1,000,000 due to an error in the justification for Federal Support for Air Quality Management. Within the amount provided, the Agency is directed to spend not less than \$800,000 for the Sunwise program.

Climate Protection Program.—The bill provides \$120,681,000, which includes a \$1,000,000 increase over the enacted level for the Energy Star program. This increase shall only be directed to instituting corrective actions and increasing controls associated with the Government Accountability Office findings. The bill does not provide the requested increase for videoconferencing equipment.

Compliance.—The bill provides \$109,117,000, which reflects a reduction of \$750,000 due to an unjustified and poorly documented transfer between programs. It does not include the requested resources in this account for Mississippi River Basin activities.

Enforcement.—The bill provides \$264,158,000, which reflects a reduction of \$750,000 due to an unjustified and poorly documented transfer between programs.

Environmental Protection: National Priorities.—The bill provides \$17,000,000 for a competitive grant program to provide rural and urban communities with technical assistance to improve water quality and provide safe drinking water. Grants shall be awarded on a competitive basis, and priority for said grants shall be given to qualified not-for-profit organizations whose activities are national in scope and are supported by a majority of small community water systems or currently provide assistance to private well owners. The Agency is directed to allocate funds to grantees within 180 days of enactment of this Act.

Great Lakes Restoration Initiative.—Consistent with the request, the bill provides \$300,000,000 to be allocated to the five focus areas as follows:

—Toxic Substances and Areas of Concern: \$101,364,000, of which \$50,000,000 is for cleanup projects authorized by the Great Lakes Legacy Act (Public Law 107-303);

—Invasive Species: \$43,303,000;

—Nearshore Health and Nonpoint Source Pollution: \$54,402,000;

—Habitat and Wildlife Protection and Restoration: \$60,377,000; and

—Accountability, Education, Monitoring, Evaluation, Communication and Partnerships: \$40,554,000.

Funding amounts for these focus areas are subject to a reprogramming threshold of \$5,000,000. The Agency is directed to report quarterly to the Committees on Appropriations on changes below the threshold. As the Agency implements the Great Lakes Restoration Initiative (GLRI) in 2011, it is directed to:

1. accelerate the obligations and outlays given lessons learned and protocols established in 2010;

2. report funding decisions once agency allocations are established;

3. report quarterly on changes to agency allocations;

4. minimize non-federal match requirements where practicable;

5. ensure funds transferred through inter-agency agreements will supplement, not supplant, base program resources in partner agencies;

6. establish a process and consult with federal and non-federal stakeholders to fully consider all high-priority restoration

projects and before proposing large-scale reallocations of funds;

7. report the findings of the Scientific Advisory Board's review of the restoration plan in Spring 2011;

8. prioritize on-the-ground work that meets Action Plan objectives and results in direct, beneficial ecological outcomes even if doing so will significantly shift the size and scope of projects funded and the distribution of funds;

9. determine whether making larger or more geographically concentrated grant awards will measurably improve ecological outcomes, prior to awarding funds;

10. prioritize funding for Asian Carp management activities;

11. provide an annual report by March 1, 2011 that details program accomplishments and compares funding levels by Agency on an annual basis; and

12. use the Western Lake Erie Basin Partnership to engage the various stakeholders, State, local and nonprofit entities to work cooperatively in this watershed. Project funding decisions in this basin should be made in coordination with entities that maximize coordination with GLRI funded projects.

While the Action Plan assumes annual GLRI program funding at \$475,000,000 in future years, consideration of future requests will depend on the Agency's ability to obligate and outlay funds in a timely manner.

Chesapeake Bay.—The bill provides \$63,000,000 to improve and accelerate the performance of Federal and State programs to protect the Bay, and strengthen the regulatory and accountability programs for controlling pollution from urban, suburban and agricultural lands. From within this amount, the bill provides \$8,000,000 for nutrient and sediment removal grants, \$6,500,000 for Chesapeake Bay Extramural Operations, \$1,214,000 for ChesapeakeStat, and \$4,000,000 for a competitive grant program targeted to small watersheds. From within the \$2,000,000 increase provided for small watershed grants, the Agency is directed to (1) support a \$1,000,000 competitive grant program to fund projects identified in the Highlands Action Plan, which will serve to continue the Agency's commitment to protecting the Potomac Highlands through conservation and ecological restoration initiatives; and (2) allocate \$1,000,000 to conduct a survey of local government policies and programs used to control polluted runoff from urban, suburban and agricultural lands within the Bay's four largest watersheds. The Agency is directed to make the results of these surveys public to assist local government decision-makers with information on successful Low Impact Development practices already in place, best management practices aimed at improving water quality, better implementation of existing policies, and road maps to help counties and municipalities decide how best to reduce pollution.

Puget Sound.—The bill provides \$50,000,000 to manage and implement Washington State's Puget Sound Action Agenda, an approved Comprehensive Conservation and Management Plan (CCMP) under Section 320 of the Clean Water Act. Consistent with proposals under consideration by the authorizing committees, the Committees direct that an intended use list to guide the activities and project funding to restore Puget Sound be established. Such an intended use priority list, which is similar to the intended use plans for the State revolving funds, shall include, but not be limited to:

(1) a prioritized list of specific activities and projects, including programs, studies,

and processes that will meet the goals and priorities of the approved comprehensive conservation and management plan, and a ranking of those priorities;

(2) information on the activities and projects to be supported, including terms of financial assistance, communities served, and the identity of the recipients who will receive financial or other assistance from the Agency to carry out the activities and projects; and

(3) the criteria and methods used to determine the selection of activities, projects and recipients on the priority list, and the ranking of projects on the list.

The annual intended use list shall be created by the Section 320 Agency designated by the State of Washington and shall include an identification and determination of the highest priority activities, projects and recipients necessary to implement the CCMP. This list shall be made available jointly by the Administrator and the Section 320 Agency for public comment prior to approval by the Administrator. After considering public comments, the Administrator shall review and approve the priority list upon a determination that projects listed are consistent with the goals and priorities of the approved comprehensive conservation and management plan. If the Administrator finds that the annual priority list is inconsistent with the CCMP, the Administrator shall recommend alternatives to the Section 320 Agency, which shall then resubmit the annual priority list for approval. Subject to the availability of funds, the Administrator shall fund the projects that rank highest on the priority list.

The Committees direct the Agency to expeditiously obligate funds, in a manner consistent with the authority and responsibilities under Section 320 and the National Estuary Program. Not more than \$2,100,000 shall be used by the Agency for intramural costs. In addition, and as in the prior year, funds are provided for continued funding of the existing competitive grant to manage the Action Agenda and development of the intended use plan.

San Francisco Bay Competitive Watershed Grants.—The bill provides \$7,000,000 to continue a competitive grant program to improve habitat and water quality in the San Francisco Bay. Priority shall be given to projects that restore wetlands and other critical Bay wildlife habitat. The Appropriations Committees believe that funding for other types of water quality improvements, such as green infrastructure and urban runoff, should be principally addressed by other complementary programs such as the Clean Water State Revolving Fund and categorical grant programs. As in previous years, no less than a 25 percent match shall be required; however, priority shall be given to grantees that can demonstrate additional leverage. The Agency may retain up to 5 percent of the funds for administrative purposes.

Mississippi River Basin.—The bill provides \$10,000,000 to establish a new competitive grant program to target non-point source and nutrient runoff in the Mississippi River basin. The Agency is directed to target a few high priority watersheds within the basin. Once selected, the Agency should report to the Committees how activities focused on those watersheds will improve water quality and reduce nutrient runoff in the Basin. When selecting projects, the Agency is directed to consider and give equal priority to projects located in both the northern and southern Mississippi River basin. The Committees on Appropriations direct the Agency

to coordinate with the Mississippi Department of Environmental Quality to evaluate alternatives for developing a comprehensive implementation plan to remedy the Mississippi Delta region's water quality, nutrient loading and water quantity concerns.

Long Island Sound Program.—The bill provides \$9,000,000 for the Long Island Sound environmental protection program. Of the funds provided, \$7,000,000 is to continue environmental restoration activities and \$2,000,000 may be used at the discretion of the Administrator to initiate a supplemental environmental impact statement to identify potential disposal sites for dredged material in the eastern Long Island Sound in conjunction with the U.S. Army Corps of Engineers.

Lake Champlain Basin Program.—The bill provides \$4,000,000 for the Lake Champlain Basin Program to be distributed among its longstanding grantees: the States of Vermont and New York, the New England Water Pollution Control Commission and the ECHO Lake Aquarium Science Center. The Agency is to implement the program using sections 120 and 104(b)(3) of the Clean Water Act.

Information Exchange/Outreach.—The Agency shall follow the statutory criteria when distributing the funds provided for the environmental education program. Funding has not been provided for either the proposed regional Centers of Excellence or the proposed social networking increase.

International Programs.—The Appropriations Committees expect the Agency to use the funds provided to partner with other nations to assess and map flows of global movement of electronic waste from the United States and provide electronic waste best practices through education and demonstration projects in developing countries to strengthen implementation of global programs for addressing electronic waste.

IT/Data Management/Security.—The bill does not provide the increase requested for web capacity improvements.

Operations and Administration.—The bill provides \$516,434,000 for this program, including reductions of \$3,768,000 to reflect efficiencies in rent, utilities and security and a \$1,000,000 program reduction for central planning, budgeting and finance activities. The Agency may reallocate reductions to rent, security or utilities as appropriate.

Pesticide Licensing and RCRA.—The bill has fully funded all pesticide and RCRA activities, but has not included funding for the videoconferencing equipment in either line item.

Water: Ecosystems.—Within the amounts provided, the bill restores funding for the National Estuary Program to \$32,567,000, which provides \$800,000 to each of the grantees authorized by Section 320 of the Clean Water Act.

Water: Human Health Protection.—Funding for videoconferencing equipment has not been included.

Water Quality Protection.—Within the amounts provided, the bill includes \$5,000,000 for the new Community Water Priorities program to address water quality issues in urban areas, including \$2,000,000 for staffing and technical assistance and \$3,000,000 to initiate a demonstration grant program to fund on-the-ground implementation activities in selected communities. The bill does not provide funds for the new Mississippi River water quality program within this program-project as requested.

Lake Tahoe Restoration Act Programs.—Within the amounts provided, the Committees direct the Agency to provide adequate

resources and staffing to fulfill its expanding role of implementing environmental oversight and protection programs authorized by the Lake Tahoe Restoration Act (Public Law 106-506), as amended. The Agency is also directed to provide detail on the base resources provided for Lake Tahoe environmental activities as part of the budget request for fiscal year 2012 and subsequent years.

Sustainable Communities.—The bill provides \$11,227,000 for its Sustainable Communities initiative, equal to the requested amount.

Arsenic Reporting. The Committees on Appropriations direct the Agency to do the following not later than 180 days after the date of enactment of this Act: release an overdue report mandated in P.L. 108-447; convene a working group composed of representatives from States, small publicly owned water systems, treatment manufacturers and other stakeholders; and, in consultation with the working group, submit a report to the Committees on: (1) barriers to the use of point-of-use and point-of-entry treatment units, package plants (including water bottled by the public water system) and modular units; and (2) alternative affordability criteria that gives extra weight to small, rural and lower income communities.

Endocrine Disruptors (ED).—The Agency is directed to: (1) establish performance criteria for laboratories including, demonstrations of standard based accuracy of controls, intra-assay viability and intra-laboratory variability in assay results; (2) include endocrinologists in a peer review of the results of the tier 1 assays; (3) take steps to ensure laboratories performing tests pursuant to the Endocrine Disruptor Screening Program minimize the use of animals and use appropriate statistical calculations to justify usage; (4) provide a detailed report to the Committees: (a) describing coordination with the National Institute for Environmental Health Sciences, and in particular how the Agency has been working within the National Research Council's Tox 21 framework in its ED research; (b) describing the status of the eight chemical action plans; and (c) describing how the ED research will provide the supporting science for the Agency's regulatory efforts; and, (5) evaluate the completed Tier 1 test chemicals in endocrine-relevant assays including estrogenic, androgenic and thyroid assays in the ToxCast program as a proof of concept.

BUILDINGS AND FACILITIES

The bill provides \$38,001,000 for the Building and Facilities account. The bill does not provide the requested increase for videoconferencing equipment.

HAZARDOUS SUBSTANCE SUPERFUND

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$1,293,060,000 for the Hazardous Substance Superfund account, and includes bill language to transfer \$10,156,000 to the Inspector General account and \$24,527,000 to the Science and Technology account as requested. The bill provides the following additional direction:

Lawrence Aviation Industries, Inc. Superfund Site, NY.—The Administrator is urged to continue to collaborate with all interested parties including the Village of Port Jefferson to further advance the remediation strategy at the site.

Leech Lake Superfund Site, MN.—Within 18 months of enactment the Agency shall complete a comprehensive remedial investigation of the St. Regis Paper Company Superfund site in Cass Lake, MN. Within 90 days of completion of that investigation, the Agency

shall provide a report to the Committees detailing all necessary actions for site remediation that is fully protective of human health and the environment.

OIL SPILL RESPONSE

The bill provides \$18,468,000 for Oil Spill Response, as requested. The Agency is directed to expeditiously implement exemptions applying to large milk storage containers (1,320 gallons or more) from pending regulatory efforts, and report to the Committees on Appropriations regarding the status of providing such exemptions no later than 30 days after enactment of this Act.

STATE AND TRIBAL ASSISTANCE GRANTS

The bill provides \$4,768,929,000 for the State and Tribal Assistance Grants (STAG) program and makes changes to the request by providing the following specific funding levels and direction:

Infrastructure Assistance.—The bill provides \$3,482,310,000 for infrastructure assistance, including \$1,898,000,000 for the Clean Water State Revolving Fund and \$1,206,000,000 for the Drinking Water State Revolving Fund.

STAG Infrastructure Grants.—The bill provides \$145,056,000 for infrastructure assistance grants. Bill language has been included to incorporate these projects into law by reference and to require a local match of 45 percent of the total project costs. Project designations and technical corrections to prior year project designations have been included as part of the table entitled "Incorporation of Congressionally Requested Projects" at the end of this division.

Targeted Airshed Grants.—The bill provides \$15,000,000 to continue targeted emission reduction grants as in prior years; funds shall be divided equally between the San Joaquin Air Pollution Control District (CA) and South Coast Air Quality Management District (CA) and shall be matched on at least a one-to-one basis.

Section 106 Grants.—The increase provided over the enacted level should be used to supplement and not supplant State investment in clean water programs. As part of the program direction for these funds, the Agency is expected to maintain and expand emphasis on water quality permitting and enforcement as directed in fiscal year 2010 and report annually to the Committees, by State, regarding specific progress made to improve permitting and enforcement activities as a result of this increase.

Technical Corrections to Prior Year STAG Infrastructure Grants.—The bill provides for the following technical corrections to prior year infrastructure grants:

AL—Item number 6 in Senate Report 111-38 for Fayette County for the construction of a drinking water reservoir shall be made available to the City of Cullman for the Duck River Reservoir project;

AR—Of the funds made available for items 49 in P.L. 108-7 and 55 in P.L. 108-199 for the Community Water System Public Water Authority of Arkansas in Lonoke and White Counties for the Green and Greers Ferry drinking water projects, unliquidated balances shall be made available to Lonoke White Public Water Authority for drinking water projects;

CA—Item number 22 in House Report 109-188 for the Georgetown (CA) Greenwood Lake Water Treatment Facility shall be made available to the Georgetown Divide Public Utility District for water infrastructure improvements;

CO—Item number 103 in House Report 108-401 for the Town of Rico for the construction

of a wastewater treatment plant and sewer system shall be made available for drinking water system improvements;

CT—Item number 55 in P.L. 111-8 for the Town of North Haven's Wharton Brook Industrial Park and Todd Drive Area Sewer Project shall be made available to the Town of North Haven for water and wastewater infrastructure improvements;

HI—Item number 77 in House Report 111-316 for Hawaii County for the Hawaii Ocean View Estates drinking water source development project shall be made available to the County of Hawaii Department of Water Supply for the Kapulea drinking water source development project;

MO—Item number 154 in House Report 111-36 for the City of Lee's Summit for a wastewater infrastructure improvements project shall be made available for the City of Lee's Summit for a drinking water and wastewater infrastructure improvements project;

MT—Item number 171 in House Report 111-316 for the Crow Tribe in Crow Agency for wastewater infrastructure improvements shall be made available for water and wastewater infrastructure improvements;

NY—Item number 206 in P.L. 111-8 for the Village of Mamaroneck Drainage Improvement Projects shall be made available to the Village of Mamaroneck for sewer system improvements;

OH—Item number 232 in P.L. 111-88 to the Trumbull County Commissioners for wastewater infrastructure improvements shall be made available for a Revolving Loan Fund;

SC—Item number 233 in P.L. 110-161 for the City of Gaffney Water Treatment Plant upgrade shall be made available to the Gaffney Board of Public Works for sewer system improvements;

TN—Item number 251 in the joint explanatory statement to accompany Public Law 111-8 for Unicoi County for a well water treatment plant improvements project shall be made available to the Town of Erwin for the project;

TX—Item number 245 in P.L. 110-161 for the City of Grandview Elevated Water Storage Tank shall be made available to the City of Godley for Water Storage Expansion;

TX—Item number 458 in the joint explanatory statement to accompany P.L. 108-199 for the Brazos River Authority for the West Fort Bend County regional water treatment facility shall be made available to the Cities of Rosenberg and Richmond for a water supply project in West Fort Bend County;

TX—Item number 388 in the joint explanatory statement to accompany P.L. 108-447 for the Brazos River Authority for the planning and design of the West Fort Bend County Regional surface drinking water treatment plant shall be made available to the Cities of Rosenberg and Richmond for a water supply project in West Fort Bend County;

WA—Item number 297 in House Report 111-316 for the Cowlitz Public Utility District in Cowlitz County for replacement of wastewater infrastructure shall be made available to Beacon Hill Sewer District for drinking water infrastructure improvements;

WA—Item number 489 in House Report 108-401 for the Skagit Public Utility District for sewer improvements for Similk Beach shall be made available for general drinking water infrastructure improvements; and

WY—Item number 301 in the joint explanatory statement to accompany P.L. 111-8 for Lincoln County for the water treatment plant rehabilitation project shall be made available to the Kemmerer/Diamondville Water and Wastewater Joint Powers Board for that project.

Multimedia Tribal Grants.—The Agency is directed to report to the Appropriations Committees on eligible Tribal recipients, the allocation of grant awards, and a description of each project funded, 90 days after the grants are awarded.

Climate Change Initiative Grants for Local Communities.—The bill includes \$10,000,000 to continue this competitive grant program, which provides assistance to local governments to establish and implement climate change initiatives. The Agency is directed to continue to follow the specific guidelines contained in the explanatory statement accompanying the fiscal year 2009 Omnibus Appropriations Act. When evaluating grant applications, the Agency is encouraged to consider applications from local governments and tribal communities that partner with non-profit entities offering innovative solutions to reduce greenhouse gases such as carbon neutral product labeling and certification as part of local and tribal climate change initiatives.

Bill Language.—The bill continues language enacted in 2010 directing the Agency to provide: (1) not less than 30 percent of the SRF funds with additional subsidization; (2) 20 percent of SRF funds for green infrastructure investments, and (3) not less than 25 percent of Alaska Native Village funds for projects in regional hub communities.

Brownfields Technical Assistance Centers.—Within the funds provided for State and Tribal Assistance Grants, \$2,000,000 is included for the Agency's Technical Assistance to Brownfields Communities program.

ADMINISTRATIVE PROVISIONS, ENVIRONMENTAL PROTECTION AGENCY (INCLUDING TRANSFER AND RESCISSION OF FUNDS)

The bill continues administrative provisions from previous years for Great Lakes transfers and pesticide fees. In addition, bill language has been included to: (1) continue specific wage requirements for the State Revolving Funds; (2) authorize up to \$2,448,000 for the Community Action for a Renewed Environment program, which provides grants and tools to communities to address local environmental problems; and (3) rescind \$10,000,000 from unobligated State and Tribal Assistance Grant balances, as proposed in the request. The Agency is directed to provide to the Committees a list of the balances it proposes to rescind 15 days prior to the rescission.

TITLE III—RELATED AGENCIES DEPARTMENT OF AGRICULTURE FOREST SERVICE

Operating Plan.—Except for as provided below, the Forest Service is directed to provide an operating plan to the Appropriations Committees within 30 days of enactment of this Act that details final regional funding allocations for all Service programs, including comparisons between fiscal years 2010 and 2011. The Service is directed to expedite the allocation of funding for competitive programs to the field and shall provide those allocations to the Committees no later than 180 days after enactment. It is unacceptable for the Service to submit a budget request that lacks regional allocation tables; future budget justifications shall include this basic information.

Longleaf pine restoration.—The Forest Service is urged to continue the longleaf pine restoration initiative through various appropriations accounts, and to lead a submission of a multi-agency, Federal cross-cutting funding table on this work in the next budget request.

FOREST AND RANGELAND RESEARCH

The bill provides \$314,254,000 for Forest and Rangeland Research, which includes \$66,939,000 for the Forest Inventory and Analysis program, and increases above the request of \$4,500,000 for global climate change research, \$400,000 for the USFS Center for Bottomlands hardwood research in Mississippi, and \$500,000 for the durability housing coalition, Mississippi State University. The Service shall maintain the aspen free air CO₂ enrichment experiment as fully operational. The Service should also accelerate efforts of the Pine Genome Initiative, and collaborate with other interested USDA agencies and the National Science Foundation and the Department of Energy.

The Appropriations Committees are aware that the Service has proposed a reorganization of the Pacific Southwest Research Station, which will impact regional programs in California, Hawaii and the Pacific Islands. The Service is directed to ensure that this reorganization maintains and strengthens the Institute of Pacific Islands Forestry (IPIF) and fully supports the resources necessary for IPIF to carry out its mission of tropical forestry and conservation research.

STATE AND PRIVATE FORESTRY

The bill provides \$323,142,000 for State and Private Forestry. Funding within Federal lands forest health management includes \$1,034,000 for buffelgrass mitigation in Arizona and \$1,000,000 for work around the Cherokee NF and Great Smoky Mountains NP, TN and NC. Cooperative forest health management funding includes \$2,000,000 to continue pest and disease revolving fund activities as in fiscal year 2010. Within forest stewardship, \$138,000 is designated for land grant forestry equipment, NM. Urban and community forestry funding includes \$1,000,000 to continue the Seattle-Tacoma regional urban forestry initiative and there is an increase of \$2,000,000 above the request for the National competitive urban area grants. The economic action program funding includes: \$1,000,000 to the USFS Region 5 to continue the infrastructure assistance grants for small forest products businesses in California; \$1,000,000 for the Washington Investment Board for economic development activities in Oregon and Washington State, as authorized by P.L. 99-663; \$500,000 to the State of Vermont to continue the forest products development grants and technical assistance; and a \$500,000 increase above the request for the Wood Education and Resource Center in Princeton, WV, for technical assistance and business development activities, for a total of \$1,460,000.

The Forest Service should lead collaborative work on emerald ash borer with the various Federal agencies and use existing authorities to highlight tree replanting activities that maximize employment and reforestation within areas devastated by this pest. Urban forestry funding and technical assistance should be provided to assist Northeastern Area States, especially Minnesota, Wisconsin, Ohio, Illinois and Michigan, in replacing trees and monitoring the spread of emerald ash borer. The Administration and the USDA is directed to use existing emergency authorities to release USDA funds to assist impacted communities to respond to the emerald ash borer emergency just as they have during previous pest and agricultural emergencies.

Forest Legacy.—The bill provides \$89,785,000 for the forest legacy program, of which \$2,500,000 is derived from prior-year unobligated funds. This includes \$6,400,000 for program administration and does not include

the request for “New State Start-Ups”. The funds are to be distributed as follows:

State	Project Description	Amount
AR	Maumelle Water Excellence	\$4,000,000
CA	Chalk Mountain Area	2,000,000
CO	Ben Delatour Scout Ranch	4,000,000
CT	Scantic River Headwaters Project	2,230,000
DE	Chesapeake Headwaters ...	2,250,000
FL	Thomas Creek ..	3,500,000
FSM	Yela Forest Watershed	530,000
GA	Ocmulgee WMA Expansion	4,000,000
IA	Upper Iowa River Watershed	1,500,000
ID	North Idaho Timberland Communities	3,850,000
IN	Discover Woods	850,000
KY	Big Rivers Corridor	3,250,000
MA	Brushy Mountain	5,000,000
ME	West Grand Lake Community Forest ...	6,675,000
MI	Crisp Point	5,000,000
MT	Clearwater	4,000,000
NC	Campbell Creek Watershed	1,375,000
NH	Androscoggin Headwaters ...	4,100,000
NM	Vallecitos High Country	1,925,000
NY	Follensby Pond	2,350,000
PA	Little Bushkill Headwaters Forest Reserve	2,500,000
SD	Blood Run	2,600,000
TN	North Cumberland Conservation Area	4,000,000
TX	Longleaf Ridge Conservation Area	1,600,000
UT	Green Canyon ..	2,000,000
VT	Northern Green Mountains Linkage	3,300,000
WA	Mt. St. Helens Forest	2,000,000
WI	Chippewa Flowage Forest	3,000,000
	Subtotal, Forest Legacy projects	83,385,000
	Administration Use of Prior Year Funds ...	6,400,000
	Total, Forest Legacy	2,500,000
		\$87,285,000

NATIONAL FOREST SYSTEM

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$1,618,743,000 for the National Forest System. The bill does not provide funding for the integrated resource restoration program as was requested; instead, funding has been provided through the traditional budget structure for forest products, vegetation and watershed management and wildlife and fish habitat management programs. The Service is expected to retain numerical program performance targets, consistent with current programs, and include these targets in the operating plan submitted to the Congress.

The bill includes \$25,000,000 for a new, competitive priority watersheds initiative to fund watershed restoration projects on national forests. These projects should treat landscapes that are at least 10,000 acres, fund restoration needs that are developed and prioritized through a collaborative process, and demonstrably create and maintain forest product or restoration-related jobs. Performance targets shall also be tracked and provided to the Appropriations Committees for these selected projects. The Service may also

select a pilot region in which other integrated resource restoration policy changes could be tested using the traditional budget structure. To provide additional flexibility, the Service may move up to 5% of that pilot region's forest products, vegetation and watershed, wildlife and fisheries and hazardous fuels funding to do restoration projects without being subject to reprogramming limitation. Pilot efforts may also build on the collaborative forest landscape restoration fund and priority watershed and job stabilization activities and should, if appropriate, include legacy road and trail remediation projects in the same watersheds. If an integrated management initiative is offered again, it should integrate hazardous fuels funding, road maintenance and decommissioning, and national forest system vegetation, watershed and habitat enhancement activities.

The Forest Service is directed to provide the report directed in the fiscal year 2010 Appropriations Act within 30 days of enactment of this Act, which outlines the process the Service will use by region to ensure compliance with travel management regulatory requirements, including those set forth in CFR 212.5 and 212.55.

Inventory and monitoring funding includes \$1,000,000 for the Southern Center for Natural Resource Inventory, Monitoring and Evaluation at Mississippi State University to collaborate with Federal and State agencies on new technologies for gathering information on timber inventory, carbon sequestration and threatened and endangered species. Within the funds provided for vegetation and watershed management, cooperative leafy spurge eradication activities on the Dakota Prairie Grasslands and marijuana site remediation activities shall continue at no less than the fiscal year 2010 enacted level. The Service is expected to continue timber pipeline funding for the Tongass National Forest, AK, at no less than the enacted level. The Service is expected to fund operations at the Land Between the Lakes National Recreation Area, KY and TN, at no less than the enacted level.

The Service is directed to use the increase above the enacted level for law enforcement to expand marijuana eradication operations on national forest lands. Priority for these funds shall be given to defraying support and aviation costs associated with interagency drug operations and expanding cooperative agreements with local law enforcement agencies.

The Forest Service should initiate a planning process for a renewable energy development program to identify specific areas appropriate for renewable energy development and select development proposals. To ensure consistency, the Service should harmonize its renewable energy development policies with those adopted by the Bureau of Land Management, where appropriate.

CAPITAL IMPROVEMENT AND MAINTENANCE

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$544,547,000 for Capital Improvement and Maintenance, offset by a \$13,000,000 scoring credit related to the Roads and Trails fund as in prior years. Facilities maintenance includes an increase of \$205,000 for the Blanchard Springs visitor center, AR and facilities construction includes an increase of \$1,000,000 for phase I of the Green Mountain NF headquarters, VT. Road construction funding includes \$1,500,000 for Tongass NF, AK and \$880,000 for Monongahela NF, WV improvements within the amounts provided. Trails maintenance funding includes \$700,000 for rehabilitation of

trails and roads affected by the Station Fire, CA. The road construction funding provides the engineering support required for all Forest Service programs.

The bill provides authority for the legacy road and trail remediation program. The Service shall use legacy road and trail remediation funding in a strategic effort to de-commission and fix roads and trails in environmentally sensitive areas and focus on those areas where Forest Service roads are contributing to water quality problems in streams and water bodies which support threatened, endangered or sensitive species. The legacy road and trail remediation program is a key part of integrated forest restoration activities. The Service should utilize public input to help select legacy road and trail projects, report back to the Appropriations Committees on the selected projects, and display the selection process, implementation activities, and anticipated benefits (including habitat, water quality and jobs created) on the agency's web site. The Service should accelerate planning of the minimum road system needed on each forest, and focus maintenance on environmentally sensitive areas and areas of substantial use. The legacy road and trail remediation program should integrate watershed, habitat and transportation planning needs and complement other Service activities needed to help restore sensitive watersheds.

The Forest Service is encouraged to support the maintenance and upkeep of existing recreational airstrips through cooperation with interested groups; the Service should consider constructing additional airstrips, where appropriate, to increase access to remote Federal lands.

LAND ACQUISITION

The bill provides \$73,489,000 for land acquisition, to be distributed as follows:

State	Project	Amount
AK	Tongass National Forest—Cube Cove	\$3,500,000

The Sharkey Restoration Research Site, Delta NF.—The Secretaries of the Interior and Agriculture are directed to study and report back to the Committees on Appropriations within 180 days of enactment, on potential exchange proposals for approximately 1,700 acres currently managed by the U.S. Fish and Wildlife Service in Sharkey County, Mississippi and generally depicted on a map titled “The Sharkey Restoration Research Site, Delta NF” for lands of equal or approximate value managed by the U.S. Forest Service in Mississippi.

WILDLAND FIRE MANAGEMENT

(INCLUDING TRANSFERS AND RECISSION OF FUNDS)

The bill provides \$2,127,922,000 for Forest Service Wildland Fire Management, which is partially offset by a rescission of \$155,000,000 in unobligated balances from previous appropriations. The bill accepts the proposal to move \$333,000,000 into preparedness, which in prior years was funded within suppression. The bill also provides within this appropriation \$595,000,000 in new budget authority for wildland fire suppression; there is an additional \$291,000,000 for the FLAME Wildfire Suppression Reserve Fund in that appropriation account. These amounts for suppression, when added to substantial fire suppression balances carried over from fiscal year 2010, provide significantly more funding than has been needed by the Service in any previous year.

The Forest Service shall maintain preparedness resources at no less than the fiscal year 2010 enacted level and, if necessary, adjust preparedness and suppression allocations accordingly to fully fund those activities. The Secretary of Agriculture shall notify the Committees on Appropriations in writing prior to making such a funding shift. This flexibility shall also be utilized if the Secretary determines that an adjustment is necessary to address emergent preparedness needs such as aviation contracts or retention initiatives as detailed below.

The Service has not yet fully addressed firefighting challenges in high-cost, high-risk areas such as Region 5; the Service shall

provide a status report within 30 days of enactment of this Act regarding efforts to update and expand a special firefighting pay rate for the region, including associated costs.

The Forest Service is currently reviewing policies related to nighttime aerial firefighting operations and a decision may soon be made about whether to acquire the capability and resources to fly rotary and fixed-wing aircraft at night. The Service is directed to provide a report detailing proposed policy and program changes, along with associated costs, related to night flying within 30 days of enactment of this Act. Night flying activities may be funded within the fire suppression appropriation if necessary.

The Appropriations Committees remain concerned that the Forest Service still does not have a plan to replace its aging fleet of air tankers and the Committees expect the Service to develop a concrete plan to start fielding replacement aircraft by the fiscal year 2012 fire season. The Forest Service should, in conjunction with the Department of the Interior, collaborate with the Department of Defense to develop a report governing planning for an effective aviation resource base to support wildland fire management programs of the future. A close partnership among the Air Force, the Air National Guard, and the wildland fire management agencies is an essential element to provide for safe and effective fire fighting capacity needed to protect communities and natural resources in a most efficient manner.

The increase provided above the requested level for hazardous fuels reduction shall be targeted to areas in the wildland-urban interface that face a high risk of catastrophic wildfire due to population density and fuel loading. The bill provides no less than the requested level of \$26,200,000 to fund Quincy Library Group (QLG), CA, activities in fiscal year 2011. The Forest Service shall treat 33,000 acres in fiscal year 2011 through mechanical thinning, including approximately 20,000 acres within the Plumas National Forest. If the Service anticipates that it may not achieve these targets, it shall promptly inform the Committees on Appropriations and provide a strategy to make up as much acreage as soon as possible within the QLG area.

The bill provides a total of \$5,000,000 within the State fire assistance activity to the South Tahoe Public Utility District to continue the community fire protection project for the Lake Tahoe Basin. The bill also supports the State fire assistance program request that \$5,000,000 is designated for Fire Safe Councils in California for fire risk reduction activities. The Forest Service and Department of the Interior should work together to develop consistent application and award procedures for grants to the California Fire Safe Councils.

The Forest Service and the Interior Department must use independent panels to examine every individual wildfire incident which results in suppression expenses greater than \$10,000,000 and report these evaluations promptly to the Congress and on agency websites.

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

(INCLUDING TRANSFERS OF FUNDS)

The bill includes administrative provisions similar to previous years. In addition, language has been included limiting the amounts of funds available for internal administrative assessments known as cost pools.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

INDIAN HEALTH SERVICE INDIAN HEALTH SERVICES

The bill provides \$3,961,187,000 for Indian Health Services. The bill contains the following changes and directions:

Clinical Services.—Within the funds provided for clinical services, a reduction of \$100,000 to the Alcohol and Substance Abuse program provides \$205,670,000 for that activity. The Mental Health activity is provided \$77,176,000, an increase of \$100,000 above the budget request, which the Indian Health Service (IHS) is directed to use to develop a comprehensive strategic plan for the reform and improvement of mental health services throughout Indian Country. IHS is directed to provide the completed plan to the House and Senate Committees on Appropriations by July 31, 2011.

Electronic Dental Record.—IHS is directed to use a portion of its health information technology funds to expedite deployment of the electronic dental record (EDR) system. Within 90 days of enactment of this Act, IHS is directed to provide a detailed schedule for implementation of EDR within the current funding level.

Indian Health Care Improvement Fund.—IHS is directed to give priority in distributing the Indian Health Care Improvement Fund to those units currently operating with less than 45 percent of their estimated need before it allocates any additional funds to units with more than 45 percent of their need currently funded.

Indian Health Professions.—In agreement with the budget request, the Recruitment and Retention of American Indians into Nursing program, the Indians into Psychology program, and the Indians into Medicine program are to be supported at no less than their current funding levels.

IHS Recruitment and Retention.—Within 90 days of enactment of this Act, IHS should provide a report to the House and Senate Committees on Appropriations that evaluates its current efforts to address the critical shortage of trained health care professionals throughout Indian Country and recommends new strategies for tackling this longstanding problem. Issues of low pay, a cumbersome federal hiring process, and inadequate housing are just a few of the items that should be considered as a part of the report.

INDIAN HEALTH FACILITIES

The bill provides \$445,242,000 for the Indian Health Facilities account. Within 90 days of enactment of this Act, IHS is directed to provide a detailed report to the House and Senate Committees on Appropriations that examines the causes for the high unobligated balances in this account and includes recommendations for using these balances in a more timely manner. In future budget requests, IHS is encouraged to build on successful programs, such as joint venture and small ambulatory grants, and work with tribes to explore other innovative funding alternatives that could be made available to address the backlog of construction projects throughout Indian Country.

AGENCY FOR TOXIC SUBSTANCES AND DISEASE REGISTRY

TOXIC SUBSTANCES AND ENVIRONMENTAL PUBLIC HEALTH

The Appropriations Committees direct ATSDR to report the results of its indirect

cost methodology study as soon as the final report is available. Until a new formula is determined, the Committees expect the administrative charges will be no greater than the amount charged in fiscal year 2010.

OTHER RELATED AGENCIES CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

SALARIES AND EXPENSES

The bill provides \$13,147,000 for the Chemical Safety and Hazard Investigation Board (the Board). Within this amount, the bill provides \$2,000,000 to investigate and provide a thorough report on the root causes of the BP-Transocean Deepwater Horizon disaster. The Board shall use the funds to hire subject matter experts and additional inspectors to term employments in order to build expertise related to offshore drilling practices, and should issue interim reports as appropriate that would serve to articulate findings that may have led to the catastrophic failure of the blowout preventer on April 20, 2010.

SMITHSONIAN INSTITUTION

SALARIES AND EXPENSES

The bill provides a total of \$797,600,000 for all Smithsonian Institution accounts, of which \$660,850,000 is provided for salaries and expenses. The Smithsonian is directed to use \$250,000 from within that amount to continue activities under the Civil Rights History Project Act of 2009 in cooperation with the Library of Congress.

JOHN F. KENNEDY CENTER FOR THE PERFORMING ARTS

OPERATIONS AND MAINTENANCE

The bill provides \$23,500,000 for the Operations and Maintenance of the Kennedy Center. Bill language has been included to amend P.L. 111-88 to make \$500,000 of that appropriation available for the general purposes of this account until September 30, 2011.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

NATIONAL ENDOWMENT FOR THE ARTS GRANTS AND ADMINISTRATION

The bill provides \$170,000,000 for the National Endowment for the Arts (NEA). Within this amount the Committees direct that the Big Read be funded at no less than \$3,000,000. As has been the case in prior years, Sections 309 and 311 of Public Law 108-447, as amended, are incorporated by reference into this bill. These provisions provide the grant guidelines and program priorities under which NEA is directed to operate, including a requirement to place priority on reaching underserved populations, including urban minorities, and a prohibition on direct grants to individual artists.

NATIONAL ENDOWMENT FOR THE HUMANITIES

GRANTS AND ADMINISTRATION

The bill provides \$170,000,000 for the National Endowment for the Humanities (NEH). The NEH is encouraged to include Native American communities in the Bridging Cultures initiative and work with tribes in the preservation of Native American languages. The NEH should provide a report to the Committees that examines the feasibility of developing a collaborative student/faculty grant program within existing funds, and provides a plan for its implementation.

NATIONAL CAPITAL ARTS AND CULTURAL AFFAIRS

Title IV General Provisions includes a section which increases the annual authorization to \$12,000,000.

TITLE IV GENERAL PROVISIONS

(INCLUDING TRANSFERS OF FUNDS)

Longstanding general provisions are continued unless otherwise noted and several new items are noted:

Section 417 continues, for one more year only, language limiting the ability of the Secretary of Agriculture to increase certain Forest Service recreation residence fees.

Section 418 continues a provision from the fiscal year 2010 Act, with slight modifications, requiring the President to report on climate change expenditures by agency.

Section 419 amends the authorization for the National Capital Arts and Cultural Affairs program by increasing the annual authorization to \$12,000,000.

Section 422 authorizes, within the Environmental Protection Agency, the San Francisco Bay restoration grant program.

Section 424 continues bill language concerning border security and environmental mitigation accountability. Within 180 days of enactment of this Act, the GAO is directed to examine whether and what type of conflicts arise among the Department of the Interior, the U.S. Forest Service, and the Department of Homeland Security while enforcing established laws on the border.

Section 425 clarifies previous "incorporation by reference" language contained in the fiscal year 2009 and 2010 Interior, Environment, and Related Agencies Appropriations Acts.

Section 426 rescinds \$160,000,000 in previously appropriated emergency wildland fire suppression funds from the Department of the Interior, Wildland Fire Management account.

Section 427 rescinds \$140,000,000 in previously appropriated emergency wildland fire suppression funds from the Department of Agriculture, Forest Service, Wildland Fire Management account.

TITLE V—SACRAMENTO—SAN JOAQUIN DELTA NATIONAL HERITAGE AREA

Title V of this division authorizes the Sacramento-San Joaquin Delta National Heritage Area in California.

TITLE VI—NATIONAL WOMEN'S HISTORY MUSEUM ACT

Title VI of this division authorizes the Administrator of the General Services Administration to convey a parcel of real property in the District of Columbia to provide for the establishment of the National Women's History Museum. The General Services Administration is directed to include in its agreement for conveyance of the property to the Museum a provision that the Museum will submit siting and building plans to the National Capital Planning Commission for review and approval.

TITLE VII—MONTANA FORESTS

Title VII authorizes certain forest management activities and designations on national forests in Montana.
